IIFL FINANCE LIMITED

IIFL Finance Limited (the "Company" or "Issuer") was incorporated at Mumbai on October 18, 1995 as a private limited company with the name Probity Research & Services Private Limited under the provisions of the Companies Act, 1956. The status of our Company was changed to a public limited company and our name was changed to Probity Research & Services Limited pursuant to a fresh certificate of incorporation dated on April 28, 2000 issued by the Registrar of Companies, Maharashtra, Mumbai. The name of our Company was subsequently changed to India Infoline.Com Limited, and a fresh certificate of incorporation, consequent upon change of name was issued by the Registrar of Companies, Maharashtra, Mumbai on May 23, 2000. The name of our Company was further changed to India Infoline Limited, and a fresh certificate of incorporation, consequent upon change of name was issued by the Registrar of Companies, Maharashtra, Mumbai on March 23, 2001. Thereafter, the name of our Company was changed to IIFL Holdings Limited, and a fresh certificate of incorporation, consequent upon change of name was issued by Registrar of Companies, Maharashtra, Mumbai on February 18, 2014. Thereafter, the name of our Company was changed to IIFL Finance Limited and a fresh certificate of incorporation, consequent upon change of name was issued by Registrar of Companies, Maharashtra, Mumbai on May 24, 2019. Also, our Company has obtained a Certificate of Registration dated March 06, 2020 bearing Registration No. N-13.02386 issued by the Reserve Bank of India ("RBI") to commence the business of a non-banking financial institution without accepting public deposits under Section 45 IA of the RBI Act, 1934. Our Company is a Non-Banking Finance Company- Middle Layer ("NBFC-ML"). For details of the changes in name of our Company, see "General Information" beginning on page 61.

OUR PROMOTERS

Our promoters: (i) Mr. Nirmal Bhanwarlal Jain; Email: csteam@iifl.com; Tel: +91 22 6788 1000 and (ii) Mr. R Venkataraman; Email: csteam@iifl.com; Tel: +91 22 6788 1000. For further details see "Our Promoters" on page 252 GENERAL RISKS

Investment in non-convertible securities is risky, and investors should not invest any funds in such securities unless they can afford to take the risk attached to such investments. Investors are advised to take an informed decision and to read the risk factors carefully before investing in this offering. For taking an investment decision, investors must rely on their own examination of the Issue, and the Issue, including the risks involved in it. Specific attention of the Investors is invited to the chapters "Risk Factors" and "Material Developments" on pages 23 and 270, respectively, before making an investment in such Issue. These risks are not, and are not intended to be, a complete list of all risks and considerations relevant to the non-convertible securities or investor's decision to purchase such securities This Shelf Prospectus has not been and will not be approved by any regulatory authority in India, including the Securities and Exchange Board of India ("SEBI"), the Reserve Bank of India ("RBI"), any registrar of companies or any Stock Exchanges in India nor do they guarantee the accuracy or adequacy of this document.

COUPON RATE, COUPON PAYMENT FREQUENCY, REDEMPTION DATE, REDEMPTION AMOUNT & ELIGIBLE INVESTORS

For details relating to Coupon Rate, Coupon Payment Frequency, Redemption Date, Redemption Amount & Eligible Investors of the NCDs, see "Issue Related Information" on page 467

CREDIT RATING

The NCDs proposed to be issued under the Issue have been rated "Crisil AA/Stable (pronounced as Crisil double A rating with Stable outlook)" for an amount of ₹ 3,500 crore by Crisil vide their rating rationale dated September 30, 2024 and February 11, 2025 read with rating letter dated September 30, 2024 and revalidation letter dated October 25, 2024, rating letter dated February 12, 2025 and revalidation letter dated March 10, 2025 and "[ICRA] AA (Stable)" for an amount of ₹ 5,000 crore by ICRA vide their rating rationale dated September 25, 2024 read with rating letter dated September 24, 2024 and revalidation letters dated October 29, 2024 and March 05, 2025. Securities with this rating are considered to have high degree of safety regarding timely servicing of financial obligations. Such securities carry very low credit risk. Ratings given by Crisil and ICRA are valid as on the date of this Shelf Prospectus and shall remain valid on date of issue and allotment of NCDs and the listing of the NCDs on Stock Exchanges unless withdrawn. In case of any change in credit ratings till the listing of NCDs, our Company will inform the investors through public notices/advertisements in all those newspapers or electronic modes such as online newspapers or website of the issuer or the stock exchanges in which pre issue advertisement has been given. The rating is not a recommendation to buy, sell or hold the rated instrument and investors should take their own decisions. The rating may be subject to revision or withdrawal at any time by the assigning rating agency and each rating should be evaluated independently of any other rating. The rating agencies have a right to suspend or withdraw the rating at any time on the basis of factors such as new information. For the rating letter, rationale and press release for these ratings, see "Annexure A" of this Shelf Prospectus. There are no unaccepted ratings and any other ratings other than as specified in this Shelf Prospectus.

LISTING

The NCDs offered through this Shelf Prospectus and relevant Tranche Prospectus(es) are proposed to be listed on National Stock Exchange of India Limited and BSE Limited ("NSE" and "BSE" or "Stock Exchange"). ISSUE PROGRAMME***

ISSUE OPENS ON: AS SPECIFIED IN THE RELEVANT TRANCHE PROSPECTUS(ES) ISSUE CLOSES ON: AS SPECIFIED IN THE RELEVANT TRANCHE PROSPECTUS(ES)

* IIFL Capital Services Limited (formerly known as IIFL Securities Limited) is deemed to be an associate of the Issuer as per the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992, as amended (Merchant Bankers Regulations). Further, in compliance with the provisions of Regulation 21A and explanation to Regulation 21A of the Merchant Bankers Regulations, IIFL Capital Services Limited (formerly known as IIFL Securities Limited) would be involved only in marketing of the Issue and as per Regulation 25 (3) of SEBI NCS Regulations shall not issue a due diligence certificate.

** Vardhman Trusteeship Private Limited under regulation 8 of SEBI NCS Regulations has by its letter dated October 23, 2024 given its consent for its appointment as Debenture Trustee to the Issue and for its name to be included in the Draft Shelf Prospectus, this Shelf Prospectus, and relevant Tranche Prospectus(es) and in all the subsequent periodical communications to be sent to the holders of the NCDs issued pursuant to the Issue.

*** The Issue shall remain open for subscription on Working Days from 10:00 a.m. to 5:00 p.m. (Indian Standard Time) during the period as indicated in the relevant Tranche Prospectus(es). Our Company may, in consultation with the Lead Managers, consider closing the relevant Tranche Issue on such earlier date or extended date (subject to a minimum period of two working days and a maximum period of ten working days from the date of opening of the relevant tranche issue and subject to not exceeding thirty days from filing relevant tranche prospectus(es) with ROC including any extensions), as may be decided by the Board of Directors of our Company or Finance Committee thereof, subject to relevant approvals, in accordance with Regulation 33A of the SEBI NCS Regulations. In the event of an early closure or extension of the relevant Tranche Issue, our Company shall ensure that notice of the same is provided to the prospective investors through an advertisement in all the newspapers or electronic modes such as online newspapers or website of the issuer or the stock exchanges in which pre-issue advertisement for opening of the relevant Tranche Issue has been given on or before such earlier or initial date of Issue closure. On the Issue Closing Date, the Application Forms will be accepted only between 10:00 a.m. and 3:00 p.m. (Indian Standard Time) and uploaded until 5:00 p.m. (Indian Standard Time) or such extended time as may be permitted by the Stock Exchanges. Further, pending mandate requests for bids placed on the last day of bidding will be validated by 5:00 p.m. (Indian Standard Time) on one Working Day post the Issue Closing Date. For further details please refer to the section titled "General Information" on page 61.

A copy of this Shelf Prospectus and relevant Tranche Prospectus(es) shall be filed with the Registrar of Companies, Maharashtra at Mumbai in terms of Section 26 and Section 31 of Companies Act, 2013, along with the endorsed/certified

copies of all requisite documents. For further details, please see "Material Contracts and Documents for Inspection" on page 538.

CERTAIN CONVENTIONS, USE OF FINANCIAL, INDUSTRY AND MARKET DATA AND CURRENCY OF PRESENTATION

Certain Conventions

In this Shelf Prospectus, unless otherwise specified or the context otherwise indicates or implies the terms, all references to "we", "us", "our" are to IIFL Finance Limited, and references to "you", "offeree", "purchaser", "subscriber", "recipient", "investors" and "potential investor" are to the prospective investors in this Issue. Unless stated otherwise, all references to page numbers in this Shelf Prospectus are to the page numbers of this Shelf Prospectus.

All references in this Shelf Prospectus to "India" are to the Republic of India and its territories and possessions. All references to the "Government", "Central Government" or "State Government" are to Government of India, Central or State, as applicable.

Unless otherwise specified, any time mentioned in this Shelf Prospectus is in Indian Standard Time.

Presentation of Financial Information

The financial year of our Company commences on April 1 and ends on March 31 of the next year, so all references to particular "financial year", "fiscal year" and "fiscal" or "FY", unless stated otherwise, are to the 12 months period ended on March 31 of that year. Unless the context requires otherwise, all references to a year in this Shelf Prospectus are to a calendar year ended on December 31 and all references to a financial year in this Shelf Prospectus are to a financial year or fiscal ended on March 31 of that particular calendar year.

The basis of presentation of the Audited Financial Information is as follows:

- 1. The Audited Standalone Financial Statements for Fiscal 2024 and Audited Consolidated Financial Statements for Fiscal 2024, each as at and for the year ended March 31, 2024, have been prepared in accordance with the Ind AS, as specified under Section 133 of the Companies Act, 2013, the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time. The Audited Standalone Financial Statements for Fiscal 2024 and Audited Consolidated Financial Statements for Fiscal 2024, each as at and for the year ended March 31, 2024, have been audited by our Erstwhile Joint Statutory Auditors, Sharp & Tannan Associates, Chartered Accountants and Chhajed & Doshi, Chartered Accountants.
- 2. The Audited Standalone Financial Statements for Fiscal 2023 and Audited Consolidated Financial Statements for Fiscal 2023, each as at and for the year ended March 31, 2023 have been prepared in accordance with the Ind AS, as specified under Section 133 of the Companies Act, 2013, the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time. The Audited Standalone Financial Statements for Fiscal 2023 and Audited Consolidated Financial Statements for Fiscal 2023, each as at and for the year ended March 31, 2023, have been audited by Erstwhile Joint Statutory Auditors Chhajed & Doshi, Chartered Accountants and V Sankar Aiyar & Co. Chartered Accountants.
- 3. The Audited Standalone Financial Statements for Fiscal 2022 and Audited Consolidated Financial Statements for Fiscal 2022, each as at and for the year ended March 31, 2022 have been prepared in accordance with the Ind AS, as specified under Section 133 of the Companies Act, 2013, the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time. The Audited Standalone Financial Statements for Fiscal 2022 and Audited Consolidated Financial Statements for Fiscal 2022, each as at and for the year ended March 31, 2022, have been audited by Erstwhile Joint Statutory Auditors, Chhajed & Doshi, Chartered Accountants and V Sankar Aiyar & Co. Chartered Accountants.
- 4. The H1 2025 Unaudited Standalone Financial Results and H1 2025 Unaudited Consolidated Financial Results have been prepared in accordance with the principles laid down in Indian Accounting Standard (Ind AS) 34 "Interim Financial Reporting" specified under Section 133 of the Companies Act, 2013, as amended, read with the relevant rules issued thereunder and other accounting principles generally accepted in India. These H1 2025 Unaudited Standalone Financial Results and H1 2025 Unaudited Consolidated Financial Results have been reviewed by Current Joint Statutory Auditors i.e. Sharp & Tannan Associates, Chartered Accountants and G.M. Kapadia & Co. Chartered Accountants. The H1 2025 Unaudited Standalone Financial Results and H1 2025 Unaudited Consolidated Financial Results are not indicative of full year results and are not comparable with Audited Financial Statements.

5. The Q3 2025 Unaudited Standalone Financial Results and Q3 2025 Unaudited Consolidated Financial Results have been prepared in accordance with the principles laid down in Indian Accounting Standard (Ind AS) 34 "Interim Financial Reporting" specified under Section 133 of the Companies Act, 2013, as amended, read with the relevant rules issued thereunder and other accounting principles generally accepted in India. These Q3 2025 Unaudited Standalone Financial Results and Q3 2025 Unaudited Consolidated Financial Results have been reviewed by Current Joint Statutory Auditors i.e. Sharp & Tannan Associates, Chartered Accountants and G.M. Kapadia & Co. Chartered Accountants. The Q3 2025 Unaudited Standalone Financial Results and Q3 2025 Unaudited Consolidated Financial Results are not indicative of full year results and are not comparable with Audited Financial Statements.

The Audited Financial Statements and the auditor reports, the H1 2025 Unaudited Financial Results and the review reports and the Q3 2025 Unaudited Financial Results and the review reports are included in this Shelf Prospectus. For further details, please refer to the section titled "Financial Statements" on page 269.

Unless stated otherwise or unless the context requires otherwise, the financial data as at and for the year ended March 31, 2024, March 31, 2023 and March 31, 2022 used in this Shelf Prospectus is derived from the Audited Financial Statements, for the quarter and six months period ended September 30, 2024 is derived from our H1 2025 Unaudited Financial Results and for the quarter and nine months ended December 31, 2024 is derived from our Q3 2025 Unaudited Financial Results. Accordingly, the degree to which the Audited Financial Statements, Q3 2025 Unaudited Financial Results and H1 2025 Unaudited Financial Results in this Shelf Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Shelf Prospectus should accordingly be limited.

Unless stated otherwise and unless the context requires otherwise, the financial data used in this Shelf Prospectus is on a consolidated basis.

Unless stated otherwise, macroeconomic and industry data used throughout this Shelf Prospectus has been obtained from publications prepared by providers of industry information, government sources and multilateral institutions. Such publications generally state that the information contained therein has been obtained from sources believed to be reliable but that their accuracy and completeness are not guaranteed and their reliability cannot be assured. Although the Issuer believes that industry data used in this Shelf Prospectus is reliable, it has not been independently verified. Further, the extent to which the market and industry data presented in this Shelf Prospectus is meaningful depends on the readers' familiarity with and understanding of methodologies used in compiling such data.

Non-GAAP Financial Measures

Certain non-GAAP financial measures and certain other statistical information relating to our operations and financial performance and other industry metrics have been included in this section and elsewhere in this document. These non-GAAP measures are supplemental measure of our performance and liquidity that is not required by, or presented in accordance with, Ind AS, Indian GAAP, IFRS or US GAAP. We compute and disclose such non-GAAP financial measures and such other statistical information relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance, and because such measures are frequently used by securities analysts, investors and others to evaluate the operational performance of financial services businesses. Many financial services businesses provide such non-GAAP financial measures and other statistical and operational information when reporting their financial results. Such non-GAAP measures are not measures of operating performance or liquidity defined by generally accepted accounting principles and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the years/ period or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, Indian GAAP, IFRS or US GAAP.

In addition, these non-GAAP measures are not standardised terms, hence a direct comparison of these Non-GAAP Measures between companies may not be possible. Other companies may calculate these Non-GAAP Measures differently from us, limiting its usefulness as a comparative measure. These non-GAAP financial measures and other statistical and other information relating to our operations and financial performance may not be computed on the basis of any standard methodology that is applicable across the industry. Therefore, such non-GAAP measures may not be comparable to financial measures and statistical information of similar nomenclature that may be computed and presented by other banks in India or elsewhere.

Currency and Unit of Presentation

In this Shelf Prospectus, all references to 'Rupees'/'₹'/'INR'/ 'Rs.' are to Indian Rupees, the official currency of the Republic of India. Except where stated otherwise in this Shelf Prospectus, all figures have been expressed in 'in crore'. All references to 'million/million/mn.' refer to one million, which is equivalent to 'ten lakh' or 'ten lacs', the word 'lakh/lacs/lac' means 'one hundred thousand' and 'crore' means 'ten million' and 'billion/bn./billions' means 'one hundred crore'.

Certain figures contained in this Shelf Prospectus, including financial information, have been subject to rounding adjustments. Unless set out otherwise, all figures in decimals, including percentage figures, have been rounded off to two decimal points. In certain instances, (i) the sum or percentage change of such numbers may not conform exactly to the total figure given; and (ii) the sum of the numbers in a column or row in certain tables may not conform exactly to the total figure given for that column or row. Further, any figures sourced from third party industry sources may be rounded off to other than one decimal point to conform to their respective sources.

Industry and Market Data

Unless stated otherwise or unless otherwise requires, industry and market data used throughout this Shelf Prospectus has been obtained from the industry report titled "NBFC Report February 2025" ("Industry report on NBFCs") prepared and issued by Crisil Intelligence and various industry publications and sources. Industry publications generally state that the information contained in such publications has been obtained from publicly available documents from various sources believed to be reliable but accuracy, completeness and underlying assumptions of such third-party sources are not guaranteed. Although the industry and market data used in this Shelf Prospectus is reliable, the data used in these sources may have been re-classified by us for the purposes of presentation however, no material data in connection with the Issue has been omitted. Data from these sources may also not be comparable.

The extent to which the market and industry data used in this Shelf Prospectus is meaningful depends on the reader's familiarity with and understanding of the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which business of our Company is conducted, and methodologies and assumptions may vary widely among different industry sources. Certain information and statistics in relation to the industry in which we operate, which has been included in this Shelf Prospectus has been extracted from an industry report titled "NBFC Report February 2025", prepared and issued by Crisil Intelligence. Please see "Industry Overview" on page 237 for further details.

General Risk

Investment in NCDs is risky, and investors should not invest any funds in NCDs unless they can afford to take the risk attached to such investments. Investors are advised to take an informed decision and to read the risk factors carefully before investing in this offering. For taking an investment decision, investors must rely on their examination of the issue including the risks involved in it.

Specific attention of investors is invited to statement of risk factors contained under section "*Risk Factors*" on page 23. These risks are not, and are not intended to be, a complete list of all risks and considerations relevant to the NCDs or Investor's decision to purchase such securities.

Exchange Rates

The exchange rates for INR ($\stackrel{?}{\stackrel{?}{?}}$) vis-à-vis of USD, as at December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022, are provided below:

Currency*	December 31, 2024	September 30, 2024	March 31, 2024	March 31, 2023	March 31, 2022
1 USD	85.62	83.79	83.37	82.22	75.80

^{*}Source: https://www.fbil.org.in/#/home and https://www.rbi.org.in/scripts/ReferenceRateArchive.aspx

The above exchange rates are for the purpose of information only and may not represent the rates used by the Company for purpose of preparation or presentation of its financial statements. The rates presented are not a guarantee that any person could have on the relevant date converted any amounts at such rates or at all.

In case March 31/December 31/September 30 of any of the respective years/ period is a public holiday, the previous working day not being a public holiday has been considered.

FORWARD LOOKING STATEMENTS

Certain statements contained in this Shelf Prospectus that are not statements of historical fact constitute "forward-looking statements". Investors can generally identify forward-looking statements by terminology such as "aim", "anticipate", "believe", "continue", "could", "estimate", "expect", "intend", "may", "objective", "plan", "potential", "project", "pursue", "shall", "seek", "should", "will", "would", or other words or phrases of similar import. Similarly, statements that describe our strategies, objectives, plans or goals are also forward-looking statements. All statements regarding our expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, revenue and profitability, new business and other matters discussed in this Shelf Prospectus that are not historical facts. All forward-looking statements are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. Important factors that could cause actual results, including our financial conditions and results of operations to differ from our expectations include, but are not limited to, the following:

- We are subject to periodic inspections by the RBI. Any deficiencies highlighted by RBI are required to be rectified
 and we may be subject to penal action in the event of failure to comply with RBI directions. Any such penal action
 could adversely impact our overall brand, profitability and results of operations. We are subject to supervision and
 regulation by the RBI as a NBFC-ML, and changes in RBI's regulations governing us could adversely affect our
 business.
- We may not be able to realise the full value of our pledged gold, and inaccurate appraisal of the pledged gold jewellery by our personnel may adversely affect our business and exposes us to potential loss.
- Our Company, Directors, Promoters and our Subsidiaries are involved in certain legal and regulatory proceedings and any adverse outcome in these or other proceedings may adversely affect our future financial performance, business and our operations.
- Our Company's inability to recover the amounts due from customers to whom it has provided secured and unsecured
 loans in a timely manner, or at all, and its full collateral and its customers' failure to comply with applicable statutory
 or regulatory requirements in relation to such loans could adversely affect our Company's operations and
 profitability.
- High levels of customer defaults and the resultant non-performing assets could adversely affect our Company's business, financial condition, results of operations and future financial performance.
- Our financial performances are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance.
- We may not be able to successfully sustain our growth plans.
- Our business requires substantial capital, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.
- Our inability to obtain or maintain statutory or regulatory approvals and licenses for conducting our business.

For further discussion of factors that could cause our actual results to differ, see "Risk Factors" on page 23.

All forward-looking statements are subject to risks, uncertainties and assumptions about our Company that could cause actual results and valuations to differ materially from those contemplated by the relevant statement. Additional factors that could cause actual results, performance or achievements to differ materially include, but are not limited to, those discussed under the sections titled "Industry Overview", "Our Business" and "Legal and Other Information" on pages 137, 175 and 339, respectively. The forward-looking statements contained in this Shelf Prospectus are based on the beliefs of management, as well as the assumptions made by and information currently available to management. Although our Company believes that the expectations reflected in such forward-looking statements are reasonable at this time, it cannot assure investors that such expectations will prove to be correct or will hold good at all times. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements. If any of these risks and uncertainties materialise, or if any of our Company's underlying assumptions prove to be incorrect, our Company's actual results of operations or financial condition could differ materially from that described herein as anticipated, believed, estimated or expected. All subsequent forward-looking statements attributable to our Company are expressly qualified in their entirety by reference to these cautionary statements.

Neither our Company, its Directors, its KMPs, SMPs and officers, or the Lead Managers, nor any of their respective affiliates or associates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with SEBI NCS Regulations, our Company and the Lead Managers will ensure that investors in India are informed of material developments until the time of the grant of listing and trading permission by the Stock Exchanges.

By their nature, certain market risk disclosures are only estimate(s) and could be materially different from what actually occurs in the future. As a result, actual future gains or losses could materially differ from those that have been estimated. Neither our Company, nor the Lead Managers or its respective Directors and officers, nor any of its respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with SEBI NCS Regulations, our Company and the Lead Managers will ensure that investors are informed of material developments between the date of filing this Shelf Prospectus and the relevant Tranche Prospectus(es) with ROC and the date of receipt of listing and trading permission from the Stock Exchanges for the NCDs issued pursuant to relevant Tranche Issue.

SECTION II - RISK FACTORS

An investment in NCDs involves a certain degree of risk. You should carefully consider all the information contained in this Shelf Prospectus, including the chapters "Our Business" and "Financial Statements" on pages 175 and 269, respectively, before making an investment decision. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the NCDs. Additional risks and uncertainties, which are currently unknown or now deemed immaterial, if materialises, may in the future have a material adverse effect on our business, financial condition and results of operations and cash flows. The market prices of the NCDs could decline due to such risks and you may lose all or part of your investment.

If any one of the following stated risks or other risks that are not currently known or are now deemed immaterial actually occurs, the Company's business, financial conditions and results of operations and cash flows could suffer and, therefore, the trading price of the Company's NCDs could decline and/or the Company's ability to meet its obligations in respect of the NCDs could be affected and you may lose all or part of your interest and/or redemption amounts. More than one risk factor may have simultaneous affect with regard to the NCDs such that the effect of a particular risk factor may not be predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No prediction can be made as to the effect that any combination of risk factors may have on the value of the NCDs and/or the Company's ability to meet its obligations in respect of the NCDs.

The financial and other related implications of the risks described in this section, have been disclosed to the extent quantifiable as on the date of this Shelf Prospectus. This Shelf Prospectus also contains forward-looking statements that involve risks and uncertainties. Our results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including events described below and elsewhere in this Shelf Prospectus.

This Shelf Prospectus contains forward looking statements that involve risk and uncertainties. Our Company's actual results could differ materially from those anticipated in these forward-looking statements as a result of several factors, including the considerations described below and elsewhere in this Shelf Prospectus. Certain information in this section includes extracts from – industry report titled "NBFC Report February 2025" prepared and issued by Crisil Intelligence. Neither our Company, the Lead Managers, the Debenture Trustee, nor any other person connected with the Issue has independently verified such industry and third-party information. For more information, please see "Industry Overview" on page 137.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section.

Unless otherwise stated or unless context requires otherwise, the financial information used in this section is derived from and should be read in conjunction with the Audited Financial Statements and the Unaudited Financial Information as included in this Shelf Prospectus. Unless stated otherwise, financial information used in this section is on a standalone basis. For further details on the financial information used in this section, please refer to "Presentation of Financial Information" under chapter "Certain Conventions, Use of Financial, Industry and Market Data and Currency of Presentation." on page 18.

In this section any reference to "Company", "we" or "us" or "Our" refers to IIFL group.

INTERNAL RISK FACTORS

We are subject to periodic inspections by the RBI. Any deficiencies highlighted by RBI are required to be rectified
and we may be subject to penal action in the event of failure to comply with RBI directions. Any such penal action
could adversely impact our overall brand, profitability and results of operations.

As a NBFC-ML, we are subject to annual inspection by the RBI in terms of the Master Directions and under Section 45N of the Reserve Bank of India Act, 1934. As part of its inspection, RBI inspects our books of accounts and other records to verify the correctness or completeness of any statement, information or particulars furnished to the RBI, or for the purpose of obtaining any statements, information or particulars which our Company has failed to furnish on being called upon to do so. RBI issues reports to our Company highlighting areas of concern or matters which may require further

improvements to our operations. Further, such regulatory authorities also seek certain clarifications and share their findings in the ordinary course of business. We respond to observations made by such authorities and address them appropriately. However, in the event we are unable to resolve such deficiencies to the satisfaction of the RBI, we may be restricted in our ability to conduct our business as we currently do. For example, in respect of RBI inspection with reference to financials position as on March 31, 2023 ("Inspection Report"), we have received certain observations from RBI inter alia including in respect of high staff attrition rates, complaint management system incapable of storing information with no systems in place for categorizing complaints, deficiency in anti-money laundering ("AML") monitoring mechanism for filing of suspicious transaction reporting ("STR") and anomalies in Company's agreement with digital lending platforms. The Company has taken various positives steps to comply with RBI observations. The customer redressal mechanism system has been enhanced and updated as per RBI requirements. The Company has enhanced its STR parameters and reviewed its all active agreements with digital lending platforms and has designed a vendor assessment framework and review mechanism to ensure better controls.

Further in the Inspection Report RBI observed certain material supervisory concerns in respect to the gold loan portfolio of our Company, including serious deviations in assaying and certifying purity and net weight of the gold at the time of sanction of loans and at the time of auction upon default; breaches in loan-to-value ratio; significant disbursal and collection of loan amount in cash far in excess of the statutory limit; non-adherence to the standard auction process; and lack of transparency in charges being levied to customer accounts, etc. Pursuant to press release and order dated March 4, 2024, RBI had directed our Company to cease and desist, with immediate effect, from sanctioning or disbursing gold loans or assigning/ securitising/ selling any of our gold loans. Our Company, however, was permitted to continue service our existing gold loan portfolio through usual collection and recovery processes. RBI, by way of its subsequent letter dated September 19, 2024, has lifted the restrictions imposed on our gold loan business and that we are allowed to offer gold loans.

The AUM of the Company was severely impacted by the embargo on the gold loan business. Our AUM for March 31, 2024 was ₹ 78,959.88 crore, which was reduced to ₹ 71,410.19 crore as on December 31, 2024. Our gold loan business contributed 21.07% of our consolidated AUM for December 31, 2024. While our Company is working towards resuming the normal operations since the upliftment of the embargo, we cannot assure you that we would not be subject to further regulatory action or penalties on account any deficiencies.

Further, RBI has in the Inspection Report identified other deficiencies, in our operations such as deficiencies in risk management system, risk culture and implementation of fair practice code, non-adherence to the extant RBI guidelines with respect to reporting to credit information companies ("CICs"). We have implemented system controls to prevent LTV breaches. Further, we have updated our Interest Rate Model, as per the fair practices code, which includes granting discretionary power to product-level business heads to determine interest rates for various loan products. With respect to reporting of NPA cases to CICs, we will be reporting data on a monthly basis. Further, the loan management and originating system has been modified to ensure compliance with the Income Tax Act, 1961. Further, the Company has digitized the suspicious transaction monitoring mechanism using a third-party platform, covering parameters such as high-value cash and non-cash transactions and sudden high-value transactions by customers daily and monthly.

While we seek to comply with all regulatory provisions applicable to us, in the event we are unable to comply with the observations made by the regulatory authorities, we could be subject to penalties and restrictions which may have an adverse effect on our business, results of operations, financial condition and reputation. Further, we cannot assure you that these authorities will not find any deficiencies in future inspections or otherwise/ the authorities will not make similar or other observations in the future.

2. We are subject to supervision and regulation by the RBI as a NBFC-ML, and changes in RBI's regulations governing us could adversely affect our business.

Being an NBFC, the operations of our Company are subject to various regulations prescribed by the RBI and other statutory authorities including regulations relating to foreign investment in India. Our Company has a certificate of registration from the RBI to operate as a Non-Banking Financial Company and is regulated by the RBI. Accordingly, legal and regulatory risks are inherent and substantial in our business. As we operate under licenses and registrations obtained from the applicable regulators, we are subject to actions that may be taken by such regulators in the event of any non-compliance with any applicable policies, guidelines, circulars, notifications and regulations issued by the relevant regulators.

As per the Master Directions-Reserve Bank of India (Non-Banking Financial Company-Scale Based Regulation)

Directions, 2023 dated October 19, 2023, NBFCs are required to consider a loan as non-performing asset if it is overdue for more than 90 days than the earlier norm of 180 days overdue for loans. Our Company is required to maintain a CAR of 15% besides complying with other prudential norms, directions and the requirements under the revised regulatory framework. Further, RBI had by way of circular dated June 24, 2021 capped the dividend pay-out ratios for NBFCs and has laid out minimum prudential guidelines for NBFCs to be eligible for declaring and paying out dividends. Restrictions as laid out by RBI may restrict our Company to pay out dividend to its shareholders. Compliance with many of the regulations applicable to our Company across jurisdictions including any restrictions on investments and other activities currently being carried out by our Company involve a number of risks, particularly in areas where applicable regulations may be subject to varying interpretations. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and the business of our Company could be adversely affected. Further, the RBI may amend regulations/ guidelines applicable to NBFCs in future which may require us to restructure our activities, incur additional cost or could otherwise adversely affect our business and our financial performance.

While, RBI has not provided for any restriction on interest rates that can be charged by NBFC-ML, there can be no assurance that the RBI and/or the Government will not implement regulations or policies, including policies or regulations or legal interpretations of existing regulations, relating to or affecting interest rates, taxation, inflation or exchange controls, or otherwise take action, that could have an adverse effect on non-deposit taking NBFCs. In addition, there can be no assurance that any changes in the laws and regulations relative to the Indian financial services industry will not adversely impact our business. We work in a regulated environment and we cannot predict any restrictions that may be placed by the regulator with respect to interest that is to be charged to our customers in future. There can be no assurance that any changes in the laws and regulations relative to the Indian financial services industry will not adversely impact our business.

3. We may not be able to realise the full value of our pledged gold, and inaccurate appraisal of the pledged gold jewellery by our personnel may adversely affect our business and exposes us to potential loss.

In case of loan against gold, we may not be able to realise the full value of our pledged gold, due to, among other things, defects in the quality of gold. We cannot assure you that we will be able to auction such pledged gold jewellery at prices sufficient to cover the amounts under default. Moreover, there may be delays associated with the auction process. Any failure to recover the expected value of pledged gold could expose us to a potential loss. Any such losses could adversely affect our financial condition, cash flows and results of operations.

The accurate appraisal of pledged gold jewellery is a significant factor in the successful operation of our business and such appraisal requires a skilled and reliable workforce. Inaccurate appraisal of gold by our workforce may result in gold being overvalued and pledged for a loan that is higher in value than the gold's actual value, which could adversely affect our reputation and business.

Further, we are subject to the risk that our gold appraisers may engage in fraud regarding their estimation of the value of pledged gold. Any such inaccuracies or fraud in relation to our appraisal of gold may adversely affect our reputation, business and financial condition.

4. Our Company, Directors, Promoters and our Subsidiaries are involved in certain legal and regulatory proceedings and any adverse outcome in these or other proceedings may adversely affect our future financial performance, business and our operations.

Our Company, our Directors, our Promoters and our Subsidiaries, are involved, from time to time, in legal and regulatory proceedings that are incidental to our operations and these involve proceedings filed by and against us. These include criminal and civil proceedings, including arbitration cases, consumer proceedings, tax investigations and cases filed by us under the Negotiable Instruments Act, 1881 and Insolvency and Bankruptcy Code, 2016 and other regulatory and statutory proceedings and notices. These proceedings are pending at different levels of adjudication before various courts, fora, authorities, tribunals and appellate tribunals. A summary of outstanding legal proceedings involving our Company, our Promoters, our Directors and our Subsidiaries as on the date of this Shelf Prospectus is set forth in the table below:

Name	Criminal	Tax	Statutory or	Disciplinary	Material Civil	Aggregate
	Proceedings	Proceedings	Regulatory	actions by the	Litigations	amount

^{*}We have not included amounts in relation to matters which have no financial implication on us.

A notice dated December 2, 2020 was issued under Rule 4 of (Procedure for Holding Inquiry And Imposing Penalties By Adjudicating Officer) Rules, 1995 was issued) against the Promoters & Promoter Group ("Promoters") to show cause against alleged violation of provisions of Regulation 3(1) read with Regulation 13(1) and 13(2)(a) of SAST Regulation. The Promoters responded with a reply dated December 19, 2020 contending that there was no such violation since Regulation 3(1) would be attracted if there is an entitlement to exercise voting rights of 25% or more and if the entitlement to exercise voting rights does not touch 25%, the charging provisions would not be attracted. Therefore, when an acquirer acquires, or even for that matter, "agrees to acquire", the underlying contractual obligation or the intention of the impending contract ought to be the acquisition of an entitlement to voting rights of 25% or more. In the instant case, there was no intention or agreement to acquire an entitlement to voting rights of 25% or more. A computational error led to the instruction to the broker for purchase of shares. No sooner than the error was discovered, it was ensured that threshold to exercise voting rights of 25% or more never came about, by timely selling of existing shares. Therefore, the entitlement to exercise voting rights in the hands of the promoter group never reached threshold of 25% or more. It remained 24.99 % as was always the actual intent of the Promoters. At no point of time, either during a day or at the close of the register of beneficial ownership of shares on any day, did the Promoters ever cross the threshold of 25% and hence there was no question of Regulation 3(1) read with Regulation 13(1) and / or Regulation 13(2) being violated. Inspite of the above representation, an adjudication order dated March 28, 2022 was passed by SEBI against the Promoters imposing a penalty of ₹ 10,00,000. The Promoters vide its letter dated May 09, 2022 respectfully disagreed with the findings and imposition of the said penalty, however the Promoters paid the said penalty with a view to moving forward constructively and putting this matter behind.

Further, SEBI has by way of a letter dated June 7, 2022 directed us to provide certain specific information and documents with respect to suspected insider trading activities, including (amongst others) (a) chronology of events in relation to declaration of financial results for the period ended December 31, 2020 on January 29, 2021; (b) details of all persons who were involved in the process of/ having access to unpublished price sensitive information vis-a-vis the aforesaid financial results; (c) all relevant documentary evidence with respect to communications with members of board of directors for the period August 31, 2020 to May 3, 2021; (d) details of all on market and off market trades undertaken by the directors, promoters, key managerial personnel, compliance officer of our Company and their family members during the period August 31, 2020 to May 3, 2021; (e) relationship of Company and/or any of its Promoters/ Directors/ employees or any other person with the entities as mentioned in the letter issued by SEBI, etc. Each of these requests were responded by our Company to SEBI in July 2022. We have and we will respond to any further queries from SEBI.

Further, a first information report dated September 30, 2013 ("Complaint") was lodged by Pankaj Saraf, an investor in National Spot Exchange Limited ("NSEL"), at the MRA Marg Police Station, Mumbai against NSEL and other brokers, including IIFL Commodities Limited, alleging *inter alia*, criminal conspiracy, fraud and criminal breach of trust, under Sections 406, 420 and 120B of the Indian Penal Code, 1860. Basis the complaint, the Economics Offences Wing,

Mumbai, lodged a first information report against the Accused ("FIR"). In this matter, EOW has filed its final chargesheet on December 2, 2022. Post this, NSEL and Arvind Bahl, IICL client moved an application to implead Mr. Nirmal Jain as an accused. MPID Court vide its Order allowed the application and issued the summons. Against, the said order, Mr. Nirmal Jain preferred an appeal before High Court, Mumbai, the stay is granted by the Hon'ble HC against the said order. The matter is pending for hearing.

There can be no assurance that these disputes will not be determined against our Company, our Subsidiaries, our Directors or our Promoters or that our Company, our Subsidiaries, our Directors or our Promoters will not be required to pay all or a portion of the disputed amounts or that it will be able to recover amounts for which our Company and our Subsidiaries have filed recovery proceedings and also there can be no assurance that similar proceedings will not be initiated against our Company in the future. Further, there could be a material and adverse impact on our reputation, business and results of operations. In addition, even if our Company our Subsidiaries are successful in defending such cases, they will be subject to legal and other costs to defend such litigation, and such costs may be substantial, which may impact our cash flows.

For further details in relation to legal proceedings, please see "Outstanding Litigations and Defaults" on page 339.

5. Our Company's inability to recover the amounts due from customers to whom it has provided secured and unsecured loans in a timely manner, or at all, and its full collateral and its customers' failure to comply with applicable statutory or regulatory requirements in relation to such loans could adversely affect our Company's operations and profitability.

Our Company's Loan Book, on a consolidated basis as on December 31, 2024, is ₹ 49,702.16 crore which includes secured loans constituting 71.92% and unsecured loans constituting 28.08% of our Company's Loan Book and as on March 31, 2024, is ₹ 50,833.49 crore, which includes secured loans constituting 69.80% and unsecured loans constituting 30.20% of our Company's Loan Book. Further on a consolidated basis our GNPA was 2.42%, our NNPA was 1.01% and our overall PCR was 113.84% as on December 31, 2024. For further details please refer to the section titled "Business-Key Operational and Financial Parameters" on page 178. Substantial portion of our Company's Loan Book is secure in nature and the value of collateral that we collect is dependent on various factors, including (i) prevailing market conditions, (ii) the general economic and political conditions in India, (iii) growth real estate sector in India and the areas in which our Company operates, (iv) any change in statutory and/or regulatory requirements; and (v) fluctuation in gold prices. We maintain loan-to-value on the basis of the products being offered and product specific LTVs vary from case to case. In the event our borrowers default on the repayment of loans, we may not be able to realize the full value of the collateral due to various reasons, including a possible decline in the realizable value of the collateral, defective title as security, prolonged legal proceedings, unavailability of a ready market and fraudulent actions by borrowers, or we may not be able to foreclose on collateral at all. Further, certain kinds of loans that are advanced by us are not secured by any assets. In India, foreclosure on collateral may be subject to delays and administrative requirements that may result, or be accompanied by, a decrease in the value of the collateral. Foreclosure on collateral generally requires a written petition to an Indian court or tribunal, any proceedings brought may be subject to delays and administrative requirements that may result in, or be accompanied by, a decrease in the value of the collateral.

A decline in the value of the security could impair our ability to realize the secured assets upon any foreclosure, which may require us to increase our provision for loan losses. In the event of a default with respect to any of these loans, the amounts we receive upon sale of the secured assets may be insufficient to recover the outstanding principal and interest on the loan. If we are required to re-value the assets securing a loan to satisfy the debt during a period of reduced asset values or to increase our allowance for loan losses, our profitability could be adversely affected, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

In respect to unsecured portion of our Company's Loan Book which accounts to 28.08% on a consolidated basis as on December 31, 2024, in the event of defaults by the customers, our Company's ability to realise the amounts due to it from the loans would be restricted to initiating legal proceedings for recovery as our Company will not have the benefit of enforcing any security interest. There can be no guarantee as to the length of time it could take to conclude such legal proceedings or for the legal proceedings to result in a favourable decision for our Company.

6. High levels of customer defaults and the resultant non-performing assets could adversely affect our Company's business, financial condition, results of operations and future financial performance.

Our Company's business involves lending money and accordingly, our Company is subject to risks of customer default which includes default or delays in repayment of principal and/or interest on the loans our Company provides to its customers. Customers may default on their obligations as a result of various factors, including certain external factors which may not be within our Company's control such as developments in the Indian economy and the real estate market, movements in global markets, changes in interest rates and changes in regulations. Customers could also be adversely affected by factors such as, bankruptcy, lack of liquidity, lack of business and operational failure. If customers fail to repay loans in a timely manner or at all, our Company's financial condition and results of operations will be adversely impacted. To the extent our Company is not able to successfully manage the risks associated with lending to these customers, it may become difficult for our Company to make recoveries on these loans. In addition, our Company may experience higher delinquency rates due to prolonged adverse economic conditions or a sharp increase in interest rates. An increase in delinquency rates could result in a reduction in our Company's total interest income (i.e., our Company's accrued interest income from loans, including any interest income from credit substitutes) and as a result, lower revenue from its operations, while increasing costs as a result of the increased expenses required to service and collect delinquent loans, and make loan loss provisions as per applicable laws. Our Company may also be required to make additional provisions in respect of loans to such customers in accordance with applicable regulations and, in certain cases, may be required to write-off such loans. For further details please refer to the section "Business - Key Operational and Financial Parameters" on page 178.

7. Our financial performances are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance.

For the nine months ended December 31, 2024 and for the Fiscals 2024, 2023 and 2022, our revenue from operations on a consolidated basis was ₹ 7,619.65 crore and ₹ 10,249.43 crore, ₹ 8,258.85 crore and ₹ 6,836.37 crore, respectively, whereas our total comprehensive income post minority was ₹ 169.25 crore and ₹1,747.77 crore, ₹ 1,534.01 crore and ₹ 1,197.11 crore, respectively.

Our Company's financial performance is substantially dependent upon the level of its net interest margins. As at December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022 on a consolidated basis, our Loan Book stood at ₹ 49,702.16 crore, ₹ 50,833.49 crore, ₹ 40,101.87 crore, and ₹ 34,066.58 crore, respectively and our assets under management were ₹ 71,410.19 crore and ₹ 78,959.88 crore, ₹64,637.64 crore, and ₹ 51,209.79 crore, respectively.

As a result of certain reserve requirements of the Reserve Bank of India applicable to non-banking financial companies, we are structurally exposed to interest rate risk than other corporates. If the yield on our interest-earning assets does not increase at the same time or to the same extent as our cost of funds, or if our cost of funds does not decline at the same time or to the same extent as the decrease in yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted. Further, any tightening of liquidity and volatility in markets may limit our access to capital markets and result in an increase in our cost of funding. Continued volatility in international markets could also constrain and increase the cost of our borrowings and our ability to replace maturing borrowings and fund new assets.

Furthermore, we are also exposed to interest rate risks as a result of lending to customers at floating interest rates, which comprise of 53.77% of our consolidated AUM as on December 31, 2024, and in amounts and for periods which may differ from our funding sources. While we seek to match our interest rate positions to minimise interest rate risk, we are unable to assure you that significant variation in interest rates will not have an effect on our results of operations. Moreover, volatility in interest rates is sensitive to factors which are beyond our control, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation and other such considerations. In a rising interest rate environment, if the yield on our interest-earning assets does not increase simultaneously with or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline simultaneously or to the same extent as the yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted and the same would adversely affect our business and results of operations.

8. We may not be able to successfully sustain our growth plans.

In recent years, we have experienced steady growth. Our growth plan includes growing our secured and unsecured lending and expanding our retail customer base through strategic business alliances and marketing initiatives, expanding and diversifying our loan product portfolio, growing our operations and network across the country and expanding our customer base across various business verticals in India. However, there can be no assurance that we will be able to sustain our growth plan successfully or that we will be able to expand further or diversify our product portfolio. If we grow our Loan Book too rapidly or fail to make proper assessments of credit risks associated with new borrowers, a higher percentage of our loans may become non-performing, which would have a negative impact on the quality of our assets and our financial condition. Our gold loan business contributed 21.07% of our consolidated AUM for December 31, 2024. Our consolidated AUM for March 31, 2024 was ₹ 78,959.88 crore, which was reduced to ₹ 71,410.19 crore as on December 31, 2024. The AUM of the Company was impacted by the embargo on the gold loan business; while our Company is working towards resuming the normal operations since the upliftment of the embargo, we cannot assure you that we would not be subject to further regulatory action or penalties on account any deficiencies. Any adverse regulatory action arising from contravention of regulatory requirements may also adversely impact the IIFL Finance brand and hence, our overall business operations.

We also face a number of operational risks in executing our growth strategy. Our Company has experienced growth in our mortgage loans and microfinance loans; our branch network has expanded significantly as part of our growth strategy. Our rapid growth exposes us to a wide range of increased risks, including business and operational risks, such as the possibility of growth of NPAs, fraud risks and regulatory and legal risks.

Our ability to sustain our rate of growth also significantly depends upon our ability to recruit trained and efficient personnel and retain key managerial personnel, maintain effective risk management policies, continuing to offer products which are relevant to our target base of clients, developing managerial experience to address emerging challenges and ensuring a high standard of client service. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train our employees properly may result in an increase in employee attrition rates, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us.

Further, a principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses, as well as the development of our business streams viz. mortgage loans, construction and real estate finance, small & medium enterprise loans, capital market finance, microfinance and home loans. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

9. Our business requires substantial capital, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.

Our Company's liquidity and ongoing profitability are, to a large extent, dependent upon its timely access to, and the costs associated with, raising capital. Our funding requirements historically have been met from various sources, including shareholder funding, term loans, working capital limits from banks, issuance of commercial papers and non-convertible debentures, cash credit facilities from banks and inter-corporate deposits. Thus, our Company's business growth, liquidity and profitability depends and will continue to depend on its ability to access diversified, relatively stable and low-cost funding sources as well as our Company's financial performance, capital adequacy levels, credit ratings and relationships with lenders. Any adverse developments or changes in applicable laws and regulations which limit our Company's ability to raise funds through issuance of non-convertible debentures can disrupt its sources of funding and as a consequence, could have a material adverse effect on our Company's liquidity and financial condition.

Further, the RBI vide its Master Circular no. DOR.CRE.REC.No.07/21.04.172/2023-24 on Bank Finance to Non-Banking Financial Companies dated April 3, 2023, as amended ("Master Circular – Bank Finance to NBFC") relating to financing of NBFCs by banks has prescribed that the exposure of a bank to single NBFC which is predominantly engaged in lending against collateral of gold jewellery (i.e. such loans comprising 50 % or more of their financial assets), shall not exceed 7.5 % of the bank's capital funds (Tier I plus Tier II Capital). However, this exposure ceiling may go up

by 5 %, i.e., up to 12.5 % of banks' capital funds if the additional exposure is on account of funds on-lent by such NBFCs to the infrastructure sector.

The Master Circular – Bank Finance to NBFC also imposed certain restrictions regarding investments made by banks in securities / instruments issued by NBFCs as follows:

- (i) Banks cannot invest in zero coupon bonds issued by NBFCs unless the issuer NBFC builds up sinking fund for all accrued interest and keeps it invested in liquid investments/securities (government bonds); and
- (ii) Banks are permitted to invest in Non-Convertible Debentures ("NCDs") issued by NBFCs with original or initial maturity for up to a year NBFCs. However, while investing in such instrument's banks should be guided by the extant prudential guidelines in force, ensure that the issuer has disclosed the purpose for which the NCDs are being issued in the disclosure document and such purposes are eligible for bank finance in terms of the Master Circular Bank Finance to NBFC.

Additionally, pursuant to RBI notification DOR.STR.REC.57/21.06.001/2023-24 dated November 16, 2023, it was decided to increase the risk weights on exposure of scheduled commercial banks on credit facilities provided to NBFCs by 25% points (over and above the risk weight associated with the given external rating) in all cases where the extant risk weight as per external rating of NBFCs is below 100%. Thereafter, on February 25, 2025, the RBI, has issued a circular, whereby, it has decided to restore the risk weights applicable to such exposures as per the external rating, as specified in Paragraph 5.8.1 of the 'Master Circular – Basel III Capital Regulations' dated April 1, 2024, as amended from time to time. This circular shall come into effect from April 01, 2025.

These circulars could affect our business and any similar notifications released by the RBI in the future, which has a similar impact on our business could affect our growth, margins and business operations. Our Company's ability to borrow funds and refinance existing debt may also be affected by a variety of factors, including liquidity in the markets, the strength of the lenders from which our Company borrows, the amount of eligible collateral and accounting changes that may impact calculations of covenants in our Company's financing agreements. An event of default, a significant negative ratings action by a rating agency, an adverse action by a regulatory authority or a general deterioration in prevailing economic conditions that constricts the availability of credit may increase our Company's cost of funds and make it difficult for our Company to access financing in a cost-effective manner. A disruption in sources of funds or increase in cost of funds as a result of any of these factors may have a material adverse effect on our Company's liquidity and financial condition

10. We have had negative cash flows in the past including negative cash flows from operating activities in Fiscal 2024 and Fiscal 2023 and negative cash flows from investing activities in H1 2025, Fiscals 2024, 2023 and 2022, and negative cashflows from financing activities for half year ended September 30th, 2024 and it is possible that we may experience negative cash flows in the future which could adversely affect our cash flow requirements, our ability to operate our business and implement our growth plans, thereby affecting our financial performance.

We have had negative cash flows in the past including negative cash flows from operating activities in Fiscal 2024 and Fiscal 2023 and negative cash flows from investing activities in H1 2025, Fiscals 2024, 2023 and 2022, and negative cashflows from financing activities for half year ended September 30, 2024.

The table below sets forth selected information from our statements of cash flows in H1 2025 and Fiscal 2024, Fiscal 2023 and Fiscal 2022:

(in ₹ crore, unless otherwise stated)

Particulars	H1 2025	Fiscal 2024	Fiscal 2023	Fiscal 2022
Net cash (used in) / generated from operating activities	5,635.89	(5,848.00)	(4,940.56)	1,783.73
Net cash (used in)/ generated from investing activities	(332.28)	(1,356.37)	(2,730.45)	(995.79)
Net cash (used in)/ generated from financing activities	(5,848.12)	6,042.11	5,090.04	2,780.80

For further details, see "Financial Information" on page 269. We cannot assure you that we will not experience negative cash flows in the future. If we continue to experience such negative cash outflows in the future, this could adversely affect our business prospects, financial condition, and results of operations.

11. Our contingent liabilities could adversely affect our financial condition.

As per the consolidated financial statements of our Company for the Fiscal 2024, we had certain contingent liabilities not provided for, amounting to ₹ 693.46 crore as of March 31, 2024. The contingent liability amounts disclosed in our Financial Statements represent estimates and assumptions of our management based on advice received. If, for any reason, these contingent liabilities materialize, it may adversely affect our financial condition. For more details regarding the contingent liabilities please see the "Financial Information" on page 269.

12. Our growth will depend on our continued ability to access funds at competitive rates which are dependent on a number of factors including our ability to maintain our credit ratings.

As we are a "non-deposit accepting" NBFC-ML and do not have access to deposits, our liquidity and ongoing profitability are primarily dependent upon our timely access to, and the costs associated with raising capital. Our business is significantly dependent on funding from the debt capital markets and commercial borrowings. The demand for such funds is competitive and our ability to obtain funds at competitive rates will depend on various factors including our ability to maintain positive credit ratings. Ratings reflect a rating agency's opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. In relation to our long-term debt instruments, we have long term ratings of 'AA/Stable' from Crisil, 'IND AA/Stable' from India Rating, 'AA; Stable' from ICRA. Further Brickwork Ratings has given our Company a rating of 'BWR AA+/ Stable' for our non-convertible debentures. In relation to our short-term debt instruments, we currently have a short-term rating of A1+ from Crisil and ICRA respectively.

Fitch Ratings has put our Company's long-term issuer default rating (IDR) and global medium-term note programme at 'B+' with stable outlook. S&P Global ratings has put our Company's long-term issuer default rating (IDR) and global medium-term note programme a rating of B+ / Stable.

Any downgrade of our credit ratings might increase borrowing costs and constrain our access to capital and debt markets and, as a result, would negatively affect our net interest margin and our business. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any additional financing or refinancing arrangements in the future. Any such adverse development could adversely affect our business, financial condition and results of operations.

Our business depends and will continue to depend on our ability to access diversified funding sources. Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. While our borrowing costs have been competitive in the past due to our ability to raise debt products, credit rating and our asset portfolio, in the event we are unable to access funds at an effective cost that is comparable to or lower than our competitors, we may not be able to offer competitive interest rates for our loans. This may adversely impact our business and results of operations.

13. Insurance of relevant assets obtained by our borrowers may not be adequate to protect them against all potential losses, which could indirectly affect our ability to recover our loans to such borrowers. Further, our insurance coverage may not adequately protect us against losses.

Pursuant to our loan agreements, where loans are extended on the basis of a charge on assets, our borrowers are required to create a charge on their assets in our favour in the form of hypothecation or mortgage, or both. In addition, the terms and conditions of the loan agreements require our borrowers to maintain insurance against damage caused by any disasters including floods, fires and earthquakes or theft on the assets charged, primarily as collateral against the loan granted by us. However, our borrowers may not have obtained the required insurance coverage, or may not renew the insurance policies, or the amount of insurance coverage may be less than the replacement cost of the relevant assets and therefore insufficient to cover all financial losses that our borrowers may suffer, or at all, resulting in adverse effect on our business and financial condition.

We maintain such insurance coverage that we believe is adequate for our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We cannot, however, assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future

claim.

A successful assertion of one or more large claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of a larger deductible or coinsurance requirement, could adversely affect our business, financial condition and results of operations. These circulars could affect our business and any similar notifications released by the RBI in the future, which has a similar impact on our business could affect our growth, margins and business operations.

14. Our Company's inability to obtain, renew or maintain the statutory and regulatory permits and approvals which are required to operate its existing or future businesses may have a material adverse effect on its business, financial condition and results of operations.

NBFCs in India are subject to regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as an NBFC with the RBI, our Company is also required to comply with certain other regulatory requirements for its business imposed by the RBI. In the future, there could be circumstances where our Company may be required to renew applicable permits and approvals, including its registration as an NBFC-ML and obtain new permits and approvals for its current and any proposed operations or in the event of a change in applicable law and regulations. There can be no assurance that RBI or other relevant authorities will issue any such permits or approvals in the timeframe anticipated by our Company, or at all. Failure by our Company to renew, maintain or obtain the required permits or approvals may result in an interruption of its operations and may have a material adverse effect on its business, financial condition and results of operation. In addition, our branches are required to be registered under the relevant shops and establishments laws of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of these conditions, our certificate of registration may be suspended or cancelled and we shall not be able to carry on such activities.

15. Our erstwhile statutory auditors have highlighted certain emphasis of matter / remark to their audit report relating to our audited financial statements and unaudited financial results, which may affect our future financial results.

There were no modifications i.e., unmodified opinions were given by our current Joint Statutory Auditors in their limited review reports for the Q3 2025 Unaudited Financial Results and by our Erstwhile Statutory Auditors in their audit reports for the Audited Financial Statements. However, certain emphasis of matter ("EOM") / remarks were highlighted by our Erstwhile Joint Statutory Auditors for FY 24 and Erstwhile Joint Statutory Auditors for FY 22 in their audit reports. Following are the details of EOM / remarks in our audit reports:

Period	Emphasis of Matter / Remarks
H1 2025 Unaudited Consolidated Financial Results	In this section, we reproduce hereunder Emphasis of Matter section of our review report of even date issued on the standalone financial results for the quarter and half year ended September 30, 2024, of the Holding Company: We refer to the note 9 that describe lifting of Reserve Bank of India's embargo on the Company to cease and desist from continuing with its gold loan business activities which had resulted in uncertainties over the company's ability to continue its operations as a going concern and the note 10 explaining the rationale for provision of investments in Security Receipts.
H1 2025 Unaudited Standalone Financial Results	We refer to the note 9 that describe lifting of Reserve Bank of India's embargo on the Company to cease and desist from continuing with its gold loan business activities which had resulted in uncertainties over the Company's ability to continue its operations as a going concern and the note 10 explaining the rationale for provision of investments in Security Receipts. Our Conclusion is not modified in respect of these matters.
2024 Audited Consolidated Financial Statements	This section of our report contains and we reproduce hereunder sections of our audit report of even date issued on the standalone financial statements of the Holding Company described under Material Uncertainty Relating to Going Concern and Emphasis of Matter sections, respectively. 1. We draw attention to Note No 48 in the financial statements, which explains that the
	Reserve Bank of India ("RBI") vide its directive dated March 4, 2024 and in exercise of its powers under Section 45l(1)(b) of the Reserve Bank of India, 1934 has directed the Company

to cease and desist, with immediate effect, from sanctioning or disbursing gold loans or assigning / securitizing/ selling any of its gold loans. However, the RBI permitted the company to continue to service its existing gold loan portfolio through usual collection and recovery processes.

The Company has total Loan book of Rs. 17,842 crores and Rs. 14,047 crores as on March 31, 2024, and March 31, 2023 respectively. Out of the above, the Gold Loan stood at Rs. 9,634 crores (54.00%) and Rs. 8,330 crores (59.30%) for each respective financial year.

These events or conditions may cast significant doubt on the Company's ability to continue as a going concern. However, in view of the factors as described in the note no 49 in the financial statements, the management is of the view that the going concern basis of accounting is appropriate.

2. We refer to Note No 49 of the accompanying financial statements that explains the directives issued by The Reserve Bank of India ("RBI") dated March 4, 2024.

The Note explains the supervisory concerns noted by the RBI in respect of restrictions on loan against gold. These supervisory restrictions are under review by RBI post completion of special audit instituted by the RBI.

Our opinion is not modified in respect of this matter.

2024 Audited Standalone Financial Statements

Material Uncertainty related to Going Concern

We draw attention to Note No 42 in the financial statements, which explains that the Reserve Bank of India ("RBI") vide its directive dated March 4, 2024 and in exercise of its powers under Section 45l(1)(b) of the Reserve Bank of India Act, 1934 has directed the Company to cease and desist, with immediate effect, from sanctioning or disbursing gold loans or assigning / securitizing/ selling any of its gold loans. However, the RBI permitted the company to continue to service its existing gold loan portfolio through usual collection and recovery processes.

The Company has total Loan book of Rs. 17,842 crores and Rs. 14,047 crores as on March 31, 2024 and March 31, 2023 respectively. Out of the above, the Gold Loan stood at Rs. 9,634 crores (54.00%) and Rs. 8,330 crores (59.30%) for each respective financial year.

These events or conditions may cast significant doubt on the Company's ability to continue as a going concern. However, in view of the factors as described in the note no 43 in the financial statements, the management is of the view that the going concern basis of accounting is appropriate.

Our opinion is not modified in respect of this matter.

Emphasis of matter

We refer to Note No 42 of the accompanying financial statements that explains the directives issued by The Reserve Bank of India ("RBI") dated March 4, 2024. The Note explains the supervisory concerns noted by the RBI in respect of restrictions on loan against gold. These supervisory restrictions are under review by RBI post completion of special audit instituted by the RBI.

Our Opinion is not modified in respect of this Emphasis of Matter.

2022 Audited Consolidated Financial Statements

Emphasis of Matter

We draw attention to Note 8.3 to the Consolidated Financial Statements, which fully describes that the Company has recognised impairment on financial assets to reflect the business impact and uncertainties arising from the COVID 19 pandemic. Such estimates are based on current facts and circumstances and may not necessarily reflect the future uncertainties and events arising from the full impact of the COVID 19 pandemic.

Our opinion is not modified in respect of this matter.

2022 Audited Standalone Financial Statements

We draw attention to Note 8.3 to the Standalone Financial Statements, which fully describes that the Company has recognised impairment on financial assets to reflect the business impact and uncertainties arising from the COVID 19 pandemic. Such estimates are based on current facts and circumstances and may not necessarily reflect the future uncertainties and events

arising from the full impact of the COVID 19 pandemic.
Our opinion is not modified in respect of this matter.

For further details, in relation to the emphasis of matter, etc. please see "Financial Information" on page 269. There can be no assurance that our statutory auditors will not include further matters of emphasis or other similar comments in the audit reports to our audited financial statements in the future, or that such remarks or matters of emphasis will not affect our financial results in future fiscal periods. Investors should consider the matters of emphasis and remark in evaluating our financial condition, results of operations and cash flows. Any such matter of emphasis or remark in the auditors' report on our financial statements in the future may also adversely affect the trading price of the NCDs.

16. Our Company's business is dependent on relationships established through its branches with its clients. Any events that harm these relationships including closure of branches or the loss of our Company's key personnel or employees may lead to a decline in our Company's revenue and profits. Further, our Company's results of operations could be adversely affected in the event of any disputes with its employees.

Our Company's business is dependent on the key personnel and employees who directly manage client relationships. Our Company encourages dedicated personnel to service specific clients since our Company believes that this leads to long-term client relationships, a trust based business environment and over time, better cross-selling opportunities. While no key personnel or employees contribute a significant percentage of the business, the business may suffer materially if a substantial number of them either becomes ineffective or leaves the organisation. As a result, there may be an adverse effect on our Company's business and profits. While our Company believes that our Company maintains good relationships with its employees, there can be no assurance that our Company will not experience future disruptions to its operations due to disputes or other problems with its work force which may adversely affect our Company's business and results of operations.

17. As on March 31, 2024, our Company's (on a standalone basis) top 20 borrowers represented 7.98% of our total advances. Our inability to maintain relationships with these customers or any payment default by or credit losses of these customers could materially and adversely affect our business, future financial performance and results of operations.

As on March 31, 2024, our Company's top 20 borrowers on a standalone basis accounted for 7.98% of our total advances on a standalone basis. Our business and results of operations will be adversely affected if we are unable to maintain or further develop relationships with such significant customers. There can be no assurance that we will be able to maintain the historic levels of business from such significant customers. Further, in the event we lose any such significant customer, we cannot assure that we will be able to replace them, which could have a material adverse effect on our results of operations. Our business and results of operations depend upon the timely repayment of the interest and principal from our significant customers. We cannot assure you that we will not experience delays in servicing of the loan advanced or that we will be able to recover the interest and the principal amount of the loan. Any such delay or default will adversely affect our income from operations and consequently, our profitability. In case we are unable to recover the full amount of principal and interest or any part of thereof, and the collateral is not sufficient to recover the full amount, our financial condition may be adversely affected.

18. The value of our collateral may decrease or we may experience delays in enforcing our collateral when borrowers default on their obligations to us which may result in failure to recover the expected value of collateral security exposing us to a potential loss.

As on December 31, 2024, 71.92 % of our Company's loans, on a consolidated basis, to its customers is secured by collateral. Changes in asset prices may cause the value of our collateral to decline, and we may not be able to realize the full value of our collateral as a result of delays in bankruptcy and foreclosure proceedings, delays in the creation of security interests, defects or deficiencies in the perfection of collateral (including due to inability to obtain approvals that may be required from various persons, agencies or authorities), fraudulent transfers by borrowers and other factors, including depreciation in the value of the collateral and illiquid market for disposal of and volatility in the market prices for the collateral, current legislative provisions or changes thereto and past or future judicial pronouncements. Foreclosure on collateral consisting of property can be undertaken directly by lenders by fulfilling certain procedures and requirements (unless challenged in courts of law) or otherwise by a written petition to an Indian court or tribunal. An application, when made (or a legal challenge to the foreclosure undertaken directly), may be subject to delays or

administrative requirements that may result in, or be accompanied by, a decrease in the value of collateral. These delays can last for several days and might lead to deterioration in the physical condition or market value of the collateral.

Delays in recovery, bankruptcy and foreclosure proceedings, defects in the title and delays in obtaining regulatory approvals for the enforcement of such collaterals may affect the valuation of the collateral. As a result, our Company may not be able to recover the full value of the collateral for the loans provided by it within the expected timeframe or at all. Further, legal proceedings may have to be initiated by our Company in order to recover overdue payments on loans and as a consequence, the money and time spent on initiating legal proceedings may adversely affect our Company's cash flow.

The value of the security provided by the borrowers to our Company may be subject to a reduction in value on account of various reasons. While our Company's customers may provide alternative security to cover the shortfall, the realisable value of the security for the loans provided by our Company in the event of a liquidation may continue to be lower than the combined amount of the outstanding principal amount, interest and other amounts recoverable from the customers.

Any default in the repayment of the outstanding credit obligations by our Company's customers may expose it to losses. A failure or delay to recover the loan value from sale of collateral security could expose our Company to potential losses. Any such losses could adversely affect our Company's financial condition and results of operations. Furthermore, the process of litigation to enforce our Company's legal rights against defaulting customers in India is generally a slow and potentially expensive process.

Similarly, in case of capital market finance, the value of collateral may be extremely volatile and in default scenario might not yield results same as per book value. A failure to recover the expected value of collateral security could expose us to a potential loss. Any such losses could adversely affect our financial condition and results of operations.

Further, the security for our MSME loans are usually movable assets, making it difficult to locate or seize in the event of any default by our customers. There can also be no assurance that we will be able to sell such collaterals at prices sufficient to cover the amounts under default. In addition, there may be delays associated with seizure and disposal of such collaterals, including litigations and court proceedings which is generally a slow and potentially expensive process in India. A failure or delay to recover the expected value from sale of collateral security could expose us to a potential loss. Any such losses could adversely affect our financial condition and results of operations. Accordingly, it may be difficult for us to recover amounts owed by defaulting customers in a timely manner or at all.

19. Certain of our group companies are involved in regulatory proceedings or have received notices or administrative warning letters from SEBI in the ordinary course of their business. Any adverse orders in such proceedings or pursuant to such notices may result in monetary penalties or administrative warnings or suspension or debarring or cancellations of registrations of the respective entities. While there is no monetary impact on our Company, we may face adverse reputational impact on account of orders or penalties against entities using the IIFL brand.

Certain of our group companies are SEBI registered intermediaries. In the ordinary course of their respective business, these entities have received and may in the future receive notices or administrative warnings from various regulators. Our group companies are also involved in litigation and regulatory proceedings in the ordinary course of their business. For instance, IIFL Capital Services Limited (formerly known as IIFL Securities Limited) and 360 One WAM Limited (formerly IIFL Wealth Management Limited) have in the past three financial years settled the following matters, without admission of guilt in terms of the SEBI Settlement Regulations: (i) in terms of a show cause notice dated April 16, 2021 in the matter of alleged manipulation of the reference price considered for execution of block deals in the shares of Alkem Laboratories Limited during April 1, 2019 to September 30, 2019, IIFL Capital Services Limited (formerly known as IIFL Securities Limited), has opted for a settlement and has paid ₹ 2.22 crore towards settlement fees; (ii) in terms of a show cause notice dated June 16, 2022 in respect of alleged facilitation of fraudulent transactions in illiquid stock options on BSE Limited, IIFL Capital Services Limited (formerly known as IIFL Securities Limited), has opted for a settlement and has paid ₹ 0.01 crore towards settlement fees; and (iii) in terms of a show cause notice dated April 16, 2021, in respect of trades executed as a stock broker towards facilitation of alleged manipulation of price of block deal in the shares of Alkem Laboratories Limited, 360 One WAM Limited (formerly IIFL Wealth Management Limited), has opted for a settlement and has paid ₹ 3.12 crore towards settlement fees. Further, SEBI had initiated two enquiry proceedings dated July 4, 2022 and July 18, 2022 as well as two adjudication proceedings dated October 28, 2021 against IIFL Capital Services Limited (formerly known as IIFL Securities Limited) under the Securities and Exchange Board of India (Intermediaries) Regulations, 2008 pursuant to SEBI's observations from six inspections conducted by SEBI during the period between April 1, 2011 to January 31, 2017. The observation letter issued pursuant to the inspections indicated failure of segregation of own funds from clients' funds, misuse of credit balance of clients' funds for the benefit of the clients having debit balance and improper designation of the client bank account. During the period of three years beginning the date of conclusion of the onsite inspection, three supplementary reports were issued in this matter by SEBI. Consequently, SEBI had passed two adjudication orders dated May 20, 2022 and May 30, 2022, imposing a penalty aggregating to ₹ 2.00 crore on IIFL Capital Services Limited (formerly known as IIFL Securities Limited) and a separate order dated June 19, 2023 was passed in the enquiry proceedings whereby IIFL Capital Services Limited (formerly known as IIFL Securities Limited) was banned on taking up / onboarding any new client for a period of two years in respect of its business as a stockbroker. IIFL Capital Services Limited (formerly known as IIFL Securities Limited) filed an appeal against the SEBI order before SAT. SAT vide its order dated December 07, 2023 passed a common order and partly allowed the appeals and set aside the ban on taking up / onboarding any new client for a period of two years in respect of its business as a stockbroker and also reduced penalty to ₹ 0.20 crore. SEBI has filed an appeal against the SAT order before the Supreme Court of India and the matter is currently pending before the Supreme Court of India.

Further, IIFL Capital Services Limited (formerly known as IIFL Securities Limited), received certain adjudication notices dated May 2, 2017 and October 28, 2021 from SEBI, alleging i) failure to to do segregation of own funds from clients' funds; ii) misused credit balance of clients' funds for debit balance clients' funds; and iii) not having a designated client bank account. IIFL Capital Services Limited (formerly known as IIFL Securities Limited) filed an appeal before SAT on June 20, 2023 aggrieved by SEBI findings. SAT, pursuant to its order dated December 07, 2023 passed the common order and partly allowed the appeals and set aside the ban from taking new clients for a period of two years and reduced penalty to Rs. 20 lacs. SEBI preferred an appeal before the Supreme court against the SAT order. The same is pending.

Further, IIFL Capital Services Limited (formerly known as IIFL Securities Limited), had received a notice from SEBI of summary settlement dated June 14, 2024, in relation to the role played by IIFL Capital Services Limited in handling various public issues of Non- Convertible Debt Securities between August 9, 2021 to November 30, 2023. The settlement application has been filed by IIFL Capital Services before SEBI.

Further, IIFL Capital Services Limited (formerly known as IIFL Securities Limited), had received a show cause notice dated October 9, 2024 in relation to association of IIFL Capital Services Limited with Tradetron and other algorithm platforms where strategies providing guaranteed returns/ consistent profit and/or past and/or expected future performance of the algorithm were hosted. IIFL Capital Services Limited filed Settlement Application and a response to the show cause notice February 27, 2025. Matter is pending with SEBI.

Further, few of our group companies have also received notices and administrative warning letters in the ordinary course of business from various regulators, including notice advising them to submit their compliance with the Securities and Exchange Board of India (Intermediaries) Regulations, 2008 in relation to the "fit and proper criteria". The constitutional validity of Schedule II of Securities and Exchange Board of India (Intermediaries) Regulations, 2008, as mentioned in the said notice has been challenged before the Bombay High Court and is presently pending. These notices may result in regulatory action or litigation in the future. Further, one of our group companies, IIFL Commodities Limited's application for registration with SEBI was rejected and it has been debarred from making fresh application, for the period 6 months or complete acquittal by the courts pursuant to the chargesheet or FIR filed by/with EOW, whichever is earlier. The appeal is preferred before the Securities Appellate Tribunal and the same is pending.

Further, in respect of a writ petition filed by Vishvanidhi Dalmia before the Bombay High Court seeking directions under the Maharashtra Protection of Investors Deposits Act, 1999, the Home Department, Government of Maharashtra, issued a notification dated April 04, 2024 under Maharashtra Protection of Investors Deposits Act, 1999, to attach the properties of IIFL Commodities Limited to the extent of brokerage or commission received in respect of unsettled trades viz. ₹ 0.33 crore, in the said matter.

While there is no monetary impact on our Company, we may face adverse reputational impact on account of orders or penalties against entities using the IIFL brand.

20. Any increase in the levels of non-performing assets ("NPA") on our loan portfolio, for any reason whatsoever, would adversely affect our business and results of operations

Various factors, including a rise in unemployment, prolonged recessionary conditions, our regulators' assessment and review of our loan portfolio, a sharp and sustained rise in interest rates, developments in the Indian economy, movements

in global commodity markets, fluctuations in gold prices, exchange rates and global competition, could cause an increase in the level of our non-performing assets and have a material adverse impact on the quality of our loan portfolio. Consistent with the growth of our branch network and our product portfolio, we expect an increase in our loan assets. Should the overall credit quality of our loan portfolio deteriorate, the current level of our provisions may not be adequate to cover further increases in the amount of our NPAs. Moreover, there also can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of Gross NPAs or otherwise, or that the percentage of NPAs that we will be able to recover will be similar to our past experience of recoveries of NPAs.

As of December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022, the gross value of NPAs on a consolidated basis was ₹ 1,200.77 crore, ₹ 1,181.43 crore, ₹ 738.14 crore and ₹ 1,074.29 crore, respectively which is 2.42%, 2.32%, 1.84% and 3.15%, respectively, of our loan book. Further as of December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022, the NPAs on gold loans portfolio on a consolidated basis was ₹ 64.92 crore, ₹ 368.70 crore, ₹ 66.68 crore, and ₹67.76 crore respectively and provision coverage ratio was 27.90%, 34.61%, 17.42% and 20.76%. As of December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022, the gross value of NPAs on a standalone basis was ₹ 426.61 crore, ₹ 653.24 crore, ₹ 181.33 crore and ₹ 366.45 crore, respectively which is 2.30%, 3.66%, 1.29% and 2.90%, respectively, of our loan book. Further as of December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022, the NPAs on gold loans portfolio on a standalone basis was ₹ 64.92 crore, ₹ 368.70 crore, ₹ 66.68 crore and ₹ 67.76 crore respectively and provision coverage ratio was 27.90%, 34.61%, 17.42% and 20.76%.

If our provisioning requirements are insufficient to cover our existing or future levels of non-performing loans or other loan losses that may occur, or if future regulation (or change in accounting standards) requires us to increase our provisions, our results of operation and financials may get adversely affected including our ability to raise additional capital and debt funds at favourable terms. Further, if our customers are unable to meet their financial obligation in a timely manner, then it could adversely affect our results of operations. Any negative trends or financial difficulties particularly among our borrowers could increase the level of non-performing assets in our portfolio and adversely affect our business and financial performance. If a significant number of our customers are unable to meet their financial obligations in a timely manner, it may lead to an increase in our level of NPAs. If we are not able to prevent increases in our level of NPAs, our business and our future financial performance could be adversely affected.

21. We may be unable to realize the expected value of collateral when borrowers default on their obligations to us, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We follow internal risk management guidelines in relation to portfolio monitoring which, inter alia, include a periodic assessment of loan to security value on the basis of conservative market price levels and ageing analysis, amongst others. However, we may not be able to realize the full value of the collateral as a result of the following (among other factors):

- 1. delays in bankruptcy and foreclosure proceedings;
- 2. defects or deficiencies in the perfection of collateral (including due to inability to obtain any approvals that may be required from third parties);
- 3. destruction / material damage to the underlying property;
- 4. fraud by borrowers;
- 5. errors in assessing the value of the collateral;
- 6. illiquid market for the sale of the collateral; and
- 7. applicable legislative provisions or changes thereto and past or future judicial pronouncements;

As a result of any of the foregoing factors, we may not be able to realize the full value of collateral, which could have an adverse effect on our financial condition, results of operations and cash flows.

22. A failure or inadequacy in our Company's information technology and telecommunication systems or its inability to adapt to rapid technological changes may adversely affect its business, results of operation and financial condition.

Our Company's ability to operate and remain competitive depends in part on its ability to maintain and upgrade its information technology systems and infrastructure on a timely and cost-effective basis, including its ability to process a large number of transactions on a daily basis. Our Company's operations also rely on the secure processing, storage and transmission of confidential and other information in its computer systems and networks. Our Company's financial, accounting or other data processing systems and management information systems or its corporate website may fail to

operate adequately or become disabled as a result of events that may be beyond its control, including a disruption of electrical or communications services. RBI has in its past inspection reports, highlighted certain deficiencies in our IT systems such as the inadequacy of IT systems to record information related to auction processes, non-maintenance of complete information related to jewellery being auctioned. Further, the information available to and received by our Company's management through its existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in its operations. If any of these systems are disabled or if there are other shortcomings or failures in our Company's internal processes or systems, it may disrupt our Company's business or impact its operational efficiencies and render it liable to regulatory intervention or damage to its reputation. The occurrence of any such events may adversely affect our Company's business, results of operations and financial condition.

Our Company is dependent on various external vendors for the implementation of certain elements of its operations, including implementing information technology infrastructure and hardware, industry standard commercial off-the-shelf products, networking and back-up support for disaster recovery. Our Company is, therefore, exposed to the risk that external vendors or service providers may be unable to fulfil their contractual obligations to it (or will be subject to the risk of fraud or operational errors by their respective employees) and the risk that their (or their vendors') business continuity and data security systems prove to be inadequate or fail to perform. Failure to perform any of these functions by our Company's external vendors or service providers could materially and adversely affect its business, results of operations and cash flows.

In addition, the future success of our Company's business will depend in part on its ability to respond to technological advances and to emerging financing industry standards and practices on a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. There can be no assurance that our Company will successfully implement new technologies effectively or adapt its technology and systems to meet customer requirements or emerging industry standards. If our Company is unable, for technical, legal, financial or other reasons, to adapt in a timely manner to changing market conditions, customer requirements or technological changes, its financial condition could be adversely affected. Any technical failures associated with its information technology systems or network infrastructure, including those caused by power failures and other unauthorised tampering, may cause interruptions or delays in our Company's ability to provide services to its customers on a timely basis or at all, and may also result in added costs to address such system failures and/or security breaches, and for information retrieval and verification.

23. Any non-compliance with mandatory Anti-Money Laundering and Know Your Customer policies could expose us to additional liability and harm our business and reputation.

In accordance with the requirements applicable to us, we are mandated to comply with rules and regulations under Prevention of Money Laundering Act 2002 ("PMLA"), the Prevention of Money-Laundering (Maintenance of Records) Rules, 2005 and RBI Know Your Client ("KYC") regulations in India. These laws and regulations require us, among other things, to adopt and enforce AML and KYC policies and procedures. While we have adopted policies and procedures aimed at collecting and maintaining all AML and KYC related information from our customers in order to detect and prevent the use of our networks for money-laundering activities, there may be instances where we may be used by other parties in attempts to engage in money-laundering and other illegal or improper activities. There can be no assurance that we will be able to fully control instances of any potential or attempted violation by other parties and may, accordingly, be subject to regulatory actions, including imposition of fines and other penalties by the relevant government agencies. We have not been found in non-compliance of the PMLA in Fiscal 2023 and Fiscal 2024. Our business and reputation could suffer if any such parties use or attempt to use us for money-laundering or illegal or improper purposes and such attempts are not detected or reported to the appropriate authorities in compliance with applicable regulatory requirements.

24. We have significant exposure to the real estate sector through our housing finance and construction & real estate finance businesses and any negative trends affecting this sector could adversely affect our business and result of operations.

In our housing finance business, the primary security for the loans disbursed by our Company is the underlying property; the value of this security is largely dependent on housing market conditions prevalent at that time. The value of the collateral on the loans disbursed by our Company may decline due to adverse market conditions, including an economic

downturn or a downward movement in real estate prices. In the event the real estate sector is adversely affected due to a decline of demand for real properties, changes in regulations or other trends or events, which negatively impact the real estate sector, the value of our collaterals may diminish which may affect our business and results of operations.

We have significant exposure of 55.85% as of December 31, 2024 and 48.00% as of March 31, 2024 of our AUM to the real estate sector through our housing finance and construction & real estate finance businesses, on a consolidated basis. As of December 31, 2024 on a consolidated basis, we have assets under management aggregating to ₹ 71,410.19 crore, towards mortgage loans which comprises of housing loans of approximately ₹ 30,317.96 crore. MSME secured loan of ₹ 8,682.53 crore and construction and developer loans (wholesale book) of ₹ 883.08 crore. In the event the real estate sector is adversely affected due to any reason whatsoever, the value of our collateral may diminish which may affect our results of operations in the event of a default in repayment by our clients.

As of December 31, 2024, the wholesale book in the mortgage loans comprises 1.24% of our consolidated AUM. The projects primarily comprise residential projects in Mumbai MMR, Delhi NCR, Bengaluru and Pune region.

Failure to recover the expected value of collateral could expose the Issuer to losses and, in turn, result in a material adverse effect on our business, results of operations, cash flows and financial condition. Following the introduction of the SARFAESI Act, we are allowed to enforce on secured property after 60 (sixty) days' notice to a borrower, whose loan has been classified as non-performing. Although the enactment of the SARFAESI Act has strengthened the rights of creditors by allowing expedited enforcement of security in an event of default, there is still no assurance that we will be able to realize the full value of our collateral, due to, among other things, delays on our part in taking action to enforce the property, delays in bankruptcy foreclosure proceedings, stock market downturns, defects in the perfection of collateral and fraudulent transfers by borrowers.

Further, among the various regulatory developments that have impacted the real estate sector recently, we believe that the implementation of the Real Estate Regulation and Development Act, 2016 ("RERA Act") is expected to have the biggest impact over the long term. After notification of certain provisions of the RERA Act with effect from May 2016, the remaining provisions of the RERA Act became effective from May 2017 onwards. Subsequent to this, the obligations of real estate project developers under the provisions of the RERA Act including mandatory project registration, enhanced disclosure norms and penal provisions for violation of rules have become effective across India. While most of the state governments have notified rules in relation to the RERA Act, other states are in the process of doing so.

To ensure compliance with the requirements of the RERA Act, companies in the real estate sector may need to allocate additional resources, which may increase compliance and they may face regulatory actions or be required to undertake remedial steps, which may have an adverse effect the business, operations and financial condition of various companies in the sector leading to less than anticipated growth in the housing sector, resulting in adverse effect on our business.

25. Majority of the gold loans we offered were due within one year of disbursement, and a failure to disburse new loans may result in a reduction of our loan portfolio and a corresponding decrease in our interest income.

Majority of the gold loans we offered were due within one year of disbursement. The relatively short term nature of our loans means that we are not assured of long term interest income streams compared to businesses that offer loans with longer terms. In addition, our existing customers may not obtain new loans from us upon maturity of their existing loans, particularly if competition increases. The short term nature of our loan products and the potential instability of our interest income could materially and adversely affect our results of operations and financial position.

26. Microfinance loans offered by our subsidiary, IIFL Samasta Finance Limited ("Samasta") are unsecured and are susceptible to various operational, credit and political risks which may result in increased levels of NPAs, thereby adversely affecting our business, results of operation and financial condition.

The focus client segment for our micro-loans is women in rural areas. The clients of Samasta typically have limited sources of income, savings and credit histories and as a result, are usually adversely affected by declining economic conditions. Further, for most of the loans provided by Samasta, clients do not provide any collateral or security for their borrowings as the RBI has mandated that loans given by NBFC-MFIs should be collateral free and should have annual household income up to ₹3,00,000 (RBI vide circular DoR.FIN.REC.95/03.10.038/2021-22 dated March 14, 2022) for the purpose of "consideration as microfinance loans". Such clients generally do not have a high level of financial

resilience, and, as a result, they can be adversely affected by declining economic conditions and natural calamities. Furthermore, although Samasta uses credit bureau reports to check certain background information such as the total indebtedness of each potential client and their existing repayment/ default history, the information in such reports may be incomplete or unreliable and accordingly the credit risk analysis we carry out on potential clients may be limited. Further, Samasta relies primarily on non-traditional guaranteed mechanisms rather than any tangible assets such as collateral. Most of its loans involve a joint liability mechanism whereby borrowers form an informal joint liability group and provide joint and several guarantees for loans obtained by each member of the group. Such joint liability arrangements are likely to fail if there is no meaningful personal relationship or bond among members of such group, if there is irregular participation in group meetings, if inadequate risk management procedures have been employed, or as a result of adverse external factors such as natural calamities. As a result, its clients potentially present a higher risk of loss in case of a credit default compared to that of borrowers in other asset-backed financing products. In addition, the microfinance business is susceptible to various political and social risks, including political interference in the working of MFIs at the district, state or national level; adverse publicity or litigation relating to the microfinance sector; public criticism of the microfinance sector; introduction of a stringent regulatory regime; or religious beliefs relating to loans and interest payments, which adversely affect repayment by its clients and may have an adverse effect on our business prospects and future financial performance.

Due to the underlying profile of the clients of Samasta, we may, in the future, experience increased levels of non-performing assets and related provisions and write-offs, which would materially and adversely impact our business and results of operations.

27. A rise in the general income level of our customers may adversely affect the demand for our loans.

The size of our loans portfolios (other than housing loans) is dependent upon the demand for loans in India, which is inversely related to the general income level of our customers. A rise in the general income level in India could make our loans unattractive to some customers due to their having increased disposable income, making them less reliant on loans. Such a shift in income levels could lower our interest income, which could in turn adversely affect our business, financial condition, cash flows and results of operations.

28. We may not be able to appropriately assess the credit worthiness of our customers before extending credit facilities to them. Unavailability of adequate information or inaccurate and/or incomplete information provided by our customers may adversely affect our operations and profitability.

In deciding whether to extend credit or enter into other transactions with customers and counterparties, we may rely on information furnished to us by or on behalf of customers and counterparties, including financial statements and other financial information. We may also rely on certain representations as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. For example, in deciding whether to extend credit, we may assume that a customer's audited financial statements conform to generally accepted accounting principles and present fairly, in all material respects, the financial condition, results of operations and cash flows of the customer. Our financial condition and results of operations could be negatively affected by relying on financial statements that do not comply with generally accepted accounting principles or other information that is materially misleading. In addition, we may not be able to place a reliance on credit bureaus to assess credit worthiness of all our borrowers segment. This may affect the quality of information available to us about the credit history of our borrowers, especially individuals and small businesses. As a result, our ability to effectively manage our credit risk may be adversely affected.

Moreover, we have implemented KYC norms and other measures, to prevent money laundering. In the event of ineffectiveness of these norms and systems, our reputation, business and results of operations may be adversely affected.

29. The Bankruptcy Code in India may affect our rights to recover loans from borrowers.

The Insolvency and Bankruptcy Code, 2016, as amended from time to time ("Bankruptcy Code") was notified on August 5, 2016. The Bankruptcy Code offers a uniform and comprehensive insolvency legislation encompassing all companies, partnerships and individuals (other than financial firms). It allows creditors to assess the viability of a debtor as a business decision and agree upon a plan for its revival or a speedy liquidation. The Bankruptcy Code creates a new institutional framework, consisting of a regulator, insolvency professionals, information utilities and adjudicatory mechanisms, which will facilitate a formal and time-bound insolvency resolution and liquidation process.

In case insolvency proceedings are initiated against a debtor to our Company, we may not have complete control over the recovery of amounts due to us. Under the Bankruptcy Code, upon invocation of an insolvency resolution process, a committee of creditors is constituted by the interim resolution professional, wherein each financial creditor is given a voting share proportionate to the debts owed to it. Any decision of the committee of creditors must be taken by a vote of not less than 66% of the voting share of all financial creditors. Any resolution plan approved by committee of creditors is binding upon all creditors, even if they vote against it.

In case a liquidation process is opted for, the Bankruptcy Code provides for a fixed order of priority in which proceeds from the sale of the debtor's assets are to be distributed. Before sale proceeds are distributed to a secured creditor, they are to be distributed for the costs of the insolvency resolution and liquidation processes, debts owed to workmen and other employees, and debts owed to unsecured credits. Further, under this process, dues owed to the Central and State Governments rank at par with those owed to secured creditors. Moreover, other secured creditors may decide to opt out of the process, in which case they are permitted to realise their security interests in priority.

Accordingly, if the provisions of the Bankruptcy Code are invoked against any of the borrowers of our Company, it may affect our Company's ability to recover our loans from the borrowers and enforcement of our Company's rights will be subject to the Bankruptcy Code.

Further, the GOI vide notification dated March 24, 2020 ("Notification") has amended section 4 of the Bankruptcy Code due the lingering impact of the COVID-19 pandemic. Pursuant to the said Notification, GoI has increased the minimum amount of default under the insolvency matters from $\stackrel{?}{\underset{?}{?}}$ 100,000 to $\stackrel{?}{\underset{?}{?}}$ 10,000,000. Therefore, the ability of our Company to initiate insolvency proceedings against the defaulters where the amount of default in an insolvency matter is less than $\stackrel{?}{\underset{?}{?}}$ 10,000,000 may impact the recovery of outstanding loans and profitability of our Company.

30. We may face tax related assessments or regulatory actions.

The laws and regulations governing the tax liability of our Company could change in the future and any such changes could adversely affect its business and future financial performance by requiring a restructuring of its activities, which may impact its results of operations. Further, the tax department may impose additional tax liability on our Company upon completion of their assessments of our past tax returns. Our Company cannot assure you that the tax department will not initiate scrutiny, investigation or regulatory action or reopen assessments for previous years. Any adverse finding by the tax department may have a material adverse effect on our Company's reputation, business, operations and financial conditions. For instance, on January 28, 2025, the Indian income tax department initiated a search under the Indian Income Tax Act at the Issuer's registered office and the residences of certain key management personnel of the IIFL group. The search operation concluded on February 3, 2025. Following the search, none of the Issuer's assets, including bank accounts, investments, or fixed assets have been seized by the Indian income tax department. The Issuer has provided necessary clarifications as a part of the standard procedure, and, as of the date of this Shelf Prospectus the financial impact of the outcome of the search operation is not ascertainable to the Issuer. For further details, see "Outstanding Litigations and Default" on page 339.

31. The financing industry is becoming increasingly competitive and our growth will depend on our ability to compete effectively.

The sector in which we operate is highly competitive and we face significant competition from banks and other NBFCs. Many of our competitors are larger institutions, which may have much larger customer and funding sources, larger branch networks and more capital than we do. Some of our competitors may be more flexible and better-positioned to take advantage of market opportunities. In particular, private banks in India and many of our competitors outside of India may have operational advantages in implementing new technologies and rationalising branches. These competitive pressures affect the industry in which we operate as a whole, and our future success will depend in large part on our ability to respond in an effective and timely manner to these competitive pressures.

In our housing finance and gold loan business, we face increasing competition from commercial banks and other players in the unorganized sector. Interest rate deregulation and other liberalization measures affecting the housing finance industry, together with increased demand for home finance, have also increased our exposure to competition. The demand for housing loans has also increased due to the increase in demand of real estate, stable property prices, higher disposable

incomes and increased fiscal incentives for borrowers. The demand for gold loans has also increased due to urgent borrowing or bridge financing requirements and the need for liquidity for assets held in gold and also due to increased awareness among customers of gold loans as a source of quick access to funds. All of these factors have resulted in the housing finance and gold loan industry, including our Company, facing increased competition from other lenders to the retail housing market, including commercial banks. Unlike commercial banks, we do not have access to funding from savings and current deposits of customers. Instead, we are reliant on higher cost loans and debentures for our funding requirements, which may reduce our margins compared to competitors. Our ability to compete effectively with commercial banks will depend, to some extent, on our ability to raise low-cost sources of funding in the future.

Furthermore, as a result of increased competition in the housing finance and gold loan industry, home loans and gold loans are becoming increasingly standardized and terms such as floating rate interest options for housing loans, lower processing fees, monthly rest periods and no prepayment penalties are becoming increasingly common in India. There can be no assurance that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive housing finance industry. Increasing competition may have an adverse effect on our net interest margin and other income, and if we are unable to compete successfully, the origination of new loans will decline and we may not be able to achieve our growth objectives.

32. Our Company has entered into number of related party transactions and may continue to enter into related party transactions, which may involve conflict of interest.

Our Company enters into transactions with the related parties in the ordinary course of business pursuant to the applicable provisions of the Companies Act, 2013. Such transactions may give rise to current or potential conflicts of interest with respect to dealings between us and such related parties. While our Company believes that all related party transactions entered into are conducted on an arms' length basis and in the ordinary course of business, there can be no assurance that it could not have achieved more favourable terms if such transactions had not been entered into with related parties. For further details, please see "Financial Information" on page 269. Additionally, there can be no assurance that any dispute that may arise between our Company and related parties will be resolved in our Company's favour.

33. We are permitted to use the IIFL trademark IIFL spiritudes, by IIFL Capital Services Limited (formerly known as IIFL Securities Limited) pursuant to the trademark license agreement between our Company and IIFL Capital Services Limited (formerly known as IIFL Securities Limited). Such right to use the IIFL trademark is subject to the termination based on the terms and conditions of the trademark license agreement and any such termination may result in us being unable to use the IIFL trademark, which could have a material adverse effect on our reputation and business.

We have been given the right to use the IIFL trademark, owned by IIFL Capital Services Limited (formerly known as IIFL Securities Limited) pursuant to the trademark license agreement entered into between our Company and IIFL Capital Services Limited (formerly known as IIFL Securities Limited). We have been provided a non-exclusive, non-transferable for a onetime fee payable to the Licensor, as set out therein, to use the trademark. Any termination of the agreement by IIFL Capital Services Limited (formerly known as IIFL Securities Limited) may result in us being unable to use this trademark which could have a material adverse effect on our reputation and business.

34. We may not be able to adequately protect our intellectual property rights.

Our ability to compete effectively depends in part upon protection of our intellectual property rights. On January 12,

2024, we made an application for registration of our logo "Money" and trademark "My Money", respectively, with the Registrar of Trade Marks, Mumbai under class 36 of the Trade Marks Act. The Trade Marks Registry has examined the captioned trade mark application and has raised objections inter alia under the provisions of Sections 9 and 11 of the Trade Marks Act, 1999. While our Company will file a response against the objections raised once the examination report is served upon us, there can be no assurance that our trademark application will be accepted. Further, there are no assurances that we will be able to register this mark. In the event we are not able to obtain registrations due to any injunctive or other adverse order issued against us by the appellate authorities in respect of the registration of our logo or slogan, we may not be able to avail legal protections under the trade mark or prevent unauthorised use of such trademarks by third parties, and in case the logo or slogan is used or claimed by a third party, our ability to use such logo or slogan may be restricted or lost, which may adversely affect our goodwill or business. For further details, please see "Our Business" on page 175.

35. We face asset-liability mismatches which could affect our liquidity and consequently may adversely affect our operations and profitability.

Our Company's funding requirements is met through long-term and medium-term funding sources such as bank loans and non-convertible debentures and our short-term funding requirements are met through working capital demand loans, cash credit, commercial paper and other short term loans. Our Company may face potential liquidity risks due to varying periods over which our Company's assets and liabilities mature. Our Company's inability to obtain additional credit facilities or renew its existing credit facilities in a timely and cost-effective manner, may lead to gaps and mismatches between its assets and liabilities, which in turn may adversely affect our Company's liquidity position, and in turn, its operations and financial performance. Our liquidity position may be adversely affected and we may be required to pay higher interest rates in order to meet our liquidity requirements in the future, which could have a material adverse effect on our business and financial results.

36. We extend margin funding loans, or loans against shares, to our clients, and any default by a client coupled with a downturn in the stock markets could result in substantial losses for us.

We extend, margin funding loans or loans against shares which are secured by liquid, marketable securities at an appropriate or predetermined margin levels. In the event of a volatile stock market or adverse movements in stock prices, the collateral which secures the loans may decrease significantly in value, which might result in losses which our Company may be unable to support. Customers may default on their obligations to us as a result of various factors including bankruptcy, lack of liquidity, lack of business and operational failure. Although we use a technology-based risk management system and follow strict internal risk management guidelines on portfolio monitoring, which include limits on the amount of margin, the quality of collateral provided by the client and pre-determined margin call thresholds, no assurance can be given that if the financial markets witnessed a significant single-day or general downturn, our financial condition and results of operations would not be adversely affected.

37. We are exposed to fluctuations in currency exchange and interest rates.

As our functional currency is the Rupee, our operating expenses are denominated primarily in Rupees. However, the Company is exposed to interest rate risk arising from its foreign currency borrowings. Interest on the borrowing is payable at a floating rate linked to the benchmark plus margin. The Company hedges the interest rate risk arising from the debt with a 'receive floating - pay fixed' interest rate swap. The Company uses cross currency swap contracts and forward exchange contracts to hedge its risks associated with interest rate and currency risk arising from the foreign currency loans.

To the extent that we are unable to match revenue received in our functional currency with liabilities paid in foreign currencies, exchange rate fluctuations in any such currency could have an adverse effect on our profitability. Substantially all of our cash flows are generated in Rupees and, therefore, significant changes in the value of the Rupee relative to the other foreign currencies could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows. Any amounts spent to hedge the risks to our business due to fluctuations in currencies may not adequately hedge against any losses we incur due to such fluctuations. There is no assurance that we will be able to reduce our foreign currency risk exposure, through the hedging transactions we have already entered into or will enter into, in an effective manner, at reasonable costs, or at all.

38. Third party industry and industry-related statistical data in this Shelf Prospectus may be incomplete, out of date, incorrect or unreliable.

Industry data in this document is derived from Industry report on NBFCs commissioned by and paid for us for such purpose. The Industry report on NBFCs is not exhaustive and is based on certain assumptions, parameters and conditions. The data and statistics in the Industry report on NBFCs may be inaccurate, incomplete or unreliable.

Neither we, nor the Lead Managers have independently verified the third party and industry related data obtained from Industry report on NBFCs and other industry sources referred in this Shelf Prospectus and therefore, while we believe them to be true, there can be no assurance that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. Therefore, discussions of matters relating to India, its economy and our industry in this Shelf Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends.

Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources may take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data or report and do not take responsibility for any errors or omissions or for the results obtained from using their data or report. Accordingly, investors should not place undue reliance on, or base their investment decision on this information. See "Industry Overview" on page 137.

39. The MSMEs to which our Company provides loans may not perform as expected and our Company may not be able to control the non-performance of such businesses.

Our Company provides loans to select growing MSMEs which obtain loans against their assets and profits made by them. Our Company does not manage, operate or control such businesses or entities. Further, our Company has no control over those businesses' functions or operations. As a result, such businesses may make business, financial or management decisions which our Company does not agree or the majority shareholders or the management of such companies may make business, financial or management decisions that may be adverse to, or otherwise act in a manner that does not serve, our Company's best interests. The repayment of the loans extended to such businesses will depend to a significant extent on the specific management team of the relevant borrower entity. The actions taken by the management of our Company's customers may lead to significant losses and affect their ability to repay our Company's loans. Consequently, this may adversely affect our Company's financial performance.

40. We do not own the premises where our branch offices are located and in the event our rights over the properties is not renewed or is revoked or is renewed on terms less favourable to us, our business activities may be disrupted.

At present we do not own the premises of any of our branch offices. All such non-owned properties are leased or licensed to us. If the owners of these properties do not renew the agreements under which we occupy the premises or only agree to renew such agreements on terms and conditions that are unacceptable to us, or if the owners of such premises withdraw their consent to our occupancy, our operations may suffer a disruption. We may be unable to locate suitable alternate facilities on favorable terms, or at all, and this may have a material adverse effect on our business, results of operations and financial condition.

41. We are required to comply with the requirements of certain labour laws which may impose additional costs on us.

Our employees are required to be registered under the provisions of certain labour laws such as the Employees' State Insurance Act, 1948, the Payment of Gratuity Act, 1972, and the Employees Provident Fund and Miscellaneous Provisions Act, 1952. We are also required to maintain certain records under the provisions of these laws, which add to our costs. If we are subject to penalties under these labour laws or if we do not obtain the requisite approvals, our business, financial condition, cash flows and results of operations may be adversely affected.

42. Our results of operations could be adversely affected by any disputes with employees.

As of December 31, 2024, our Company and our Subsidiaries have a combined workforce of 38,235 employees. Currently, none of our employees are members of any labour union. While we believe that we maintain good relationships with our employees, there can be no assurance that we will not experience future disruptions to our operations due to disputes or other problems with our work force, which may adversely affect our business and results of operations.

43. We require several licenses and approvals for our business and in the event we are unable to procure or renew them in time or at all, our business may be adversely affected.

Our Company requires several licenses, approvals and registration in order to undertake its business activities. These registrations include registrations with the RBI as a NBFC-ML. We are also required to maintain licenses under various

state Shops and Establishment Acts for some of our offices and branches. Failure by us to comply with the terms and conditions to which such permits or approvals are subject, and/or to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

44. Certain of our Directors, Key Management Personnels and Senior Management Personnels may have interests in us other than reimbursement of expenses incurred and normal remuneration or benefits.

Certain of our Directors, Key Management Personnels and Senior Management Personnels may be regarded as having an interest in our Company other than reimbursement of expenses incurred and normal remuneration or benefits. Certain Directors and Senior Management Personnels, as applicable, may be deemed to be interested to the extent of Equity Shares held by them, as well as to the extent of any dividends, ESOPs, bonuses or other distributions on such Equity Shares. We cannot assure you that our Directors and Senior Management Personnels will exercise their rights as shareholders to the benefit and best interest of our Company. For further details, see sections titled "Capital Structure" and "Our Management" on pages 72 and 223, respectively.

45. Our branches are vulnerable to various operational risks, including theft, fraud, burglary and embezzlement by our employees and customers due to high volume of cash and gold jewellery handled by us.

Our business involves carrying out cash and gold jewellery transactions that expose us to the risk of fraud by employees, agents, customers or third parties, theft, burglary and misappropriation or unauthorised transactions by our employees. Storage of cash and pledged gold jewellery as part of our business entails the risk of theft and resulting loss to our reputation and business. The short tenure of the loans advanced by us and our practice of processing loan repayments within short timelines require us to store pledged gold on our premises at all points in time. With regard to all burglaries, we may not be able to recover the entire amount of the loss suffered and may receive only a partial payment of the insurance claim. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer. Additionally, our cash in transit policies do not cover theft where an employee is involved, unless such involvement is identified within 48 hours of such thefts. Further, the actual recovery of the insured amount from the insurer requires the undertaking of certain procedures, and any delay in recovery could adversely affect our reputation and results of operation.

Pursuant to the same, while we have strengthened our security policies and procedures, we cannot guarantee that theft will not be committed in the future, which could adversely affect our reputation, business and results of operations. Further, we are exposed to the risk of fraud and other misconduct by employees and customers. While we carefully recruit all of our employees and screen all our employees who are responsible for disbursement of gold loans and custody of gold, there have in the past been acts of fraud with respect to gold loans and cash related misappropriation committed by our employees.

46. Our Company has entered into securitisation/assignment agreements to sell certain loans from our outstanding loan portfolio. Our business, financial condition and results of operations could be adversely affected due to some of the restrictions imposed under such agreements or downgrade in the ratings of our securitized debt or if such assignment of loan is held to be unenforceable or due to any change in the regulatory requirements.

As part of our means of raising and/or managing our funds, we assign or securitise the receivables from our loan portfolio to banks and other institutions. Such assignment or securitization transactions are conducted on the basis of our internal estimates of our funding requirements, which may vary from time to time. As of December 31, 2024 outstanding book value of assignment was ₹ 2,214.95 crore on a standalone basis. Our Company has sold and assigned a group of similar loans from our outstanding loan portfolio to Banks/financial institutions in return for an upfront fixed consideration. Under such agreements, we have provided credit enhancement through fixed deposits with banks to the purchaser for an amount equal to a percentage of the value of the loans being assigned as per the rating agency to enhance the rating of the pool. If there is any short fall in the scheduled cash flow promised to the investor then credit enhancement will be utilized to that extent.

Further, any change in statutory and/regulatory requirements such as securitisation guidelines issued by RBI in June 2018 in relation to assignments or securitizations by financial institutions, including the requirements prescribed by RBI and the Government of India, could have an adverse impact on our assignment or securitization transactions. Any adverse changes in the policy and/or regulations in connection with securitization of assets by NBFCs and/or new circulars and/or

directions issued by the RBI in this regard, affecting NBFCs or the purchasers of assets, would affect the securitization market in general and our ability to securitize and/or assign our assets.

47. Our loan portfolio may no longer continue to be classified as priority sector advances by the RBI.

The RBI currently mandates domestic commercial banks operating in India to maintain an aggregate 40% of adjusted net bank credit or credit equivalent amount of off-balance sheet exposure, whichever is higher as "priority sector advances". These include advances to agriculture, micro and small enterprises, micro enterprises within the micro and small enterprises sector, export credit and advances to weaker sections where the government seeks to encourage flow of credit for developmental reasons. Banks in India that have traditionally been constrained or unable to meet these requirements organically have relied on specialised institutions like us that are better positioned to or exclusively focus on originating such assets through on-lending or purchase of assets or securitised and assigned pools to comply with these targets.

In the event that any part of our loan portfolio is no longer classified as a priority sector advance by the RBI, or if the laws relating to priority sector lending as applicable to the banks undergo a change, our ability to securitise/assign our asset pool will be hampered, which may adversely affect our financial condition, results of operations and/or cash flows.

48. A decline in our capital adequacy ratio could restrict our future business growth.

Pursuant to the Reserve Bank of India (Non-Banking Financial Company – Scale Based Regulation) Directions, 2023 vide the circular dated DoR.FIN.REC.No.45/03.10.119/2023-24 dated October 19, 2023 (Updated as on March 21, 2024) all NBFC-ML have to maintain a minimum capital ratio, consisting of Tier I and Tier II capital, which shall not be less than 15% of its aggregate risk weighted assets on balance sheet and risk adjusted value of off-balance sheet items and Tier I capital of 10%. On a standalone basis, our capital adequacy ratio computed on the basis of applicable RBI requirements was 21.96% as of December 31, 2024, with Tier I capital comprising 16.69%, respectively. If we continue to grow our loan portfolio and asset base, we will be required to raise additional Tier I and Tier II capital in order to continue to meet applicable capital adequacy ratios with respect to our business. There can be no assurance that we will be able to raise adequate additional capital in the future on terms favourable to us or at all, and this may adversely affect the growth of our business.

49. Our Company may have to comply with stricter regulations and guidelines issued by regulatory authorities in India.

Our Company is regulated principally by and have reporting obligations to the RBI and our subsidiary is regulated by and have reporting obligations to NHB. Our Company is also subject to the corporate, taxation and other laws in effect in India. In recent years, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented which are intended to provide tighter control and more transparency. Moreover, new regulations may be passed that restrict our ability to do business.

Our Company cannot assure you that we will not be subject to any adverse regulatory action in the future. Further, these regulations are subject to frequent amendments and depend upon government policy. The costs of compliance may be high, which may affect our profitability. If we are unable to comply with any such regulatory requirements, our business and results of operations may be materially and adversely affected.

50. Our Company is subject to certain restrictive covenants in our loan documents, which may restrict our operations and ability to grow and may adversely affect our business. Any default in compliance with the material covenants could adversely affect our financial condition, and/or our ability to obtain financing in the future.

There are restrictive covenants in the agreements we have entered into with our lenders. These restrictive covenants require us to maintain certain financial ratios and seek the prior permission of these banks/financial institutions for various activities, including, amongst others, selling, leasing, transferring or otherwise disposing of any part of our business or revenues, effecting any scheme of amalgamation or reconstitution, implementing a new scheme of expansion, taking up an allied line of business or making any amendments to Memorandum and Articles of Association etc. Such restrictive covenants in our loan documents may restrict our operations or ability to expand and may adversely affect our business.

IIFL Samasta Finance Limited, one of the principle subsidiaries of the Company, is in breach of certain asset quality

related covenants in relation to some of its facilities. These breaches have arisen due to the prevailing challenges in the microfinance industry, which have had an impact on the overall asset quality and performance metrics of microfinance institutions. Considering the broader industry-wide context and the systemic challenges faced by the microfinance institutions, none of the lenders of SFL have enforced their rights in relation to the aforesaid breach of covenants. IIFL Samasta Finance Limited is in the process of obtaining waivers and relaxations for the breached covenants.

A failure to observe the covenants under our financing arrangements or to obtain necessary consents required thereunder may lead to the termination of our credit facilities, acceleration of all amounts due under such facilities and the enforcement of any security provided. Any acceleration of amounts due under such facilities may also trigger cross default provisions under our other financing agreements. If the obligations under any of our financing documents are accelerated, we may have to dedicate a substantial portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. Further, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. Any of these circumstances could adversely affect our business, credit rating and financial condition, cash flows and results of operations.

51. We may experience difficulties in expanding our business into new regions and markets in India.

As part of our growth strategy, we continue to evaluate attractive growth opportunities to expand our business into new regions and markets in India. Factors such as competition, culture, regulatory regimes, business practices and customs and customer requirements in these new markets may differ from those in our current markets, and our experience in our current markets may not be applicable to these new markets. In addition, as we enter new markets and geographical regions, we are likely to compete not only with other banks and financial institutions but also the local unorganised or semi-organised private financiers, who are more familiar with local regulations, business practices and customs, and have stronger relationships with customers.

If we plan to expand our geographical footprint, our business may be exposed to various additional challenges, including: obtaining necessary governmental approvals; identifying and collaborating with local business and partners with whom we may have no previous working relationship; successfully gauging market conditions in local markets with which we have no previous familiarity; attracting potential customers in a market in which we do not have significant experience or visibility; being susceptible to local taxation in additional geographical areas of India; and adapting our marketing strategy and operations to different regions of India in which different languages are spoken. Our inability to expand our current operations may adversely affect our business prospects, financial conditions, results of operations and/or cash flows.

52. We may not be able to fully comply with insider trading rules and regulations, which could result in criminal and regulatory fines and severe reputational damage. Further, we may fail to detect illegal or improper activities in our business operations on a timely basis, which may have an adverse effect on our reputation, business operations, financial condition, cash flows and results of operation.

We are required to comply with applicable insider trading laws and regulations, including the Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015. These laws and regulations require us to establish sound internal control policies and reporting procedures with respect to insider trading. Such policies and procedures require us to, among other things, establish or designate a policy for prohibition of insider trading which imposes reporting obligations on connected persons who are in possession of undisclosed price sensitive information in relation 45 to the securities of our Company. Further, we are subject to various laws relating to the prevention of other conflicts of interest. Conflicts of interest may exist between, (i) our departments; (ii) us and our vendors; (iii) different customers serviced by us; (iv) our employees and us; or between (v) our customers and our employees. Although we have internal controls and measures in place, there is no assurance that we will always manage such conflicts of interest, including compliance with various applicable laws and regulations. If the controls and measures implemented for detecting or eliminating insider trading or other improper or illegal trading activities which result in conflicts of interest are considered inadequate under applicable laws and regulations by any regulatory, governmental or judicial authority, we may be subject to penal action, freezing or attachment of our assets, imposition of fines, or both. There is no assurance that the controls and measures implemented by us are adequate to detect or eliminate every instance of insider trading in a timely manner or at all. Any such lapse may adversely affect our reputation, business operations, financial condition, cash flows and results of operations.

53. We utilize the services of certain third parties for our operations and any deficiency or interruption in their services could adversely affect our business and results of operations.

We rely on third parties, such as direct selling agents, recovery agents, and other service providers to facilitate our business operations. All our third party contracts are subject to outsourcing guidelines issued by RBI and any other regulatory authority from time to time. We are exposed to various risks related to the business of such third parties, including the following: (i) fraud or misconduct, including mis-selling, by such third parties; (ii) operational failure of such third parties systems; (iii) adverse change or termination in our relationship with such third parties; (iv) failures in legal or regulatory compliance, by such third parties; (v) regulatory changes relating to the operations of such third parties; (vi) violation of laws and regulations, including those relating to licensing or registration by such third parties; and (vii) regulatory actions due to improper business practices of such third parties.

Any of the above risks may result in litigation or regulatory action against us, which could have a material adverse effect on our business, reputation, financial condition, cash flows and results of operations. Outsourcing of our certain operations to third-party service providers. Further, there is no assurance that such third-party service providers will comply with regulatory requirements or meet their contractual obligations to us in a timely manner, or at all. Third-party service providers may breach agreements they have with us because of factors beyond our control. They may also terminate or refuse to renew their agreements because of their own financial difficulties or business priorities, potentially at a time that is costly or otherwise inconvenient for us. In addition, if our third-party service providers fail to operate in compliance with regulations or corporate and societal standards, we could suffer reputational harm by association, which would likely cause a material adverse effect on our business, financial condition, cash flows, results of operations and prospects. We also rely on third parties to provide certain critical IT infrastructure. If the third parties upon which we rely cannot expand system capacity to handle increased demand, or if any of their systems otherwise fail to perform or experience interruptions, malfunctions, disruptions in service, slower response times or delays, then we could incur reputational damage, regulatory sanctions, litigation and loss of trading, any of which could materially adversely affect our business, financial condition, cash flows and results of operations. In addition, we license certain software and technology from third parties. Any premature termination of our license agreements or the loss of the ability to use such software or technology for any reason would have an adverse impact on our business and operations. Rapid changes in our industry or technology may also result in our licensed technologies being recalled or discontinuation of support for outdated products or services. Any deficiencies in the infrastructure used, or processes adopted, by such third parties could have a material adverse effect on our business, results of operations and prospects.

54. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of future dividend payments by the Issuer, if any, will depend upon a number of factors, including but not limited to our future earnings, financial condition, cash flows, working capital requirements, contractual obligations, applicable Indian legal restrictions and capital expenditures. In addition, our ability to pay dividends may be impacted by a number of factors, including restrictive covenants under the loan or financing agreements the Issuer may enter into to finance our fund requirements for our business activities. There can be no assurance that we will be able to pay dividends in the future. We may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. Additionally, in the future, we may be restricted by the terms of our financing agreements in making dividend payments unless otherwise agreed with our lenders.

55. We face difficulties and incur additional expenses in operating from rural and semi urban areas, where infrastructural facilities are limited.

A portion of our operations are conducted in rural and semi urban areas. We face certain difficulties in conducting such operations, such as accessing power facilities, transporting people and goods and maintaining profitability at branches in remote areas. We may also face increased costs in implementing security measures and expanding our advertising presence. We cannot assure that such costs will not increase in the future as we expand our network in rural and semi urban areas.

56. Our success largely depends on our management team and key personnel and our ability to attract, train and retain such persons. Our inability to attract and retain talented professionals, or the resignation or loss of key management personnel, may have an adverse impact on our business and future financial performance.

Our ability to sustain our rate of growth depends significantly upon our ability to manage key issues such as selecting and retaining key managerial personnel, developing managerial experience to address emerging challenges and ensuring

a high standard of client service. In order to be successful, we must attract, train, motivate and retain highly skilled employees, especially branch managers and product executives. If we cannot hire additional qualified personnel or retain them, our ability to expand our business will be impaired and our revenue could decline. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train and motivate our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us. Hiring and retaining qualified and skilled managers are critical to our future, as our business model depends on our credit-appraisal and asset valuation mechanism, which are personnel-driven operations. Moreover, competition for experienced employees can be intense. While we have an incentive structure and an ESOP designed to encourage employee retention, our inability to attract and retain talented professionals, or the resignation or loss of key management personnel, may have an adverse impact on our business and future financial performance.

57. If we fail to identify, monitor and manage risks and effectively implement our risk management policies, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our Company has devoted resources to develop our risk management policies and procedures and aim to continue to do so in the future. Please see "Our Business" on page 175. Despite this, our policies and procedures to identify, monitor and manage risks may not be fully effective. Some of our risk management systems are not automated and are subject to human error. Some of our methods of managing risks are based upon the use of observed historical market behaviour. As a result, these methods may not accurately predict future risk exposures, which could be significantly greater than those indicated by the historical measures.

To the extent any of the instruments and strategies we use to hedge or otherwise manage our exposure to market or credit risk are not effective, we may not be able to mitigate effectively our risk exposures in particular market environments or against particular types of risk. Further, some of our risk management strategies may not be effective in a difficult or less liquid market environment, where other market participants may be attempting to use the same or similar strategies to deal with the difficult market conditions. In such circumstances, it may be difficult for us to reduce our risk positions due to the activity of such other market participants. Other risk management methods depend upon an evaluation of information regarding markets, clients or other matters. This information may not in all cases be accurate, complete, up-to-date or properly evaluated.

Our investment and interest rate risk are dependent upon our ability to properly identify, and mark-to-market changes in the value of financial instruments caused by changes in market prices or rates. Our earnings are dependent upon the effectiveness of our management of changes in credit quality and risk concentrations, the accuracy of our valuation models and our critical accounting estimates and the adequacy of our allowances for loan losses.

If we fail to effectively implement our risk management policies, it could materially and adversely affect our business, financial condition, results of operations and cash flows.

58. Certain non-GAAP measures and other statistical information relating to our operations and financial performance have been included in this Shelf Prospectus. These non-GAAP measures are not measures of operating performance or liquidity defined by Ind AS and may not be comparable with those presented by other companies.

Certain non-GAAP measures and other statistical information relating to our operations and financial performance such as net worth, return on net worth and Net Asset Value per Equity Share have been included in this Shelf Prospectus. Such non-GAAP measures are supplemental measures of our performance and liquidity that are not required by, or presented in accordance with, Ind AS. Further, these non-GAAP measures are not a measurement of our financial performance or liquidity under Ind AS and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the years/period or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS. We compute and disclose such non-GAAP measures and other statistical information relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance. However, such information may not be computed on the basis of any standard methodology that

is applicable across the industry and therefore may not be comparable to financial measures and statistical information of similar nomenclature that may be computed and presented by other companies and are not measures of operating performance or liquidity defined by Ind AS.

59. Our Company is exposed to many operational risks which could materially impact our business and results of operations.

Our Company is exposed to many types of operational risks. Operational risk can result from a variety of factors, including failure to obtain proper internal authorizations, improperly documented transactions, failure of operational and information security procedures, computer systems, software or equipment, fraud, inadequate training and employee errors. We attempt to mitigate operational risk by maintaining a comprehensive system of internal controls, establishing systems and procedures to monitor transactions, maintaining key back-up procedures, undertaking regular contingency planning and providing employees with continuous training. Any failure to mitigate such risks could adversely affect our business and results of operations.

60. Significant fraud, system failure or calamities could adversely impact our business.

We seek to protect our computer systems and network infrastructure from physical break-ins as well as fraud and system failures. Computer break-ins and power and communication disruptions could affect the security of information stored in and transmitted through our computer systems and network infrastructure. We employ security systems, including firewalls and password encryption, designed to minimize the risk of security breaches. Although we intend to continue to implement security technology and establish operational procedures to prevent fraud, break-ins, damage and failures, there can be no assurance that these security measures will be adequate. A significant failure of security measures or operational procedures could have a material adverse effect on our business and our future financial performance. Although we take adequate measures to safeguard against system-related and other frauds, there can be no assurance that it would be able to prevent frauds.

We are exposed to many types of operational risks, including the risk of fraud or other misconduct by employees and unauthorized transactions by employees. Although we have been careful in recruiting all our employees, we have in the past been held liable for the fraudulent acts committed by our employees adversely impacting our business. Our reputation could be adversely affected by significant frauds committed by employees, customers or outsiders.

61. Inaccurate appraisal of credit may adversely impact our business

We may be affected by failure of employees to comply with internal procedures and inaccurate appraisal of credit or financial worth of our clients. Inaccurate appraisal of credit may allow a loan sanction which may eventually result in a bad debt on our books of accounts. In the event we are unable to check the risks arising out of such lapses, our business and results of operations may be adversely affected.

62. Some of our Directors may have interests in entities, which are in businesses similar to ours and this may result in conflicts of interest with us.

Some of our Directors are also directors on the board of our related parties. Commercial transactions in the future between us and related parties may result in conflicting interests which could have an adverse effect on our operations. Such factors may have an adverse effect on the results of our operations and financial condition.

63. We rely on direct selling agents ("DSAs") to sell some of our products across the country. These DSAs may not perform their obligations satisfactorily or in compliance with law or may be part of unlawful/unethical behaviour which may adversely affect the business and reputation of our Company

We enter into direct selling arrangements with DSAs for the purpose of marketing and selling some of our products across India. Although adequate due diligence is conducted before entering into any DSA arrangement with any person, we cannot guarantee that there shall be no disruptions in the provision of their services to our Company or that these DSAs will adhere to their contractual obligations. If there is a disruption in the services of these DSAs, or if the DSAs discontinue their service agreement with us, our business, financial condition and results of operations will be adversely affected. In case of any dispute between our Company and the DSAs, we cannot assure you that the terms of the

agreements/arrangements entered into with the DSAs will not be breached, which may result in litigation costs. Such additional cost, in addition to the cost of entering into agreements with other DSAs, may materially and adversely affect our business, financial condition and results of operations. Further, our DSAs or the personnel they employ may be engaged in unethical or unlawful behaviour or they may misrepresent or mis-sell our products and services. Due to this, we may also suffer from reputational and legal risks and these actions may materially and adversely affect our business, financial condition and results of operations.

64. Our Company and its Subsidiaries have availed or may avail of certain loans that are recallable by lenders, at any time.

Our Company and its subsidiaries have availed or may avail of loans that are repayable on demand at any time by the relevant lenders. Any such unexpected demand for immediate repayment may have a material adverse effect on the business, cash flows and financial condition of the entity against which repayment is sought.

65. Our ability to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange control laws that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted without onerous conditions, or at all. Limitations on raising foreign debt may have an adverse effect on our business, results of operations and financial condition.

66. There may be inadvertent discrepancies in our secretarial filings and/or corporate records. We cannot assure you that no legal proceedings or regulatory actions will be initiated against our Company in the future in relation to any such discrepancies and we will not be subject to any penalty imposed by the competent authority in this regard.

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

Accordingly, we cannot assure you that our Company will not be subject to any legal proceedings or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our secretarial filings and/or corporate records in the future, which may adversely affect our business, financial condition and reputation.

EXTERNAL RISK FACTORS

67. Our results of operations have been, and may continue to be, adversely affected by Indian and international financial market and economic conditions.

Our business is highly dependent on Indian and international markets and economic conditions. Such conditions in India include fluctuations in interest rates; changes in consumer spending; the level of consumer confidence; housing prices; corporate or other scandals that reduce confidence in the financial markets, among others. International markets and economic conditions include the liquidity of global financial markets, the level and volatility of debt and equity prices and interest rates, investor sentiment, inflation, the availability and cost of capital and credit, and the degree to which international economies are expanding or experiencing recessionary pressures. The independent and/or collective fluctuation of these conditions can directly and indirectly affect demand for our lending finance and other financial products or increase the cost to provide such products. In addition, adverse economic conditions, such as declines in housing values, could lead to an increase in mortgage and other home loan delinquencies and higher write offs, which can adversely affect our earnings.

Global financial markets were and continue to be extremely volatile and were materially and adversely affected by a significant lack of liquidity, decreased confidence in the financial sector, disruptions in the credit markets, reduced business activity, rising unemployment, declining home prices and erosion of consumer confidence. These factors have contributed to and may continue to adversely affect our business, financial condition and results of operations.

68. Financial difficulties and other problems in certain financial institutions in India could cause our business to suffer and adversely affect our results of operations.

We are exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties and other problems faced by certain Indian financial institutions. Certain Indian financial institutions have experienced difficulties during recent years. Some co-operative banks (which tend to operate in rural sector) have also faced serious financial and liquidity crises. There has been a trend towards consolidation with weaker banks and NBFCs being merged with stronger entities. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. Our transactions with these financial institutions and other non-banking financial institutions expose us to various risks in the event of default by a counterparty, which can be exacerbated during periods of market illiquidity.

69. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect our business and may also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence. In addition, any deterioration in relations between India and its neighboring countries might result in investor concern about stability in the region, which could adversely affect our business.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk.

70. Natural calamities could have a negative impact on the Indian economy, particularly the agriculture sector, and cause our business to suffer.

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their impact on the Indian economy. The erratic progress of the monsoon over the course of past few years affected sowing operations for certain crops. Further, prolonged spells of below normal rainfall or other natural calamities could have a negative impact on the Indian economy thereby, adversely affecting our business.

Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, the interest rates and other commercial terms at which such additional financing is available. Any such adverse development could adversely affect our business, financial condition and results of operations.

72. Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry.

There is no assurance that the liberalization policies of the Government will continue in the future. Protests against privatization could slow down the pace of liberalization and deregulation. The Government of India plays an important role by regulating the policies and regulations that govern the private sector. The current economic policies of the Government may change at a later date. The pace of economic liberalization could change and specific laws and policies affecting the industry and other policies affecting investments in our Company's business could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our Company's business.

Unstable domestic as well as international political environment could impact the economic performance in the short term as well as the long term. The Government of India has pursued the economic liberalization policies including relaxing restrictions on the private sector over the past several years. The present Government has also announced policies

and taken initiatives that support continued economic liberalization. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business may be affected not only by changes in interest rates, changes in Government policy, taxation, social and civil unrest but also by other political, economic or other developments in or affecting India.

73. Financial instability in other countries could disrupt our business.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the economy as a whole, in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India.

In the event that the current difficult conditions in the global credit markets continue or if the recovery is slower than expected or if there any significant financial disruption, this could have an adverse effect on our cost of funding, loan portfolio, business, prospects, results of operations and financial condition.

74. Changing laws, rules and regulations, including taxation laws, may adversely affect our business, results of operations, cash flows and prospects.

Change on the quantum of taxes and duties levied globally, or in the terms of international trade agreements, environmental regulation or other applicable laws may require us to incur additional costs. The Government of India has implemented two major reforms in Indian tax laws, namely the Goods and Services Tax ("GST"), and provisions relating to general anti-avoidance rules ("GAAR"). The indirect tax regime in India has undergone a complete overhaul. The indirect taxes on goods and services, such as central excise duty, service tax, central sales tax, state value added tax, surcharge and excise have been replaced by GST with effect from July 1, 2017. The GST regime continues to be subject to amendments and its interpretation by the relevant regulatory authorities is constantly evolving. GAAR became effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement may result in, among others, a denial of tax benefit to us and our business. In the absence of any substantial precedents on the subject, the application of these provisions is subjective. If the GAAR provisions are made applicable to us, it may have an adverse tax impact on us. Further, if the tax costs associated with certain of our transactions are greater than anticipated because of a particular tax risk materializing on account of new tax regulations and policies, it could affect our profitability from such transactions.

Earlier, distribution of dividends by a domestic company was subject to Dividend Distribution Tax ("**DDT**"), in the hands of the company at an effective rate of 20.56% (inclusive of applicable surcharge and cess). Such dividends were generally exempt from tax in the hands of the shareholders. However, the GoI has amended the Income-tax Act, 1961 ("**IT Act**") to abolish the DDT regime. Accordingly, any dividend distribution by a domestic company is subject to tax in the hands of the investor at the applicable rate. Additionally, the domestic company is required to withhold tax on such dividends distributed at the applicable rate.

However, non-resident shareholders may claim benefit of an applicable tax treaty, subject to satisfaction of certain conditions. We may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of withholding tax pursuant to any corporate action including dividends. Further, the Finance Act, 2023 has introduced various amendments to the IT Act. There is no certainty on the impact that the Finance Act, 2023 may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

We cannot predict whether any new tax laws or regulations impacting our services will be enacted, the likely nature and impact of the specific terms of any such laws or regulations or whether, if at all, any laws or regulations would have an adverse effect on our business.

75. Companies operating in India are subject to a variety of central and state government taxes and surcharges.

Tax and other levies including stamp duty imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, goods and service tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. The statutory corporate income tax in India (as applicable to us), which includes a surcharge on the tax and a health and education cess on the tax and the surcharge. The central or state government may in the future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business and results of operations.

76. Trading of the NCDs may be limited by temporary exchange closures, broker defaults, settlement delays, strikes by brokerage firm employees and disputes.

The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

77. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and our future financial performance.

78. If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.

Inflation rates could be volatile, and we may face high inflation in the future as India had witnessed in the past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, salaries, and other expenses relevant to our business. Further, high inflation leading to higher interest rates may also lead to a slowdown in the economy and adversely impact credit growth. Consequently, we may also be affected and fall short of business growth and profitability.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our operating expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

While the Government of India through the RBI has previously initiated economic measures to combat high inflation rates, it is unclear whether these measures will remain in effect, and there can be no assurance that Indian inflation levels will not rise in the future.

79. We are subject to regulatory, economic and social and political uncertainties and other factors beyond our control.

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- Any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- The impact of international trade wars or uncertain or unfavourable policies on international trade or (whether or not directly involving the Government of India);
- Any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian customers and Indian corporations;
- Epidemic or any other public health in India or in countries in the region or globally, including in India's various neighboring countries;
- Macroeconomic factors and central bank regulation, including in relation to interest rates movements which may
 in turn adversely impact our access to capital and increase our borrowing costs;
- · Volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- Decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- Political instability, including terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- Civil unrest, acts of violence, regional conflicts or situations or war may adversely affect the financial markets;
- International business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- Logistical and communication challenges;
- Downgrading of India's sovereign debt rating by rating agencies;
- Changes in government policies, including taxation policies, social and civil unrest and other political, social and economic developments in or affecting India;
- Occurrence of natural calamities and force majeure events;
- Difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis; and
- Being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could materially adversely affect our business, financial condition, results of operations, cash flows and prospects.

80. Significant differences exist between Ind AS and other accounting principles, such as US GAAP and IFRS, which may be material to NCD Holders' assessments of our financial condition.

The annual financial statements included in this Shelf Prospectus have been prepared in accordance with Ind AS. We have not attempted to quantify the impact of US GAAP or IFRS on the financial data included in this Shelf Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP or IFRS. US GAAP and IFRS differ in significant respects from Ind AS. Accordingly, the degree to which the Ind AS financial statements included in this Shelf Prospectus, will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Shelf Prospectus should be limited accordingly.

81. This Shelf Prospectus includes certain unaudited financial information, which has been subjected to limited review, in relation to our Company. Reliance on such information should, accordingly, be limited.

This Shelf Prospectus includes certain unaudited financial information, which has been subjected to limited review, in relation to our Company. Reliance on such information should, accordingly, be limited. This Shelf Prospectus includes certain unaudited financial information of our Company for the quarter and six months ended September 30, 2024 and for the quarter and nine months ended December 31, 2024, prepared in accordance with Indian Accounting Standards 34 "Interim Financial Reporting", prescribed specified under the Section 133 of the Companies Act, 2013, Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and other relevant provisions of the Act and in respect of which the Joint Statutory Auditors of our Company have issued their limited review reports dated October 23, 2024 for H1 2025 Unaudited Financial Results and February 12, 2025 for Q3 2025 Unaudited Financial Results. As this financial information has been subject only to limited review as required under Regulations 33 and 52(2) of SEBI

Listing Regulations and as described in 46 Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India, and not to an audit, any reliance by prospective investors to the Issue on such financial information for the quarter and nine months ended December 31, 2024 should be limited.

Further, this Shelf Prospectus includes certain unaudited financial information such as information relating to financial indebtedness as on December 31, 2024 which has not been subjected to limited review by our Joint Statutory Auditors. Accordingly, prospective investors should rely on their independent examination of our financial position and results of operations, and should not place undue reliance on, or base their investment decision solely on the financial information included in this Shelf Prospectus.

RISKS RELATING TO THE ISSUE AND NCDS

82. Any downgrading in credit rating of our NCDs may affect the value of NCDs and thus to raise further debt.

The NCDs proposed to be issued under the Issue have been rated "Crisil AA/Stable (pronounced as Crisil double A rating with Stable outlook)" for an amount of ₹ 3,500 crore by Crisil vide their rating rationale dated September 30, 2024 and February 11, 2025 read with rating letter dated September 30, 2024 and revalidation letter dated October 25, 2024, rating letter dated February 12, 2025 and revalidation letter dated March 10, 2025 and "[ICRA] AA (Stable)" for an amount of ₹ 5,000 crore by ICRA vide their rating rationale dated September 25, 2024 read with rating letter dated March 05, 2025. Securities with this rating are considered to have high degree of safety regarding timely servicing of financial obligations. Such securities carry very low credit risk. Ratings given by Crisil and ICRA are valid as on the date of this Shelf Prospectus and shall remain valid on date of issue and allotment of NCDs and the listing of the NCDs on Stock Exchanges unless withdrawn In case of any change in credit ratings till the listing of NCDs, our Company will inform the investors through public notices/ advertisements in all those newspapers or electronic modes such as online newspapers or website of the issuer or the stock exchanges in which pre issue advertisement has been given. The rating is not a recommendation to buy, sell or hold the rated instrument and investors should take their own decisions. The rating may be subject to revision or withdrawal at any time by the assigning rating agency and each rating should be evaluated independently of any other rating. The rating agencies have a right to suspend or withdraw the rating at any time on the basis of factors such as new information. For the rating letter, rationale and press release for these ratings, see "Annexure A" of this Shelf Prospectus. There are no unaccepted ratings and any other ratings other than as specified in this Shelf Prospectus.

83. You may be subject to taxes arising on the sale of the NCDs.

Sale of NCDs by any holder may give rise to tax liability, under Indian taxation laws. Investors and or subscribers are advised to consult their own tax consultant with respect to the specific tax implications arising out of sale of the NCDs.

84. There may be no active market for the NCDs on the platform of the Stock Exchanges. As a result, the liquidity and market prices of the NCDs may fail to develop and may accordingly be adversely affected.

There can be no assurance that an active market for the NCDs will develop. If an active market for the NCDs fails to develop or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors, *inter alia*, including (i) the interest rate on similar securities available in the market and the general interest rate scenario in the country, (ii) the market price of our Equity Shares, (iii) the market for listed debt securities, (iv) general economic conditions, and (v) our financial performance, growth prospects and results of operations. The aforementioned factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs and/or be relatively illiquid.

85. There may be a delay in making refund/unblocking of funds to Applicants.

We cannot assure you that the monies refundable to you, on account of (i) withdrawal of your Applications, (ii) our failure to receive minimum subscription in connection with the Base Issue, (iii) withdrawal of the Issue, or (iv) failure to obtain the final approval from the Stock Exchanges for listing of the NCDs, will be refunded to you in a timely manner. We, however, shall refund / unblock such monies, with the interest due and payable thereon as prescribed under applicable statutory and/or regulatory provisions.

86. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts due on the NCDs.

The NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In the event of bankruptcy, liquidation or winding-up, our Company's assets will be available to pay obligations on the NCDs only after all of those liabilities that rank senior to these NCDs have been paid as per Section 327 of the Companies Act, 2013. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts due on the NCDs.

87. There is no assurance that the NCDs issued pursuant to the Issue will be listed on Stock Exchanges in a timely manner, or at all.

In accordance with Indian law and practice, permissions for listing and trading of the NCDs issued pursuant to the Issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents to be submitted and carrying out of necessary procedures with the stock exchanges. There could be a failure or delay in listing the NCDs on the Stock Exchanges for reasons unforeseen. If permission to deal in and for an official quotation of the NCDs is not granted by the stock exchanges, our Company will forthwith repay, with interest, all monies received from the Applicants in accordance with prevailing law in this context, and pursuant to this Shelf Prospectus. There is no assurance that the NCDs issued pursuant to the Issue will be listed on stock exchanges in a timely manner, or at all.

88. There are other lenders and debenture trustees who have pari passu charge over the Security provided.

There are other lenders and debenture trustees of the Company who have *pari passu* charge over the Security provided for the Issue. While the Company is required to maintain 100% asset cover for the outstanding amount of the NCDs and interest thereon, upon the Company's bankruptcy, winding-up or liquidation, the other lenders and debenture trustees will rank *pari passu* with the NCD holders and to that extent, may reduce the amounts recoverable by the NCD holders.

89. The NCD Holders may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs. Failure or delay in recovering the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose the holders to a potential loss.

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors, *inter alia*, including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all. Our Company will create appropriate security in favour of the Debenture Trustee for the NCD Holders on the assets adequate to ensure 100% asset cover for the NCDs. The Debenture Trustee will protect the interest of the NCD Holders in the event of default by us in regard to timely payment of interest and repayment of principal and they will take necessary action at our cost. It is it the duty of the debenture trustee to monitor the security cover is maintained, however, the recovery of 100% of the amount shall depend on the market scenario prevalent at the time of enforcement of the security and the realisable value of the assets charged as security, when liquidated, may be lower than the outstanding principal and/or interest accrued thereon in connection with the NCDs. A failure or delay in recovering the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose you to a potential loss.

The Issuer, being a NBFC is not required to maintain a debenture redemption reserve ("DRR").

Pursuant to a Ministry of Corporate Affairs notification dated August 16, 2019 amending Section 71 of the Companies Act, 2013 and Rule 18 (7) of the Companies (Share Capital and Debentures) Rules, 2014, an NBFC is not required to maintain DRR for debentures issued through a public issue. Hence, investors shall not have the benefit of reserve funds to cover the re-payment of the principal and interest on the NCDs.

91. The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution

We intend to use the proceeds of the Issue, after meeting the expenditures of and related to the Issue, for the purpose of onward lending, our various financing activities including lending, for repayment of interest and principal of existing borrowing of the company, subject to applicable statutory and/or regulatory requirements. For further details, see "Issue Related Information" on page 467. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. The utilization details of the proceeds of the Issue shall be adequately disclosed as per applicable law. Further, as per the provisions of the SEBI NCS Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for the Issue.

SECTION III - INTRODUCTION

GENERAL INFORMATION

Our Company was incorporated under the provisions of the Companies Act, 1956 on October 18, 1995, under the name of Probity Research & Services Private Limited. The status of our Company was changed to a public limited company and our name was changed to Probity Research & Services Limited pursuant to a fresh certificate of incorporation dated on April 28, 2000 issued by the Registrar of Companies, Maharashtra, Mumbai. The name of our Company was subsequently changed to India Infoline.Com Limited, and a fresh certificate of incorporation, consequent upon change of name was issued by the Registrar of Companies, Maharashtra, Mumbai on May 23, 2000. The name of our Company was further changed to India Infoline Limited, and a fresh certificate of incorporation, consequent upon change of name was issued by the Registrar of Companies, Maharashtra, Mumbai on March 23, 2001. Thereafter, the name of our Company was changed to IIFL Holdings Limited, and a fresh certificate of incorporation, consequent upon change of name was issued by Registrar of Companies, Maharashtra, Mumbai on February 18, 2014. Thereafter, the name of our Company was changed to IIFL Finance Limited and a fresh certificate of incorporation, consequent upon change of name was issued by Registrar of Companies, Maharashtra, Mumbai on May 24, 2019.

Our Company has obtained a Certificate of Registration dated March 06, 2020 bearing Registration No. N-13.02386 issued by the RBI to commence the business of a non-banking financial institution without accepting public deposits under Section 45 IA of the RBI Act, 1934. Our Company is a NBFC-ML.

For further details in relation to the changes in our name, constitution, registration with the RBI and our Company's main objects, see "History and Main Objects" on page 215. For details of the business of our Company, see "Our Business" beginning on page 175.

Credit Rating and Rationale

The NCDs proposed to be issued under the Issue have been rated "Crisil AA/Stable (pronounced as Crisil double A rating with Stable outlook)" for an amount of ₹ 3,500 crore by Crisil vide their rating rationale dated September 30, 2024 and February 11, 2025 read with rating letter dated September 30, 2024 and revalidation letter dated October 25, 2024, rating letter dated February 12, 2025 and revalidation letter dated March 10, 2025 and "[ICRA] AA (Stable)" for an amount of ₹ 5,000 crore by ICRA vide their rating rationale dated September 25, 2024 read with rating letter dated September 24, 2024 and revalidation letters dated October 29, 2024 and March 05, 2025. Securities with this rating are considered to have high degree of safety regarding timely servicing of financial obligations. Such securities carry very low credit risk. Ratings given by Crisil and ICRA are valid as on the date of this Shelf Prospectus and shall remain valid on date of issue and allotment of NCDs and the listing of the NCDs on Stock Exchanges unless withdrawn. In case of any change in credit ratings till the listing of NCDs, our Company will inform the investors through public notices/ advertisements in all those newspapers or electronic modes such as online newspapers or website of the issuer or the stock exchanges in which pre issue advertisement has been given. The rating is not a recommendation to buy, sell or hold the rated instrument and investors should take their own decisions. The rating may be subject to revision or withdrawal at any time by the assigning rating agency and each rating should be evaluated independently of any other rating. The rating agencies have a right to suspend or withdraw the rating at any time on the basis of factors such as new information. For the rating letter, rationale and press release for these ratings, see "Annexure A" of this Shelf Prospectus.

There are no unaccepted ratings and any other ratings other than as specified in this Shelf Prospectus.

Disclaimer Statement of Crisil

Crisil Ratings Limited (Crisil Ratings) has taken due care and caution in preparing the Material based on the information provided by its client and / or obtained by Crisil Ratings from sources which it considers reliable (Information). A rating by Crisil Ratings reflects its current opinion on the likelihood of timely payment of the obligations under the rated instrument and does not constitute an audit of the rated entity by Crisil Ratings. Crisil Ratings does not guarantee the completeness or accuracy of the information on which the rating is based. A rating by Crisil Ratings is not a recommendation to buy, sell, or hold the rated instrument; it does not comment on the market price or suitability for a particular investor. The Rating is not a recommendation to invest / disinvest in any entity covered in the Material and no part of the Material should be construed as an expert advice or investment advice or any form of investment banking within the meaning of any law or regulation. Crisil Ratings especially states that it has no liability whatsoever to the subscribers / users / transmitters/ distributors of the Material. Without limiting the generality of the foregoing, nothing in the Material is to be construed as Crisil Ratings providing or intending to provide any services in jurisdictions where Crisil Ratings does not have the necessary permission and/or registration to cany out its business activities in this regard. IIFL Finance Limited will be responsible for ensuring compliances and consequences of non-compliances for use of the Material or part thereof outside India. Current rating status and Crisil Ratings' rating criteria are available without charge to the public on the website, www.crisilratings.com. For the latest rating information on any instrument of any company rated by Crisil Ratings, please contact Customer Service Helpdesk at 1800-267-3850.

Disclaimer Statement of ICRA

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.

Legal Counsel to the Issue

Khaitan & Co

One World Centre 10th, 13th & 14th Floor, Tower 1C, 841 Senapati Bapat Marg, Mumbai – 400 013 Maharashtra, India

Tel: +91 22 6636 5000

Impersonation

As a matter of abundant precaution, attention of the investors is specifically drawn to the provisions of sub-Section (1) of Section 38 of the Companies Act, 2013, relating to punishment for fictitious applications. Section 38(1) of the Companies Act, 2013 provides that:

"Any person who —

- (a) makes or abets making of an application in a fictitious name to a company for acquiring, or subscribing for, its securities; or
- (b) makes or abets making of multiple applications to a company in different names or in different combinations of his name or surname for acquiring or subscribing for its securities; or
- (c) otherwise induces directly or indirectly a company to allot, or register any transfer of, securities to him, or to any other person in a fictitious name,

shall be liable for action under Section 447."

The liability prescribed under Section 447 of the Companies Act 2013 for fraud involving an amount of at least ₹ 0.10 crore or 1.00% of the turnover of our Company, whichever is lower, includes imprisonment for a term which shall not be less than six months extending up to 10 years (provided that where the fraud involves public interest, such term shall not be less than three years) and fine of an amount not less than the amount involved in the fraud, extending up to three times of such amount. In case the fraud involves (i) an amount which is less than ₹ 0.10 crore or 1.00% of the turnover of our Company, whichever is lower; and (ii) does not involve public interest, then such fraud is punishable with an imprisonment for a term extending up to five years or a fine of an amount extending up to ₹ 0.50 crore or with both.

Recovery Expense Fund

Our Company has created a recovery expense fund in the manner as specified by SEBI in SEBI Debenture Trustee Master Circular as amended from time to time and Regulation 11 of SEBI NCS Regulations with the Designated Stock Exchange and have informed the Debenture Trustee regarding the creation of such fund. The Recovery expense fund may be utilized by Debenture Trustee, in the event of default by our Company under the terms of the Debenture Trust Deed, and the Applicable Laws, for taking appropriate legal action to enforce the security.

Settlement Guarantee Fund

Our Company will deposit amounts in the settlement guarantee fund, as applicable, in the manner as specified in the SEBI NCS Master Circular. This fund has been created under the SEBI NCS Master Circular to ensure upfront collection of charges from eligible issuers at the time of allotment of debt securities.

Inter-se allocation of Responsibility

The following table sets forth the responsibilities for various activities by the Lead Managers:

S. No.	Activities	Responsibility#	Coordinator
1.	Due diligence of Company's operations/ management/ business plans/ legal etc. • Drafting of the offering document. • Coordination with Stock Exchanges for in-principle approval	Trust and Nuvama	Trust
2.	Structuring of various issuance options with relative components and formalities etc.	Trust and Nuvama	Trust
3.	Co-ordination with auditors for auditor deliverables and co-ordination with lawyers for legal opinion	Trust and Nuvama	Trust
4.	Drafting and approval of statutory advertisement.	Trust and Nuvama	Trust

[#] IIFL Capital Services Limited (Formerly known as IIFL Securities Limited) is deemed to be an associate of the Issuer as per the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992, as amended (Merchant Bankers Regulations). Further, in compliance with the provisions of Regulation 21A and explanation to Regulation 21A of the Merchant Bankers Regulations, IIFL Capital Services Limited (Formerly known as IIFL Securities Limited) would be involved only in marketing of the Issue and as per Regulation 25 (3) of SEBI NCS Regulations shall not issue a due diligence certificate.

Underwriting

This Issue is not underwritten.

Arrangers to the Issue

There are no arrangers to the Issue.

Guarantor to the Issue

There are no guarantors to the Issue.

Minimum subscription

In terms of the SEBI NCS Regulations, for an issuer undertaking a public issue of debt securities the minimum subscription for public issue of debt securities shall be 75% of the Base Issue Size. If our Company does not receive the minimum subscription of 75% of Base Issue Size as specified in the relevant Tranche Prospectus(es), prior to the Issue Closing Date the entire Application Amount shall be unblocked in the relevant ASBA Account(s) of the Applicants within 8 Working Days from the Issue Closing Date or such time as may be specified by SEBI. In the event, there is a delay by our Company in unblocking the aforesaid ASBA Account within the prescribed time limit our Company will become liable to refund the Application Amount along with interest at the rate of 15 (fifteen) percent per annum for the delayed period.

Under Section 39(3) of the Companies Act, 2013 and Rule 11(2) of the Companies (Prospectus and Allotment of Securities) Rules, 2014 if the stated minimum subscription amount is not received within the specified period, the application money received is to be credited only to the bank account from which the subscription amount was remitted. To the extent possible, where the required information for making such refunds is available with our Company and/or Registrar, refunds will be made to the account prescribed. However, where our Company and/or Registrar does not have the necessary information for making such refunds, our Company and/or Registrar will follow the guidelines prescribed by SEBI in this regard included in the SEBI NCS Master Circular.

Designated Intermediaries

Self-Certified Syndicate Bank

The list of banks that have been notified by SEBI to act as the SCSBs for the ASBA and UPI Mechanism process is provided on the website of SEBI at https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes and https://sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=40 respectively, as updated from time to time. For a list of branches of the SCSBs named by the respective SCSBs to receive the ASBA Forms and UPI Mechanism through app/web interface from the Designated Intermediaries, refer to the above-mentioned links.

In relation to Bids submitted under the ASBA process to a Member of the Consortium, the list of branches of the SCSBs at the Specified Locations named by the respective SCSBs to receive deposits of the ASBA Forms from the Members of the Consortium is available on the website of SEBI at https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes and updated from time to time. For more information on such branches collecting Bid cum Application Forms from the Syndicate at Specified Locations, see the website of SEBI at https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes or any such other website as may be prescribed by SEBI from time to time.

Syndicate SCSB Branches

In relation to Applications submitted to a member of the Syndicate or the Trading Members of the Stock Exchanges only in the Specified Cities (Mumbai, Chennai, Kolkata, Delhi, Ahmedabad, Rajkot, Jaipur, Bengaluru, Hyderabad, Pune, Vadodara and Surat), the list of branches of the SCSBs at the Specified Locations named by the respective SCSBs to receive deposits of Application Forms from the Members of the Syndicate is available on the website of the SEBI (https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes) and updated from time to time or any such other website as may be prescribed by SEBI from time to time. For more information on such branches collecting Application Forms from the Syndicate at Specified Locations, see the website of the SEBI (https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes) as updated from time to time or any such other website as may be prescribed by SEBI from time to time.

Broker Centres/ Designated CDP Locations/ Designated RTA Locations

In accordance with SEBI Circular No. CIR/CFD/14/2012 dated October 4, 2012 and RTA Master Circular and the SEBI NCS Master Circular, Applicants can submit the Application Forms with the Registered Brokers at the Broker Centres, CDPs at the Designated CDP Locations or the RTAs at the Designated RTA Locations, respective lists of which, including details such as address and telephone number, are available at the website of the Stock Exchanges at www.bseindia.com and www.nseindia.com. The list of the Registered Brokers, RTAs, CRTAs, and CDPs, eligible to accept Applications in the Issue, including details such as postal address, telephone number and email address, are provided on the websites of the BSE at http://www.bseindia.com/Markets/PublicIssues/brokercentres_new.aspx?expandable=3 and ww.nseindia.com for Registered Brokers and http://www.bseindia.com/Static/Markets/PublicIssues/RtaDp.aspx?expandable=6 for and www.nseindia.com for RTAs and CDPs, as updated from time to time.

The list of branches of the SCSBs at the Broker Centres, named by the respective SCSBs to receive deposits of the Application Forms from the Registered Brokers will be available on the website of the SEBI (www.sebi.gov.in) and updated from time to time.

Utilisation of Issue proceeds

For details on utilisation of Issue proceeds please see, "Objects of the Issue" beginning on page 118.

Issue Programme*

Issue Opens on	As specified in the relevant Tranche Prospectus(es) for each Tranche Issue.
Issue Closes on	As specified in the relevant Tranche Prospectus(es) for each Tranche Issue.
Pay in Date	As specified in the relevant Tranche Prospectus(es) for each Tranche Issue.
Deemed Date of	The date on which the Board of Directors or the Finance Committee approves the Allotment of
Allotment	the NCDs for the relevant Tranche Issue or such date as may be determined by the Board of
	Directors thereof and notified to the Stock Exchanges. The actual Allotment of NCDs may take

place on a date other than the Deemed Date of Allotment. All benefits relating to the NCDs including interest on NCDs shall be available to the Debenture Holders from the Deemed Date of Allotment.

* The Issue shall remain open for subscription on Working Days from 10:00 a.m. to 5:00 p.m. (Indian Standard Time) during the period as indicated in the relevant Tranche Prospectus(es). Our Company may, in consultation with the Lead Managers, consider closing the relevant Tranche Issue on such earlier date or extended date (subject to a minimum period of two working days and a maximum period of ten working days from the date of opening of the relevant tranche issue and subject to not exceeding thirty days from filing relevant tranche prospectus(es) with ROC including any extensions), as may be decided by the Board of Directors of our Company or Finance Committee thereof, subject to relevant approvals, in accordance with Regulation 33A of the SEBI NCS Regulations. In the event of an early closure or extension of the relevant Tranche Issue, our Company shall ensure that notice of the same is provided to the prospective investors through an advertisement in all the newspapers or electronic modes such as online newspapers or website of the issuer or the stock exchanges in which pre-issue advertisement for opening of the relevant Tranche Issue has been given on or before such earlier or initial date of Issue closure. On the Issue Closing Date, the Application Forms will be accepted only between 10:00 a.m. and 3:00 p.m. (Indian Standard Time) and uploaded until 5:00 p.m. (Indian Standard Time) or such extended time as may be permitted by the Stock Exchanges. Further, pending mandate requests for bids placed on the last day of bidding will be validated by 5:00 p.m. (Indian Standard Time) on one Working Day post the Issue Closing Date.

Applications Forms for the Issue will be accepted only from 10:00 a.m. to 5:00 p.m. (Indian Standard Time) ("Bidding Period"), during the Issue Period as mentioned in the relevant Tranche Prospectus(es) for each Tranche Issue on all Working Days (a) by the Designated Intermediaries at the Bidding Centres, or (b) by the SCSBs directly at the Designated Branches of the SCSBs. On the Issue Closing Date, Application Forms will be accepted only between 10:00 a.m. to 3:00 p.m. (Indian Standard Time) and uploaded until 5:00 p.m. (Indian Standard Time) or such extended time as may be permitted by the Stock Exchanges. It is clarified that the Applications not uploaded on the Stock Exchange(s) Platform would be rejected. Further, pending mandate requests for bids placed on the last day of bidding will be validated by 5:00 p.m. (Indian Standard Time) on one Working Day after the Issue Closing Date.

Due to limitation of time available for uploading the Applications on the Issue Closing Date, Applicants are advised to submit their Application Forms one day prior to the Issue Closing Date and, no later than 3.00 p.m. (Indian Standard Time) on the Issue Closing Date. Applicants are cautioned that in the event a large number of Applications are received on the Issue Closing Date, there may be some Applications which are not uploaded due to lack of sufficient time to upload. Such Applications that cannot be uploaded will not be considered for allocation under the Issue. Neither our Company, nor the Lead Managers, nor any Member of the Consortium, Registered Brokers at the Broker Centres, CDPs at the Designated CDP Locations or the RTAs at the Designated RTA Locations or designated branches of SCSBs are liable for any failure in uploading the Applications due to failure in any software/hardware systems or otherwise. As per the SEBI NCS Master Circular, the allotment in this Issue is required to be made on the basis of date of upload of each application into the electronic book of the Stock Exchanges. However, from the date of oversubscription and thereafter, the allotments will be made to the applicants on proportionate basis in accordance with SEBI NCS Regulations and SEBI NCS Master Circular. For further details please section titled 'Issue Related Information' on page 467.

17. Details of Employee Stock option Scheme

Company has in force the following ESOS Schemes with an object of rewarding employee:

IIFL Finance Employees Stock Option Plan 2007 ("ESOS Scheme 2007").

Pursuant to the approval given by the shareholders at their extraordinary general meeting held on October 20, 2007, our Company has implemented "Employee Stock Option Scheme, 2007" ("ESOS Scheme 2007"). The Company received In Principal approval for the said scheme from National Stock Exchange of India Limited and BSE Limited

on November 14, 2008 and November 25, 2008 respectively. The maximum number of options that can be granted under the Schemes shall be 7,500,000. There are no outstanding employee stock options as on March 31, 2023.

IIFL Finance Employee Stock Option Plan 2008 ("ESOS Scheme 2008")

Pursuant to the approval given by the shareholders at their extraordinary general meeting held on December 15, 2008, our Company has implemented "Employee Stock Option Scheme, 2008" ("**ESOS Scheme 2008**"). The Company received In Principal approval for the said scheme from National Stock Exchange of India Limited and BSE Limited on December 17, 2009 and December 18, 2009 respectively. The maximum number of options that can be granted under the Schemes shall be 50,000,000.

The stock options cancelled or lapsed without being exercised will be available for allocation to other Employees, subject to compliance with the provisions of the Applicable Laws.

The Nomination & Remuneration Committee shall in accordance with ESOS Scheme 2008 and Applicable Laws approve the grant of stock options from time to time to the Employees under various series and approve terms of grant of stock options under each series, including vesting schedule for each series of grants.

The Nomination & Remuneration Committee shall, in accordance with ESOS Scheme 2008 and Applicable Laws, approve the procedure for making a fair and reasonable adjustment in case of a corporate action such as stock split /consolidation, rights issues, bonus issues, merger, de-merger, sale of division and others, to ensure that the stock option holders are compensated appropriately in case of any diminution in the value of their stock options as a result of such corporate action.

Stock options granted under ESOS Scheme 2008 would vest as per the vesting schedule as determined under each series of grant approved by the Nomination & Remuneration Committee, subject to a minimum period of one year from the date of grant of such stock options. Vesting of stock options would be subject to continued employment of the respective Employee with the Company. Any acceleration in vesting schedule of the stock option will be subject to approval of Nomination & Remuneration Committee.

Please refer below for the details of stock options as on December 31, 2024:

ESOP Plan 2008:

S.	Particulars	(No. of Stock Options)
No.		
1	Stock options granted	5,92,70,000
2	Stock options vested	5,22,18,577
3	Stock options exercised	4,05,46,101
4	Total number of shares arising out of exercise of Stock options	4,05,46,101
5	Stock options lapsed	1,50,54,095

IIFL Finance Employee Stock Option Plan 2020 - Merger Scheme ("ESOS Scheme 2020")

Pursuant to the merger of India Infoline Finance Limited with the Company under the Composite Scheme of Arrangement, the stock option holders of India Infoline Finance Limited were required to be granted 135 stock options by the Company for every 100 stock options held in India Infoline Finance Limited, on terms and conditions similar to the ESOP Scheme of India Infoline Finance Limited. Accordingly, the Board adopted new ESOP scheme named as "IIFL Finance Limited Employee Stock Option 2020 - Merger Scheme" and 8,281,111 stock option were granted under the scheme to option holders of India Infoline Finance Limited. The Company received in-principal

approval for the said scheme from National Stock Exchange of India Limited and BSE Limited on June 1, 2020 and June 3, 2020 respectively.

The Nomination & Remuneration Committee shall in accordance with ESOS Scheme 2020 and Applicable Laws approve the grant of stock options from time to time to the Employees under various series and approve terms of grant of stock options under each series, including vesting schedule for each series of grants.

The Nomination & Remuneration Committee shall, in accordance with ESOS Scheme 2020 and Applicable Laws, approve the procedure for making a fair and reasonable adjustment in case of a corporate action such as stock split /consolidation, rights issues, bonus issues, merger, de-merger, sale of division and others, to ensure that the stock option holders are compensated appropriately in case of any diminution in the value of their stock options as a result of such corporate action.

Stock options granted under ESOS Scheme 2020 would vest as per the vesting schedule as determined under each series of grant approved by the Nomination & Remuneration Committee, subject to a minimum period of one year from the date of grant of such stock options. Vesting of stock options would be subject to continued employment of the respective Employee with the Company. Any acceleration in vesting schedule of the stock option will be subject to approval of Nomination & Remuneration Committee.

Please refer below for the details of stock options as on December 31, 2024:

ESOP Plan 2020:

S. No.	Particulars Particulars	(No. of Stock Options)
1	Stock options granted	82,81,111
2	Stock options vested	44,99,052
3	Stock options exercised	31,46,236
4	Total number of shares arising out of exercise of Stock options	31,46,236
5	Stock options lapsed	39,04,552

OBJECTS OF THE ISSUE

Our Company has filed this Shelf Prospectus for a public issue of secured, rated, listed, redeemable, NCDs for an amount up to ₹ 2,500 crore (the "Shelf Limit"). The NCDs will be issued in one or more tranches up to the Shelf Limit, on the terms and conditions as set out in the relevant Tranche Prospectus for any Tranche Issue, which should be read together with the Draft Shelf Prospectus and this Shelf Prospectus.

The Issue is being made pursuant to the provisions of the SEBI NCS Regulations, SEBI NCS Master Circular and the Companies Act and the rules made there under. Our Company proposes to utilize the proceeds raised through the Issue, after deducting the Issue related expenses to the extent payable by our Company ("Net Proceeds") towards funding the objects listed under this section.

The details of the proceeds of the Issue are summarized below:

Particulars	Estimated amount (₹ in crore unless otherwise stated)
Gross proceeds of the Issue	As specified in the relevant Tranche Prospectus(es) for each Tranche
	Issue
Less: Issue related expenses*	As specified in the relevant Tranche Prospectus(es) for each Tranche
	Issue
Net proceeds	As specified in the relevant Tranche Prospectus(es) for each Tranche
	Issue

^{*}The above Issue related expenses are indicative and are subject to change depending on the actual level of subscription to the Issue, the number of allottees, market conditions and other relevant factors.

Requirement of Funds and Utilization of Net Proceeds

The following table details the objects of the Issue (collectively, referred to herein as the "**Objects**") and the amount proposed to be financed from Net Proceeds:

Sr.	Objects of the Issue	Percentage of amount proposed
No.		to be financed from Net Proceeds
	For the purpose of onward lending, financing / refinancing the existing	At least 75%
	indebtedness of our Company, and/or debt servicing (payment of interest	
	and/or repayment / prepayment of interest and principal of existing	
	borrowings of our Company)*	
b.	General Corporate Purposes**	Maximum up to 25%
	Total	100%

^{*}Our Company will not utilise the proceeds of this Issue towards payment of prepayment penalty, if any

The main objects clause of the Memorandum of Association of the Company permits the Company to undertake its existing activities as well as the activities for which the funds are being raised through the Issue.

Issue related expenses break-up

The expenses for this Issue include, inter alia, lead management fees and selling commission to the Lead Managers, Consortium Members and intermediaries as provided for in the SEBI NCS Master Circular, fees payable to debenture trustees, the Registrar to the Issue, SCSBs' commission/ fees, printing and distribution expenses, legal fees, advertisement expenses, listing fees and any other expense directly related to the Issue. The Issue expenses and listing fees will be paid by our Company.

The estimated breakdown of the total expenses for each Tranche Issue shall be as specified in the relevant Tranche

^{**}The Net Proceeds will be first utilized towards the Objects mentioned above. The balance is proposed to be utilized for general corporate purposes, subject to such utilization not exceeding 25% of the amount raised in the Issue, in compliance with the SEBI NCS Regulations.

Prospectus(es).

Purpose for which there is a requirement of funds

As specified in the relevant Tranche Prospectus(es) for each Tranche Issue.

Breakup of the cost of the project for which the money is being raised

As specified in the relevant Tranche Prospectus(es) for each Tranche Issue.

Means of financing for the project

As specified in the relevant Tranche Prospectus(es) for each Tranche Issue.

Funding Plan

Our Company confirms that for the purpose of this Issue, funding plan will not be applicable.

Summary of the project appraisal report

Our Company confirms that for the purpose of this Issue, project appraisal report will not be applicable.

Schedule of implementation of the project

Not Applicable

Monitoring and reporting of utilization of funds

There is no requirement for appointment of a monitoring agency in terms of the SEBI NCS Regulations. The Audit Committee of our Company shall monitor the utilisation of the proceeds of the Issue. Our Company will disclose in our Company's financial statements for the relevant financial year commencing from Fiscal 2026, the utilisation of the proceeds of the Issue under a separate head along with details, if any, in relation to all such proceeds of the Issue that have not been utilised thereby also indicating investments, if any, of such unutilized proceeds of the Issue. Our Company shall utilize the proceeds of the Issue only upon receipt of minimum subscription, i.e., 75% of base issue size for relevant Tranche Issue as specified in relevant Tranche Prospectus(es), the execution of the documents for creation of security and the Debenture Trust Deed and receipt of final listing and trading approval from the Stock Exchanges. Our Company, in accordance with the timeline prescribed in SEBI Listing Regulations, shall submit to the stock exchanges, a statement indicating the utilization of issue proceeds of non-convertible securities, which shall be continued to be given till such time the issue proceeds have been fully utilised or the purpose for which these proceeds were raised has been achieved.

Interim use of proceeds

Our management, in accordance with the policies formulated by it from time to time, will have the flexibility in deploying the proceeds received from the Issue. Pending utilization of the proceeds out of the Issue for the purposes described above, our Company intends to temporarily invest funds as may be approved by the Board of Directors. Such investment would be in accordance with applicable law and the investment policies approved by the Board of Directors or any committee thereof from time to time.

General Corporate Purposes

Our Company intends to deploy up to 25% of the amount raised and allotted in the Issue for general corporate purposes, including but not restricted to routine capital expenditure, renovations, strategic initiatives, meeting any expenditure in relation to our Company as well as meeting exigencies which our Company may face in the ordinary course of business, or any other purposes as may be approved by our Board of Directors or duly authorized committee thereof.

Other Confirmations

In accordance with the SEBI NCS Regulations, our Company will not utilize the proceeds of the Issue for providing loans to or acquisition of shares of any person or company who is a part of the Promoter Group or Group Companies.

In accordance with the SEBI NCS Regulations, our Company will not utilize the proceeds of the Issue towards full or part consideration for the purchase or any other acquisition, inter alia by way of a lease, of any immovable property.

No part of the proceeds from the Issue will be paid by us as consideration to our Promoters, the Directors, Key Managerial Personnel, Senior Management Personnel or companies promoted by our Promoters except in ordinary course of business. No part of the proceeds from the Issue will be utilized for buying, trading or otherwise dealing in equity shares of any listed company. Further our Company undertakes that Issue proceeds from NCDs allotted to banks shall not be used for any purpose, which may be in contravention of RBI guidelines including those relating to classification as capital market exposure or any other sectors that are prohibited under RBI Regulations.

All monies received out of the Issue shall be credited/transferred to a separate bank account maintained with a Scheduled Bank as referred to in section 40(3) of the Companies Act 2013.

Details of all monies utilised out of the Issue referred above shall be disclosed under an appropriate separate head in our balance sheet indicating the purpose for which such monies have been utilised along with details, if any, in relation to all such proceeds of the Issue that have not been utilized thereby also indicating investments, if any, of such unutilized proceeds of the Issue.

Our Company confirms that it will not use the proceeds from the Issue, directly or indirectly, for the purchase of any business or in the purchase of any interest in any business whereby our Company shall become entitled to an interest in either the capital or profit or losses or both in such business exceeding 50% thereof, the purchase or acquisition of any immovable property (direct or indirect) or acquisition of securities of any other body corporate.

The fund requirement as above is based on our current business plan and is subject to change in light of variations in external circumstances or costs, or in our financial condition, business or strategy. Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan from time to time and consequently our funding requirements and deployment of funds may also change.

There is no contribution being made or intended to be made by the Directors as part of the Issue or separately in furtherance of the Objects of the Issue.

None of the Directors, Promoters, Key Managerial Persons and Senior Management Personnel have any financial or other material interest in the Issue.

The Company shall utilise the proceeds of the Issue only upon execution of the documents for creation of Security and the Debenture Trust Deed and receipt of listing and trading approval from the Stock Exchanges.

Variation in terms of contract or objects in this Shelf Prospectus

Our Company shall not, in terms of Section 27 of the Companies Act, 2013, at any time, vary the terms of the objects for which this Shelf Prospectus is issued, except as may be prescribed under the applicable laws and specifically under Section 27 of the Companies Act, 2013. Further, in accordance with the SEBI Listing Regulations, in case of any material deviation in the use of proceeds as compared to the objects of the issue, the same shall be indicated in the format as specified by SEBI from time to time.

We shall utilize the Issue proceeds only upon execution of Debenture Trust Deed, receipt of the listing and trading approval from the Stock Exchange(s) as stated in the relevant Tranche Prospectus(es).

 $Benefit\ /\ interest\ accruing\ to\ Promoters/Directors/\ Key\ Managerial\ Person/\ Senior\ Management\ Personnel\ out\ of\ the\ object\ of\ the\ Issue$

Neither our Promoters nor the Directors or Key Managerial Person or Senior Management Personnel of our Company are interested in the Objects of this Issue.

STATEMENT OF POSSIBLE TAX BENEFITS

STATEMENT OF POSSIBLE TAX BENEFITS AVAILABLE TO HFL FINANCE LIMITED AND ITS DEBENTURE HOLDERS UNDER THE APPLICABLE LAWS IN INDIA

To,
The Board of Directors,
IIFL Finance Limited
IIFL House, Sun Infotech Park,
Road No. 16V, Plot No. B-23,
Thane Industrial Area, Wagle Estate,
Thane – 400 604

Management's Responsibility

The preparation of the enclosed **Annexure A** is the responsibility of the Management of the Company, including the preparation and maintenance of all records supporting its contents. This responsibility includes the designing, implementation and maintaining of internal control relevant to the preparation and presentation of the **Annexure A** and applying an appropriate basis of preparation; and making estimates that are reasonable in the circumstances and making estimates that are reasonable in the circumstances.

Management of the Company is responsible for preparing the **Annexure A** under Applicable Direct Tax Law in India. The management is also responsible for ensuring compliance with the requirements of SEBI NCS Regulations and applicable law and regulations for the purpose of furnishing this **Annexure A** and for providing all relevant information to the Lead Manager.

The Management is responsible to intimate and provide complete information to us on timely basis in respect of changes and material developments relating to subject matter of this certificate.

Our Responsibility

At your specific request, we, the joint statutory auditors of the Company, have examined the enclosed Annexure A. The contents of the enclosed statement are based on information, explanations and representations obtained from the Company and on the basis of our understanding of the business activities and operations of the Company.

Pursuant to the SEBI NCS Regulations, it is our responsibility to report whether the Statement prepared by the Company, presents, in all material respects, the possible tax benefits available to the Company and the Debenture holders of the Company, under the Direct Tax Laws as of the date of this certificate.

This certificate has been prepared in accordance with the Guidance Note on Reports or Certificates for Special Purposes (Revised 2016), issued by the Institute of Chartered Accountants of India ("ICAI") and Standards on Auditing specified under Section 143(10) of the Companies Act, 2013, in so far as applicable. The Guidance Note requires that we comply with the ethical requirement of the Code of Ethics issued by ICAI, as revised from time to time.

We have conducted our verification and issued this certificate in accordance with the Guidance Note on Reports or Certificates for Special Purposes (Revised 2019) (the "Guidance Note") issued by the Institute of Chartered Accountants of India. The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India("ICAI").

We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

Opinion

Based on the information and documents presented to us. We report that **Annexure A**, prepared by the Company, presents, in all material respects, the possible tax benefits available to the Company and the Debenture holders of the Company, under the Direct Tax Laws as of the date of this certificate.

The benefits discussed in the enclosed **Annexure A** are not exhaustive. We are informed that this statement is only intended to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences and the changing Direct Tax Laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the proposed issue of non-convertible debentures ("NCDs") by the Company on in accordance with the provisions of Securities and Exchange Board of India (Issue and Listing of Non-convertible Debentures) Regulations, 2021, as amended and the guidelines and circulars issued thereunder (the "Issue"). We are neither suggesting nor advising the investors to invest in the Issue relying on this statement.

We are informed that the debentures of the Company will be listed on recognized stock exchanges in India. Annexure A has been prepared on that basis.

We do not express any opinion or provide any assurance as to whether:

- i. The Company or its debenture holders will obtain/continue to obtain these tax benefits in future;
- ii. the conditions prescribed for availing the tax benefits have been/would be met with; and
- iii. the revenue authorities/courts will concur with the views expressed herein.

Restriction of use

We hereby consent to inclusion of the extracts of this certificate in the Prospectus and/or any other document in relation to the Issue, and is not to be used, referred to or distributed for any other purpose without our prior written consent. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this certificate is shown or into whose hands it may come without our prior consent in writing. Any subsequent amendment / modification to provisions of the applicable laws may have an impact on the views contained in our statement. While reasonable care has been taken in the preparation of this certificate, we accept no responsibility for any errors or omissions therein or for any loss sustained by any person who relies on it.

Annexure A

STATEMENT OF POSSIBLE TAX BENEFITS AVAILABLE TO THE DEBENTURE HOLDER(S)

This Annexure is based on the provisions of the Income-tax Act, 1961 ('IT Act') in force as on the current date, after considering the amendments made by the Finance Act, 2024 ('FA, 2024') Proposed.

This Annexure intends to provide general information on the applicable provisions of the IT Act. However, in view of the nature of the implications, the investors are best advised to consult their respective tax advisors/consultants for appropriate counsel with respect to the specific tax and other implications arising out of their participation in the Portfolio as indicated herein.

Taxability under the IT Act

Section 50AA of the IT Act

The Finance Act, 2023 has inserted section 50AA to the IT Act to provide for a special provision for computation of capital gains in case of Market Linked Debenture (MLD). For the purposes of the said section, MLD have been defined in the Explanation to Section 50AA to mean a security by whatever name called, which has an underlying principal component in the form of a debt security and where the returns are linked to the market returns on other underlying securities or indices, and includes any security classified or regulated as a MLD by the Securities and Exchange Board of India.

Based on the definition, MLD has the following essential features:

- It is a security in the nature of debt;
- It has an underlying principal component;
- Returns with respect to such security are linked to market returns on other underlying securities or indices;
- And, by way of extension, it is also provided that any security classified or regulated by SEBI as an MLD, shall for the purposes of section 50AA of the IT Act, be deemed to be an MLD

The Non-Convertible Debentures (NCDs) issued/ proposed to be issued by the issuer creates a borrower-lender relationship between the issuer and subscriber and to that extent, such NCDs constitute a security in the nature of debt. Further, such NCDs, by their very nature, have a principal component (which is the price at which the subscriber subscribes to such NCDs).

However, the returns with respect to such NCDs (excess of redemption value over the principal component) is a fixed return and is not linked to any market return or underlying security or indices.

Given the same, the NCDs issued by the issuer do not satisfy the first limb of the definition of MLD as provided in the explanation to section 50AA of the IT Act and thus, such NCDs should not constitute an MLD for the purposes of section 50AA of the IT Act.

The second limb of the definition of MLD which deems any security classified or regulated by SEBI as an MLD, to be an MLD for the purposes of section 50AA of the IT Act, is an independent limb and need to be construed as such. We have been given to understand that, at present, the NCD issued/ proposed to be issued by the issuer is neither classified nor regulated by the SEBI as an MLD and accordingly, the NCDs issued by the issuer should not constitute an MLD for the purposes of section 50AA of the IT Act. However, the said fact-pattern would have to be re-visited in light of any amendment in the law as may be notified by SEBI in future.

A. Common provisions applicable to both Resident and Non-Resident debenture holders:

1. Determination of head of income for the purpose of assessability:

The returns received by the investors from the Non-Convertible Debentures ('NCD') in the form of 'interest' and gains on transfer of the NCD, may be characterized under the following broad heads of income for the purposes of taxation under the IT Act:

- Profits and gains of business or profession ('PGBP');
- Capital gains ('CG'); and
- Income from other sources ('IFOS').

For determining the appropriate head of income (as mentioned above) *vis-à-vis* the income or loss earned on/from the NCD, it will be pertinent to analyse whether the NCD are held as 'Investments' i.e. capital asset or as 'Stock-in-trade'.

If the NCD are held as 'Stock-in-trade', interest income as well as gain or loss on its transfer will be assessed to tax under the head PGBP, whereas, if the NCD are held as 'Investments', then the interest income will be assessed to tax under the head IFOS and any gain/loss on its transfer will be assessed to tax under the head CG (explained in ensuing paragraphs), based on facts of each case.

However, as per section 2(14) of the IT Act, 'capital asset' includes, *inter alia*, securities held by a Foreign Institutional Investor ('FII') [now known as Foreign Portfolio Investor ('FPI')] which has invested in such securities in accordance with the regulations made under Securities and Exchange Board of India Act, 1992. Accordingly, such securities, held by an FPI, will be characterised as 'capital asset' and classification as 'Stock-in-trade' shall not apply.

The investors may obtain specific advice from their tax advisors regarding the above classification and tax treatment.

2. Taxation of Interest and Gain/loss on transfer of debentures:

Taxation of Interest

Income by way of interest received on NCD held as 'Investments' (i.e. capital asset) will be charged to tax under the head IFOS at the rates applicable to the investor after deduction of expenses, if any, allowable under section 57 of the IT Act. These are essentially expenses (not being in the nature of capital expenditure) laid out or expended wholly and exclusively for the purpose of earning the interest income. In case of NCD held as 'Stock-in-trade', interest received thereon will be charged to tax under the head PGBP. Further, any expenditure specifically laid out or expended wholly and exclusively for the purpose of earning such interest income shall be allowed as deduction while computing income under the head PGBP.

The investors may obtain specific advice from their tax advisors regarding the tax treatment of their Interest income.

Taxation of gain or loss on transfer

(a) Taxable under the head PGBP

As discussed above, depending on the particular facts of each case, the NCD may, in certain cases, be regarded to be in the nature of 'Stock-in-trade' and, accordingly, the gains from the transfer of such NCD should be considered to be in the nature of business income and hence chargeable to tax under the head PGBP.

In such a scenario, the gains from the business of investing in the NCD may be chargeable to tax on a 'net' basis (i.e. net of allowable deductions for expenses under the head PGBP/allowances under

Chapter IV – Part D of the IT Act).

Based on section 145 of the IT Act, the timing of charging any income to tax would depend on the method of accounting followed by the taxpayer consistently (i.e. cash or mercantile).

Investors should obtain specific advice from their tax advisors regarding the manner of computing business income, the deductions available therefrom and the tax to be paid thereon.

(b) Taxable under the head Capital Gains

As discussed above, based on the particular facts of each case, the NCD may, in certain cases, be regarded to be held as 'Investments' in which case the gains or loss from the transfer of such NCD should be chargeable to tax under the head CG.

In such a scenario, the gains / loss from the transfer of such NCD may be chargeable to tax on a 'net' basis (i.e. net of acquisition cost of NCD, expenditure incurred in relation to transfer of NCD).

Investors should, however, seek specific advice from their tax advisors/ consultants in respect of characterization of capital gains, the manner of computation and the tax to be paid thereon.

3. Period of holding and Capital gain – long term & short term:

As per section 2(29AA) read with section 2(42A) of the IT Act, listed NCD is treated as a long-term capital asset if the same is held for more than 12 months immediately preceding the date of its transfer and consequently, the gain/ loss on transfer of such NCD should be treated as long term capital gain/ loss.

Accordingly, if listed NCD is held for upto 12 months immediately preceding the date of its transfer, the same should be treated as a short-term capital asset and the gain/ loss on transfer of such NCD should be treated as short-term capital gain/ loss.

Without prejudice to the fact that the NCDs to be issued by the issuer are not MLD (as has been concluded at the outset), where, for whatsoever reasons, the NCDs are treated as MLDs, then in such cases, as per the amendment by the FA, 2023, the capital gains arising on transfer or redemption or maturity of such NCDs shall be deemed to be capital gains arising from transfer of a short-term capital asset. Further, in computing the capital gains, no deduction shall be allowed on account of Securities Transaction Tax (STT) paid, if any.

4. Computation of capital gains and tax thereon

Capital gains is computed after reducing from the consideration received for the transfer of the capital asset ['full value of consideration (FVC)], the cost of acquisition (CoA) of such asset and the expenses incurred wholly and exclusively in connection with the transfer. The capital gains so computed will be chargeable to tax at the rates as detailed in the ensuing paragraphs.

5. Set off of capital losses

As per section 74 of the IT Act, long-term capital loss incurred during a year can be set-off only against long term capital gains arising in that year or in subsequent years and cannot be set-off against short-term capital gains arising in that year or in subsequent years. The long-term capital loss remaining after set-off, if any, can be carried forward for eight years immediately succeeding the year in which the loss was first computed, to be for set-off against subsequent years' long-term capital gains.

On the other hand, short-term capital loss incurred during a year can be set-off against both, short-term and long-term capital gains of the same year or of subsequent years. The short-term capital loss remaining after set-off, if any, can be carried forward for eight years immediately succeeding the year in which the loss was first computed, to be set-off against subsequent years' short-term as well as long-term capital gains.

B. Tax benefits available to Resident NCD holders:

- Interest on NCD received by resident NCD holders would form part of their total income and be subject to tax at the applicable rates of tax (Note 1 and 2 below) in accordance with and subject to the provisions of the IT Act.
- Capital gains on transfer of NCD shall be computed by deducting from the FVC, expenditure incurred wholly
 and exclusively in connection with the transfer and the CoA of the NCD.

As per section 112 of the IT Act, capital gains arising on the transfer of long-term capital assets being listed debentures are subject to tax at the rate of 12.5% (plus applicable surcharge and health & education cess – Note 2 below) on the capital gains calculated without indexing the cost of acquisition (Fourth *proviso* to Section 48 restricts indexation benefit in case of long-term capital asset being a bond or debenture).

In case of an individual or HUF, being a resident, where the total income as reduced by such long-term capital gains is below the maximum amount which is not chargeable to income-tax, then, such long-term capital gains shall be reduced by the amount by which the total income as so reduced falls short of the maximum amount which is not chargeable to income-tax and the tax on the balance of such long-term capital gains shall be computed at the rate mentioned above.

Short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months would be taxed at the applicable rates of tax (as mentioned in Note 1 and 2 below) in accordance with the provisions of the IT Act.

C. <u>Tax benefits available to Non-Resident debenture holders:</u>

- A non-resident Indian has an option to be governed by Chapter XII-A of the IT Act, subject to the provisions contained therein which are given in brief as under:
- As per section 115C(e) of the IT Act, the term "non-resident Indian" means an individual, being a citizen of India or a person of Indian origin who is not a "resident". A person shall be deemed to be of Indian origin if he, or either of his parents or any of his grand-parents, was born in undivided India.
- As per section 115E of the IT Act, interest income from debentures acquired or purchased with or subscribed to in convertible foreign exchange will be taxable at 20% (plus applicable surcharge and cess), whereas long term capital gains on transfer of such debentures will be taxable at 12.5% (plus applicable surcharge and cess Note 2 below) of such capital gains without indexation of CoA. Short-term capital gains will be taxable at the applicable rates of tax (as mentioned in Note 1 and 2 below) in accordance with and subject to the provisions contained therein.
- Under section 115F of the IT Act, long term capital gains arising to a non-resident Indian from transfer of debentures acquired or purchased with or subscribed to in convertible foreign exchange will be exempt from capital gain tax if the whole of the net consideration is invested within six months after the date of transfer of the debentures in any specified asset or in any saving certificates referred to in section 10(4B) of the IT Act in accordance with and subject to the provisions contained therein.
- Under section 115G of the IT Act, it shall not be necessary for a non-resident Indian to file a return of income under section 139(1) of the IT Act, if his total income consists only of investment income as defined under section 115C and/or long term capital gains earned on transfer of such investment acquired out of convertible foreign exchange, and the tax has been deducted at source from such income under the provisions of Chapter XVII-B of the IT Act in accordance with and subject to the provisions contained therein.
- Under section 115H of the IT Act, where a non-resident Indian becomes a resident in India in any subsequent
 year, he may furnish to the Assessing Officer a declaration in writing along with return of income under

section 139 for the assessment year for which he is assessable as a resident, to the effect that the provisions of Chapter XII-A shall continue to apply to him in relation to the investment income (other than on shares in an Indian Company) derived from any foreign exchange assets in accordance with and subject to the provisions contained therein. On doing so, the provisions of Chapter XII-A of the IT Act shall continue to apply to him in relation to such income for that assessment year and for every subsequent assessment year until the transfer or conversion (otherwise than by transfer) into money of such assets.

- In accordance with and subject to the provisions of section 115-I of the IT Act, a non-resident Indian may opt not to be governed by the provisions of Chapter XII-A of the IT Act. In such a case, long-term capital gains on transfer of listed debentures would be subject to tax at the rate of 12.5% (plus applicable surcharge and cess Note 2 below) computed without indexation of CoA.
- Interest income and short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months preceding the date of transfer, would be taxed at the applicable rates of tax (as mentioned in Note 1 and 2 below) in accordance with and subject to the provisions of the IT Act.
- Without prejudice to the fact that the NCDs to be issued by the issuer are not MLD (as has been concluded at the outset), where, for whatsoever reasons, the NCDs are treated as MLDs, then in such cases, as per the amendment by the FA, 2023, the capital gains arising on transfer or redemption or maturity of such NCDs shall be deemed to be capital gains arising from transfer of a short-term capital asset. Further, in computing the capital gains, no deduction shall be allowed for Securities Transaction Tax (STT) paid, if any.
- Where debentures are held as stock-in-trade, the income on transfer of debentures would be taxed as business income in accordance with and subject to the provisions of the IT Act.
- As per section 90(2) of the IT Act read with the Circular no. 728 dated October 30, 1995, issued by the Central Board of Direct Taxes ('CBDT'), in the case of a remittance to a country with which a Double Tax Avoidance Agreement ('DTAA') is in force, the tax should be deducted at the rate provided in the Finance Act of the relevant year or at the rate provided in the DTAA, whichever is more beneficial to the assessee.

As per Rule 21AB of Income Tax Rules, 1962 ('the Rules'), the following information shall be provided by an assessee in mandatory electronic Form No. 10F to avail the benefit under Section 90A, namely:—

- (i) Status (individual, company, firm etc.) of the assessee;
- (ii) Nationality (in case of an individual) or country or specified territory of incorporation or registration (in case of others);
- (iii) Assessee's tax identification number in the country or specified territory of residence and in case there is no such number, then, a unique number on the basis of which the person is identified by the Government of the country or the specified territory of which the assessee claims to be a resident;
- (iv) Period for which the residential status, as mentioned in the certificate referred to in sub-section (4) of section 90 or sub-section (4) of section 90A, is applicable; and
- (v) Address of the assessee in the country or specified territory outside India, during the period for which the certificate, as mentioned in (iv) above, is applicable.

Submission of a valid and subsisting tax residency certificate ('TRC') and other documents as notified under the IT Act is a mandatory condition for availing benefits under any DTAA.

D. Tax benefits available to Foreign Institutional Investors ('FII's) or Foreign Portfolio ` Investors ('FPI's):

- In accordance with and subject to the provisions of section 115AD of the IT Act,
 - ✓ Long-term capital gains on transfer of debentures by FIIs are taxable at 10% (plus applicable surcharge and cess Note 2 below)
 - ✓ Short-term capital gains are taxable at 30% (plus applicable surcharge and cess Note 2 below). The benefit of indexation of CoA will not be available.
- Income other than capital gains arising out of debentures is taxable at 20% (plus applicable surcharge and cess Note 2 below) in accordance with and subject to the provisions of Section 115AD of the IT Act.
- However, the above is subject to any relief available under DTAA entered into by the Government of India (as mentioned in Point C above).
- The CBDT has issued Notification No.9 dated 22 January 2014 which provides that Foreign Portfolio Investors (FPI) registered under SEBI (Foreign Portfolio Investors) Regulations, 2014 shall be treated as FII for the purpose of Section 115AD of the IT Act.

E. Withholding provisions

The withholding provisions provided under the IT Act are machinery provisions meant for tentative deduction of income-tax subject to regular assessment. The withholding tax is not the final liability to income-tax of an assessee. For rate of tax applicable to an assessee, please refer Notes 1 and 2 below:

S. No	Scenarios	Provisions
1	Withholding tax rate on interest on NCD issued to Indian residents	 Interest paid to residents other than insurance companies will be subject to withholding tax as per section 193 of the IT Act at the rate of 10 per cent. No tax is required to be deducted on interest paid to an individual or a HUF, in respect of debentures issued by a company in which the public is substantially interested if; the amount of interest paid to such person in a financial year does not exceed INR 10,000; and such interest is paid by an account payee cheque Further, prior to FA 2023, no tax was required to be deducted on any interest payable on any security issued by a company, where such security is in dematerialized form and is listed on a recognized stock exchange in India in accordance with the Securities Contracts (Regulation) Act, 1956 (42 of 1956) and the rules made thereunder. However, the FA, 2023 has omitted the aforesaid exemption and thus, any interest paid or credited on or after 1 April 2023, with respect to any security issued by a company, where such security is in dematerialized form and is listed on a recognized stock exchange in India in accordance with the Securities Contracts (Regulation) Act, 1956 (42 of 1956) and the rules made thereunder shall be liable to tax withholding as applicable.
2	Withholding tax rate on interest on NCD issued to Foreign Portfolio Investor (FII)	 Interest to a non-resident, not being a company or to a foreign company by a specified company or a business trust, may alternatively be eligible for concessional tax rate of 5 per cent under section 194LC(2)(ia) of the IT Act in respect of monies borrowed by it from a source outside India by way of issue of rupee denominated bond before the 1st day of July 2023. The FA, 2023 has extended the applicability of section 194LC of the IT Act with the following modification: The provisions of section 194LC of the IT Act shall continue to apply

S. No	Scenarios	Provisions
		to monies borrowed from a source outside India by way of issue of long- term bond or rupee denominate bond on or after 1 July 2023 where such bond is listed on a recognised stock exchange located in an International Financial Services Centre.
		2. The rate of tax in case of the aforesaid borrowings shall be 9 per cent.
		3. With respect to the borrowings made prior to 1 July 2023, the provisions of section 194LC of the IT Act, as they applied at that time, shall continue to apply <i>sans</i> the modification discussed <i>supra</i> .
		4. No extension of date for payment of interest in case of section 194LD of the IT Act has been made by the FA, 2023. Where such remains the case, interest therein shall then be subject to tax at the rate of 20% (excluding applicable surcharge and cess) subject to availability of DTAA benefits.
		Withholding rate will be increased by surcharge as applicable (Refer Note 2) and a health and education cess of 4 per cent on the amount of tax plus surcharge as applicable. However, where the withholding is done as per the rate of tax provided under the relevant DTAA, the said rate shall not be required to be increased by a surcharge and health and education cess.
3	Withholding tax rate on interest on NCD issued to non-residents other than FIIs	Interest payable to non-resident (other than FII) would be subject to withholding tax at the rate of 30 per cent/ 40 per cent as per the provisions of section 195 of the IT Act subject to relief under the relevant DTAA depending upon the status of the non-resident.
		Alternatively, benefits of concessional rates of 5/9 per cent under section 194LC of the IT Act provided the said interest falls within the ambit of the provisions of section 194LC of the IT Act and meets the conditions mentioned therein which <i>inter-alia</i> includes the loan / bond being issued prior to/ on or after 1st July 2023, obtaining approval from the Central Government with respect to the rate of interest, etc.
		■ Withholding rate will be increased by surcharge as applicable (Refer Note 2) and a health and education cess of 4 per cent on the amount of tax plus surcharge, as applicable.
4	Withholding tax rate on purchase of 'goods'	As per section 194Q of the IT Act, any sum payable by a 'buyer' to a resident for purchase of 'goods' of the value exceeding INR 50 Lakhs shall be liable to withholding at the rate of 0.1 percent.
		■ Buyer means a person whose total sales, turnover or gross receipts from the business carried on by him exceeds INR 10 crores in the financial year immediately preceding the financial year in which the purchase is carried out.
		■ TDS shall not be applicable where;
		Tax is deductible under any of the provisions of the IT Act;
		■ The CBDT has issued Circular No 13 of 2021 dated 30 June 2021 laying down guidelines under section 194Q of the IT Act. It inter alia provides that TDS under section 194Q of the IT Act shall not apply to transaction

S. No	Scenarios	Provisions
		in securities and commodities which are traded through recognised stock exchanges or cleared and settled by the recognised clearing corporation (including exchanges or corporation located in IFSC).
		 Given that the Circular does not provide clarity in respect of shares/ securities traded off-market, it is advisable that the investors obtain specific advice from their tax advisors regarding applicability of these provisions.

F. Requirement to furnish PAN under the IT Act

- i. Section 139A(5A) requires every person from whose income tax has been deducted under the provisions of chapter XVIIB of the IT Act, to furnish his PAN to the person responsible for deduction of tax at source.
- ii. As per provisions of section 206AA of the IT Act, the payer would be obliged to withhold tax at higher of the following rates in case the deductee has not furnished PAN to the payer or PAN which are inoperative (i.e. PAN which are not linked with aadhar):
 - a) at the rate in force specified in the relevant provision of the IT Act; or
 - b) at the rates in force; or
 - c) at the rate of twenty per cent

Section 206AA of the IT Act provides that the provisions shall not apply to non-residents in respect of payment of interest on long-term bonds as referred to in section 194LC and any other payment subject to such conditions as may be prescribed.

Further, as per Rule 37BC of the Income-tax Rules, 1962 ('the Rules'), the provisions of section 206AA shall not apply to non-residents (not having PAN) where the non-residents provide the following information to the payer of such income:

However, this shall apply only to interest, royalty, fees for technical services, dividend and payments on transfer of any capital asset.

- Name, email-id, contact number;
- Address in the country or specified territory outside India of which the deductee is a resident;
- A certificate of his being resident in any country or specified territory outside India from the government
 of the other country or specified territory if the law of that country or specified territory provides for
 issuance of such certificate;
- Tax Identification Number of the deductee in the country or specified territory of his residence and in a case, no such number is available, then a unique number on the basis of which the deductee is identified by the Government of that country or the specified territory of which he claims to be a resident.

Where an incorrect PAN is provided, it will be regarded as non-furnishing of PAN and TDS shall be deducted as mentioned above, apart from any other penal consequences that may ensue.

But other than a non-resident who does not have a permanent establishment in India. Further, FA, 2023 has carved-out from the definition of 'specified person' under section 206AB of the IT Act, a person who is not required to file/ furnish a return of income and who, in that behalf, is notified by the Central Government *vide* the Official Gazette.

G. General Anti Avoidance Rules ("GAAR")

The General Anti Avoidance Rule (''GAAR'') was introduced in the IT Act by the Finance Act, 2012. The Finance Act, 2015 made the provisions of GAAR applicable prospectively from 1 April 2017. Further, income accruing, arising, deemed to accrue or arise or received or deemed to be received by any person from transfer of investments made up to 31 March 2017 would be protected from the applicability of GAAR.

H. Exemption under Section 54F of the IT Act

Exemptions may be claimed from taxation of LTCG if investments in certain specified securities/assets is made subject to fulfillment of certain conditions.

Section 54F of the IT Act exempts long-term capital gains on transfer of any long-term capital asset (other than a residential house), held by an individual or HUF, if the net consideration is utilized to purchase/ construct a residential house within the specified timelines.

Note 1: Tax Rates

Resident Individuals and Hindu Undivided Families:

The FA, 2023 has amended section 115BAC of the IT Act by, *inter alia*, inserting sub-section (1A) thereto to provide that the tax regime provided under section 115BAC of the IT Act shall be the default tax regime applicable in case of an individual, HUF, AOP (other than a co-operative society), body of individual or artificial juridical, beginning with the financial year 2023-24, except where the assessee specifically opts to be governed by the erstwhile regime. In such cases, the following shall be the rate of tax applicable For FY 2024-2025:

Slab	Tax Rate
Total income up to INR 4,00,000	Nil
More than INR 4,00,001 but up to INR 8,00,000	5% of excess over INR 4,00,000
More than INR 8,00,001 but up to	10 % of excess over INR 8,00,000
INR 12,00,000	+ INR 20,000
More than INR 12,00,001 but up to	15 % of excess over INR 12,00,000
INR 16,00,000	+ INR 60,000
More than INR 16,00,001 but up to	20 % of excess over INR 16,00,000
INR 20,00,000	+ INR 1,20,000
More than INR 20,00,001 but up to	25 % of excess over INR 20,00,000
INR 24,00,000	+ INR 2,00,000
More than INR 24,00,000	30 % of excess over INR 24,00,000
	+ INR 3,00,000

In computing the income-tax under the new regime, certain deductions like standard deduction available to salaried taxpayers, etc., shall be allowed. However, most of the deductions/exemptions such as section 80C, 80D, etc. would need to be foregone.

A resident individual (whose total income does not exceed Rs 12,00,000) whose income is chargeable to tax under subsection (1A) of section 115BAC can avail rebate under section 87A. It is deductible from income tax before calculating health and education cess. The amount of rebate available would be 100 per cent of income-tax chargeable on his total income or Rs 60,000, whichever is less. Further, where the total income exceeds Rs 12,00,000, the assessee shall be entitled for deduction of an amount equal to the amount by which the income-tax payable on the total income exceeds the amount by which the total income exceeds Rs 12,00,000.

Where the assessee as stated above, specifically opts to be governed by the erstwhile regime, the income earned by assessee should be liable to tax as per the applicable slab rates (plus applicable surcharge and health and education cess) based on the taxable income of such assessee. The slab rates applicable to such investors (other than resident individuals aged 60 years or more) are as follows:

Income	Tax rate*
Up to INR 2,50,000#	NIL
Exceeding INR 2,50,000 up to INR	5 per cent of the amount by which the total income exceeds INR 2,50,000
5,00,000@	
Exceeding INR 5,00,000 up to INR	20 per cent of the amount by which the total income exceeds INR 5,00,000
10,00,000	plus INR 12,500\$
Exceeding INR 10,00,000	30 per cent of the amount by which the total income exceeds INR 10,00,000
-	plus INR 112,500\$

[@]A resident individual (whose total income does not exceed Rs 500,000) can avail rebate under section 87A. It is deductible from income tax before calculating health and education cess. The amount of rebate available would be 100 per cent of income-tax chargeable on his total income or Rs 12,500, whichever is less.

for resident senior citizens of sixty years of age and above but below eighty years of age, Rs 250,000 has to be read as Rs 300,000 and for resident senior citizens of eighty years of age and above ("super senior citizen) Rs 250,000' has to be read as Rs 500,000.

\$Similarly, for resident senior citizens of sixty years of age and above but below eighty years of age, Rs 12,500 has to be read as Rs 10,000 and Rs 112,500 has to be read as Rs 110,000. And for super senior citizen Rs 12,500 has to be read as Nil and Rs 112,500 has to be read as Rs 100,000.

Partnership Firms & LLP's:

The tax rates applicable would be 30 per cent (plus surcharge if applicable – Refer Note 2 and a health and education cess of 4 per cent on the amount of tax plus surcharge, if applicable).

Domestic Companies:

Type of Domestic company	Base normal tax rate on income (other than income chargeable at special rates)	Base MAT rate
Domestic companies having turnover or gross receipts of upto Rs 400 Crore in FY 2020-21 (For AY 2023-24) and in FY 2021-22 (For AY 2024-25)	25 per cent	15 per cent
Domestic manufacturing company set-up and registered on or after 1 March 2016 subject to fulfilment of prescribed conditions (Section 115BA)	25 per cent	15 per cent
Any domestic company (even if an existing company or engaged in non-manufacturing business) has an option to avail beneficial rate, subject to fulfilment of prescribed conditions (Section 115BAA)	22 per cent	Not applicable
Domestic manufacturing company set-up and registered on or after 1 October 2019 and commences manufacturing upto 31 March 2024, has an option to avail beneficial rate, subject to fulfilment of prescribed conditions (Section 115BAB)	15 per cent	Not applicable
Domestic companies not falling under any of the above category	30 per cent	15 per cent

^{*} plus surcharge if applicable and a health and education cess ('cess') of 4 per cent on the amount of tax plus surcharge,if applicable).

Note 2: Surcharge (as applicable to the tax charged on income)

Non-corporate assesses (other than firm, co-operative societies and FIIs):

Particulars	Rate of Surcharge
Where total income (including dividend income and income under the provisions of	Nil
section 111A, section 112A and section 112 of the IT Act) does not exceed Rs 50	
lacs	
Where total income (including dividend income and income under the provisions of	10 per cent on total tax
section 111A, section 112A and section 112 of the IT Act) exceeds Rs 50 lacs but	
does not exceed Rs 1 crore	
Where total income (including dividend income and income under the provisions of	15 per cent on total tax
section 111A section 112A and section 112 of the IT Act) exceeds Rs 1 crore but	
does not exceed Rs 2 crore	
Where total income (excluding dividend income and income under the provisions of	15 per cent on total tax
section 111A, section 112A and 112 of the IT Act) does not exceed Rs 2 crore but	
total income (including dividend income and income under the provisions of section	
111A, section 112A and 112 of the IT Act) exceeds Rs 2 crore	

Note: The Finance Act, 2022 from FY 2022-23 has capped the surcharge rates for long-term gains chargeable to tax under section 112 of the IT Act as well.

As per the FA, 2023, the maximum surcharge rate in case of capital gains chargeable to tax under section 112 of the IT Act, in case of an assessee being an individual, HUF, AOP (not being a co-operative society), BOI or artificial juridical person is also capped to 15%.

FIIs (Non – corporate):

Particulars	Rate of Surcharge
Where total income (including dividend income or income of the nature	Nil
referred to in section 115AD(1)(b) of the IT Act) does not exceed Rs 50 lacs	
Where total income (including dividend income or income of the nature	10 per cent on total tax
referred to in section 115AD(1)(b) of the IT Act) exceeds Rs 50 lacs but does	
not exceed Rs 1 crore	
Where total income (including dividend income or income of the nature	15 per cent on total tax
referred to in section 115AD(1)(b) of the IT Act) exceeds Rs 1 crore but does	
not exceed Rs 2 crore	
Where total income (excluding dividend income or income of the nature	15 per cent on total tax
referred to in section 115AD(1)(b) of the IT Act) does not exceed Rs 2 crore	
but total income (including dividend income or income of the nature referred	
to in section 115AD(1)(b) of the IT Act) exceeds Rs 2 crore	
Where total income (excluding dividend income or income of the nature	- 25 per cent on tax on income
referred to in section 115AD(1)(b) of the IT Act) exceeds Rs 2 crore	excluding dividend income or
	income of the nature referred to in
	section
	115AD(1)(b) of the IT Act
	- 15 per cent on tax on dividend
	income
	or income of the nature referred to in
	section 115AD(1)(b) of the IT Act

Note: The FA, 2023 has capped the highest surcharge rate to 25 per cent.

For assessees other than those covered above:

Particulars	Rate of surcharge applicable
Non-corporate taxpayers being firms and co-operative societies	Nil where total income does not
	exceed Rs 1 crore
	From FY 2022-23 7 per cent where
	total income exceeds Rs 1 crore but
	does not exceed Rs 10 crore
	From FY 2022-23 12 per cent where
	total income exceeds Rs 10 crore
Domestic companies (other than companies availing benefit under section	Nil where total income does not
115BAA and section 115BAB of the IT Act)	exceed Rs 1 crore
	7 per cent where total income
	exceeds Rs 1 crore but does not
	exceed Rs 10 crore
	12 per cent where total income
	exceeds Rs 10 crore
Domestic companies availing benefit under section 115BAA and section	10 per cent (irrespective of total
115BAB of the IT Act	income)
Foreign Companies (including corporate FIIs)	Nil where total income does not
	exceed Rs 1 crore
	2 per cent where total income
	exceeds Rs 1 crore but does not
	exceed Rs 10 crore
	5 per cent where total income
	exceeds Rs 10 crore

A health and education cess of 4 per cent is payable on the total amount of tax plus surcharge.

Global economic overview

Global economy is expected to grow at 3.3% both in CY 2025 and CY 2026

Globally, uncertainties remain elevated due to the rapidly evolving trade tensions, particularly the tariff escalations imposed by the US on various countries. The global uncertainty that has persisted since Donald Trump's presidency has been reflected in the underwhelming fourth-quarter growth experienced by advanced Western economies. Growth has moderated in both the US and the eurozone, and has been sluggish in the UK, despite a marginal pickup.

According to the International Monetary Fund's (IMF) World Economic Outlook (January 2025), global GDP growth prospects for 2025 and 2026 are expected to remain steady at 3.3%. However, inflation remains a concern, with the "last mile" of inflation proving sticky across advanced Western economies. The US, Euro Area, and the UK have all recorded a pickup in inflation, driven primarily by core or services inflation. Furthermore, the risks to inflation remain significant, with potential tariffs imposed by the US on imports posing a threat. In the US, GDP grew at an annualized and seasonally adjusted rate of 2.8% in the third quarter of 2024, down from 3.0% in the second quarter, due to a further decrease in residential fixed investment and a downturn in private inventory investment. The euro area's GDP rose 0.4% in the third quarter of 2024, compared to 0.2% in the previous quarter. The UK's economic growth moderated to 0.1% quarter-on-quarter in the third quarter of 2024, down from 0.5% in the second quarter, due to a significant slowdown in the services sector.

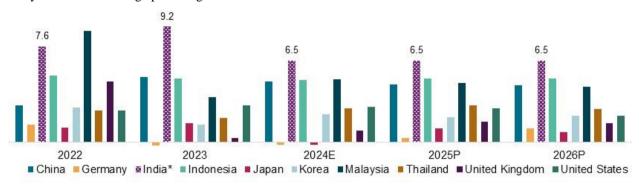

In contrast, the Indian economy has been one of the fastest-growing major economies globally during fiscal 2024, logging a robust 9.2% growth rate on the back of strong domestic fundamentals and benign inflation expectations. The National Statistical Office (NSO) expects the real GDP to grow at 6.5% in fiscal 2025, according to its second advance estimate of national income. Crisil Intelligence expects the GDP growth rate to remain steady at 6.5% in fiscal 2026, driven primarily by private consumption, which is expected to recover due to better agricultural prospects and an increase in government consumption expenditure. While the budget's tax cuts are expected to boost household consumption, the overall fiscal impulse to economic growth is expected to decrease due to the continued reduction in the fiscal deficit. Easing inflation, combined with the Reserve Bank of India's (RBI) rate cuts, is expected to lift consumption. However, geopolitics will remain a key monitorable factor in the next fiscal year, given the potential wide-ranging changes expected from the Donald Trump administration.

Global energy prices have picked up sharply, rising 7.2% in January after remaining broadly steady in the previous month, driven by an equivalent increase in global oil prices. Brent crude oil prices rose 7.3% in January, reaching an average of \$79.2 per barrel, up from \$73.8 per barrel, due to anticipated supply disruptions arising from widened sanctions on Russia

and potential sanctions on Iran, as well as increased demand due to colder weather in the Northern Hemisphere.

The US Federal Reserve has cut its benchmark rate by 100 basis points between September and December 2024, allowing Asia-Pacific central banks to pivot on their monetary policies. The People's Bank of China (PBOC), Reserve Bank of India (RBI), and Bank of Korea (BoK) have all initiated rate cuts. The RBI's Monetary Policy Committee (MPC) cut policy rates by 25 basis points, the first cut since May 2020, in response to easing inflation and a slowing economy. Crisil expects the MPC to cut rates by 75-100 basis points in the next fiscal year, although this rate cut cycle is expected to be less pronounced than the previous rate cut of 225 basis points during the pandemic. The US tariff hikes, moderating US Federal Reserve rate cuts, and weather-related risks are all expected to have a bearing on the rate-cutting cycle.

On-year real GDP change percentage

Note: All forecasts refer to IMF forecasts on calendar year basis. *For India data and forecast are presented on fiscal year basis as per MoSPI SAE, with fiscal 2024-25 shown in 2024; E: Estimate, P: Projected Source: International Monetary Fund (IMF October 2024 World Economic outlook and January 2025 update), Ministry of Statistics and Programme Implementation (MoSPI) Second Advance Estimates (SAE), Crisil Intelligence

The growth forecast for emerging markets and developing economies has been unchanged at 4.2% for 2024 (versus April 2024 forecast). Similar to advanced economies, growth outlook for emerging market and developing economies is remarkably stable for the next two years, hovering at about 4.2%, a level similar to 2024, and steadying at 3.9% by 2029. China's growth forecast for 2024 was unchanged at 4.8% and is projected to slow down to 4.6% in 2025 due to heightened trade policy uncertainty and property market drag. China's growth is forecasted to continue decelerate to 3.3% in 2029 due to challenges from an aging population and slowing productivity growth. India's growth forecast for 2024 (fiscal 2025) has been revised downward to 6.5% in January 2025 (vs. 7.0% in October 2024 forecast) as pent-up demand accumulated during the pandemic has been exhausted. IMF projects India's GDP to remain stable at 6.5% in 2025 and 2026.

On-year real GDP change percentage

Country	2022	2023	2024E	2025P	2026P

An overview of the Indian economy

India expected to remain one of the fastest growing economies in the world

Prior to the onset of the pandemic, the Indian economy was among the fastest growing in the world. In the years leading up to the global health crisis, which severely disrupted economic activities, India's economic indicators showed gradual improvement, driven by strong domestic consumption and a reduced reliance on global demand. Despite ongoing global geopolitical instability, India has maintained its position as one of the fastest-growing economies globally. As of February

2025, the National Statistical Office (NSO) estimates that the country's real GDP will grow at 6.5% year-on-year in fiscal 2025, according to its second advance estimate of national income.

Looking ahead, Crisil Intelligence expects India's GDP growth to remain steady at 6.5% in fiscal 2026. The combination of easing inflation, the RBI rate cuts and the personal income tax cuts announced in the fiscal 2026 budget are expected to benefit households and boost consumption. However, a significant pickup in investment will depend on a revival in private sector investment. The overall fiscal stimulus to economic growth is likely to decrease due to the continued reduction in the fiscal deficit.

India's economy expected to grow at 6.5% in fiscal 2026

Note: E = Estimated, P = Projected; GDP growth till fiscal 2024 is actuals. GDP Estimates for fiscals 2024- 2025 is based on Second advance NSO Estimates and 2025-2026 is projected based on Crisil Intelligence estimates and that for fiscals 2026-2029 based on IMF estimates; Source: NSO, Crisil Intelligence

Over the past three fiscals (FY22-24), Indian economy has outperformed its global counterparts by witnessing a faster growth. In IMF's October 2024 update, it raised the GDP growth forecast for India highlighting India's improved prospect for private consumption particularly in rural areas. Going forward as well, IMF projects that Indian economy will remain strong and would continue to be one of the fastest growing economies.

RBI cuts repo rate by 25 bps, maintains neutral stance

During fiscal 2023, due to the rise in Inflation globally, including India, led by soaring food and fuel prices. This prompted major central banks to hike interest rates to combat inflation. The Reserve Bank of India raised the repo rate by a cumulative 250 basis points to 6.5% in fiscal 2023. Similarly, the US Federal Reserve increased interest rates by a cumulative 525 basis points between February 2022 and July 2023. Globally, major central banks are currently cautious about cutting rates, amid slower disinflation and strong economic growth.

The US Federal Reserve cut the federal funds rate by total 100 basis points with first rate cut of 50 bps in September 2024 followed by 25 bps each in November and December 2024 in response to the easing inflationary pressures.

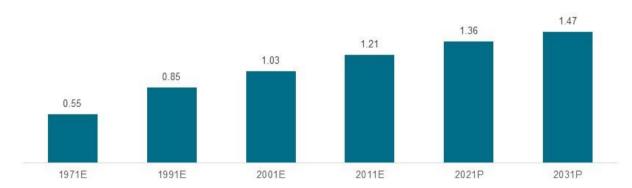

In India, RBI also began to ease its monetary policy stance, delivering its first rate cut in February 2025. The central bank decreased the repo rate by 25 basis points to 6.25%, citing easing inflation, which had moved closer to its target rate of 4%. Crisil Intelligence expects repo rate cut of 75-100 basis points (including 25 basis points cut in February 2025) in the current rate cut cycle.

Indigenous advantages to result in a stronger economic growth rate in the longer term

India has the largest population in the world

As per the report published (in July 2020) by National commission on population, Ministry of Health & Family Welfare report, India's population in 2011 was 1.21 billion, comprising nearly 246 million households. It should be noted that decadal growth rate during 2001-2011 stood at 17%. This is estimated to have fallen to 12% during 2011-2021 and is likely to decline further to 9% during 2021-2031. However, with 1.47 billion estimated population in 2030, India will continue to be a major opportunity market from demand perspective. Additionally, as per United Nations Department of Economic and Social Affairs, India has overtaken China as the world's most populous country in April 2023.

India's population growth trajectory (billion)

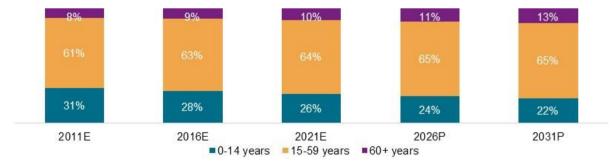

Note: P – Projected, E – Estimates

Source: Census of India 2011, Ministry of Health and family welfare, Crisil Intelligence

Favourable demographics

India is also one of the countries with the largest youth population, with a median age of 28 years. About 90% of Indians are aged below 60 years. It is estimated that 64% of this population is aged between 15 and 59 years. Crisil Intelligence expects the existence of a large share of working population, coupled with rapid urbanisation and rising affluence, will propel growth of the Indian financial services sector.

India's demographic division (share of different age groups in India's population)

Note: P – Projected, E – Estimates

Source: Census of India 2011, Ministry of Health and family welfare, Crisil Intelligence

Rise in urbanization

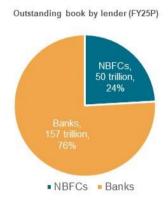

Urbanisation is a key growth driver for India, as it leads to faster infrastructure development, job creation, development of modern consumer services, and the city's ability to mobilise savings. The share of urban population in total population

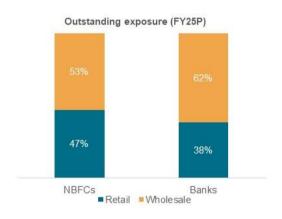

has been consistently rising over the years and is expected to reach 36% by 2025 from 31% in 2011, spurring more demand. Urban consumption in India has shown signs of improvement and given the country's favourable demographics, coupled with rising disposable incomes, the trend is likely to continue and drive domestic economic growth.

Overview on NBFC sector

Credit growth faces turbulence amid challenges in unsecured credit

Wholesale credit continues to dominate lending

P-Projected

Note:

- 1. The above representation of bank credit is exclusive of agriculture credit
- 2. Numbers in the presentation are adjusted for the HDFC merger, with booked moved to banks for like-for-like comparison

Source: Reserve Bank of India (RBI), company reports, Crisil Intelligence

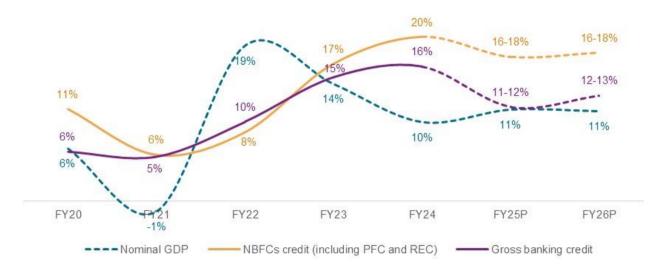

The financing market, including banks (excluding agriculture credit) and non-banking financial companies (NBFCs)/housing finance companies (HFCs), is projected to be valued at Rs 208 trillion by the end of fiscal 2025. Banks are expected to continue dominating the market, accounting for a share of about 76% with a portfolio of Rs 157 trillion. Meanwhile, NBFCs/ HFCs are expected to hold a share of about 24% with Rs 50 trillion.

Secured asset classes, including housing finance, gold loans, infrastructure finance, and micro, small and medium enterprise (MSME) finance, are expected to drive loan book growth in fiscal 2025. Meanwhile, unsecured asset classes, such as personal loans and microfinance, are expected to experience a slowdown.

As of March 2024, the financing market stood at Rs 181 trillion, with banks accounting for Rs 139 trillion and NBFCs for Rs 42 trillion.

Momentum in credit growth continued in fiscal 2024, driven by vehicle loans, personal loans, housing finance, and microfinance in the retail segment and MSME and infrastructure financing in the wholesale segment. This growth trend was a continuation of the resurgence seen in fiscal 2023, which marked a return to pre-pandemic levels. Pandemic-related disruptions had slowed credit growth in fiscals 2021 and 2022. NBFCs' credit has rebounded since, clocking a healthy compound annual growth rate (CAGR) of 12% between fiscals 2020 and 2024.

Retail-driven credit expansion to sustain momentum for NBFCs

P-Projected

Note: Historical credit growth numbers adjusted for the merger of HDFC Ltd with HDFC Bank for fair comparison Source: RBI, National Housing Bank (NHB), Ministry of Finance, company reports, Crisil Intelligence

Prior to the onset of the pandemic, the Indian economy was among the fastest growing economies in the world. In the years leading up to the global health crisis, which severely disrupted economic activities, the country's economic indicators improved gradually owing to strong domestic consumption and lower reliance on global demand. The Indian economy remains one of the fastest growing despite challenges posed by global geopolitical instability. India's real gross domestic product (GDP) exceeded forecasts in fiscal 2024, expanding 9.2%. The National Statistics Office's second advance estimates indicate real GDP growth of 6.5% in fiscal 2025, 10 basis points (bps) higher than that indicated by the first advance estimates released in January.

Crisil Intelligence expects India's real GDP growth to be steady at 6.5% in fiscal 2026, assuming the upcoming monsoon season to be normal and commodity prices to remain soft. Private consumption is expected to recover further, while investment growth hinges on private capital expenditure (capex). The pick-up in GDP growth will be mild because of overall lower fiscal impulse. Emerging global risks from United States (US) tariff hikes are a downside risk for domestic growth.

Expectations of healthy agricultural production and cooling food inflation will boost private consumption. Softer food inflation should create space in household budgets for discretionary spending. Further, the tax benefits announced in Union Budget 2025-2026 and increased allocations towards key asset- and employment-generating schemes are expected to support consumption.

Easing of monetary policy by the RBI is expected to support discretionary consumption. Crisil Intelligence expects the RBI's Monetary Policy Committee to cut the repo rate by 50-75 bps in fiscal 2026. The central bank's recent liquidity-easing measures and easier regulations for NBFCs are expected to transmit the benefits from an easier monetary policy to the broader economy.

Performance of NBFCs to remain healthy in fiscal 2025 and fiscal 2026

NBFCs (including PFC and REC) saw credit grow 20% on-year in fiscal 2024, but the momentum is expected to moderate, with a projected expansion of 16-18% in fiscals 2025 and 2026 amid short-term headwinds. The retail segments will continue to drive credit growth, although the unsecured lending segment is expected to normalise from an elevated base. Meanwhile, the RBI's vigilant oversight and risk weight circular will temper growth in unsecured portfolios, ensuring a more measured pace of expansion.

However, in February, the RBI rolled back the 25% increase in risk weights on bank exposures to NBFCs, effectively reinstating the previous levels determined by external credit ratings. This revision, which takes effect from April 1, 2025, is expected to boost credit growth from banks to NBFCs, with a positive ripple effect on the overall credit flow to the retail segment in fiscal 2026. Furthermore, upon review, the RBI also decided to exclude microfinance loans from the higher risk weight applied to consumer credit and will subsequently attract 100% risk weight. On the other hand, wholesale credit is expected to grow faster, supported by momentum in infrastructure finance NBFCs and MSME lending.

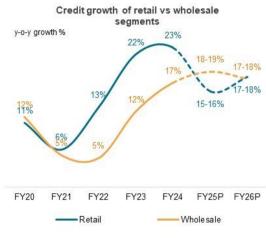

The retail segment was driven by strong growth in vehicle, personal and housing loans and microfinance in fiscal 2024, while on the wholesale front, MSME and infrastructure finance, particularly power finance companies, led the way with high double-digit growth rates. Consolidation within certain corporate groups and other corporate activities indicate buoyancy among NBFCs/ HFCs and expectations of good credit conditions, albeit with a pinch of caution.

Asset quality declined for segments such as gold loans and personal loans in fiscal 2024. The deterioration was primarily in the unsecured lending segments, which have seen an increase in slippages and, in turn, stage 3 assets. These primarily included microfinance and unsecured personal loans. Asset quality stress was also visible from the declining collection efficiencies of microfinance institutions (MFIs) in securitised pools. However, in the case of secured asset classes such as housing loans and vehicle loans, gross non-performing assets (GNPAs) remained rangebound with no significant deterioration.

The buoyant credit growth since fiscal 2022 is in sharp contrast to fiscal 2021, when the pandemic brought economic activity to a sudden halt and slowed demand for credit, impacted by funding challenges. But banks benefitted in this milieu and used their surplus liquidity to gain market share in a few key segments. In fiscal 2022, the economy began to reopen, and lockdowns were relaxed after the second wave of the pandemic, leading to normalisation of business activities — this drove credit growth in most segments.

Unsecured retail loans weigh on credit growth, while the wholesale segment remains resilient

P — Projected

Note:

- 1) Retail includes housing, vehicle, gold, microfinance, personal, consumer durables and education loans
- 2) Wholesale includes MSME, real estate and large corporate, infrastructure, and construction equipment loans Source: Industry, Crisil Intelligence

In fiscal 2025, the retail segment's share in the lending mix is projected to fall slightly to 47%, while the wholesale segment's share is expected to increase to 53%. This trend is likely to continue into fiscal 2026, with the share of both the segments holding steady. The retail segment's growth momentum is expected to moderate in fiscals 2025 and 2026, due to a cautious approach to unsecured lending and visible stress in the microfinance and personal loan segments. Higher slippages in stage 1 loans, resulting from customer overleveraging and election-related disruptions in the first quarter of fiscal 2025, are also contributing to this slowdown. As a result, Crisil Intelligence forecasts retail credit growth to slow to 15-16% in fiscal 2025 and 17-18% in fiscal 2026. This moderation is largely attributable to the normalisation of the unsecured segments, which had previously experienced rapid growth, following the RBI's risk weight circular.

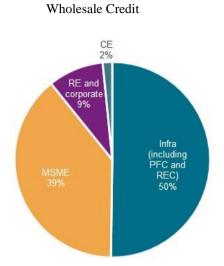

In contrast, the wholesale segment is poised to maintain its robust growth trajectory, with projected credit growth of 18-19% in fiscal 2025 and 17-18% in fiscal 2026. Driven by improvement in underlying asset quality and focused investments in infrastructure, the wholesale segment's growth is expected to be a key driver of overall credit expansion in the near term.

In fiscal 2024, the retail segment's share in the lending mix stood at 48%, driven by strong credit growth over the past two years. The wholesale segment also saw strong credit growth of 17%. These trends were a continuation of the patterns observed in fiscal 2023, when the retail segment grew 22% and the wholesale segment expanded 12%. The MSME segment was a key driver of growth in the wholesale segment in fiscal 2023, supported by steady growth in infrastructure financing. Historically, the retail segment had led the NBFC sector's growth post the fiscal 2018 crisis, while the wholesale segment had experienced low single-digit growth between fiscals 2021 and 2022.

NBFC credit growth momentum supported by secured lending segments in fiscal 2025

The retail portfolio of NBFCs is projected to grow to Rs 23 trillion by the end of fiscal 2025 from Rs 20 trillion in fiscal 2024. Within this portfolio, the unsecured segment has expanded significantly, increasing its share from 17% in fiscal 2020 to 28% in fiscal 2024. According to Crisil Intelligence, the unsecured segment's share is projected to decline in fiscal 2025, before gaining ground on the secured segment in fiscal 2026.

Despite the slowdown, unsecured credit expected to maintain steady share in the retail portfolio

P-Projected

Note: For calculation of unsecured retail loans given by NBFCs, segments such as personal, microfinance and consumer

durables loans, and a share of education loans are considered Source: RBI, NHB, MFIN, Crisil Intelligence

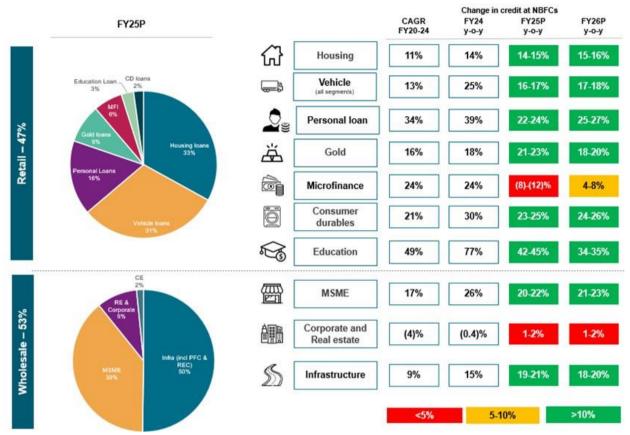

The surge in unsecured lending had raised concerns about underlying risks, prompting the RBI to issue a circular that led to a slowdown in credit during the second half of fiscal 2024. This slowdown has continued into fiscal 2025, driven, in part, by higher inflation and stagnant income, which could impair borrowers' repayment capability. Overleveraging at the borrower's end could also augment asset quality vulnerability. This is further exacerbated in unsecured lending, where there is no recourse to collateral and, hence, the loss given default is high. Following the RBI's circular, lenders are required to keep higher capital buffers against such exposures.

As a result, Crisil Intelligence expects the unsecured segment's growth to moderate to 12-14% in fiscal 2025, before accelerating to 20-22% in fiscal 2026. This growth trajectory reflects the ongoing impact of the RBI's circular, considerable deterioration in microfinance credit growth during fiscal 2025, and the evolving landscape of the retail lending market.

Between fiscals 2021 and 2024, i.e., the post-pandemic period, the secured segment logged a CAGR of 14%, surpassing pre-pandemic growth of 8%. In contrast, the unsecured segment clocked a staggering CAGR of 39% as NBFCs expanded their reach by targeting the new-to-credit customer segment and focusing on Tier II and lower-tier cities.

A decadal low savings rate of Indian households of 5.0% as of fiscal 2023 (as per second advance estimate FY23-24) owing to rising financial liabilities indicates a debt-driven consumption-led post-pandemic recovery. Further, recovery can be seen with improved savings rate to 5.2% as of fiscal 2024. The emergence of fintech companies (fintechs) has played a key role in driving the growth of the unsecured segment. Fintechs have been at the forefront of innovative lending practices, often catering to segments that traditional financial institutions might not reach.

Credit growth to be supported by secured lending segments, with moderation in unsecured loans

P-Projected

Source: Company reports, Crisil Intelligence

Housing finance: The housing finance sector saw 14% credit growth in fiscal 2024, led by affordable-HFCs and prime HFCs. The growth was driven by rising disposable incomes and increasing demand in smaller cities (Tier 2 and 3), supported by government initiatives and market penetration by HFCs. According to Crisil Intelligence, housing credit is projected to grow 14-15% in fiscal 2025 and 15-16% in fiscal 2026, driven by an anticipated repo rate cut of 75-100 bps (25 bps already done in February 2025) in the current cycle and government initiatives such as the Rs 30 billion allocation for the Interest Subsidy Scheme under Pradhan Mantri Awas Yojana - Urban 2.0 in Union Budget 2025-26. In addition, a projected 8-10% growth in housing demand and a 5-6% increase in capital values in the top 10 cities will support credit growth.

Vehicle finance: The vehicle finance segment has demonstrated a strong growth trajectory, with a CAGR of ~13% between fiscals 2020 and 2024, with NBFC credit growth in fiscal 2024 outpacing banks vehicle finance growth. Going forward, the growth is expected to be driven by a surge in demand for used vehicles and a normal monsoon season, which will boost demand for tractors and two-wheelers. Improving market sentiment following the RBI's repo rate cut and continued momentum in passenger vehicle sales will also contribute to growth. However, sluggish demand for commercial vehicles due to weak utilisation may pose a risk to the growth trajectory. Crisil Intelligence forecasts 16-17% growth in vehicle finance advances for NBFCs in fiscal 2025 and 17-18% in fiscal 2026.

Gold finance: NBFCs' gold loan credit grew 18.4% in fiscal 2024, outpacing the 16% CAGR over fiscals 2020-2024. Despite a slow start due to a temporary ban on a key player, growth rebounded after the ban was lifted in September

2024. With rising concerns over asset quality and overleveraging in unsecured loans, gold loans are becoming a preferred credit option. Although the RBI has highlighted irregular practices in the sector, NBFCs have shown resilience. With gold prices anticipated to increase due to strong demand, Crisil Intelligence expects 21-23% growth in gold loan advances for NBFCs in fiscal 2025, followed by 18-20% growth in fiscal 2026.

Microfinance: The microfinance industry logged a CAGR of 17% between fiscals 2020 and 2024. The industry grew 25% in fiscal 2024, with NBFC-MFIs expanding 24% during the period. However, the industry's growth momentum was disrupted in the first half of fiscal 2025 due to a combination of transient challenges, including extreme heat waves, general elections and loan waiver campaigns in Punjab. The primary reason for the industry's asset quality deterioration was overleveraging among borrowers. The industry is expected to face a steep decline in advances, with a projected decline of (8-12)% in fiscal 2025 and modest growth of 4-8% in fiscal 2026. This downturn is attributed to factors such as reduced disbursements, declining collection efficiencies, state-level regulatory hurdles, and MFIN's self-regulatory measures aimed at addressing overleveraging and promoting credit discipline among borrowers.

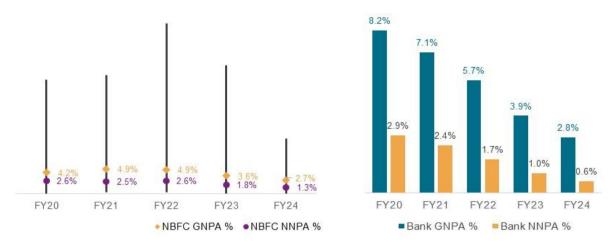

MSME finance: The MSME segment has a fundamental link to economic activity and was severely impacted during the pandemic. That said, after the pandemic, the segment logged healthy double-digit growth, supported by rise in corporate India's revenue. Crisil Intelligence expects MSME credit growth to moderate in fiscal 2025 on a high base. Further, growth in the secured loan against property (LAP) segment is expected to be higher than in non-LAP, owing to increased stress in the unsecured lending segment.

Real estate and corporate finance: NBFCs/HFCs are systematically trimming their wholesale portfolios and shifting their focus towards the retail business. This led to muted growth of -0.4% in fiscal 2024. Crisil Intelligence expects the wholesale book of NBFCs to start recovering in fiscal 2025, with a growth rate of 1-2%. This trend is expected to be sustained in fiscal 2026.

Infrastructure finance (including PFC and REC): The infrastructure book of NBFCs grew 15.4% in fiscal 2024 after expanding 12.2% in the previous fiscal. The growth momentum can be traced to investments in renewable power and a pick-up in the transmission and distribution sector amid increased power demand. Despite a moderation in government capital expenditure in fiscal 2025 compared with previous fiscals, power demand and infrastructure expansion in the power sector have remained strong, positioning NBFCs' infrastructure loan portfolios for healthy growth in fiscal 2025. Furthermore, the appointment of REC as the nodal agency for the rooftop solarisation project, announced in January 2024, is expected to provide an additional boost. According to Crisil Intelligence, these factors will drive 19-21% growth in NBFCs' infrastructure portfolio in fiscal 2025, followed by 18-20% growth in fiscal 2026.

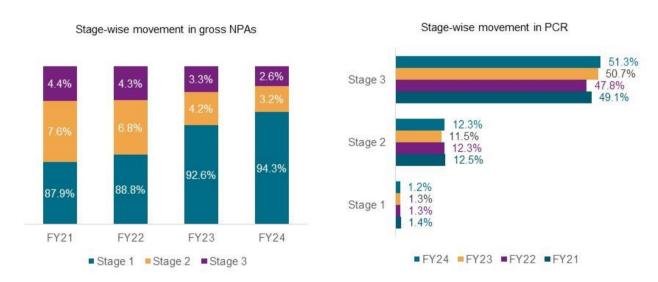

Asset quality pressure to mount for unsecured loans, secured to remain range-bound

Improving asset quality, a positive for medium-term growth

Note: For calculating GNPA and NNPA, 100 NBFCs that collectively accounted for loans and advances of Rs 23,000 billion as on March 31, 2024, were considered. The above set excludes PFC and REC. Source: RBI, company reports, Crisil Intelligence.

Decline in Stage 2 assets and higher provisioning instill optimism

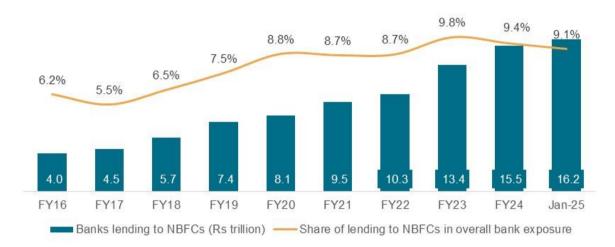

Note: The analysis is based on aggregate data for 27 NBFCs/HFCs in fiscal 2024, accounting for a gross exposure of Rs 15,810 billion as on March 31, 2024.

Source: RBI, company reports, Crisil Intelligence

The asset quality of NBFCs continued to improve until March 2024. Fiscal 2025 has been challenging for unsecured lending, with personal loans and microfinance facing asset quality concerns due to borrower overleveraging and collection disruptions. Crisil Intelligence expects GNPAs of the unsecured segment to remain elevated in fiscals 2025 and 2026, despite regulatory interventions. In contrast, secured retail assets such as housing and vehicle loans saw a decline in GNPAs in fiscal 2024, driven by effective collections and provisioning. However, vehicle loans may experience a marginal uptick in GNPAs in near term due to retail borrowers' exposure to unsecured lending. On the wholesale front, asset quality improved in fiscal 2024, driven by economic growth and robust credit expansion.

Infrastructure financing, in particular, has benefitted from its low-risk borrower profile, with GNPAs expected to decline further in fiscals 2025 and 2026.

Impact of risk weight circular and hardening of rates led to a decline in share of banks lending to NBFCs

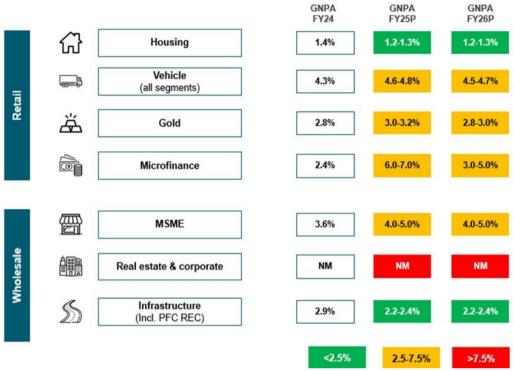

Source: RBI, Crisil Intelligence

In absolute terms, the credit exposure of banks to NBFCs increased 16% on-year to Rs 15.5 trillion in fiscal 2024 from Rs 13.4 trillion in fiscal 2023. On the other hand, the share of NBFCs in the overall credit exposure declined from 9.8% in fiscal 2023 to 9.4% in fiscal 2024 and further to 9.1% in January 2025. The moderation was driven by dynamic management of banking liquidity, which led to increased lending rates among banks and was further compounded by the RBI's risk weight circular. However, the recent reversal of the 25% increase in risk weights on bank exposures to NBFCs is expected to boost credit growth from banks to NBFCs.

The weighted average lending rates on outstanding rupee loans for banks increased from 8.72% in April 2022 to 9.85% in January 2025 (9.87%, if HDFC merger is excluded). Hardening of bank lending rates in relation to other funding avenues such as domestic capital markets and ECBs is expected to further moderate the share of bank borrowings this fiscal. However, bank borrowings are likely to rebound next fiscal as the effects of interest rate cuts are passed on to borrowers with a lag, making bank lending more competitive.

Unsecured lending to face higher stress with consequent deterioration in asset quality vis-à-vis range-bound trend in secured book

Notes:

- 1) P Projected, NM Not meaningful
- 2) Green: <2.5%, amber: 2.5-7.5%, red: >7.5%
- 3) Asset quality of real estate and corporate loans is not meaningful due to the addition of contractual moratoriums, extension of date of commencement of commercial operations (DCCO), one-time restructuring, and player strategy to downsize the wholesale portfolio

Securitisation volume up ~27% in nine months of this fiscal

The securitisation market in India has seen a significant surge in volume, with a 27% year-on-year increase to Rs 1.78 trillion in the first nine months of the current fiscal. This growth has been largely driven by private sector banks, which contributed 28% of the total issuances in the third quarter alone. The total issuance in the third quarter reached Rs 630 billion, a 60% increase from the same period last year.

In contrast, NBFCs have seen a modest 5% increase in originations. However, the number of first-time NBFC issuers has increased, with 15 new entities entering the market, bringing the total number of originators to 152. Private sector banks are expected to continue using securitisation as a balance sheet management tool, driving the market to new heights. Meanwhile, NBFCs are expected to see more new participants entering the market as they seek alternative funding sources.

Vehicle loans, including commercial vehicles and two-wheelers, accounted for 48% of securitisation volume, followed by mortgage-backed loans at 23%. Other asset classes, such as gold loans, microfinance loans, and personal and business loans, have also seen significant activity in the securitisation market.

The securitisation market is expected to continue growing, driven by the participation of private sector banks and the increasing demand for alternative funding sources from NBFCs. Despite some challenges, such as asset-quality issues in the microfinance sector, the market remains attractive for NBFCs amid tighter regulations around lending by banks. With banks the dominant investor class, accounting for 70% of the securitisation volume, the market is on track to hit record highs this fiscal.

Source: CRISIL Ratings

The securitisation and assignment of loan portfolios yields substantial benefits for NBFCs. Securitisation deals can effectively unlock liquidity, help manage asset-liability mismatches and liberate capital to pursue new lending opportunities. The assignment of loans to banks or other investors, meanwhile, enables NBFCs to transfer credit risk, reduce provisioning requirements, and enhance balance-sheet resilience. Furthermore, securitisation and assignments can provide NBFCs with access to a diversified funding base, diminish their reliance on traditional funding sources, and bolster their financial stability.

Housing finance - Review and outlook

Housing loan growth to remain range bound in fiscal 2025 and recover in fiscal 2026

The Indian housing finance sector—comprising financial institutions (FIs), scheduled commercial banks, scheduled cooperative banks, regional rural banks, agriculture and rural development banks, housing finance companies (HFCs), state-level apex cooperative housing finance societies and non-banking financial companies (NBFCs) - clocked a healthy 13.4% CAGR over fiscal 2020 to 2024 supported by rise in disposable income, healthy demand emanating from smaller cities markets, greater number of players entering the segment and government impetus on housing.

At the end of fiscal 2024, overall housing finance credit outstanding of banks and NBFCs/HFCs stood at ~Rs 33,989 billion, representing a 13% on-year increase. The growth was driven by the rising aspirations of a young population with growing disposable incomes as well as increased demand in smaller cities (tier II and III) facilitated by government initiatives and innovative digital tools which enabled lenders to more effectively assess cash flow-based incomes and broaden their market reach.

Notably, the demand for home loans remained robust despite the significant hike in reportates in fiscal 2023, which led

to higher interest rates over the next two fiscals. This resilience can be attributed to India's strong economic growth of 8.2% and the relative insulation of the salaried class from the impact of rising repo rates, allowing them to maintain their appetite for home loans.

Crisil Intelligence expects a range bound housing finance market of 13-14% growth in fiscal 2025 due to a slower economic growth rate of 6.4%, a delayed cut in repo rate by the RBI and disbursement headwinds stemming from state elections. However, with the full impact of anticipated repo rate cut of 75-100bps (25bps already done in February 2025) in the current cycle and government initiatives like Rs 30 billion allocation to Interest Subsidy Scheme (ISS) under PMAY in the union budget for fiscal 2025-26, the market is projected to bounce back with 14-15% growth.

Housing finance credit outstanding of NBFCs/HFCs and banks

Туре	Share in book FY24 (%)	Book (Rs billion) FY24	CAGR (%) FY20-24	Growth in FY24 (%)	Growth Outlook for FY25P (%)	Growth outlook for FY26P (%)

Banks	80	27,187	14	13	13-14	14-15
Overall	100	33,989	13	13	13-14	14-15

P: Projection

Note: HDFC Ltd and HDFC Bank became a merged entity effective July 1, 2023. Past numbers have been adjusted for HDFC Ltd.'s estimated loan book for the retail housing and commercial real estate segments to arrive at normalised credit growth.

Source: Company reports, RBI, Crisil Intelligence

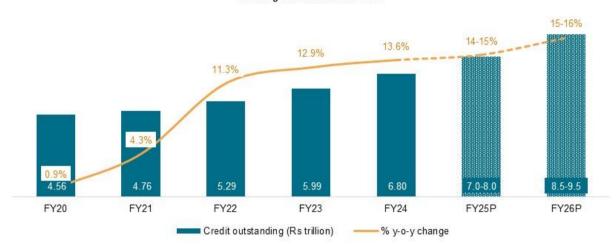

The merger of HDFC Ltd with HDFC Bank last fiscal has resulted in a shift in market share, with banks accounting for ~80% of retail housing credit. Banks have continued to gain market share over HFCs/NBFCs because of their competitive advantage in terms of higher liquidity and ability to offer lower interest rates.

Between fiscals 2020 and 2024, HFCs/NBFCs clocked ~11% CAGR, driven by a combination of factors such as improved affordability, pent-up demand and concessions on stamp duties by state governments. Additional support factors were initiatives from the central government, developer schemes and the RBI's accommodative monetary policy.

During the first nine months of fiscal 2025, housing loan book growth at HFCs was relatively slow compared to previous fiscal as they faced several headwinds in disbursements such as amendments in property registration systems in Karnataka and Madhya Pradesh, impact of HYDRA (Hyderabad Disaster Response and Asset Monitoring and Protection Agency) in Hyderabad, heavy rains in Andhra Pradesh as well as elections in many states including Maharashtra, Andhra Pradesh, Jharkhand and Haryana. Moreover, HFCs focused on high-yielding mortgage-based portfolios such as loans against property (LAP) and equity loans to support margins and portfolio growth. Additionally, HFCs have established dedicated exposure limits to expand their affordable housing portfolios, aiming to boost yields and ease pressure on their net interest margins (NIMs). However, as these headwinds eased towards the end of fiscal year and RBI pivoting to rate cutting in February, disbursements are expected to see an uptick. Crisil Intelligence expects housing loan book of HFCs to grow between 14-15% in fiscal 2025 and further rise by 15-16% in fiscal 2026 as the full impact of repo rate cuts on interest rates will boost home loan demand.

Housing credit at HFCs to grow steadily

Housing loans at NBFCs/HFCs

P: Projection

Note: HDFC Ltd and HDFC Bank became a merged entity effective July 1, 2023. Past numbers have been adjusted for estimated loan book of HDFC Ltd for the retail housing and commercial real estate segments to arrive at normalised credit growth.

Source: Company reports, RBI, Crisil Intelligence

According to Crisil Intelligence, the housing demand (in million square feet) in the top seven cities recorded a significant surge in fiscal 2024, with 23% increase in demand and 13% rise in capital value. This surge supported a 13.6% growth in home loans provided during fiscal 2024.

The COVID-19 pandemic had a significant impact on the residential market in 2020 and 2021, causing a decline in demand and resulting in a significant build-up of unsold inventory at an average of over five years to sell. As the pandemic's grip began to loosen in fiscal 2022, the residential market started to recover, and demand began to rebound. This resurgence in demand continued to gain momentum, culminating in a collective release of pent-up demand that was felt in fiscals 2023 and 2024 leading to a decline the average inventory overhang from over three years in fiscal 2023 to 2.7 years during fiscal 2024 and is expected to be range bound in fiscal 2025 and 2026.

Crisil Intelligence projects rise in capital value of real estate properties by 14% in fiscal 2025, supporting housing finance credit growth of banks and NBFCs/HFCs of 13-14%. Going ahead in fiscal 2026, as the existing stock is absorbed and demand starts to rise on account of repo rate cut by the RBI, developers will respond by launching new projects to meet the growing demand, supporting overall housing credit growth of 14-15% in fiscal 2026.

Affordable-housing finance outpaces overall housing growth

Over the past few fiscals, rapid urbanisation and migration to cities resulted in urban housing shortage, particularly among the economically weaker sections (EWS) of the society. In this milieu, new housing projects mushroomed, leading to a sharp rise in disbursements by affordable-housing finance companies (A-HFCs). Credit growth in the A-HFC segment was led by an aggressive expansion by relatively small HFCs to gain a major share of the affordable and/or, tier II and III cities' markets.

Demand for housing remained robust throughout fiscal 2024 but slowed down towards the end of the year due to the prolonged period of high interest rates. Additionally, some buyers who were initially looking at affordable housing

options opted to stretch their budgets to purchase lower-mid ticket homes priced between ₹25-75 lakh, driven by increasing property values. The Union Budget 2024-25 has allocated a significant amount of Rs 2.2 trillion for the Pradhan Mantri Awas Yojana (PMAY)-Urban over the next five years, which is expected to revive interest in affordable housing. Going forward, a push in the form of Rs 2.2 trillion allocation for Pradhan Mantri Awas Yojana (PMAY-Urban) over the next five years announced in Union Budget 2024-25 is likely to revive interest in affordable housing once again, which has lately seen a decline in construction activity, with developers increasingly shifting focus towards the premium and luxury segments in metros, tier II and III cities, etc. Moreover, the expected repo rate cuts of 75-100 bps, with 25 bps already implemented in February 2025, will provide relief to the underlying customer base. According to Crisil Intelligence, credit growth of the A-HFC segment is projected to slow down in fiscal 2025 to 19-20% mainly due to delayed in repo rate cut by the RBI and headwinds in disbursements faced by the overall sector. However, in fiscal 2026, credit growth is expected to rebound strongly to 22-23% on account of pass on of benefit of repo rate cut on interest rates and traction from PMAY schemes.

Note: Crisil Intelligence defines A-HFCs with average ticket size of less than Rs 2 million

A-HFCs: Growth to moderate in FY25, accelerate in FY26

Asset quality continued its improving trend and is expected to remain range bound

Housing portfolio continues to show resilience

P: Projection,

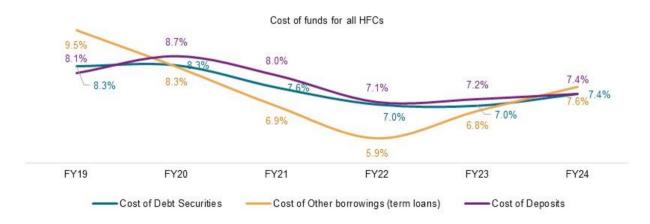

Note: HDFC Ltd and HDFC Bank became a merged entity effective July 1, 2023. Past numbers have been adjusted for HDFC Ltd.'s estimated loan book for the retail housing and commercial real estate segments to arrive at normalised credit growth

Source: Company reports, Crisil Intelligence

The housing portfolio has demonstrated a positive trend, with a decline in GNPAs since fiscal 2021, indicating an improvement in asset quality. In fiscal 2024, the housing portfolio's GNPA decreased 40 basis points to 1.4% due to the resilience of prime HFCs' customer base during the pandemic. Effective collections and higher provisioning also contributed to the improvement. Due to high interest rates in first nine months of fiscal 2025, lenders intensified their collection efforts and closely monitored early signs of delinquency, leading to an improvement in asset quality. As a result, Crisil Intelligence forecasts the GNPA of the housing portfolio to decline to 1.2-1.3% in fiscal 2025 and remain relatively stable in fiscal 2026. Furthermore, the anticipated reduction in the repo rate by 75-100 basis points in the current cycle, including the 25-basis point cut in February 2025, is expected to alleviate the burden of high-interest loans on customers, providing a stable outlook for the sector.

Rise in the cost of funds

Funding cost increase in fiscal 2024 with elevated interest rates

Note: Cost of funds is considered for LIC Housing Finance, Sammaan Capital, PNB Housing Finance, Bajaj Housing Finance, Can Fin Homes, Aadhar Housing Finance, Aptus Value Housing Finance and ICICI Home Finance. Source: Company reports, Crisil Intelligence

Profitability of HFCs remains robust during previous fiscals, trends to continue in short term with minor hiccups due to faster yield pass on floating rates loans

In fiscal 2024, HFCs saw a healthy double digit credit growth, led by increased loan disbursements expanding their overall loan book. The credit growth was accompanied by increase in yield on advances, owing to the issuance of new loans at higher interest rates and repricing of existing floating-rate loans, which fully absorbed the 250 basis points hike in repo rates from the previous fiscal year, resulting in a higher overall yield.

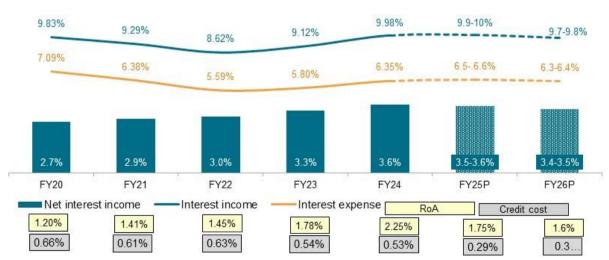

Simultaneously, the cost of borrowing rose due to new loans borrowed at higher interest rates and the repricing of existing floating-rate loans in fiscal 2024. However, since NBFCs maintain a balanced mix of fixed and floating-rate borrowings, the impact of the 250-basis points repo rate hike is more gradual, unlike the faster pass-through to the final borrower. As a result, in fiscal 2024, interest income on average assets increased to 10.0% from 9.1% in fiscal 2023, while interest expense on average assets rose to 6.3% from 5.8% in fiscal 2023, translating into the highest net interest income in the last five years, at 3.6%.

In fiscal 2024, some housing-finance companies' operating expenses increased due to investments in technology and operational upgrades. However, these costs were partially offset by higher fee income generated from loan repricing. In fiscal 2024, credit costs remained range-bound at 0.5%, resulting in a strong return on assets of ~2.2%. Crisil Intelligence projects a decline in both interest income on average assets and interest expenses on average assets for fiscal years 2025 and 2026. This downward trend is expected to be driven by the anticipated interest rate cut of 75-100bps (25 bps already done in February 2025) in the current cycle. The extent of the decline will depend on the lag in passing on the rate cut to end customers and its impact on borrowing costs.

Crisil intelligence expects a reduction in net interest income to average assets ratio due to the impact reporate cut by the RBI on the borrowing cost of HFCs. Credit cost will decline slightly in line with improvement in asset quality. RoA is expected to decline by about 1.7-1.8% primarily due to lower net interest income.

Further in the next fiscal, the impact of the repo rate changes will be higher, leading to a drop in net interest income to average assets ratio. Credit costs are expected to increase to 0.3-0.4% in line with loan book growth.

Credit costs to remain range at manageable levels in fiscals 2025 and 2026

P: Projected

Note: All ratios are based on total assets

credit growth. Source: Company reports, Crisil Intelligence

Housing finance – Industry overview

Crisil Intelligence defines affordable-housing loans as housing loans with an average ticket size of less than Rs 2 million.

Affordable-HFCs are able to garner share owing to their:

- Strong origination skills and a focused approach
- Ability to cater to a niche category of customers
- Relatively superior customer service and diverse channels of business sourcing
- Non-salaried profile of ~80% of customers
- Higher presence in smaller cities

These factors have helped affordable-HFCs capture market share as banks have become risk-averse and are focusing on high-ticket customers with good credit profiles.

By virtue of being largely present in metros and urban areas, the ticket sizes of banks and large HFCs have followed rising property prices. Further, the focus on the urban salaried segment by banks and large HFCs has enabled affordable-HFCs to tap the non-salaried customer, Tier 3 cities and rural markets.

Business model

The high cost of serving the affordable-housing category has prompted financiers to adopt innovative models to source business. An HFC targeting the low-income, informal-sector customer employs a hub-and-spoke model, where its retail branches operate as 'hubs' in urban areas, while project site kiosks follow up on low-income construction projects to source customers.

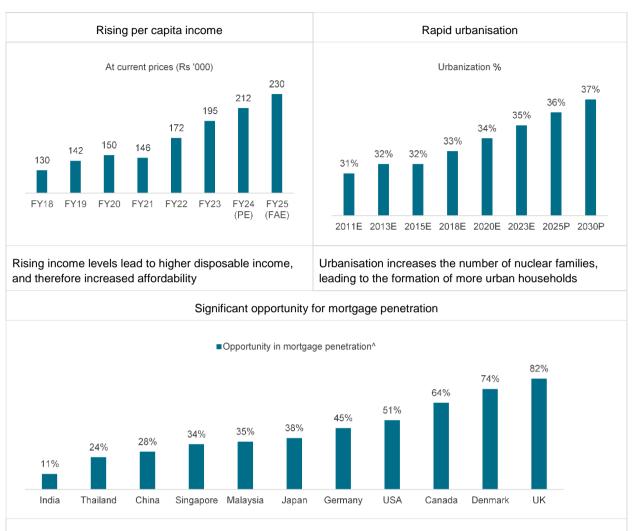

Although this model is popular and largely followed by financiers, a developer-based model, where the HFC is present at the low-income housing-project site and business takes place directly alongside developer-partners, is not uncommon. Financiers also spread awareness about their products in rural areas by setting up kiosks at gram sabhas and arranging loan melas.

Direct customer contact enables better visibility and reliable customer assessment, thus limiting fraud. Moreover, all critical functions, such as origination, verification and credit appraisal, are undertaken in-house, while certain non-core activities, such as loan documentation and processing, may be outsourced. This allows a start-up HFC to allocate more internal resources towards vital aspects of lending, such as verification and credit appraisal.

Customer risk

HFCs are aware of the challenges of serving low-income customers and the informal sector, in particular. There are fundamental differences compared with traditional housing finance, as this income group rarely has proof of income and expenditure documents that conventional mortgage lenders rely on to assess creditworthiness. Thus, evaluating these customers requires more of a field-based approach to verify cash flow – using surrogates and building up knowledge about customer sub-segments to increase assessment reliability. The person, and not just documents, helps assess credit quality.

Long-term growth drivers of the housing-finance sector

India's mortgage penetration, though low, is improving owing to ease of financing, tax incentives, and increasing reach of financiers ^Company

reports, European Mortgage Federation and Hofinet

Source: Ministry of Statistics and Programme Implementation, United Nations Department of Economic and Social Affairs, International Monetary Fund, European Mortgage Federation, Housing Finance Information Network, NHB, company reports, Crisil Intelligence

Risks and challenges

Competitive advantage of banks vis-à-vis HFCs

 Banks have access to borrowers' banking behaviour and their repayment history by which they approach their regular customers by offering lower interest rates (than HFCs) and zero processing fee.

Funding disadvantage for lower rated HFCs Smaller HFCs have disadvantage due to the mix of funding (mid-size and small HFCs are more bank-funded) and higher costs (as credit ratings are lower)

Delay in project approvals and construction

- HFCs' cash flows are largely dependent on the timely completion of projects, in which their customers have bought housing.
- If the project gets delayed, the borrower may start defaulting on loans

Lack of proper title; lack of data for credit appraisal

- Credit score availability in India is still at a nascent which makes it difficult
 to judge the ability of the borrower to repay
- HFCs are trying hard to mitigate this risk by doing more due diligence by their technical team.

Affordable housing finance - Review and outlook

Affordable housing credit to outpace the overall housing growth in fiscal 2025 and 2026

The affordable housing finance market in India has emerged as a significant sector, driven by the government's vision of "Housing for All". Driven by the rapid urbanization and growing demand for affordable housing, this market is characterised by a large and unmet demand, presenting a substantial opportunity for lenders to cater to the housing needs of low- and middle-income segments. As a large portion of the population remains unable to afford formal housing, the affordable housing finance market has become a critical component of the country's financial ecosystem, playing a vital role in addressing this pressing social issue.

The sector has witnessed considerable growth in recent years, with the government introducing various initiatives such as the Pradhan Mantri Awas Yojana and the Interest Subsidy Scheme to support the development of affordable housing.

The overall credit growth of affordable housing finance companies (A-HFCs), or companies disbursing average loan ticket size of less than Rs 2 million, logged a robust 15% compound annual growth rate (CAGR) between fiscals 2020 and 2024 vs an 11% CAGR for the overall housing finance segment.

The loan growth of A-HFCs was driven by higher housing demand, owing to the companies' improved operating environment supported by stable income level and increasing penetration in tier I and II cities. Also, factors such as rising disposable incomes, stable economic conditions and various government initiatives, contributed to the sharp double-digit growth.

Demand for affordable housing finance tapered down slightly in fiscal 2025 due to a prolonged period of higher interest rates which lowered the demand. Moreover, some of the affordable housing customers moved up into the lower-level mid-ticket borrowing bracket of 25-75 lakh by extending their budgets owing of increase in capital values of residential properties. As a result, Crisil Intelligence projects credit growth at A-HFCs to slow to 19-20% in fiscal 2025.

Going forward, a push in the form of Rs 2.2 trillion allocation for Pradhan Mantri Awas Yojana PMAY-Urban over the next five years announced in Union Budget 2024-25 is likely to revive interest in affordable housing once again, which

has lately seen a decline in construction activity, with developers increasingly shifting focus towards the premium and luxury segments in metros, tier I and II cities, etc. This move is likely to be further supported by expected reporate cuts of 75-100 bps, with 25 bps already implemented in February 2025, providing relief to the underlying customer base. Crisil Intelligence, projects credit growth at HFCs to recover to 22-23% in fiscal 2026.

A-HFCs credit growth trend vs overall segment

Asset quality of affordable housing to stabilise supported by increased information availability and technology integration for credit assessment

GNPA of AHFCs to remain range bound in fiscal 2026

P-projected,

Note: HDFC Ltd and HDFC Bank became a merged entity effective July 1, 2023, historical numbers are adjusted for HDFC Ltd book considered under banks and eliminated from HFCs.

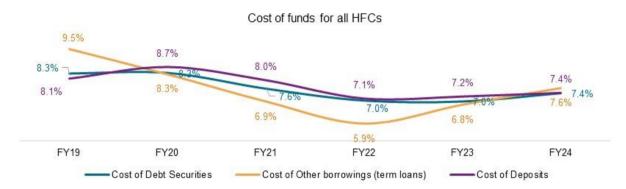

Source: Company reports, RBI, Crisil Intelligence

In fiscal 2024, gross non-performing assets (GNPAs) of the affordable housing portfolio improved 70 basis points (bps),

owing to enhanced collections, resilient economic conditions and appropriate underwriting controls of the customer base, leading to no major write-off in their retail portfolios.

According to Crisil Intelligence, the asset quality of A-HFC players is expected to rise marginally to 1.7-1.8% in fiscal 2025 due to the delayed rate cut by the RBI, leading many the financers to raise the benchmark rates. GNPAs will remain range bound at 1.7-1.8% in fiscal 2026 supported by passing the rate cuts benefit on lending rates to end borrowers.

Cost of borrowing rises marginally in fiscal 2024

Note: HFCs comprise LIC Housing Finance Ltd, Indiabulls Housing Finance Ltd, PNB Housing Finance Ltd, Bajaj Housing Finance Ltd, Can Fin Homes Ltd, Aadhar Housing Finance Ltd and Aptus Value Housing Finance India Ltd Source: Company reports, Crisil Intelligence

Profitability of Affordable financers steady last fiscal, RoA peaked

Affordable housing finance companies witnessed improvement in RoA supported by increase in yield on advances, owing to the issuance of new loans at higher interest rates and repricing of the existing floating rate loans, which fully absorbed the 250-bps hike in repo rates from the previous fiscal, resulting in a higher overall yield. As interest rates rose, borrowing costs increased as well in fiscal 2024, on account of uptake of new loans with higher rates and repricing of existing floating rate borrowings. However, as housing finance companies have a mix of fixed and floating rate borrowings, the effect of the 250-bps repo rate hike was slower and more gradual, unlike the quicker impact on the final borrower.

As a result, in fiscal 2024, interest income-to-average assets ratio increased to 11.1% from 10.6% in fiscal 2023 and interest expense-to-average assets ratio rose to 6.0% from 5.5% in fiscal 2023, translating into a stable net interest income ratio at 5.0%.

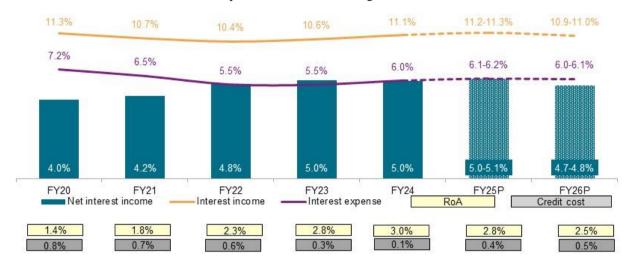

Meanwhile, some companies saw a roll-back of provisions, totalling 0.1% credit cost. The extra provision was created last fiscal to cushion any impact because of rising repo rate transfers to final consumers. This led to the segment's best return on assets (RoA) in the past five years, at 3.0%.

Going ahead, Crisil Intelligence projects that interest income will further increase in fiscal 2025 as A-HFCs raised new loans at a higher rate as well as increased their MCLR on account of delayed repo rate cut. On the other hand, interest expense-to-average assets is expected to increase at a relatively lower rate as A-HFCs focused on raising money at competitive rates from sources such as term loans and NHB refinancing. Overall, net interest income ratio is expected to improve by ~10 bps. However, as A-HFCs again built provisions after reversals in fiscal 2024, RoA is expected to shrink by about ~20 bps.

The full impact of this rate cut will be seen in fiscal 2026. However, due to mismatch in the timings of its impact on lending and borrowing, net interest income will see a slight improvement. Credit costs are expected to increase slightly in tandem with loan book growth and time lag in passing interest rate benefit to borrowers. As a result, ROA is expected

to shrink in fiscal 2026.

NIMS to contract next fiscal, due to faster pass of rate cuts to floating rate loans

P – projected

Note: All ratios are based on total assets Source: Company reports, Crisil Intelligence

Gold finance - Review and outlook

Gold loan growth accelerates as banks and non-banking financial companies (NBFCs) shift focus to secured lending, driven by a reduction in exposure to unsecured credit.

Crisil Intelligence expects gold loan growth for NBFCs to remain strong in fiscal 2025, with a projected increase of 300-500 basis points over fiscal 2024. Regulatory developments may pose a risk to the sector's growth momentum and will be watched closely.

NBFCs are poised to deliver strong gold loan growth, with a projected increase of 21-23% in fiscal 2025, tapering to 18-20% in fiscal 2026

Banks dominated gold loans credit market, with a share of ~78% in fiscal 2024, up from 71% in 2020. This trend is expected to persist, with banks' market share projected to increase ~100 bps in the current fiscal.

Credit growth in this segment has normalised for banks and rebounded post-pandemic for NBFCs, though slower than the compound annual growth rate (CAGR) of ~25% logged between fiscals 2020 and 2024 by the industry. While credit growth of banks in the segment has normalised, that of NBFCs has recovered following a slack seen after the pandemic, resulting in a healthy growth in the overall segment in fiscal 2024. The overall gold loan segment (banks and NBFCs combined) grew ~23% in fiscal 2024, driven by rising gold prices, better asset quality, and higher interest rates.

The overall gold loan market is poised for a substantial growth of 24-26% in fiscal 2025, with NBFCs expected to contribute 21-23% credit expansion in the current fiscal. Meanwhile, banks are likely to take the lead, driven by targeted efforts to expand agricultural credit, which is facilitated by their ability to lend at lower interest rates. NBFCs will lose share of the gold loan market to banks, even as their disbursements are expected to recover.

The strategic shift towards secured lending is expected to drive the growth in gold loan advances of NBFCs, as they seek

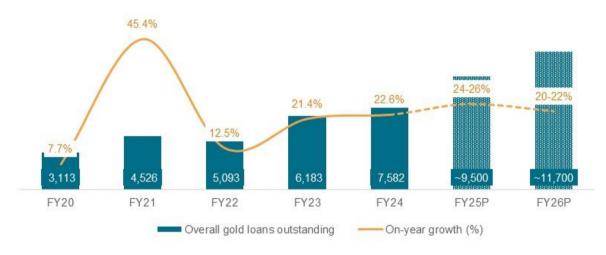

to reduce exposure to the unsecured segments. Gold loans are considered a low-risk proposition due to the strong collateral the yellow metal provides, reinforced by the sentimental value borrowers attach to gold. Additionally, gold loans offer attractive interest margins, making them more lucrative than other secured asset classes.

Regulatory challenges notwithstanding, gold loans are poised to become a preferred option for financial institutions on account of strong demand for credit amidst rising concerns over asset quality and overleveraging in the unsecured loan segment. The low credit cost associated with gold loans, combined with the enhanced borrowing capacity facilitated by rising gold prices, is expected to fuel growth in this segment.

Furthermore, the vast gold reserves held by Indian households, estimated to be 25,000 tonnes, of which only a fraction (2,950-3,350 tonne) is currently being utilised as collateral, presents a significant growth opportunity. The increasing penetration of the formal sector is likely to unlock this potential, driving growth in the gold loan market and making it an attractive proposition for lenders.

Rising gold prices and a shift towards secured lending expected to drive growth in the gold loan segment

2) Gold loan portfolio of banks includes "loans against gold jewellery" and "agri-gold loans" portfolio Source: Company reports, Crisil Intelligence

Gold prices drive growth, while higher tonnage amplifies expansion in gold loans

Crisil Intelligence forecasts a significant surge in gold prices this fiscal. The surge is expected to persist on account of continued pressure from the international markets, a weakening rupee, and robust investment demand.

Average monthly gold prices witnessed 15% growth in fiscal 2024, while average monthly prices rose 21% on-year. The key drivers of this growth include:

- 1. Global pressures: Ongoing geopolitical tensions, economic uncertainty, and monetary policy changes are contributing to the surge in gold prices globally
- 2. Weak rupee: The depreciation of the Indian rupee against the United States (US) dollar is making gold imports more expensive, which is driving up domestic gold prices
- 3. Investment demand: Robust investment demand for gold owing to its appeal as a safe-haven asset and a hedge against inflation, is fuelling the price increase

Additionally, the recent reduction in import duty on gold to 6% from 15% is expected to partially offset the dip in demand caused by higher prices. However, the overall impact of this duty cut is likely to be limited, as the strong upward momentum in gold prices is expected to continue.

Looking ahead, further weakening of the rupee and expectations of an interest rate cut by the US Federal Reserve, despite the 100-bps cuts it has announced so far, are likely to drive gold prices even higher, providing a boost to the gold loan market. Gold loans are expected to surge due to rising gold prices and higher tonnage.

Tonnage of the top two gold finance companies comprising nearly ~65% of NBFC gold loans outstanding has increased 7% on-year by the end of December 2024 as against 3% growth in December 2023.

Rising penetration will drive organised gold loans market share

The shift in customer preference to organised players from unorganised ones will also support credit growth, largely because the latter charge exorbitant interest rates and provide little clarity on valuation of gold and the loan-to-value (LTV) ratio. Also, there is no assurance that the pledged asset will be returned.

Crisil Intelligence believes the share of organised financiers will grow on increasing gold loan penetration in the country through geographical diversification and wider popularity of this mode of financing.

Organised gold loan penetration in India is expected to deepen significantly due to wider geographical diversification, a growing branch network, and increasing keenness of households to monetise their gold holdings for personal and business purposes. Rising gold prices and expectations that micro enterprises would fund their working capital requirements through gold loans are also expected to boost gold financing. The organised segment has been using digital and online platforms, along with phygital (a combination of physical and digital) modes, for business. The increasing uptake through these modes is expected to be the primary growth driver.

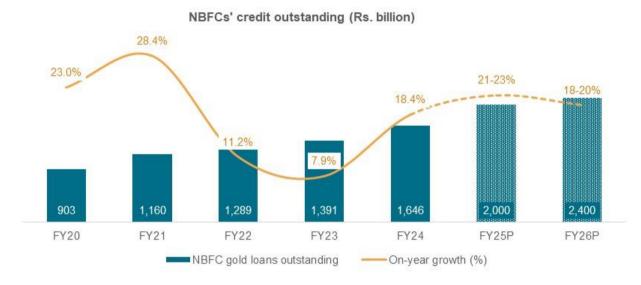

NBFCs compete on operating efficiency, turnaround time and local connect, while managing risks

Banks offering gold loans at a lower cost gives them a competitive advantage over NBFCs. Hence, NBFCs have been trying to compete through aggressive branch expansion and a focussing on improving customer experience. They focus more on the gold loan business and have, accordingly, built their service offerings by investing significantly in staffing, systems and processes in line with customer needs. Some key features are as follows:

- 1. Lower turnaround time and less documentation: The borrower generally wants to loan to be disbursed as quickly as possible. Availability of well-trained and experienced employees in assessment and valuing gold helps NBFCs disburse loans faster than banks.
- 2. Wider reach and better local connect: NBFCs have a wider and deeper reach geographically, especially in rural and semi-urban regions, where demand for gold loans is higher.
- 3. Risk management process: Most NBFCs have put in place a comprehensive and robust risk management process based on their experiences and the key risks involved. These include steps to prevent fraud, ensure safety of the gold stored, and recoup losses from possible non-performing assets (NPAs).
- 4. Operational efficiency: Gold loan finance requires operational efficiency in storing, securing, transporting and auctioning assets. Industry leaders Muthoot Finance and Manappuram Finance have achieved significant growth of 14% and 20%, respectively, in assets under management (AUM) per branch,

indicating improved operational efficiency. As they account for 60% of the NBFC gold loan market, their performance sets the benchmark for the industry's operational efficiency.

Domestic appetite, low penetration, and vast untapped unorganised market share to drive gold loan demand

Note: P — *projected*

Source: Company reports, Crisil Intelligence

Looking to compete more effectively with banks and fintech players in the gold loan segment, NBFCs are expanding their reach and customer base through focused marketing, and increased spending on advertising, and employee incentives. They are also working towards ringfencing their high-value customers (those availing loans of over Rs 2 lakh), who are targeted by banks, and expanding to cater to rural low-income customers. Most of the customer base of NBFCs offering gold loans remains stable, as banks typically cater to larger ticket sizes.

NBFCs' gold loan portfolio logged a CAGR of 16.2% between fiscals 2020 and 2024 despite low credit growth of 7.9% in 2023. Crisil Intelligence projects NBFCs' gold loan credit growth at 21-23% in fiscal 2025 on account of branch expansion and optimisation, expected rise in gold prices, an increase in demand for credit from the target consumer segment, and easing competition from banks. However, the RBI's flagging of irregular practices, in September 2024 on the loan-against-gold jewellery space and subsequent requirement of review of policies, processes and practices to identify gaps and initiate remedial measures, are expected to impact growth and pose a downside risk to credit growth.

The average ticket size of gold loans increased over the past five years, as higher gold prices have created headroom for incremental credit due to lowering of the LTV ratio. Since the LTV ratio for NBFCs is capped at 75%, the increase in the average ticket size suggests a rise in the gold loan portfolio owing to higher gold prices. Thus, AUM growth is also led by an increase in ticket size, in addition to higher volumes.

Rising gold prices boost gold-loan growth, as more loans can be taken against the same quantity of gold

Despite the rise in gold stocks, LTVs remained range-bound at 62-65% between fiscal 2021 and the first half of fiscal 2025, compared with the pre-pandemic level of 55-60%, due to a considerable jump in gold prices. The gold stocks of the top two NBFCs declined throughout most of fiscal 2023 but rebounded moderately in the final quarter of fiscal 2024, with the upward momentum carrying over into the first quarter of fiscal 2025.

Microfinance - Review and outlook

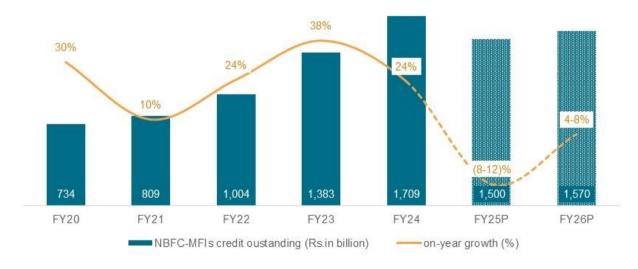

The microfinance industry to remain under pressure this fiscal due to a sharp decline in disbursements, high GNPA levels, and stringent MFIN guardrails

The microfinance industry's woes are likely to persist, with the current stress expected to linger beyond the current fiscal year and potentially extend into the first half of the next fiscal, suggesting a prolonged period of challenges for the sector.

The microfinance industry is expected to face severe challenges, with NBFC-MFIs portfolio expected to decline in the range of (8-12) % in fiscals 2025 and grow by 4-8% in next fiscal. The precipitous decline is due to multiple adverse factors, including a sharp reduction in disbursements triggered by an alarming surge in delinquent assets, a marked deterioration in collection efficiencies, and state-level regulatory hurdles. Furthermore, the implementation of MFIN guardrails and the sector's own self-regulatory measures, aimed at mitigating rising stress, are likely to exacerbate the downturn, ultimately leading to a severe downside risk for the sector.

According to RBI's revised regulatory framework, any collateral-free loan given to a household with an annual income of up to Rs 3 lakh would be considered an MFI loan. In India, microfinance plays an important role in delivering credit to the bottom of the economic pyramid. As a result, microfinance lends support to income-generating activities and livelihoods in both rural and urban areas. Microfinance loans are of small amount, have short tenures, are extended without collateral, and have a higher frequency of loan repayments compared with traditional commercial loans. These loans are generally taken for income-generating activities, but are also provided for consumption, housing and other purposes. Thus, MFI operations have traditionally been cash-intensive and have become very aggressive in rural areas, especially after demonetisation.

NBFC-MFIs are expected to witness sharp contraction of their portfolio with advances expected to decline to (8-12)% this fiscal

Note: P: Projected

Source: MFIN, Crisil Intelligence

NBFC-MFIs' share increased 7% since fiscal 2020 to December 2024.

While microfinance advances would comprise of only 1% of total banking credit outstanding as of March 2024; it is nearly 5% of total NBFC advances. Despite this Banks had the largest share in the MFI industry in fiscal 2020, as they lend under priority-sector lending (PSL) norms. However, NBFC-MFIs' focused lending approach and support from

investors (impact and private equity funds) over the past five fiscals boosted their disbursements, with their loan book growing at a CAGR of 24% between fiscals 2020 and 2024 compared with ~12% for banks. Share of NBFC-MFIs increased to 39% by the end of December 2024.

Share of rural lending increased considerably by the end of December 2024

Going forward, NBFC-MFIs are expected to bring more individuals under the formal mode of financing and increase financial literacy, along with supporting credit growth.

The main objective of microfinance lending is to support capital formation in agriculture and allied sectors. With disbursements targeting the rural areas, NBFC-MFIs promote alternative employment opportunities by supporting farm and manufacturing sectors.

GNPA in microfinance industry are expected to rise with some moderation expected after implementation of new self-regulatory measures.

The Covid-19 pandemic put considerable strain on small businesses and disrupting cash flows of rural borrowers, who account for bulk of NBFC-MFI borrowers. However, over the past two years, the portfolio at risk denoted by (PAR) 90+ consistently improved. Asset quality improved up to end-fiscal 2024 along with reduction in the restructured portfolio. PAR 90+, which had peaked at 6.7% during first quarter of fiscal 2022 following the second wave of the pandemic, improved significantly up to fiscal 2024, as loans moved out of moratorium and borrowers started regular repayment – PAR 90+ declined from a high of 6.7% in fiscal 2022 to 2.2% in the second quarter of fiscal 2024.

The microfinance industry's stress levels continued to escalate, as evident from the sharp rise in PAR 30+ to 8.8% in December 2024, up from 3.4% in March 2024. This increase was driven by a significant surge in loans falling under the 30-60 DPD bucket, which rose to 1.8% in December 2024, compared to 0.5% in March 2024, representing a 50-basis point increase from September 2024. Furthermore, the 60-90 DPD bucket also saw a notable increase, rising to 1.7% in December 2024, up from 0.5% in March 2024. Overall, the 30-180 DPD bucket witnessed a substantial expansion, growing to 6.4% in December 2024, more than triple the 1.9% recorded in March 2024, underscoring the deepening delinquency stress in the industry.

Raise in credit cost and high attrition rates are expected to drag RoAs

Yields in the segment have historically been high on account of high interest rates and riskier borrower profiles. Borrowers are small businesses, household manufacturing units, farmers and daily wage workers, who have weak payment profiles. Hence, any disruption in the normal business environment impacts their cash flow, weakening their repayment ability. Players factor in this risk with higher yields. Typically, large players in this segment disburse loans at 18-23%.

As most all borrowers are charged a fixed rate of interest owing to shorter span of the loan, any change in the repo rate gets immediately passed on to borrowers.

The anticipated increase in slippages and GNPAs is likely to result in non-recognition of income on affected assets and non-accrual of interest income on these accounts. Furthermore, the RBI's heightened scrutiny of lending rates may lead to pressure on interest income, which could be compounded by a decline in advances, potentially impacting the overall revenue trajectory of NBFC-MFIs. Furthermore, the decline in microfinance securitisation volumes is expected to impact other income. The share of microfinance loans in overall securitisation volumes has decreased from 15% in March 2024 to 11% in December 2024, indicating a reduction in upfront income. This is because a significant portion of microfinance securitisation volumes, approximately 73%, comes from direct assignment transactions, which typically involve upfronting of income.

According to Crisil Intelligence, the interest income as a percentage of average total assets is expected to drop to 18.2-18.4% in fiscal 2025, and further to 17.8-18.0% in the subsequent fiscal year, due to the reduction in reportates, following a previous level of 18.8% in fiscal 2024.

Key success factors

- Ability to attract funds/raise capital and maintain healthy capital position
 - The microfinance industry had seen rapid growth over the past few years before moderating in fiscal 2025 owing to small ticket sizes and doorstep disbursement. Despite this, a large portion of the market remains underpenetrated, making it necessary for MFIs to raise funds at regular intervals to sustain growth. This remains a challenge for several MFIs owing to perceived risk of the borrower segment, their susceptibility to socio-political issues, and volatility in asset quality. The ability of MFIs to raise funding from diverse sources and maintain a capital position much higher than the prescribed regulatory minimum is vital for long-term sustainability. RBI rolled back the 25% increase in risk weights on consumer loans, excluding microfinance loans, amid rising industry stress.
- Geographically diversified portfolio helps MFIs mitigate risks
 A large, well-diversified portfolio in different geographies enables players to mitigate risks associated with
 a concentrated portfolio. Apart from this, a wider scale of operation helps them reduce operating expenses
 as a percentage of outstanding loans. Rural areas are still under-penetrated in India; hence, players operating
 in/focussed on these areas are likely to see faster growth in their portfolios.
- Ability to control asset quality and ageing of NPAs
 The vulnerability of MFI portfolios to local issues and events that impact the repayment ability of borrower households makes it critical for them to have a strong hold on asset quality and regularly engage with borrowers to control ageing of NPAs. MFIs, thus, need to put in place methods and use analytics to understand and predict the quality of the portfolio, and minimise the frequency and size of asset quality-related risks.
- Competitive dynamics Micro finance segment has witnessed intense competition between banks, NBFC-MFIs, vanilla NBFCs, and SFBs. Over the past fiscals, NBFC-MFI has clearly outpaced other lenders and has increased their market share from 32% as of March 2020 to 39% as of March 2024. The ~7% increase in market share of NBFC-MFIs came at the cost of banks. The NBFC-MFI were able to capture the share on account of their consistently rising ticket size, increased penetration in new geographies and support from investors (impact

and PE funds).

MSME finance - Review and outlook

Credit offtake by micro, small and medium enterprises (MSMEs) in fiscal 2024 stood at Rs 35,432 billion. Banks had a dominant 76% share of this, while non-banking financial companies (NBFCs) accounted for the balance.

The MSME lending landscape has undergone a significant transformation in recent years, with both banks and non-banking financial companies (NBFCs) intensifying their focus on this segment. The perfect storm of digital lending, government-backed initiatives, a thriving economy, and increasing adoption of formal credit channels has propelled this growth. Moreover, the shift towards cash flow-based underwriting has further boosted lending to MSMEs. This upward trend has been consistent over the past five fiscal years, with lenders recognizing the vital role MSMEs play in the economy. Fiscal 2024 witnessed a remarkable 22% growth in the overall MSME lending, with NBFCs taking the lead peaking at 27% and banks following at 20%, albeit on a higher base.

LAPs to maintain share within NBFC MSME financing this fiscal and next

Note:

1. P: Projected

2. Non-LAP segment includes secured and unsecured loans

Source: Company reports, Crisil Intelligence

During fiscal 2024, the loan against property (LAP) portfolio regained its dominance, accounting for 53% of the total, as economic activity rebounded with support from government initiatives such as the Atmanirbhar Bharat and the RBI. Additionally, housing finance companies (HFCs) contributed to the growth of the LAP segment as they expanded their portfolios to achieve better blended yields. The share of non-LAP declined during fiscal 2024 on account of cautious lending by players in unsecured segment, the trend continued in fiscal 2025 with share expected to remain stable at 47%. Additionally, increased focus of HFCs towards higher yielding LAP segment supported the faster increase in share of LAP during the last two fiscals. The LAP segment is expected to maintain its dominant position, accounting for a steady 53% of the market share in fiscal 2025 and subsequently increase to 54% by in fiscal 2026.

Industrialisation, steady economic expansion to propel MSME credit

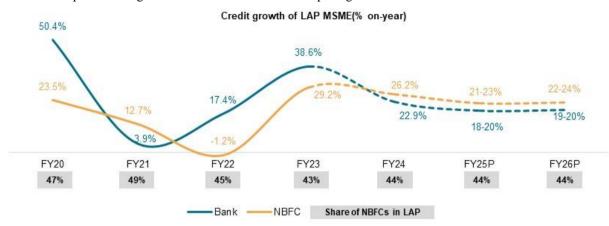

Notes:

1. P: Projected

2. Credit deployment data published by the RBI was revised and so were the comparable numbers for the previous fiscals. Sources: Company reports, Crisil Intelligence

LAP credit growth to moderate albeit at growing at a healthy pace

LAPs can be obtained by mortgaging residential and commercial real estate with a lender. These loans can be used for personal or business purposes and both salaried and self-employed individuals are eligible to apply. The main purpose of the loan is not strictly regulated and as it offers the financier security in the form of real estate, LAP is a secured offering with lower interest rate than a personal or corporate loan.

NBFCs' LAP portfolio to grow 21-23% in current fiscal outpacing banks

Notes:

1. P: Projected

2. Credit deployment data published by the RBI was revised with effect from January 2021 and so were the comparable numbers for the previous fiscals

Sources: Company reports, Crisil Intelligence

The LAP market saw a remarkable rebound in fiscal 2023, with banks and NBFCs posting growth rates of 38.6% and 29.2%, respectively, the highest since the pandemic. The growth slowed down in fiscal 2024, with banks growing at 22.9% and NBFCs at 27.6%. In fiscal 2023, banks initially took the lead owing to the perceived safety of collateral-backed loans. However, in fiscal 2024, non-banks, particularly HFCs, caught up and even surpassed banks in the LAP growth, driven by their focus on maintaining higher yields.

According to Crisil Intelligence, the LAP market is expected to experience a moderate expansion this fiscal with banks and NBFCs projected to grow at 18-20% and 21-23%, respectively.

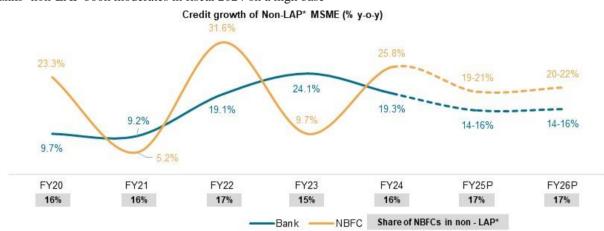

Non-LAP growth to be led by NBFCs, with banks focusing more on LAP

Loans with security and those without it make up the non-LAP sector. Working capital products, such as cash credit, overdraft facilities and bill discounting, as well as other term loan products (asset-backed or hypothecated loans), are examples of non-LAP secured MSME loans. Hypothecated loans are term-based where the offered collateral is a combination of real estate, stock and so on.

Self-employed borrowers are provided unsecured MSME loans in the absence of a collateral. Instead of being dependent on a collateral, this type of lending is cash-flow-based. Unsecured loans are reviewed based on a variety of factors, including scorecards, bureau checks, bank accounts, financial statements and returns from the goods and services tax. When a small business reaches a bank's cash credit and overdraft limits, it typically goes for an unsecured business loan to expand or sustain operations, take advantage of short-term possibilities or get through a cash flow crisis. Many lenders

offer these loans, in addition to the secured loans they already possess.

Owing to the non-availability of collateral, underwriting plays a key role in maintaining the asset quality of unsecured business loans. Underwriting these loans requires expertise and is powered by new financial technology and increased availability of data on customers' credit history. Competition in the secured loans market (especially retail loans) has compelled the NBFCs and a few private banks to gain expertise in niche lending and build robust digital platforms to cash in on fresh opportunities in the unsecured business loans space, while maximising profitability.

Banks' non-LAP book moderates in fiscal 2024 on a high base

Notes:

- 1. P: Projected
- 2. Credit deployment data published by the RBI was revised with effect from January 2021 and so were the comparable numbers for the previous fiscals have been revised accordingly.
- 3. * The non-LAP segment includes secured and unsecured loans

Sources: Company reports, Crisil Intelligence

In fiscal 2023, banks outperformed NBFCs in the non-LAP segment, achieving a robust growth rate of 24.1% driven by their aggressive strategies, increased market presence, lower funding costs and sufficient liquidity. In contrast, NBFCs grew at a slower pace of 9.7%.

In fiscal 2024, the trend reversed, with bank credit growth slowing to 19.3% due to a high base effect, while NBFCs saw a significant acceleration in growth to 25.8%, leveraging their low base and aggressively expanding their market share. Looking ahead, Crisil Intelligence predicts that bank credit growth will moderate to 14-16% in fiscal 2025 and 2026, as lenders become more cautious about unsecured lending and focus on secured loan against property lending, leading to slower growth in non-LAP segments. In contrast, NBFCs are expected to maintain a balanced growth trajectory, with both LAP and non-LAP credit growing at a rate of 19-21% in fiscal 2025 and 20-22% in fiscal 2026.

Wholesale finance - Review and outlook

NBFCs' wholesale book share drops by 3% between fiscals 2020 and 2024

Over the past few fiscals, non-banking financial companies' (NBFCs) lending to the real-estate sector has undergone a considerable change in terms of size, complexity and interconnectedness with the financial sector. Majority of housing finance companies (HFCs) are downsizing their real-estate portfolios, and only a few are actively expanding.

Wholesale finance encompasses providing short- and long-term funding to large and medium-sized corporate firms,

institutional customers and real-estate developers by banks and other financial institutions. Crisil Intelligence excludes lease-rental discounting from the wholesale book and lending to the infrastructure sector and covers only loans offered to large and mid-sized corporates in non-infrastructure segments.

Wholesale book of NBFCs flat in FY24, modest growth expected this fiscal and next

NBFCs to see muted expansion of 1-2% this fiscal and next

Notes:

1. P – Projected

2. HDFC Ltd and HDFC Bank are a merged entity effective 1 July 2023. Past numbers have been adjusted for estimated loan book of HDFC Ltd for the retail housing and commercial real-estate segment for normalised credit growth. Source: Company reports, Reserve Bank of India (RBI), Crisil Intelligence

NBFCs were cautious in lending to both the corporate and real-estate sectors. As a result, their wholesale book declined at CAGR of 4% over the last five fiscals. Most NBFCs are nearing completion of the transition to divesting their wholesale lending portfolios during fiscal 2025.

Looking ahead to fiscal years 2025 and 2026, NBFCs that continue to expand their portfolios are expected to stabilize this fiscal and remain steady the next. After a muted 0.4% degrowth in fiscal 2024, Crisil Intelligence predicts that the wholesale book of NBFCs will start to recover in fiscal 2025, with a growth rate of 1-2%, which is expected to be sustained in fiscal 2026.

Asset quality

Overall stress in the real estate and corporate segments has remained higher than in other segments. Crisil Intelligence estimates the overall stress in the wholesale book to be high, including contractual moratorium, book under extension by 'date for commencement for commercial operations (DCCO) extension. The wholesale GNPAs for non-banks (including HFCs) have moderated marginally during fiscal 2024, however, for few players the GNPAs are being on high double digit due to continued decline in wholesale book and no new disbursements. Crisil Intelligence estimates the overall GNPA to remain on a higher side at 8-10% during fiscal 2025.

OUR BUSINESS

Business Overview

Our Company is a Non-Banking Financial Company – Middle Layer ("NBFC-ML") registered with the RBI, catering to the credit requirements of a diverse customer base with its plethora of products. Our offerings include home loans, gold loans, MSME secured loan, MSME unsecured loan, personal loans, supply chain finance, micro finance, construction and real estate finance and capital market finance, catering to both retail and corporate clients.

The Company has received a registration as a Non-Banking Financial Company bearing registration number N-13.02386 vide certificate dated March 6, 2020.

Over the past several years, we have diversified our products and expanded our presence into segments that are of greater relevance to the evolving business environment and customer demand trends. Our key strategy is to steadily grow high quality, diversified retail assets focusing on under-banked segments, with effective risk management and cost optimization through well-defined processes and leveraging technology.

Our product offering evolution is depicted below:

Home Loans: include finance for purchase of flats, construction of houses, extension and for improvement in the flats/homes.

MSME secured loan: is availed for working capital requirements, business use or acquisition of new commercial

property.

Gold Loans: includes finance against security of mainly used gold ornaments. We offer loan against gold to small businessmen, vendors, traders, farmers and salaried people for their personal needs as well as for working capital needs.

MSME unsecured loan: is to provide working capital finance to small business owners. We provide small ticket loans, thereby being able to meet the needs of small scale businesses including standalone shops etc.

Supply Chain Finance: encompasses technology-enabled solutions designed to reduce financing costs and enhance operational efficiency for buyers and sellers in a sales transaction. By automating processes and tracking invoice approvals and settlements, SCF simplifies financial operations from start to finish.

In this arrangement, buyers approve their suppliers' invoices for financing through IIFL, providing short-term credit that improves liquidity and optimizes working capital for both parties. Suppliers gain faster access to funds, while buyers benefit from extended payment terms. This allows both sides to manage cash flow effectively and allocate resources to other business priorities.

Microfinance: includes credit support mainly to women, who have either limited or no access to formal banking channels. We provide financial services to the economically weaker sections of society with an aim to bring microfinance services to the doorstep of the rural and semi-urban BoP (Bottom of Pyramid) families in India. Loans are offered under various categories such as income generation, education, sanitation etc. We follow the Grameen Model (also regarded as joint liability group).

Construction and Real Estate finance: includes loans to developers for construction and development of predominantly affordable residential projects and a small proportion of mixed-use projects. In line with our broader retail strategy, the construction finance vertical is an enabler for providing retail loans under the approved project route, wherein the Company has tie-ups with developers for funding the property buyers under the retail home loan category.

Capital Market Finance: includes Loans against Securities, Margin Funding, IPO financing and other structured lending transactions.

As at December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022, our consolidated assets under management were ₹ 71,410.19 crore, ₹ 78,959.88 crore, ₹ 64,637.64 crore and ₹ 51,209.79 crore, respectively.

Our product wise split of assets under management on a consolidated basis is as under:

Products	AUM (Consolidated basis)

We are subject to capital adequacy ratio ("CAR") requirements prescribed by RBI. We are currently required to maintain a minimum of 15% as prescribed under the Prudential Norms of RBI based on our total capital to risk weighted assets. As part of our governance policy, we ordinarily maintain capital adequacy higher than statutorily prescribed CAR. As of December 31, 2024, our capital adequacy ratio computed on the basis of applicable RBI requirement was 21.96% as compared to a minimum of capital adequacy requirement of 15% stipulated by RBI.

Set forth below is our capital adequacy ratio for the nine months ended December 31, 2024, last three Fiscals on a standalone basis:

Particulars	December 31, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Capital Adequacy Ratio	21.96%	18.85%	20.38%	23.85%
Tier I Capital	16.69%	12.56%	12.85%	16.02%
Tier II Capital	5.26%	6.29%	7.53%	7.83%

Corporate Structure*

^{*} Based on Equity shareholding as on December 31, 2024

Our Strengths

We believe that the following are our key strengths:

Diversified product portfolio catering to a wide customer base

Our Company aims at promoting inclusive growth and with a wide variety of loan products including home loans, gold loans, micro finance, MSME secured loan, MSME unsecured loan, supply chain finance, personal loans, construction and real estate finance and capital market financing caters to all types of customers in the country – salaried, self-employed, informal sector, HNIs and corporates. As on December 31, 2024, our overall portfolio comprises 42.46% home loans, 21.07% gold loans, 14.48% microfinance, 12.22% MSME secured loan, 6.27% MSME unsecured loan, 0.98% supply chain finance, 0.46% personal loan, 1.24% construction and real estate finance and 0.83% capital market financing. Further, as on March 31, 2024, our portfolio composition included 34.75% home loans, 29.58% gold loans, 16.58% microfinance, 10.94% MSME secured loan, 3.76% MSME unsecured loan, 0.52% supply chain finance, 1.12% personal loan, 2.35% construction and real estate finance and 0.39% capital market financing. We have a widespread network of branches spanning the length and breadth of the country which facilitates servicing a broad customer base while reducing dependency on a single or small number of regions. Our branch network also helps us adopt best practices developed in a region across all our branches. We provide multiple products from our branches thereby providing better accessibility to clients, reducing operating costs and improving total sales.

Strong asset quality with consistent low level of NPAs

The quality of our loan portfolio is reflected in the consistent low level of NPAs. We believe that our robust credit approval mechanisms, credit control processes, audit and risk management processes and policies help us maintain the quality of our loan portfolio. We have in place product specific lending policies, credit approval committees and regular monitoring of exposures. We routinely monitor credit risk, risk concentration and compliance with board approved policies. Credit monitoring for retail products is undertaken at portfolio level wherein risk assessment is undertaken on various parameters like demographics, sector, geography, etc. As part of the credit assessment, we analyze past financial information, applicant's business performance/earnings history to assess their ability to repay loans. In addition to document verification and credit bureau reports, we conduct site verifications, interviews, as well as market and banking reference checks on the applicant, co-applicant and guarantor, as applicable. For institutional borrowers, additional assessment is undertaken on parameters of viability of business, credit history, and reputation and experience of the relevant promoters/founders/management of the organization. Additionally, as on December 31, 2024, 71.92% of our consolidated Loan Book is secured with adequate collaterals which helps mitigate risks further.

As on December 31, 2024, our Net NPA constituted 1.01% of our consolidated loan book. Further, as on March 31, 2024, on a consolidated basis, our Net NPA constituted 1.20% of our consolidated loan book, as compared to 1.08% of our consolidated Loan Book as on March 31, 2023 and 1.83% of our loan book as on March 31, 2022.

As on December 31, 2024, our Gross NPA constituted 2.42% of our Loan Book. Further, as on March 31, 2024, on a consolidated basis, our Gross NPA constituted 2.32% of our Loan Book, as compared to 1.84% of our Loan Book as on March 31, 2023 and 3.15% of our Loan Book as on March 31, 2022. Total provisions coverage ratio (including Stage 1 and Stage 2 provisions) (as defined hereinafter) for the quarter ended December 31, 2024 is 113.84% and for Fiscal 2024 on a consolidated basis is 104.43%. Our specific provision coverage ratio is 58.76% of our gross NPAs as on December 31, 2024 and 49.06% as on March 31, 2024.

Diversified funding sources and strong credit profile

Our funding requirements are currently predominantly sourced through term loans from banks, issue of secured and subordinated redeemable non-convertible debentures on public and private placement basis, external commercial

borrowing, refinance from various financial institutions, securitization and direct assignment of our retail portfolio of loans with sufficient availability of working capital facilities from banks. We have access to funds from multiple classes of credit providers, including public sector banks, private commercial banks, other financial institutions, pension and provident funds, mutual funds, foreign institutional investors and domestic retail investors. Through our stable, long-term relationships with our lenders, we have been able to borrow from a range of sources at competitive rates and have maintained adequate liquidity to meet our borrowing obligations and fund our growth, keeping a margin of safety.

In relation to our long-term debt instruments, we currently have long term ratings of 'AA/Stable' from Crisil, 'IND AA/Stable' from India Rating, 'AA;Stable' from ICRA.

Fitch Ratings has put our Company's long-term issuer default rating (IDR) and global medium-term note programme at 'B+' with stable outlook on IDR, removed form 'Rating Watch Negative'. Further Brickwork Ratings has given our Company a rating of 'BWR AA+/Stable' for our non-convertible debentures.

In relation to our short-term debt instruments, we currently have short term rating of A1+ from Crisil and ICRA.

Our financing requirements have historically been met from a variety of sources including term loans and working capital facilities from both PSU and private banks, proceeds from the issuance of publicly listed and privately placed NCDs, external commercial borrowing, proceeds from loans assigned, subordinated debts, issuance of CP and NCD from mutual funds, insurance companies and other financial institutions to meet our capital requirements. As at December 31, 2024, March 31, 2024 and March 31, 2022 our total borrowings was ₹ 19,798.07 crores, ₹ 20.010.90 crores, ₹ 17,380.49 crores and ₹ 16,245.99 crores, respectively.

Robust systems with a strong focus on digitization

We believe our well-defined business processes ensure efficient achievement of organisational tasks and in turn effective service to our customers. Our robust credit approval and credit control processes, centralized operations unit, independent audit unit for checking compliance with the prescribed policies, and risk management processes and policies provide for multiple checks and verifications for both legal and technical parameters. Our loan approval and administration procedures, collection and enforcement procedures are designed to minimize delinquencies and maximize recoveries.

Further, we have a strong focus on digitization across all organizational functions and believe technology is a business enabler for our Company. Our technology driven processes aid in product innovation, reduced turnaround times, cost optimization and superior customer experience thereby creating balanced scalable growth models. We are incrementally leveraging technology to streamline processes across the loan lifecycle including sourcing and on-boarding, underwriting, administration, monitoring and collection in order to further improve turnaround times, enhance the quality of service provided to customers as well as achieve a higher degree of productivity within the organization. We believe technology driven processes will facilitate us to respond to market opportunities and challenges swiftly, help monitor process and performance, and improve our risk management capabilities.

We believe that our end-to-end digitized processes in all the products, robust loan management system and strong analytics abilities offer us a significant competitive advantage. Our systems have the capability of end to end customer data capture, computation of income, margin monitoring, collateral data capture, and repayment management. Our loan approval is controlled by the loan application system. Our systems are customised for our services and help us reduce turnaround time and enhance our processes and operational excellence. Our systems fully integrate businesses in every aspect bringing together various departments in simple transitions and customer information updates. Continuous enhancement of our technology capabilities allows us better informed decision making and faster execution along with strong internal control mechanisms.

We have completely digitized our business loans journey, right from customer on-boarding to underwriting, disbursements and collections. We are collaborating with the fintech ecosystem to further enhance our platform and customer experience. With these strong partnerships, we intend to co-create solutions for enhanced experience in MSME lending. We have both app based and WhatsApp journeys available for paperless instant unsecured business loans. We have enabled digital top-up to retain quality customers in home loan, MSME secured loan and MSME unsecured loan, wherein the entire journey is paperless – communication for accepting sanction letter and e-agreement is sent to eligible customers sent *via* SMS. The disbursement is automatic with no manual intervention.

Strong physical and digital footprint

A strong physical as well as digital footprint is very important in our business, as it increases reach and access to customers. Physical presence is required in the gold and micro finance business whereas a digital identity provides wider access in the home, personal and MSME loan categories. We have steadily expanded our branches over time and have 4,858 branches as of December 31, 2024. Our widespread branch network enhances the brand equity and enriches customer experience. Our branch network is well spread across Tier I/II and Tier III cities across the country, effectively providing credit to the underserved segments of customers in these areas. Our microfinance branches are well entrenched in rural and semi-urban areas as well, effectively serving the relevant customer segment with 1,657 dedicated microfinance branches, as on December 31, 2024. In line with our strategy to achieve greater digitization in the organisation and considering the ever-increasing penetration of internet and mobile services in the country, we also have in place advanced technology led systems for loan applications through our website and portable tablet-based applications. This caters to the growing section of population which prefers or is incrementally relying on digital channels to access services. Our cross-country branch presence coupled with well-developed digital infrastructure gives us a widespread presence across channels and enables us to access and service a diverse customer base and their multiple credit requirements.

Well established brand along with a strong and experienced management team

'IIFL' is a well-established brand among retail, institutional and corporate clientele in India. We believe we have benefited extensively from the Promoters' experience in the financial services industry to develop deep understanding of the market and related opportunities, gauge customer expectations and design suitable products for our target customer base.

We derive synergies from our group companies and are able to leverage it for competitive advantage. IIFL Capital Services Limited (Formerly known as IIFL Securities Limited) has a vast broker network and relationships with mutual funds, insurance companies etc. We also have a referral agreement with an entity forming part of our group, engaged in the business of healthcare and wellness solutions and online tele-consultation services through their empanelled doctors. Our company's wide branch network in turn offers reach and brand recognition, we are able to provide capital market funding to clients of IIFL Capital Services Limited (Formerly known as IIFL Securities Limited). All our group company transactions are strictly done on arms-length basis.

We are led by qualified and experienced Board of Directors and key managerial personnel. The Board comprises 9 (nine) directors with significant experience in the banking and finance sector. The members of our executive management team also have significant experience in the products and services offered by us. We believe that our senior management and experienced executives are and would continue to be the principal drivers of our growth and success in all of our businesses; and that their extensive relevant experience and financial acumen will continue to provide us with a distinct competitive advantage. Our management organization structure is designed to support each product line with a dedicated team of executives with substantial experience in their particular business segment.

Our Strategies

Our key strategy is to steadily grow high quality, diversified retail assets focusing on under-banked segments, with effective risk management and cost optimization through well-defined processes and leveraging technology. Key elements of our strategy are:

Address growing financial needs in under-served markets

With a significant portion of population still being outside the reach of the formal credit system, our Company believes in contributing to bridging the credit gap in the country. We aim to efficiently and effectively provide credit to the underserved segment of customers and our diversified offerings have been built on a sound understanding of customer needs. With our widespread branch network, retail focus and a product suite catering to all classes of customers, we aim to contribute to financial inclusion in the country.

Build capacity and grow customer base through retail focus and geographic expansion

We are focused on high growth, dispersed risk-retail lending. We have innovatively designed our product and distribution strategies to fulfil our clients' credit requirements. Our product portfolio caters to all segments of customers – salaried, self-employed, informal sector, HNIs and corporates. We seek to further increase our presence in retail segments including home loans, gold loans, MSME and micro financing with an aim to capitalize on the opportunity arising from underserved customer segments as well as provide scale and diversify the risk across industries and collaterals.

We intend to utilize our extensive branch network to access a larger customer base and plan to expand our network as relevant with the aim of achieving deeper penetration in existing products and regions as well as tap new, lucrative markets. While assessing a potential branch site, we analyse the local market and proximity to target customers with the objective of providing ease of access to customers as well as enhancing brand visibility for the Company. Our

diversification and expansion strategy aims to adapt to a constantly changing digital milieu, and thereby seize growth opportunities whilst remaining cognizant to associated risks to our value chain.

Achieve superior performance with further strengthening our operating processes and risk management system

We are focused on building a process driven organization with a culture of compliance, audit and risk management. Operations excellence and risk management forms an integral part of our business. Our processes have been standardized with the objective of providing high levels of service quality and we have implemented high levels of digitization in our operational processes which contribute to faster turnaround times with lesser incidence and occurrence of errors.

Our risk management procedures are integrated seamlessly across our business operations and ensure constant measurement and monitoring of various risks we are subject to. The risk management model involves initial management control at business entity level, risk control and compliance oversight functions and overall independent audit and assurance functions. We intend to continue to improve our operating processes and risk management systems that will further enhance our ability to manage the risks inherent to our business.

Continue to invest in digitization and technology which will reduce cost and improve efficiency

As retail lending needs a high degree of operational excellence and automation to reduce turnaround time, we have our own proprietary system for loan processing and booking. Our loan application system has been built in-house by leveraging the expertise of the business and technology teams. We regularly update our systems and continue to streamline our credit approval, administration and monitoring processes to meet customer requirements and maintain our risk profile. We continue to focus on developing and strengthening our technological capabilities to support our growth and improve the quality of our services.

Ensure effective asset-liability management, diversify borrowing sources and strengthen our credit profile

The Company has in place Risk Management Committee and Asset Liability Management Committee ("ALCO"), consisting of Directors and senior officials. They regularly meet and review the policies, systems, controls, and positions of the financing business. Since our Company is a non-deposit taking NBFC and has a varied product mix of lending portfolio resulting into maturities of loans in different time buckets, efforts are made to match the maturity of liabilities with those of the assets and minimize the asset liability mismatch. We monitor liquidity risk through our ALCO Committee with the help of fortnightly and monthly liquidity and Asset Liability mismatch reviews. This involves the categorisation of all assets and liabilities in different maturity buckets and evaluating them for any mismatches in any particular maturity bucket, especially in the short-term. The ALM Policy has capped the maximum mismatches in the various maturities in line with RBI guidelines.

We secure funding from a variety of sources to meet our capital requirements. We believe that we have been able to access cost-effective debt financing and reduced our average cost of borrowings over the years due to several factors, including our financial performance and credit ratings. We will continue to focus on developing a diversified funding model to achieve an optimum cost of funds while balancing liquidity and concentration risks. We believe we will continue to improve our credit ratings and thereby access a greater pool of diversified funding sources.

Details of transactions undertaken by our Company for the last three financial years

(₹ in crore, unless otherwise stated)

Sr. No.	Particulars	March 31, 2024	March 31, 2023	March 31, 2022

Capital Optimized Value Innovation Driven strategy

Our business strategy is centered around a capital optimized value innovation driven strategy. Banks have a strong capital base and risk appetite whereas we have access to customers and advanced niche underwriting skills. Working together will turn into a win-win approach wherein banks profitably expand their retail and priority loan assets and we are able to leverage our capital resources more effectively. We have entered into Co-lending agreements with various banks for gold loans, home loan and secured MSME loan. Assets transferred to banks through co-lending constitute 12.93% of AUM and 30.40% of off-book loan assets as on December 31, 2024.

Our Company has partnered with several fintech players to collaborate and build innovative strategies to digitally source and underwrite. Our Company has also formed a joint venture with SME-focused neo-banking platform to establish a neobank that would cater to micro and small businesses' banking and credit needs and retail customers including lending, investment, and wealth management services.

We are uniquely placed to source, service & collect due to our vast branch network strong online presence and proprietary technology and large base of existing customers coupled with a culture of innovation.

Our Products and Services

We operate in the following lines of business: (i) home loan; (ii) gold loan; (iii) micro finance; (iv) construction and real estate finance; (v) capital market finance; (vi) MSME secured loan; (vii) MSME unsecured loan; and (viii) Supply chain finance.

Details of each product, originations, operations, underwriting policies and risk management are given below:

Home Loans

Home loans include finance for purchase of flats, construction of houses, extension and for improvement in the flats/homes and for acquiring plots of land (which are intended to be used for construction of houses). Pricing of retail home loans is driven by the risk profile of the borrower, the product and market demand for the product. Loan applications are sourced through direct sourcing and other alternate channels. These loans are mortgage-backed secured loans. Home loans are secured by equitable mortgage or a registered mortgage of the residential property, land, under construction residential/commercial properties and fully constructed properties, as applicable.

As on December 31, 2024, our home loans accounted for 42.46% of the consolidated AUM with an onboarding average ticket size of ₹ 0.16 crore, portfolio yield of 11.03%.

As of March 31, 2024, our home loans accounted for 34.75% of our AUM on a consolidated basis with an average onboarding average ticket size of ₹ 0.15 crore, portfolio yield of 11.00%.

Business origination

We generate loans through both in-house direct sales team ("DSTs") and external direct sales agents ("DSAs"). Loans sourced through DSTs can be through our website, social media platforms, walk-ins, cross sell etc. or may be sourced directly by the DST. We have dedicated policy defining norms which have to be complied before taking a DSA on our panel. Our contribution from DSTs to total disbursements has remained almost consistent i.e. from 86% in Fiscal 2022 to 84% in Fiscal 2024. DSTs utilise Jhatpat Application for on-boarding a new home loan borrower. As at December 31, 2024, our direct selling team comprised 2,596 members.

Our target customers are individuals with low to middle range income levels. Self-employed individuals include both professionals and small business owners and salaried individuals hail from a broad spectrum of companies/firms across industries. We cater to the broad section with a range of loans with suitable ticket-sizes.

Credit approval and disbursement process

Our credit policy is approved by the Board of Directors. Loan approval for home loans and MSME secured loan is undertaken with the help of our in-house technology that integrates various business rule engines. Our lending policy is automated in our on-boarding application "Jhatpat", which filters out the non-eligible customers for loan processing. The details of qualifying customers flow to our in-house loan processing system and are processed by our central team of underwriters. The paperless credit evaluation includes online validation of KYC, credit history check, income/ financial analysis, banking analysis, contact point verification and profile verification, where required. The eligibility of customers is auto calculated in the system. These digital verifications and automation not only enable the underwriters to process a loan application faster but also helps them to review more number of loans in a day leading to faster turnaround time ("TAT") for our customers.

The affordable housing project loans are sourced by the business teams wherein the focus is on lending to reputed developers having successful completion track record and active in the space of developing affordable housing projects, requiring construction funding. The developer should be of strategic relevance and complement to our retail strategy as well. A thorough discussion by the business and the credit team with the developer is done to understand his funding requirements. The processing of the loans is done by the specialised central credit team in accordance with the laid down guidelines and the loan proposal is evaluated on the parameters such as developer's overall real estate experience, execution capabilities and timely delivery, past repayment history, group strength and market reputation. Project assessment includes micro market analysis, location advantages, stage of construction, project future cash flow potentials, sales potential, execution capabilities and timely delivery, past repayment history, group strength and market reputation, etc. done both by in-house legal and technical team and but also through reputed international property consultants and law firms. After doing a thorough developer data analysis its audit, financial and banking analysis, legal and technical evaluation commenting on the clear title and availability of requisite approvals, RERA registrations etc., a detailed note is prepared and loan sanction is granted post approval from requisite authorities. The loan is subject to strict post disbursal monitoring by the central credit team which includes ensuring security perfection, regular developer data analysis and audit, escrow account, periodic review of project progress, etc.

For our construction finance business, we operate largely in Tier 1 and Tier 2 cities. Our underwriting team conducts an exhaustive review of the developer's space in affordable/budget homes and /or who can offer such projects to meet construction finance requirements, our team also verify financial health, historical project outcomes, developer's leverage ratios and credit bureau standings of developers. The developers who complies with green building norms are preferred. The team also scrutinizes project approvals, local market conditions, competitive benchmarks and gathers feedback from our existing clientele, in addition to obligatory site inspections. The underwriting process integrates various construction-related benchmarks, including progress milestones, sales velocity and collection targets. The offered tenure of our loan tenor for construction finance is for a period up to 5 years (including Principal Moratorium period, if any), however this tenor can be extended depending on size of the project and construction in phases.

Loan collection and monitoring

Our loan collection and monitoring is fully digitized and we use digital communication channels for monitoring our loans. Our in-house collection team comprises of tele-calling team, field collections and legal recovery. We send customers reminders before the due date using omnichannel communication like text messages and automated calls. We have logics in place to identify certain risk divisions of customers who need more focus than others and we send multiple channel reminders. Recovery actions are initiated immediately as and when the customer defaults. The degree of engagement increases with increase in number of days past due.

In case of delay in payment of EMI, we use our CRM platform to generate data and monitor the actions taken on these cases. Default cases are assigned to tele-calling team or field collections, using predefined logics present in system. Our platform empowers us to identify the focus areas and initiate campaigns based on the previous feedback entered by the collection agents. We have also provided a mobile application which is an end-to-end platform for our feet-on-street collection managers. This app helps them for receipt entry, deposit entry, visit schedule and other day to day field collection related activities. Collection Manager also uses our multiple online payment collection channels to reduce physical cash collection activities. For difficult to recover cases, we have related legal process initiated in parallel to field visits to assist our agents collect customers' outstanding. The legal collection team also uses digital platforms for efficient tracking of cases.

Our loan collection mechanism for project finance is managed through Escrow mechanism. The loan is getting repaid from the project receivable which is shared between the lender and the developer as defined in the sanction letter. The EMIs are collected through ACH banking every month. In case of delay in payment of EMI, the first level escalation is to the concerned business & in-house collection team. We also maintain a Debt Service Reserve Account (DSRA) for each case which has an amount equivalent to 3 months of interest. As the second level of escalation, DSRA is liquidated and adjusted towards the pending EMI. Once the EMI is collected, DSRA is replenished again.

Risk management

The Company has a dedicated risk management team which works to achieve the below mentioned objectives:

- to identify the various types of risks involved in the business;
- to define the methodology to measure/ quantify the risks;
- to control and mitigate the variety of risks involved in business;
- to specify the risk tolerance of the Company;
- to ensure regulatory and statutory compliance on risk management and prudential norms;
- to improve the asset quality of the Company by using risk management tools; and
- to maximize the return on equity with an acceptable level of risk, for the purpose of protecting, preserving and
 increasing the net worth of the Company.

Gold loans

We offer loan against gold to small businesses, vendors, traders, farmers and salaried people for their personal needs as well as for short term financial requirements and working capital needs, at competitive rates with a fast turnaround time. We provide a range of schemes for our customers' diverse requirements along with multiple disbursal modes and repayment options.

As at December 31, 2024, gold loans accounted for 21.07% of the consolidated AUM with an onboarding average ticket size of ₹ 1,03,204, with a portfolio yield of 17.59% with a maximum tenor upto 24 months.

As at March 31, 2024, gold loans accounted for 29.58% of the consolidated AUM with an average ticket size of ₹75,573 with a portfolio yield of 19.00% with a maximum tenor upto 24 months.

Business origination

We source clients directly at our branches which are conveniently spread across the country to grant ease of access to our diverse customer base, along with sourcing through our website, other online channels, customer referrals and partners. Our sales staff periodically conduct promotional activities and events around the catchment areas to drive visibility and generate leads. The campaigns create awareness on the various schemes on offer and contribute to brand recall. The fulfilment of all gold loan leads sourced are through branches or at customer doorstep.

Once a prospective customer walks into any of our gold branch, the customer care executive in the branch explains the various product schemes on offer and helps in identification of best scheme for the customer based on the current requirement. In case of doorstep service, loan manager explains the scheme on offer based on customer requirement. Upon selection of a suitable scheme by the customer, the customer care executive enters client details and uploads mandatory KYC documents into our in-house loan origination tablet application. This application is equipped to screen customers for earlier defaults, frauds and presence in negative customer list as circulated by concerned regulatory and government bodies from time to time.

Credit policy and controls

Post successful authentication of the mandatory documents, the customer proceeds for valuation where the physical gold is valued independently by an experienced team of valuers. Dual underwriting helps in enhancing controls further. We follow a strong verification process and our officers are certified and trained in asset quality practices.

Our branch staff are trained to observe and/or handle fraudulent customers by observing their behaviour, verifying ownership of the gold and matching the jewellery with customer profile or location. For some of high ticket loans, a secondary evaluation may be required to be conducted by an independent internal auditor. After our branch staff have opened and verified the loan account, the loan is sanctioned/approved by the appropriate authorities. The disbursal is processed post completion of mandatory checks as per our credit policy.

Disbursement

Loans upto ₹10 lakh are approved by branches and adequate due diligence is undertaken for cases above ₹10 lakh. Disbursement generally happens through Cash/RTGS/NEFT/IMPS/UPI/Multimode. Cash disbursements shall be done as per RBI Guidelines DoR.FIN.REC.No.45/03.10.119/2023-24 and in accordance with the rules issued under Section 269SS and 269T of the Income Tax Act, 1961 and the requirements under the Income Tax Act, 1961, as amended from time to time, would be applicable.

Collections and monitoring

We have developed a comprehensive collection mechanism leveraging both technology and on-field branch network. Our collection strategy is centred on important pillars comprising branch staff tele-calling, centralized tele-calling team and legal recovery team.

At the time of loan disbursement, customers are provided with both Digital (Quick Pay and Virtual Account) and cash payment options. Prior to payment due-dates, customers are reminded of their dues in the form of automated SMS reminders and branch staff tele-calling. Customers are also sensitized about the implication of default.

For customers defaulting on payments, collection tele-calling is carried out by our branch staff. Our branch staff are assigned specified number of borrowers and they have the responsibility for ensuring timely collection. We ensure that there is continuous monitoring of all customer accounts, especially for strategic high-ticket cases and adopt various collection strategies (including auction) on a case-to-case basis.

Risk management

Ensuring the safety and security of the branch premises is vital to our business since our cash reserves and gold inventory are stored in each branch. The gold ornaments pledged with us are kept in a tamper proof packet with its details mentioned on the packet and then placed into a fire and burglary proof vault. The branch is also under centralised electronic surveillance at all times.

We follow mark-to-market process for valuation of the underlying collateral. In the event of drop in gold prices, collection is initiated from the customer to cover the margin. IIFL reserves the right to sell the collateral in the event of fall in prices below prescribed threshold.

Majority of our loans go through an audit process at a transaction level where, apart from a valuation done by independent valuers at the time of loan disbursement, an experienced and trained audit executive re-appraises the pledged jewels to ensure the purity of the gold is the same as mentioned. Basis risk based sampling criteria, gold loan cases are audited by our audit executives, customers' KYC and financing documents are also checked and scrutinised by offsite auditors and additionally, fraud triggers in place are well defined and identify early warning alarms of unusual behaviour and suspicious customers.

Micro finance

In the microfinance segment, we offer credit support to women who have either limited or no access to formal banking channels. We provide financial services to the economically weaker sections of society with an aim to bring microfinance services to the doorstep of the rural and semi-urban BoP (Bottom of Pyramid) families in India. Loans are offered under various categories such as income generation, education, emergency etc. We follow the Grameen Model (also regarded as "JLG" or Joint Liability Group). Through the model, loan is disbursed to each individual in the group, and the group guarantees for each other's loans.

As of December 31, 2024, the segment accounted for 14.48% of our AUM on a consolidated basis with an onboarding average ticket size of ₹ 46,400, portfolio yield of 24.46%.

As of March 31, 2024, the segment accounted for 16.58% of our AUM on a consolidated basis with an average ticket size of ₹ 43,001, portfolio yield of 24.42%.

Business origination

The loan application is sourced by our Company through its customer relationship officers through a centre disbursement model. A pre-group recognition test is conducted for the customers to give complete information on the product, terms and conditions and repayment criteria, along with providing them financial training related to opening of bank accounts, digital repayments etc.

It is ensured that the customers make use of their loans for their enhancement of their income and financial standard. The customer's residence is also visited by our customer relationship officers.

Once an application is logged into the system, the branch manager performs the group recognition test and visits the residence of the customer and ascertains the identity and residential status of the customer.

Loan Application and acceptance process

The loan application is sourced by our Company through its customer relationship officers through a centre disbursement model. A pre-group recognition test is conducted for the customers to give complete information on the product, terms

and conditions and repayment criteria, along with providing them financial training related to opening of bank accounts, digital repayments etc. The following is the eligibility criteria for customers to avail Microfinance loan with the Company:

- The applicant must be within 18-55 years at the time of loan sanctioning for IGL 1st cycle loans. Applicant must be within 18-60 years at the time of loan sanctioning for IGL subsequent cycle loans, top up loans and product loans.
- The maximum annual income must be less than ₹ 3,00,000.
- Divorced, widow and unmarried female with more than 35 years at the time of loan application and maximum as per the above policy at the time of loan Sanctioning is eligible for a loan from our Company.
- It is ensured that the customers make use of their loans for their enhancement of their income and financial standard. The customer's residence is also visited by our customer relationship officers. Once an application is logged into the system, the branch manager performs the group recognition test and visits the residence of the customer and ascertains the identity and residential status of the customer.

Loan Repayment Process

The NACH mandate is collected from the customer as per standard norms. If the business team is unable to collect the NACH in time, they may be allowed to use the PDC cheque or cash collection only for the first instalment. This time frame shall be utilised by the team for enabling the collection through NACH

Credit policy and controls

We require each member seeking a loan from us to submit an application in the centre meeting that is managed by our customer relationship officers. Once complete, a new loan application is only accepted at a group meeting if the majority of members in a group are present. Once we have accepted the loan application, we review the information provided by the member on items such as the purpose of the loan, the amount, and the relevant expertise of the member in the business, as well as the experience, if any. We also review the previous loan of customers with us as well as other lenders through the credit bureau reports.

A credit check is done mandatorily for all customers through an automated system integrated with the credit bureau. Apart from this, certain parameters are analysed to verify the customer's credit-worthiness and also to ensure they are not overburdened.

We approve new loans based on internal credit approval process and reports from credit bureau.

This approval process comprises of the following steps:

- credit bureau checks;
- consent from the centre/group members;
- customer understanding on company process and policy;
- · customer agreement for joint liability conditions; and
- approval of loan application by the branch manager and scrutinising of the customer documents by branch credit manager.

Most of the application and approval mechanism is controlled through the technology so that policy and regulatory aspects are adhered. In addition to this, we do have a maker checker concept at the branch to reduce the errors and to ensure proper control over the laid down process and policies.

The repayment frequency for MFI customers is fortnightly and monthly. Multiple modes of repayment are provided to the customer. The general practice remains that the customer relationship officers visits the center on the center repayment date and collects the EMIs/EFIs in form of cash or online repayment. Our Company is at the forefront of driving digital collection mechanisms through UPI/BBPS and other modes.

Risk management

The initial focus of our loan portfolio management efforts is on our customer relationship officers, who are given primary responsibility for both the issuance of loans and the collection of repayments from our borrowers. They also regularly conduct checks or reviews of our borrowers and the end use of loans.

We regularly monitor defaults in the field and get in touch with the field teams to conduct prompt follow up. Central teams also report the observations to the management and seek guidance for further action to improve collections. In addition, we have an internal audit team, which reports on the exceptions in operational, system and other processes.

We have in place a dedicated risk management team to analyze and identify the risks associated with each line of business and suggest suitable policy and process changes to reduce the identified risks. The identified risks are reported & reviewed in the Product risk management committee on a regular basis and the risks associated with the enterprise as a whole are reported on a quarterly basis through Risk Management Committee to the Board for review.

Code of conduct and Fair Practices Policy as stipulated by the regulator has been adopted and the same is communicated to the field team so as to address any potential reputational risks. A dedicated vigilance team has been constituted which conducts regular screening of branch centers, and customers to identify frauds at an early stage and also to suggest suitable recommendations to prevent frauds.

Construction and Real Estate finance

Construction and Real Estate finance includes loans to developers for construction and development of predominantly affordable residential projects and a small proportion of mixed-use projects. In line with our broader retail strategy, the construction finance vertical is an enabler for providing retail loans under the approved project route, the Company has tie-ups with developers for funding the property buyers under the retail home loan category.

As at December 31, 2024, our Construction and Real Estate finance accounted for 1.24% of the consolidated AUM with an onboarding average ticket size of ₹ 18.78 crore, portfolio yield of 15.88%.

As at March 31, 2024, our Construction and Real Estate finance accounted for 2.35% of the consolidated AUM with an onboarding average ticket size of ₹ 31.88 crore, portfolio yield of 16.48%.

Business origination

In the real estate financing business, we endeavour to enter into and maintain a relationship with the client, understanding their business requirement and structuring appropriate mix of construction finance option to the developer. In order to determine demand and supply in a market, we conduct surveys, either directly or through external vendors. We lend largely to residential projects and developers that are not subject to any concentration risks. We have also formulated a prudent lending criteria for borrowers in this segment.

Our sales teams meet with clients for deal origination and receive preliminary information. A name clearance memorandum is generated for the credit committee of the Board and post the committee's deliberation, the borrower may be considered for a loan. Our team then proceeds to collect requisite information and documentation from the prospective

customer, prepares a proposal with case details for relevant authorities to review and logs the case into our loan management system for further processing.

Credit policy and controls

The loan application submitted by the sales team is checked for various parameters including the completeness of the application form, relevant KYC documents, etc. A legal and technical assessment by reputed external vendors is initiated to verify the authenticity of the documents, the legal title to the collateral property and its market value. Our credit team also conducts in-person meeting with the prospective customer to gain understanding of their business, revenue streams, expenses and cash management. The credit team then prepares a credit appraisal note which is sent to our sanctioning authority for final approval.

We follow a strict underwriting and risk assessment mechanism for our real estate loan cases, which include the following:

- Borrower group and promoter profile check: wherein we check the developers' past and ongoing project details, financial and banking details, debt history and other outstanding loans etc.
- Project assessment/overview: wherein, in case of a developed/partially developed project, we check the location, total saleable area, number of units available for sale and the market conditions in the geographic region for assessing demand etc; and in case of a new/under construction project, we check the committed commencement and completion dates, percentage of work done, total cost incurred and projections for the planned duration of the project.
- Financial performance appraisal: which involves an in-depth assessment of the financial statements and health of the developer using ratio analysis, sensitivity analysis, credit worthiness assessments and total project cost and expected sales assessments.
- *Collateral/security evaluation by external agencies*: which involves assessment of the external valuation report along with various approvals received by the developer for the project, and the title search report.
- Cash flow and sensitivity analysis: wherein cash flows of the project are analysed on the rationale of sales, construction, approvals, contingencies and debt cost assumptions. A sensitivity check is performed to ascertain the project level debt service coverage ratio.
- Completion of requisite documentation: Prescribed financing documents and KYC documents are obtained and included in the loan application file.

Disbursement and collection process

For our construction finance business, we operate largely in Tier 1 and Tier 2 cities. Our underwriting team conducts an exhaustive review of the developer's space in affordable/budget homes and /or who can offer such projects to meet construction finance requirements, our team also verify financial health, historical project outcomes, developer's leverage ratios and credit bureau standings of developers. The developers who complies with green building norms are preferred. The team also scrutinizes project approvals, local market conditions, competitive benchmarks and gathers feedback from our existing clientele, in addition to obligatory site inspections. The underwriting process integrates various construction-related benchmarks, including progress milestones, sales velocity and collection targets. The offered tenure of our loan tenor for construction finance is for a period up to 5 years (including Principal Moratorium period, if any), however this tenor can be extended depending on size of the project and construction in phases.

Risk management

Our construction and real estate loan application proposals are screened by the senior management and a multi-level committee depending on the loan amount. We seek to mitigate the risk of default by including specific covenants in the financing documentation in addition to our general terms and conditions, on a case-to-case basis.

Our risk management system involves monitoring projects and assessing the facility on a regular basis. Strict project monitoring process post disbursement is followed which includes a quarterly site visit by the technical manager to evaluate technical progress of the project, monitoring of fund transfers, NOC issuances and sales, audit of escrow account, and annual asset quality review. Performance of the portfolio is also regularly reviewed at senior management level and suitable actions are taken either by change in credit policy or by other requisite actions.

MSME secured loan

MSME secured loan is availed for working capital requirements, business use, acquisition of new commercial property. These loans are mortgage-backed secured business loans. Pricing of the product is driven by risk profile of borrower and the type of property being funded along with current prevailing property market rates.

As of December 31, 2024, our MSME secured loan accounted for 12.16% of our AUM on a consolidated basis with an onboarding average ticket size of ₹ 0.10 crores, portfolio yield of 18.84%.

As of March 31, 2024, our MSME secured loan segment accounted for 10.90% of our AUM on a consolidated basis with an onboarding average ticket size of ₹0.08 crores, portfolio yield of 18.85%.

Business origination

We source these loans through multiple channels like direct sales teams (DST), direct sales agents (DSA), website, walkins at our branches, and cross sell. Incrementally, most of our low-ticket loan originations are being done using our proprietary portable tablet-based application. Upon lead identification, our sales executives equipped with tablets visit and obtain requisite information including identity and address proof, business financials, bank statements and income tax returns. The application is entrenched with basic credit appraisal checks using analytical tools which analyses the basic data obtained from customer. Upon preliminary assessment of basic parameters, an instant in-principle approval for the loan application is granted. For cases where additional details are necessary to be assessed, the DSA/DSTs collect all requisite documents as per policy norms and submit to credit appraisal teams for assessment. Our on-field presence provides greater convenience to our customers and increases access to customers for the Company without incurring additional operational costs.

Credit policy and controls

For all our products, the credit policy is approved by the Board of Directors, senior management members, risk and audit committees.

We undertake digital underwriting for small ticket loan borrowers where logical policy checks and underwriting rule engines are in-built in the tablet-based loan application as well as in the Loan Processing System. In most cases the digital underwriting process is sufficient to assess eligibility of a prospective borrower and provide instant credit decision. For appraisal of applications of big-ticket customers, multiple document checks, financial and credit history and risk control checks are carried out and assessment is conducted/considered by various credit committees and at the board level, depending on the value of the transaction. Senior members of the credit teams are empowered at the local level to take credit decisions. Credit team members are authorized to underwrite and approve the cases depending on the value of the transaction and assigned approval authority.

In accordance with our credit policy, once a customer has been identified and has completed an application, the loan proposal is evaluated on the prescribed parameters such as past repayment history, income source, KYC and business profile. Credit underwriting is done as specified in the credit control policies and procedures manual.

The credit appraisal process is summarized as follows:

- Bureau Credit score is the gatekeeper for accepting a loan application. If score parameters defined in policy are met, then the case is logged in for further processing.
- Various checks are performed on the documents provided by the borrower to assess genuineness. These checks are done through an independent fraud control unit.
- Depending on the loan size, our loan officers either connect digitally or meet the borrowers at their business premises and carry out a personal discussion.
- A credit and financial background check on each borrower is mandatorily conducted.
- For collateralized loans, we conduct legal and technical evaluation of the offered security. We have empanelled professionally qualified legal vendors and valuation agencies to carry out security evaluation for us. These vendors are supervised by our professionally qualified, independent legal and technical teams.

In addition to the aforesaid, we have empanelled experienced and qualified vendors and agencies to carry out customer profile evaluation for us. These vendors are supervised by our independent credit and fraud control team.

Risk management

Our robust risk management procedures include monthly portfolio quality reports 'analysis and portfolio performance review TTD (Through-The-Door) population monitoring based these reports. We generate, analyse and review extensive MIS reports which are broken down by multiple segments (sourcing channels, salaried/self-employed etc.) in order to better understand each segment we are active in, logically analyse performance trends and mitigate potential/perceived risks in the portfolio by way of modification in credit policy or other measures as relevant.

MSME unsecured loan

In this segment, the facilities are extended to MSMEs with profitable business operations for certain pre-defined period as a mandatory criterion. The target borrowers must have existing business establishments having good business vintage, running cash flow, need funds to expand business related activities and have past repayment tracks. The pricing is driven by the risk profile of the borrower, the product and the market demand.

As of December 31, 2024, our MSME financing segment accounted for 6.27% of our AUM on a consolidated basis with an onboarding average ticket size of ₹0.09 crore, portfolio yield of 21.50%.

As of March 31, 2024, our MSME financing segment accounted for 5.45% of our AUM on a consolidated basis with an onboarding average ticket size of ₹ 0.07 crore, portfolio yield of 21.90%.

Business Origination:

Loans are sourced by direct/indirect channels and assessed by credit team using internal platform. We source unsecured loans through Omni channels strategies like Direct Sales Teams (DST), Direct Sales Agents (DSA), walk-ins at our branches, cross sell and other digital channels/ partners. The user can enter key details including identity and address proof, business financials, bank statements, income tax returns on the IIFL loan application platform. The authenticated documents are then fed into the underwriting rule engine to provide a soft sanction to the applicant. Upon preliminary assessment of basic parameters, an instant in-principle approval for the loan application is granted. For cases where additional details are necessary to be assessed, the sales team collects all requisite documents as per policy norms and submit for credit appraisal.

Credit policy and controls:

For appraisal of loan applications, multiple document checks, financial and credit history and risk control checks through BRE (Business Rules Engine) are carried out and assessment is conducted/considered by various credit committees and at the board level, depending on the value of the transaction. Senior members of the credit teams are empowered at the local level to take credit decisions. Credit team members are authorized to underwrite and approve the cases depending on the value of the transaction and assigned approval authority.

In accordance with our credit policy, once a customer has been identified and has completed an application, the loan proposal is evaluated on the prescribed parameters such as past repayment history, income source, KYC, assessment of business cash flows and profile. Credit underwriting is done as specified in the credit control policies and procedures manual.

We leverage our IT infrastructure to pull data points from the application form and various other checkpoints like Credit bureau reports, Banks, GST and other integrations. Riskier customers get weeded out at the time of application only.

Various parameters of fraud checks and fintech solutions have been implemented in the journey. With the help of these data points, multiple variables are generated in system at various stages which is consumed by the BRE system to decision the case and populate their eligible loan amount. These generated variables are basis all the available data points like Bureau report (type of loans, delayed loans, loan enquiries), Banking variables (Cash inflow and outflow into the account, cheque returns, Credit / Debit count, Cash transaction etc.) and other application variables like vintage, industry category etc. Overall IIFL uses it internal BRE rule engine and analytical scorecards to decision the case (approve / reject) and determine the final loan amount for approved cases.

The credit appraisal process is summarized as follows:

- Bureau Credit score is the gatekeeper for accepting a loan application. If score parameters defined in policy are met, then the case is logged in for further processing.
- Various checks are performed on the documents provided by the borrower to assess genuineness. These checks are done through an independent fraud control unit.
- Depending on the loan size, our loan officers either connect digitally or meet the borrowers at their business premises
 and carry out a personal discussion. A credit and financial background check on each borrower is mandatorily
 conducted.
- For collateralized loans, we conduct legal and technical evaluation of the offered security. We have empanelled
 professionally qualified legal vendors and valuation agencies to carry out security evaluation for us. These vendors
 are supervised by our professionally qualified, independent legal and technical teams.

In addition to the aforesaid, we have empanelled experienced and qualified vendors and agencies to carry out customer profile evaluation for us. These vendors are supervised by our independent credit and fraud control team.

Disbursement and collection process

<u>Disbursement process:</u>

Our operations team is responsible for managing loan disbursements, ensuring timely and accurate processing, and overseeing loan disbursement. It includes verification of various documents like KYC, Business documents, banking and payment to respective customer. The Operations team ensuring adherence to internal policy, regulatory and compliance parameters through pre-defined checklist.

Collection process:

IIFL Finance has a strong collections team. All members of the collection team have a good amount of prior collection experience with different banking and finance organizations and all members are exposed to Unsecured, Digital lending

(including products like personal loan, business loan, SME products) and Supply chain. The team is spread all across the country in multiple locations and receives regular training on best standard practices and regulation regarding collection. Our loan collection and monitoring is fully digitized and we use digital communication channels for monitoring our loans. Our in-house collection team comprises tele-calling team, field collections and legal recovery. We send customers reminders before the due date using omnichannel communication like text messages and automated calls. Recovery actions are initiated immediately as and when the customer defaults. The degree of engagement increases with an increase in the number of days past due.

In case of delay in payment of EMI, we use our CRM platform to generate data and monitor the actions taken on these cases. Default cases are assigned to tele-calling team or field collections, using predefined logics present in the system. Collection Manager also uses our multiple online payment collection channels to reduce physical cash collection activities. For difficult to recover cases, we have a related legal process initiated in parallel to field visits to assist our agents collect customers' outstanding.

In terms of physical coverage, we have strategically placed our team in regions where we have higher loan exposure and delinquent cases. Currently our in-house Team is covering more than 11,000 pincodes. For monitoring collection efficiency, we have divided our loan exposure across multiple collection zones and each zone is headed by a Zonal Collection Manager and under him, there are Regional/Area Managers and Agency Managers who manage collection agencies and field executives in their zone. Further to strengthen our collection initiatives, we have empanelled reputed collection agencies based on their local collection strength and preference to empanelment of collection agency is given to those agencies who had earlier exposure of collection for similar products.

Risk Management

Our robust risk management procedures include monthly portfolio quality reports 'analysis and portfolio performance review TTD (Through-The-Door) population monitoring based these reports. We generate, analyse and review extensive MIS reports which are broken down by multiple segments (sourcing channels, salaried/ self- employed etc.) in order to better understand each segment we are active in, logically analyse performance trends and mitigate potential/perceived risks in the portfolio by way of modification in credit policy or other measures as relevant.

Supply Chain Finance:

Supply Chain Finance (SCF) encompasses technology-enabled solutions designed to reduce financing costs and enhance operational efficiency for buyers and sellers in a sales transaction. By automating processes and tracking invoice approvals and settlements, SCF simplifies financial operations from start to finish.

In this arrangement, buyers approve their suppliers' invoices for financing through IIFL, providing short-term credit that improves liquidity and optimizes working capital for both parties. Suppliers gain faster access to funds, while buyers benefit from extended payment terms. This allows both sides to manage cash flow effectively and allocate resources to other business priorities.

Types of Supply chain financing:

- Vendor Finance: Vendor financing is the funding arrangement where an Anchor (buyer) arranges the funding for its Vendors (suppliers) and this financing is available for both- Purchase & Sales invoices
- Dealer finance: This financing arrangement focuses on financing of dealers which are associated with the reputed Anchors. Buyers of the anchors are IIFL customers & discounting of invoices raised by anchor is funded. Repayment is done by buyers/dealers based on the mutually agreed arrangement/agreement.

Business Origination

Supply Chain Finance loans are primarily sourced through direct & indirect channels, supported by a network of partners and assessed by the credit team using IIFL's internal platform. These loans are acquired through a comprehensive omnichannel strategy, including partnerships. User can conveniently enter key information, such as identity and address proof,

business financials, bank statements, and income tax returns, on the IIFL loan application platform. The uploaded documents undergo authentication and are processed through the underwriting rule engine to generate a soft sanction. For cases requiring further evaluation, the sales team collaborates with the applicant to gather additional documents as per policy norms for detailed credit appraisal.

Credit Policy and Control

- 1. Buyer Creditworthiness Assessment
 - Since SCF is often based on the buyer's credit strength, IIFL evaluates the buyer's credit rating, financial stability, and payment history.
 - Large, established buyers with strong credit profiles increase the likelihood of financing approval.
- 2. Supplier Evaluation
 - While the focus is primarily on the buyer, IIFL also assess the supplier's business operations, financials, and industry reputation.
 - Consistent supply performance and quality of goods/services can positively result in higher chances of approval.
- 3. Invoice Verification
 - IIFL verifies whether the invoice is legitimate, ensuring it accurately reflects the transaction between the buyer and the supplier.
 - IIFL also checks for any discrepancies, duplicate invoices, or signs of fraud.
- 4. Payment History and Transaction Analysis
 - IIFL examines the historical payment behaviour of both buyers and suppliers.
 - Timely payments and well-maintained relationships are favourable indicators.
- 5. Industry and Market Conditions
 - External factors like market volatility, economic conditions, and industry-specific risks are considered.
 - For volatile sectors, IIFL may apply stricter terms or factor the same in financing rate.
- 6. Legal and Compliance Check
 - Ensuring that all invoices, contracts, and agreements comply with legal and regulatory standards.
 - IIFL ensures adherence to RBI guidelines and other applicable financial regulations.

Below is a step-by-step overview:

- Purchase and Invoice Generation: The supplier delivers goods or services to the buyer as per the agreed terms. After delivery, the supplier issues an invoice to the buyer.
- Invoice Approval: The buyer verifies and approves the invoice for payment. This approval acts as a confirmation of the transaction and the buyer's commitment to pay on the due date.
- Financing Request: The supplier submits the approved invoice to IIFL.
- The supplier requests early payment of the invoice amount, typically at a discounted rate.
- Financing by IIFL: IIFL assesses the invoice and based on the buyer's creditworthiness disburses funds to the supplier.
- Buyer Payment: On the agreed due date (e.g., 30, 60, or 90 days), the buyer pays IIFL the full invoice amount. The buyer benefits from the extended payment period, improving their cash flow.
- Completion: IIFL recovers the payment from the buyer, and the SCF transaction is concluded.

Disbursement process:

Our operations team is responsible for managing loan disbursements, ensuring timely and accurate processing, and overseeing loan disbursement. It includes verification of various documents like KYC, Business documents, banking and payment to respective customer. The Operations team ensuring adherence to internal policy, regulatory and compliance parameters through pre-defined checklist.

Loan collection and monitoring:

Collection is a critical business function that involves the systematic process of recovering overdue payments from customers who have failed to fulfil their financial obligations. It encompasses a range of activities designed to minimize bad debt, protect revenue, and maintain positive customer relationships.

IIFL Finance has a strong collections team. All members of the collection team have good amount of prior collection experience with different banking and finance organization and all members are exposed to Unsecured, Digital lending (including products like personal loan, business loan, SME products), Secured Business Loan and Supply chain. The team is spread all across the country in multiple locations and receives regular training on best standard practices and regulation regarding collection.

Our loan collection and monitoring is fully digitized and we use digital communication channels for monitoring our loans. Our in-house collection team comprises of tele-calling team, field collections and legal recovery. We send reminders to customers before the due date using multiple communication channels like text messages and automated calls. We have frameworks in place to identify certain risk divisions of customers who need more focus than others and we send multiple channel reminders. Recovery actions are initiated immediately as and when the customer defaults. The degree of engagement increases with increase in number of days past due.

In case of delay in payment of EMI, we use our CRM platform to generate data and monitor the actions taken on these cases. Default cases are assigned to tele-calling team or field collections, based on different strategies. Our platform empowers us to identify the focus areas and initiate campaigns based on the previous feedback entered by the collection agents. We have also provided a mobile application which is an end-to-end platform for our feet-on-street collection managers. This app helps them to capture receipt entry, deposit entry, visit schedule and other day to day field collection related activities. Collection Manager also uses our multiple online payment collection channels to reduce physical cash collection activities. For difficult to recover cases, we have related legal process initiated in parallel to field visits to assist our agents collect customers' outstanding. The legal collection team also uses digital platforms for efficient tracking of cases.

In terms of physical coverage, we have strategically placed our team in regions where we have higher loan exposure and delinquent cases. Currently our in-house Team is covering more than 11000 pincodes. For monitoring collection efficiency, we have divided our loan exposure across multiple collections zones and each zone is headed by a Zonal Collection Manager and under him, there are Regional/Area Managers and Agency Managers who manages collection agencies and field executives in their zone. Further to strengthen our collection initiatives, we have empanelled reputed collection agencies basis their local collection strength and preference to empanelment of collection agency is given to those agencies who had earlier exposure of collection for similar products.

Agency assigns a team leader and field executives who follow up on the cases in the field for recovering the default amount from the delinquent customer. The Agency Managers conducts daily follow-ups with their agencies along with ACH on a regular basis. Agency Manager and above also do the joint visits on Refused to pay, Broken promise, Non Contactable along with any critical or problematic cases with Supervisor and field executive. Their visit report is also get published on a weekly basis and reviewed by Zonal Manager, Head collection on monthly basis. Cash collection is restricted and avoided by our partner agencies. Agency is only authorized to collect cheque/ DD/PO or request customer to pay us through online payment modes(Links)/ RTGS / NEFT /IMPS. The Agency shares repayment updates with the Agency Managers. An Agency performance updates are monitored monthly.

Pre EMI activities:

Analytical models are executed to identify high risky cases so that special focus can be established & allocation strategies can be decided.

Additionally, prior to EMI due dates, customer awareness & pre-EMI calling by in house call centre teams are conducted to increase customer awareness about their due dates & EMI details & reduce the number of overdue customers.

Collection allocation strategies:

Overdue cases are allocated to different teams based sourcing channel, current delinquency bucket, past feedbacks and other factors. Multi allocations of different set of customer helps is achieving higher efficiency & builds specialist teams dealing with each buckets.

Joint efforts are put in by collections & sales teams for cases with up to 6 MOB with an aim to bring in accountability as well as helps in maintaining customer experience with IIFL.

Similarly, overdue pool from current bucket is allocated to call centre teams to ensure timely contacts with customers for quick repayments & capturing feedbacks to be passed on to field teams after a specified period of days where payments are still due. Field allocations are handled by in-house as well outsourced agencies. Portfolio cases are allocated within digital teams, lower bucket teams & recovery teams to drive highest efficiency in terms of collections. Assistance from Legal teams is sought wherever required like NPA, write off cases.

Risk Management

Our robust risk management procedures include monthly portfolio quality reports, analysis and portfolio performance review, TTD (Through-The-Door) population monitoring based these reports. We generate extensive analyse and review MIS reports which are broken down into multiple segments (products, credit programs, sourcing channels, nature of employment, etc.) in order to better understand each segment we operate in & logically analyse performance trends and mitigate potential/ perceived risks in the portfolio by way of modification in credit policy or other measures as relevant.

Operational controls

We have well defined policies and procedures that help maintain operational control across the lifecycle of the loan. The function is independent and centralized and among other tasks, majorly checks loan cases for adherence to policy parameters. For every loan proposal, disbursals are approved by the front-end operations after conducting proper non-discrepancy checks.

Collections and monitoring

We have developed a comprehensive collection mechanism leveraging both technology and on-field branch network. Our collection strategy is centered on important pillars comprising branch staff tele-calling, centralized tele-calling team and legal recovery team.

At the time of loan disbursement, customers are provided with both Digital (Quick Pay and Virtual Account) and cash payment options. Prior to payment due-dates, customers are reminded of their dues in the form of automated SMS reminders and branch staff tele-calling. Customers are also sensitized about the implication of default.

For customers defaulting on payments, collection tele-calling is carried out by our branch staff. Our branch staff are assigned specified number of borrowers and they have the responsibility for ensuring timely collection. We ensure that there is continuous monitoring of all customer accounts, especially for strategic high-ticket cases and adopt various collection strategies (including auction) on a case-to-case basis.

Branch Network

As on December 31, 2024, our Company had 4,858 branches and 2,803 branches across India on consolidated basis and standalone basis, respectively.

Total Income	6.73	9.62	5.77
Total Comprehensive Income	3.70	1.79	3.68

Provisioning norms

The Company recognizes loss allowances using expected credit loss ("ECL") model. Primarily, ECL accounts for credit losses in future based on observed portfolio behaviour. ECL Credit losses can be considered as difference observed between contractual future cash inflows and expected cash inflows. ECL accounts for two major characteristics: current behaviour of a financial instrument and observed portfolio losses in the portfolio over a period of time considering the time value of money and has following important parameters:

Exposure at default – Estimate of contractual cash inflows in future as on reporting date

Probability of default - Indicator of likelihood of default of financial instrument for a time period

Loss given default - Indicator of normalised loss incurred post default of financial instrument

Stage 1 includes financial instruments that have low credit risk as on the reporting date. For such assets, 12-month expected credit losses are computed on the exposure and interest revenue is accounted on gross asset value (without considering expecting credit losses). ECL is computed based on expected default events within 12 months since reporting date. It is a measure of likelihood of low credit risk portfolio transitioning to high credit risk (and losses post its transition) in next 12 months ("Stage 1").

Stage 2 includes financial instruments that have higher credit risk than Stage 1 but with no objective impairment evidence. For such assets, lifetime expected credit losses are computed on the exposure yet interest revenue is accounted on gross asset value (without considering expecting credit losses). ECL is computed based on expected default events over the balanced loan tenure ("Stage 2").

Stage 3 includes financial assets that have high credit risk and are considered default as per regulatory norms at the reporting date. For these assets, losses are computed based on empirical data and interest revenue is not accrued ("Stage 3").

Further, additional provisions are provided for certain weak accounts.

Sales and Marketing

Marketing activities for our Company are managed by our marketing and corporate communications department. Through in-house teams, external creative agencies and execution partners, the marketing department conducts various activities ranging from brand awareness, product awareness, creative development, lead generation activities and enhancing customer experience, with a focus on aligning product communication to create an economic, social and environmental impact and an overall aim to make our brand 'IIFL' the brand of choice for its customers. The above activities are implemented through various modes such as broadcast media (TV, print, radio), digital assets (website, social media platforms), digital advertising, out-of-home media and on-ground activities.

Risk and Asset-Liability Management

Risk management is a key element of our business strategy and is integrated seamlessly across all of its business operations. The objective of the Company's risk management process is to manage the risk-return equation and ensure meticulous compliance to all extant laws, rules, and regulations applicable for its business. We take a holistic view of risk management and undertakes an enterprise-wide risk management approach under the Enterprise Risk Management ("ERM") framework.

In order to address the risks that are inherent to our business, we have developed a risk management architecture that includes monitoring by our Board through the Audit Committee, the Asset Liability Committee and the Risk Management Committee. We adopt a 'three lines-of-defence' model wherein management control at the business entity level is the first line of defence in risk management. Various risk control and compliance oversight functions, established by the management are the second line of defence. Finally, the third line comprises the internal audit/assurance function. In order to maintain financial soundness of the company, it seeks to promote a strong risk culture throughout the organization. All major risk classes viz credit risk, market risk, operational risk, fraud risk, liquidity risk, business risk and reputational risk are managed via well-defined risk management processes.

Risk	Risk Response Strategies
Credit, liquidity	Our Company has separate multi-level credit and investment committee, consisting of Directors of
and finance risk	the Board/head of the departments, to consider medium to large credit proposals. However, smaller
	proposals are decided at appropriate level as per the approval matrix.
	The Company has in place a risk management committee and asset liability management committee (ALCO), consisting of directors and senior officials. They regularly meet and review the policies, systems, controls, and positions of the financing business. The committee reviews the risk management processes, covering credit and underwriting controls, operations, technology and compliance risks.
	Liquidity risk arises due to non-availability of adequate funds or non-availability of adequate funds at an appropriate price, or of appropriate tenure, to meet our business requirements. This risk is
	minimised through flexibility in funding mix by way of sourcing the funds through money markets,
	debt markets and banks to meet its business and liquidity requirements. Also Priority sector
	qualified assets available for securitization gives ontap liquidity comfort to the company.

Risk	Risk Response Strategies
	We monitor liquidity risk through our ALCO Committee with the help of fortnightly and monthly liquidity and asset liability mismatch reviews. This involves the categorisation of all assets and liabilities in different maturity buckets and evaluating them for any mismatches in any particular maturity bucket, especially in the short-term. The ALM Policy has capped the maximum mismatches in the various maturities in line with RBI guidelines.
Technology Risk	Our management periodically reviews various technology risks such as protecting sensitive customer data, identity theft, cybercrimes, data leakage, business continuity, access controls, etc.
	We have put in processes, systems and tools for ensuring vigilant monitoring, audit logging and suspicious activity reporting.
	 Robust Business Continuity Framework including Business Continuity Plan (BCP) is in place. BCP Plan is regularly being tested in form of periodic BCP drills from alternate working sites with report submissions to Top Management and Board by Business Continuity Crisis Management Team (BCCMT) and Quick Response Team (QRT).
	We successfully completed the ISO 27001:2013 annual re-certification in January 2023. During the year, many processes are automated to reduce the risk of manual error and frauds.
Compliance Risk	We have implemented business-specific compliance manuals, limit monitoring systems and AML/KYC policies.
	The compliance requirements across various service points have been communicated comprehensively to all through compliance manuals and circulars. To ensure complete involvement in the compliance process, reporting processes have been instituted by heads of all businesses/zones/area offices and departments, through submission of quarterly compliance reports. The compilations of these reports are reviewed by the Audit Committee/Board and are also submitted to regulatory authorities, periodically. Besides, the internal auditors verify the compliances as part of their audit process.
Operational risk management	Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, systems and controls or from external events (as defined by Basel Committee on Banking Supervision).
	Independent operational risk management team reporting to the risk head is in place which is responsible for coordinating all the operational risk activities including building an understanding of the risk profile, implementing tools related to operational risk management, branch operations, cash handling, customer lifecycle management, etc., and working towards the goals of improved controls and lower risk.
Credit risk management	Credit Risk is a measure of loss arising due to failure of borrower to meet the contractual obligation of repayment as per agreement. Our Company has defined processes for identification, ongoing assessment and mitigation of credit risk for various products on regular basis.
	Our Company routinely monitors credit risk including asset impairment risks and ensures compliance within the board approved policies and risk limits. Additionally, we monitor risk concentrations based on various characteristics. Portfolio reviews are undertaken on monthly basis highlighting behaviour of products on various financial and non-financial parameters.

Risk	Risk Response Strategies		
	Our Company's credit concentration monitoring is undertaken on continual basis. Our Company		
	has board-approved policy capping credit concentration to entities. This is effectively undertaken		
	to ensure avoidance of default of large exposures affecting our Company's financial performance.		
Fraud Risk	Our Company has a comprehensive Fraud Risk Management framework in place with an		
Management	independent Fraud Control Unit (FCU) team responsible for fraud prevention, fraud detection and		
	fraud investigations supported by offsite Audit team, internal audit function, outsourced		
	verification vendors and fraud analytics.		

Internal Controls

The Company has an Internal Control System which is commensurate with the size, scale and complexity of its operation. The Internal Audit team monitors and evaluates the efficacy and adequacy of Internal Control systems in the Company, its compliance with operating systems and accounting procedures. Based on the report of the Internal Auditor, process owners undertake corrective action in their respective areas and thereby strengthen the controls. Significant audit observations, if any and corrective actions and implementation thereof are presented to the Audit Committee of the Board. Status of resolution tracking as well as pending issues is reported to senior management and audit committee of the Board on a regular basis as an 'Action Taken Report'.

Human Resources

Our human resource management systems and processes are future ready and go hand-in-hand with the demands of the business and environment. We have got a scalable talent acquisition system which seamlessly interacts with business and stakeholders to hire and onboard talent. Training and development which is central to our people development theme has the right mix of classroom, online, MDP trainings and certification courses.

We have been taking employee feedback through our annual pulse survey, which enables us to constantly recalibrate our policies and initiatives and improve on areas, based on the feedback. As of December 31, 2024, the Company (along with its subsidiaries) has a strong workforce of 38,235 employees on a consolidated basis.

Corporate Social Responsibility

On the social front, IIFL Foundation (the CSR arm of the IIFL group) has undertaken many initiatives for community welfare, with a special focus on five for development i.e. health, education & environment, livelihood and poverty alleviation. While designing the CSR programmes, a major emphasis has been given to grant opportunities and building the skills of women through our initiatives, especially those from marginalised and vulnerable communities. The programmes contribute to the sustainable development goals by working to promote gender equality, reduced inequalities, no poverty, quality education and good health and wellbeing.

IIFL Foundation's Sakhiyon ki Baadi programme, is an initiative that addresses the issue of female education, to introduce young girls especially from tribal belts, into formal education. The programme aims to eliminate female illiteracy in the indigenous tribal and other vulnerable areas with disproportionate male-female literacy and education ratios, thereby trying to address gender disparities by achieving literacy and numeracy skills for both men and women. The programme is spread across Rajasthan which has an overall reach across 5 districts with 460 learning centres focused on reducing gender disparity providing girl child with access to educational opportunities. The foundation has also supported digitization in learning at some government schools, at Rajasthan, by developing smart classrooms.

IIFL Foundation also collaborates with NGOs to hold and support medical camps. The foundation has supported the Pandharpur Medical Camp by providing medical supplies, in-patient services and food distribution. It has also provided support for conducting eye and dental check-ups camps at Barsana. As part of IIFL Foundation's initiative on skill

development it initiated a course on 'Hospitality Training Program and Chef Trade' for youths at Kupwara, a district in Kashmir.

The IIFL Foundation also supports the 'Chhoti Badi Baatein' programme which focuses on improving learning and mental well being for children. The objective of the programme is to support children to develop appropriate social and interpersonal skills, develop a sense of responsibility, recognise and manage their emotions and foster the development of cognitive, language, communication and mathematic skills among others.

Competition

Our Company offers a diversified range of products including home, gold, business and micro finance loans, loans against property and loans against securities. These are provided to a broad segment of customers including salaried and self-employed personnel and corporates. We face competition primarily from other NBFCs and banks. The major competitive factors among the peer group are an extensive branch network, greater funding capabilities, wider range of products and services, and advanced technology offerings.

Insurance

Our Company has insured its various properties and facilities against the risk of fire, burglary, breakdown of office equipment, risk of financial loss due to fraud and other perils including public liability which covers the legal liability arising out of third party bodily injury or third-party property damage in company premises. Our Company has obtained money policy to cover "money in safe and till counter and money in transit" for the branches and various offices.

Our Company also has in place a group insurance policy for its employees and their dependent family members, group term life and group personal accident policies, which provide uniform benefits to all the employees.

Further, our Company has a Directors and Officers Liability Policy which provides a cover for the personal liability of directors and officers arising due to wrongful acts in their managerial capacity.

For a discussion of certain risks relating to our insurance coverage, please see Risk Factor No. 13 "Insurance of relevant assets obtained by our borrowers may not be adequate to protect them against all potential losses, which could indirectly affect our ability to recover our loans to such borrowers. Further, our insurance coverage may not adequately protect us against losses." on page 31 of this Shelf Prospectus.

 <u>Note</u>: The abovementioned properties were owned by India Infoline Finance Limited (now merged with our Company). The said properties are in the process of transfer in the name of our Company

Intellectual Property

Our Company has entered into a trademark license agreement with IIFL Capital Services Limited (*Formerly known as IIFL Securities Limited*) dated March 19, 2019. Pursuant to which, IIFL Capital Services Limited (*Formerly known as IIFL Securities Limited*) has granted our Company with a non-exclusive right and license to use the trademark, service mark and logos pertaining to "IIFL" i.e. **IIFL FINANCE**. The term for which the license is granted is in perpetuity, subject to the terms and conditions contained in the trademark license agreement. For details please see "*History and Main*"

Objects" on page 215 of this Shelf Prospectus. Further, our Company has applied for registration of the logo "MyMoney" and trademark 'My Money' in class 36 on January 12, 2024. The Trade Marks Registry has examined the captioned trade mark application and has raised objections inter alia under the provisions of Sections 9 and 11 of the Trade Marks Act, 1999. Once the examination report is served, our Company will file a response against the objections raised.

Information Technology

Information Technology in our Company is the core element which drives business growth and forms the backbone of our organization. Information technology is used as a strategic tool which comprises industry standard business applications and robust IT infrastructure setup which are used to manage business operations which improves our overall productivity and efficiency and provide seamless and world class experience to our customers. We believe that through our information systems and adequate controls we are able to manage our nationwide operations efficiently, market effectively to our target customers, and effectively monitor and control risks. Business applications including loan operating system are designed, developed and implemented to meet our business and regulatory requirements round the clock and is being used in all our branches across India to manage business operations, improve customer services and efficiency from time to time. IT and Information security and processes are aligned with RBI Master Directions, ISO 27001 and Industry best practices and industry standard security solutions are implemented to control security and Cyber Risks.

Treasury Operations

Our treasury operations are mainly focused on meeting our funding requirements and managing short term surpluses. Our funding requirements are currently predominantly sourced through term loans, issuance of debentures, commercial paper and securitisation of receivables. We believe that through our treasury operations we are able to maintain our ability to repay borrowings as they mature and obtain new loans at competitive rates. Our treasury department undertakes liquidity management by seeking to maintain an optimum level of liquidity and complying with the RBI requirements of asset liability management. The objective is to ensure smooth functioning of all our operations and at the same time avoid the holding of excessive cash. Our treasury maintains a balance between interest earning liquid assets and cash to optimize earnings. We actively manage our cash and funds flow using various cash management services provided by banks. As part of our treasury activities we also invest our temporary surplus funds in fixed deposits with banks, liquid debt-based mutual funds and government securities. Our investments are made in accordance with the investment policy approved by the Board.

Key terms of Material Agreements and Material Contracts

Other than the below-mentioned agreements, our Company has not entered into material agreements and material contracts which are not in the ordinary course of business.

(i) Joint Venture Agreement with Open Financial Technologies Private Limited

The Board of Directors of the Company at its meeting, held on May 02, 2022 approved a proposal of Joint Venture with Open Financial Technologies Private Limited ("Open Fin Tech") for the purposes of offering neo-banking services to consumers and micro enterprises and retail customers including lending, investment, and wealth management services to certain target groups. The Company on May 02, 2022 also executed a Joint Venture Agreement with Open Financial Technologies Private Limited ("JV Agreement") and with respect to the said Joint Venture, the Company incorporated a subsidiary in the name of IIFL Open Fintech Private Limited ("JV Entity"). The Ministry of Corporate Affairs approved incorporation of the said subsidiary on May 17, 2022 and issued a Certificate of Incorporation for the same.

Our Company's obligations under the JV Agreement inter alia includes (a) capital commitment in the JV Entity; (b) assistance in customer acquisition through online and offline modes; (c) providing lending capital and support to the JV Entity; (d) risk underwriting and lending through the JV Entity platforms.

Open Fin Tech's obligations under the JV Agreement inter alia includes (a) capital commitment in the JV Entity; (b) providing technological support, license and source code for the licensed technology; (c) providing digital acquisition, know-how and staffing support.

(ii) Share Subscription Agreement dated June 9, 2022 ("Subscription Agreement") executed amongst IIFL Home Finance Limited and Platinum OWL C 2018 RSC Limited and Shareholder's Agreement dated June 9, 2022 executed amongst Our Company, Subsidiary Company and Investor (Acting as trustee of Platinum Jasmine A 2018 Trust)

IIFL Home Finance Limited ("**Subsidiary Company**"), a material subsidiary of the Company has executed the Share Subscription Agreement with a wholly owned subsidiary, Platinum OWL C 2018 RSC Limited ("**Investor**"), which is a company incorporated under the laws of Abu Dhabi Global Market (individually as a "**Party**", together the "**Parties**") ("**Subscription Agreement**"). The Investor has agreed to subscribe to the securities of IIFL Home Finance Limited.

The salient features of the Subscription Agreement, are as follows:

• Assignment of Rights: The Parties are restricted to assign their rights and obligations under the Subscription Agreement, without the prior written consent of other Parties, provided that the Investor shall be entitled to assign its rights and obligations under the Subscription Agreement to any of its affiliates to whom it transfers of its subscription securities.

 Company cannot take any decisions in relation to the below matters without obtaining prior written consent of the investor:

- Making alteration to its share capital

Except to the extent permitted under the transaction documents, any change in the share capital is permitted under the share subscription agreement, unless it reduces the proposed shareholding percentage of the investor in the share capital of the company.

- Declaring any dividend

Company cannot declare, set aside, make or pay any dividend (interim or final) without obtaining prior written consent of the Investor.

• <u>Long Stop Date</u>: Shall mean a date mutually agreed by the Investor and the Company prior to which the Company is obligated to fulfil the conditions precedent provided under the Part A of Annexure IV of the Share Subscription Agreement.

Our Company, Subsidiary Company and PLATINUM OWL C 2018 RSC LIMITED (Acting as trustee of Platinum Jasmine A 2018 Trust) ("Investor"), have entered into a Shareholder's agreement dated June 9, 2022 ("SHA") (collectively "SHA Parties"). The SHA confers certain rights on the Investor including: (i) rights upon the transfer of shares by the Company which are: (a) a tag-along right; and (b) right of first offer; (ii) rights to exit the Subsidiary Company via a secondary sale or a drag along right;; (iii) right of pre-emption and anti-dilution in relation to any further issuance of any equity shares or equity share equivalents by Subsidiary Company; (iv) the right preventing Subsidiary Company from providing another investor more favourable terms than those provided to the Investor.

Subsidiaries of our Company

The Company has following subsidiaries:

(i) IIFL Home Finance Limited:

IIFL Home Finance Limited was incorporated under the provisions of the Companies Act, 1956 bearing CIN U65993MH2006PLC166475 on December 26, 2006, under the name of India Infoline Housing Finance Limited. Its name was changed to 'IIFL Home Finance Limited' pursuant to fresh certificate of incorporation dated May 02, 2018 issued by the Registrar of Companies, Maharashtra, Mumbai. It is registered with the NHB as housing finance company vide registration no. 09.0175.18 dated September 14, 2018. The NHB registration no. before change of name of IIFL Home Finance Limited was 02.0070.09 dated February 03, 2009. The IIFL Home Finance Limited has been notified as a financial institution under SARFAESI Act vide Government notification dated June 23, 2010.

IIHFL caters to a vast segment of retail and corporate customers through its loan offering – this includes both home loans and loans against property and construction finance. IIHFL has a significant competitive advantage of the parent Company, which provides managerial, financial and operational support. IIHFL has access to the pan India branch and distribution network of the Company, and it leverages the same.

IIHFL uses its own proprietary loan software for loan originations and repayment management. The system offers greater control and flexibility over other available systems in the market since changes regarding the loan offering, policy parameters etc. can be implemented on real time basis.

Remuneration of Directors

The Nomination and Remuneration Committee ("NRC") determines and recommends to the Board the compensation to be paid to Directors. The Board of Directors or the shareholders, as the case may be, approve the compensation to Directors.

The tables below sets forth the details of the remuneration pertaining to the current financial year and last three financial years which has been paid or was payable to the Directors by the Company.

A. Remuneration paid to our Directors by our Company

The terms of remuneration of the Executive Directors are as below:

1. Nirmal Bhanwarlal Jain, Managing Director

The following sets forth Terms of Remuneration of Mr. Nirmal Bhanwarlal Jain, Managing Director appointed with effect from April 01, 2022. The following terms of remuneration has been approved by the Board of Directors at its meeting held on June 09, 2022 and the same was approved by the shareholders at the Annual General Meeting held on July 08, 2022. Further, the Nomination and Remuneration Committee at its meeting held on April 25, 2023 approved increase in remuneration by 20% effective from April 1, 2023.

- a) Basic salary of ₹ 0.72 crore per month subject to change as may be proposed by the NRC/Board from time to time.
- b) Housing/HRA: He shall be entitled to a Company provided house or house rent allowance of 20% of basic salary if house owned by him but furnished by the Company or house rent allowance of 50% of basic salary if house owned and furnished by himself.
- c) Leave Travel: Expenses for him and his family, once in a year subject to a maximum of one month's basic salary.
- d) Other benefits: In addition to the above, he will be entitled to claim reimbursement of expenses on account of residence telephones, two cars, business promotion, entertainment, professional development and traveling, full re-imbursement of the education expenses of his children and other incidental expenses incurred in the normal course of the Company's business, full medical expenses incurred for self and his family, including premium for medical insurance or any other benefit as approved by the NRC. Other benefits will be subject to a maximum of ₹ 0.30 crore per month.
- e) Increment: Board/NRC can determine the remuneration on an annual basis subject to increment not exceeding 25% p.a. of basic salary, allowances and perquisites.
- f) Commission: He shall be paid commission as permissible under the Companies Act, 2013 ("the Act") and as determined by the Board/NRC from time to time. In addition, he will be eligible for contribution to provident funds, gratuity and superannuation and leave encashment as per the rules of the Company.
- g) Other terms: He shall not be paid any sitting fees or any other salary for attending Meetings of the Board of Directors or Committees thereof.
 - In case of absence or inadequacy of profit in any financial year, the aforesaid remuneration and perquisites shall be paid to Mr. Nirmal Jain as minimum remuneration, subject to provisions of the Act.
- h) Termination of Employment:

This employment shall be deemed to be terminated on the occurrence of death, on expiration of tenure, permanent disability or on resignation, the notice period will be as per the Company's Policy.

In the event of termination for any of the reasons specified above, he or his Nominee(s) shall be entitled to receive as a lump sum severance payment, a sum equal to 5 times the annual salary including allowances and perquisites.

2. R Venkataraman, Joint Managing Director

R Venkatraman is appointed as the Managing Director of IIFL Capital Services Limited (formerly known as IIFL Securities Limited), an IIFL group company, w.e.f. March 22, 2025. Previously, he was Managing Director of IIFL Facilities Services Limited, an IIFL group company and was drawing his entire remuneration from IIFL Facilities Services Limited and not drawing any remuneration from the Company. Further, prior to his appointment in IIFL Facilities Services Limited, he was Managing Director of IIFL Capital Services Limited and was drawing remuneration from IIFL Capital Services Limited.

Details of remuneration paid to the Executive Directors for the current year and financial years ended March 31, 2024, March 31, 2023 and March 31, 2022, by our Company:

(₹ in crore)

Name of Director	For the nine months ended December 31, 2024#	Fiscal 2024#	Fiscal 2023#	Fiscal 2022#
Nirmal Jain [#]	7.78	11.09	9.95	8.49
R Venkataraman	-	-	-	-

[#]Exclusive of gratuity / leave liability.

Remuneration of Non-Executive Directors and Independent Directors

The Non-Executive Directors and Independent Directors are paid remuneration by way of sitting fees, commission and reimbursement of other expenses (travelling, boarding and lodging incurred for attending the Board/Committee meetings), except for one Non-Executive Director to whom neither sitting fees nor commission is paid by our Company and one Non-Executive Nominee Director to whom only sitting fee is paid by our Company.

The Company pays sitting fees of ₹1,00,000 (Rupees One Lakh only) per meeting to Non–Executive Directors and Independent Directors for attending meetings of the Board and Audit Committee and ₹30,000 (Rupees Thirty Thousand only) per meeting for attending other committee meetings plus reimbursement directly related to the actual travel and out-of-pocket expenses, if any, incurred by them, except the Corporate Social Responsibility Committee meetings for which there is no sitting fees is payable.

Apart from above, the Non-Executive Directors and Independent Directors are eligible for commission as approved by the shareholders of the Company at the Annual General Meeting held on June 30, 2021. The amount of commission is based on the overall financial performance of the Company and Board of Directors. The commission payable to the Non-Executive Independent Directors of the Company is as recommended by the Nomination and Remuneration Committee and as decided by the Board of the Company from time to time provided it does not exceed one percent of the net profit of the Company for the respective year.

The following table sets forth all compensation recorded by the Company to the Non-Executive and Independent Directors for the current financial year and financial years ended March 31, 2024, March 31, 2023 and March 31, 2022, by our Company:

Terms of Appointment of Independent Directors

1. Appointment

Appointment will be for a term of five years from the date of appointment unless terminated earlier or extended, as per the provisions of this letter or applicable laws ("Term"). As an Independent Director you will not be liable to retire by rotation.

Re-appointment for another term of maximum period of five years at the end of the current term shall be based on the recommendation of the Nomination and Remuneration Committee and subject to the approval of the Board and the shareholders by way of Special Resolution. Your reappointment would be considered by the Board based on the outcome of the performance evaluation process and you continuing to meet the independence criteria.

2. Role, duties and responsibilities

As member of the Board you along with the other Directors will be collectively responsible for ensuring the objectives of the Board which include:

- a) The Company ensuring the requirements under the Companies Act, 2013
- b) Responsibilities of the Board as outlined in the Corporate Governance requirements as prescribed by Stock Exchanges under the Companies Act, 2013 and the SEBI LODR Regulations
- c) Accountability under the Directors' Responsibility Statement,
- d) Overseeing the maintenance of high standards of company's values and ethical conduct of business,
- e) Reviewing the business plan, model and monitoring the action plan,
- f) Overseeing the Company's contribution to enhancing the corporate social responsibility
- g) Act not in a manner that unfairly obstructs the functioning of the board and its committees
- h) Strive to attend all meetings of the board and its committees
- i) Abide by the 'Code for Independent Directors' as outlined in Schedule IV to section 149(8) of the 2013 Act, and duties of directors as provided in the 2013 Act (including Section 166) and under the SEBI LODR Regulations, as may be applicable from time to time.

3. Time Commitment

You shall devote such time as is prudent and necessary for the proper performance of your role, duties and responsibilities as an Independent Director.

4. Remuneration

As an Independent Director you shall be paid sitting fees for attending the meetings of the Board and the Committees of which you are a member as fixed by the Board from time to time.

In addition to the sitting fees, you may be eligible for commission as may be decided by the Board subject to the necessary approval of the shareholders of the Company.

Further, the Company may pay or reimburse to you such reasonable travel, hotel or other related expenditure, as may have been incurred by you while performing your role as an Independent Director of the Company. This could include reimbursement of expenditure incurred by you for attending Board/ Committee meetings, Annual General Meetings, Extraordinary General Meetings, court convened meetings, meetings with shareholders/ creditors/ management, induction and training (organized by the Company for Directors) and in obtaining, subject to prior consultation with the Board, professional advice from independent advisors in the furtherance of your duties as an Independent Director.

5. Insurance

The Company has obtained Directors' and Officers' Liability Insurance policy and you will be covered under the same.

Code of Conduct

As an Independent Director of the Company, you agree to comply with the Code of Conduct for Non-Executive Directors (NEDs). For your reference, the Code of Conduct for Non-Executive Directors is outlined below:

- a) Non-Executive Directors of a Company will always act in the interest of the Company and ensure that any other business or personal association which they may have, does not involve any conflict of interest with the operations of the Company and his/ her role therein,
- b) Non-Executive Directors will comply with all applicable laws and regulations of all the relevant regulatory and other authorities as may be applicable to such Directors in their individual capacities,
- c) Non-Executive Directors will strictly safeguard the confidentiality of all information received by them by virtue of their position.
- d) Unless specifically authorised by the Company, you shall not disclose company and business information to public constituencies such as the media, the financial community, employees, shareholders, agents, franchisees, dealers, distributors and importers.
- e) Your obligation of confidentiality shall survive termination or cessation of your directorship with the Company.
- f) We would also like to draw your attention to the applicability of both, Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 1992 and the Code of Conduct on Prevention of Insider Trading Policy, prohibiting disclosure or use of unpublished price sensitive information.

Additionally, you shall not participate in any business activity which might impede the application of your independent judgment in the best interest of the Company. You are required to sign a confirmation of acceptance of the Code of Conduct for NEDs on annual basis.

7. Familiarization program

The Company shall, if required, conduct formal familiarization program for its Independent Directors.

8. Performance Appraisal / Evaluation Process

As a member of the Board, your performance as well as the performance of the entire Board and its Committees shall be evaluated annually. Evaluation of each director shall be done by all the other directors. The criteria for evaluation shall be determined by the Nomination and Remuneration Committee and disclosed in the Company's Annual Report.

However, the actual evaluation process shall remain confidential and shall be a constructive mechanism to improve the effectiveness of the Board / Committee.

9. Disclosures, other directorships and business interests

During the Term, you agree to promptly notify the Company of any change in your directorships, and provide such other disclosures and information as may be required under the applicable laws. You also agree that upon becoming aware of any potential conflict of interest with your position as Independent Director of the Company, you shall

promptly disclose the same to the Chairman and the Company Secretary. Please confirm that as on date of this letter, you have no such conflict of interest issues with your existing directorships. Further, you are required to obtain prior consent of the Company in case you intent to join the board of any companies engaged in the same sphere of activities that of IIFL group.

During your term, you agree to promptly provide a declaration under Section 149(7) of the 2013 Act, every year and upon any change in circumstances within 20 days which may affect your status as an Independent Director.

10. Changes of personal details

During the term, you shall promptly intimate the Company Secretary and the Registrar of Companies in the prescribed manner, of any change in address or other contact and personal details provided to the Company.

11. Termination

Your directorship on the Board of the Company shall terminate or cease in accordance with law. Apart from the grounds of termination as specified in the 2013 Act, your directorship may be terminated in case of violation of any provision of the Code of Conduct as applicable to Non-Executive Directors.

You may resign from the directorship of the Company by giving a notice in writing to the Company stating the reasons for resignation and also to Registrar of Companies (RoC). The resignation shall take effect from the date on which the notice is received by the Company or the date, if any, specified by you in the notice, whichever is later.

If at any stage during the Term, there is a change that may affect your status as an Independent Director as envisaged in Section 149(6) of the 2013 Act or, if applicable, you fail to meet the criteria for "independence" under the provisions of the SEBI LODR Regulations, you agree to promptly submit your resignation to the Company with effect from the date of such change.

12. Co-operation

In the event of any claim or litigation against the Company, based upon any alleged conduct, act or omission on your part during your Term, you agree to render all reasonable assistance and cooperation to the Company and provide such information and documents as are necessary and reasonably requested by the Company or its counsel.

13. Miscellaneous

This letter represents the entire understanding, and constitutes the whole agreement, in relation to your appointment and supersedes any previous agreement between yourself and the Company with respect thereto and, without prejudice to the generality of the foregoing, excludes any warranty, condition or other undertaking implied at law or by custom.

No waiver or modification of this letter shall be valid unless made in writing and signed by you and the Company.

As per the provisions of the Companies Act, 2013 and SEBI LODR, the terms of this letter along with your detailed profile shall be disclosed on the website of the Company and the relevant stock exchanges.

B. Remuneration paid by Subsidiary and associate companies to the Directors

As on date of this Shelf Prospectus, we do not have any associate companies.

Except as disclosed below, none of our directors have drawn any remuneration from our Subsidiaries.

REGULATIONS AND POLICIES

The regulations summarised below are not exhaustive and are only intended to provide general information to investors and are neither designed nor intended to be a substitute for any professional legal advice. Taxation statutes such as the IT Act, 1961 and applicable tax statutes, labour regulations such as the Employees State Insurance Act, 1948 and the Employees Provident Fund and Miscellaneous Provisions Act, 1952, and other miscellaneous regulations such as the Trade Marks Act, 1999 and applicable Shops and Establishments statutes apply to us as they do to any other Indian company and therefore have not been detailed below. For purposes of this section, references to any legislation, act, regulation, rule, guideline, policy, circular, notification or clarification are to such legislation, act, regulation, rule, guideline, policy, circular, notification or clarification as amended from time to time. Investors shall carefully consider the information described below, together with the information set out in other sections of this Shelf Prospectus including the financial statements before making an investment decision relating to the NCDs, as any changes in the regulations and policies could have a material adverse effect on our Company's business.

The following description is a summary of certain sector specific laws and regulations and policies as prescribed by the Government of India and other regulatory bodies, which are applicable to our Company. The information detailed in this section has been obtained from publications available in the public domain. The regulations set out below may not be exhaustive, and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice. The statements below are based on the current provisions of the Indian law, and the judicial and administrative interpretations thereof, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

NBFC Regulations

The Reserve Bank of India Act, 1934

The RBI regulates and supervises activities of NBFCs. Chapter III B of the Reserve Bank of India Act, 1934 ("RBI Act") empowers the RBI to regulate and supervise the activities of all NBFCs in India. The RBI Act defines an NBFC under Section 45-I (f) as:

- i. a financial institution which is a company;
- ii. a non-banking institution which is a company and which has as its principal business the receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner;
- iii. such other non-banking institution or class of such institutions as the RBI may, with the previous approval of the Central Government and by notification in the Official Gazette, specify.

Section 45-I(c) of the RBI Act, defines "financial institution" to mean any non-banking institution which, among other things, carries on the business of, or part of its business of, financing, by way of making of loans or advances or otherwise, of any activity other than its own; the acquisition of shares, stock, bonds, debentures or securities issued by a Government or local authority or other marketable securities of a like nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of carrying out any agricultural or industrial activities or the sale/purchase/ construction of immovable property.

The RBI has clarified through a press release dated April 08, 1999, that in order to identify a particular company as an NBFC, it will consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide its principal business. The company will be treated as an NBFC if (a) its financial assets are more than 50 per cent. of its total assets (netted off by intangible assets); and (b) income from financial assets should be more than 50 per cent. of the gross income. Both these tests are required to be satisfied as the determinant factor for principal business of a company.

Every NBFC is required to submit to the RBI a certificate, from its statutory auditor within 5 working days from the date of signing of the auditor's report in terms of section 134 of the Companies Act, 2013, but not later than December 31 of same year, in any case, based on audited books of accounts of the applicable entity for the preceding financial year.

With effect from 1997, NBFCs were not permitted to commence or carry on the business of a non-banking financial institution without obtaining a Certificate of Registration ("CoR"). Further, with a view to imparting greater financial soundness and achieving the economies of scale in terms of efficiency of operations and higher managerial skills, the RBI has raised the requirement of minimum net owned fund ("NOF") of ₹ 2 crore for the NBFCs not availing public funds.

Further under Section 45 - IC of the RBI Act, every NBFC must create a reserve fund and transfer thereto a sum not less than 20 per cent. of its net profit every year, as disclosed in the statement of profit and loss account and before any dividend is declared. Such a fund is to be created by every NBFC irrespective of whether it is a non-deposit taking NBFC or not. Further, no appropriation can be made from the fund for any purpose by the NBFC except for the purposes specified by the RBI from time to time and every such appropriation shall be reported to the RBI.

NBFCs are primarily governed by the RBI Act, Master Direction – Reserve Bank of India (Non-Banking Financial Company –Scale Based Regulation) Directions, 2023, Peer to Peer Lending Platform (Reserve Bank) Directions, 2017, Master Direction– Non-Banking Financial Company - Account Aggregator (Reserve Bank) Directions, 2016, Reserve Bank Commercial Paper Directions, 2017, Guidance Note on Operational Risk Management and Operational Resilience' dated 30 April 2024 and the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 2016. In addition to these regulations, NBFCs are also governed by various circulars, notifications, guidelines and directions issued by the RBI from time to time, and some such key circulars, notifications, guidelines and directions are further described below.

Although by definition, NBFCs are permitted to operate in similar sphere of activities as banks, there are a few important and key differences. The most important distinctions are:

- i. An NBFC cannot accept deposits repayable on demand;
- ii. NBFCs do not form part of the payment and settlement system and cannot issue cheques drawn on itself; and
- iii. Deposit insurance facility of Deposit Insurance and Credit Guarantee Corporation is not available to depositor of NBFCs.

Section 45-IA of the RBI Act makes it mandatory for every NBFC to get itself registered with the RBI in order to be able to function as an NBFC.

Master Direction – Reserve Bank of India (Non-Banking Financial Company – Scale Based Regulation) Directions, 2023 (updated as on 27 February 2024) ("SBR Directions")

On October 19, 2023 the RBI issued the SBR Directions which is a revised regulatory framework for NBFCs whereby NBFCs have been categorised into following four layers based on their size, activity, and perceived riskiness by the RBI:

- i. NBFC-Base Layer ("NBFC-BL");
- ii. NBFC-Middle Layer ("NBFC-ML");
- iii. NBFC-Upper layer ("NBFC-UL"); and
- iv. NBFC- Top Layer ("NBFC-TL").

The NBFC- BL comprise of (a) non-deposit taking NBFCs below the asset size of Rs. 1,000 core and (b) NBFCs undertaking the following activities- (i) NBFC-Peer to Peer Lending Platform ("NBFC-P2P"), (ii) NBFC-Account Aggregator ("NBFC-AA"), (iii) Non-Operative Financial Holding Company ("NOFHC") and (iv) NBFCs not availing public funds and not having any customer interface.

The NBFC- ML consist of (a) all deposit taking NBFCs ("NBFC-Ds"), irrespective of asset size, (b) non-deposit taking NBFCs ("NBFC-ND") with asset size of Rs. 1,000 crore and above and (c) NBFCs undertaking the following activities (i) Standalone Primary Dealers ("SPDs")— (ii) Infrastructure Debt Fund - Non-Banking Financial Companies ("IDF-NBFCs"), (iii) Core Investment Companies ("CICs"), (iv) Housing Finance Companies ("HFCs") and (v) Infrastructure Finance Companies ("NBFC-IFCs").

The NBFC-UL comprise of those NBFCs which are specifically identified by RBI as warranting enhanced regulatory requirement based on a set of parameters and scoring methodology as provided in Annex I to SBR Directions. The top

ten eligible NBFCs in terms of their asset size shall always reside in the upper layer, irrespective of any other factor.

The NBFC-TL will ideally remain empty. This layer can get populated if RBI is of the opinion that there is a substantial increase in the potential systemic risk from specific NBFC-UL. Such NBFC shall move to the NBFC-TL.

Our Company, being a NBFC-ND, with an asset size of more than Rs. 1,000 crore, is classified as NBFC-ML under the SBR Directions.

Prudential Norms

The SBR Directions, amongst other requirements, prescribe guidelines on NBFC-ML regarding income recognition, asset classification, provisioning requirements, constitution of audit committee, capital adequacy requirements, concentration of credit/investment and norms relating to infrastructure loans.

Provisioning Requirements

Every NBFC (except microfinance loans of NBFC-MFIs), after taking into account the time lag between an account becoming non-performing, its recognition, the realization of the security and erosion overtime in the value of the security charged, shall make provisions against standard assets, sub-standard assets, doubtful assets and loss assets in the manner provided for in the SBR Directions.

In the interests of counter cyclicality and so as to ensure that NBFCs create a financial buffer to protect them from the effect of economic downturns, pursuant to the provisions of SBR Directions, all NBFCs (except NBFC-UL) make provisions for standard assets at 0.40 per cent. of the outstanding, which shall not be reckoned for arriving at net NPAs. The provision towards standard assets need not be netted from gross advances but shall be shown separately as 'Contingent Provisions against Standard Assets' in the balance sheet.

Capital Adequacy Norms

Every NBFC should maintain, a minimum capital ratio consisting of Tier 1 and Tier 2 Capital of not less than 15 per cent of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items is required to be maintained, wherein Tier 1 capital in respect of NBFC (except NBFC-MFI and NBFC primarily engaged in lending against gold jewellery), at any point of time, shall not be less than 10 percent. Further, NBFCs primarily engaged in lending against gold jewellery (such loans comprising 50 per cent or more of their financial assets) are required to maintain a minimum Tier 1 capital of 12.00 per cent.

Credit Concentration Norms

In order to ensure better risk management and avoidance of concentration of credit risks, the RBI has, in terms of the SBR Directions, prescribed credit exposure limits for financial institutions in respect of their lending to single/group borrowers.

For an NBFC – UL: Credit exposure to a single counterparty shall not exceed 20 per cent of the Company's available eligible capital base at all times. Board of the NBFC may allow additional 5 percent exposure beyond 20 percent but at no time higher than 25 percent of the NBFC's eligible capital base, subject to the following conditions: (a) NBFC has a policy approved by its board of directors setting out conditions under which exposure beyond 20 percent may be considered; and (b) NBFC shall record in writing the exceptional reasons for which exposure beyond 20 percent is being allowed in a specific case.

The credit exposure to a group of connected counterparties shall not exceed 25 per cent of the Company's available eligible capital base at all times. However, the Company may exceed the exposure limit by 10 percent of its Tier 1 capital for exposure to a group of connected counterparties, if the additional exposure is on account of infrastructure loan and/or investment.

For NBFC – BL and NBFC - ML: Credit exposure to a single counterparty shall not exceed 25 percent of their Tier 1 capital at all times and 40 percent of their Tier 1 capital to a single group of parties. However, the NBFCs may exceed these limits by 5 percent for a single party and 10 percent for a group if the excess is related to infrastructure loans or investments. For NBFC-IFC, the limits are slightly higher, allowing 30 percent exposure to a single party and 50 percent to a group.

Further NBFCs-BL shall put in place an internal Board approved policy for credit/investment concentration limits for both single borrower/party and single group of borrowers/parties.

Asset Classification

The SBR Master Directions require that every NBFC shall, after taking into account the degree of well-defined credit weaknesses and extent of dependence on collateral security for realisation, classify its lease/hire purchase assets, loans and advances and any other forms of credit into the following classes:

- i. Standard assets;
- ii. Sub-standard assets;
- iii. Doubtful assets; and
- iv. Loss assets.

Further, such class of assets would not be entitled to be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for such upgradation. At present every NBFC is required to make a provision for standard assets at 0.40 per cent.

Net Owned Fund

Section 45-IA of the RBI Act provides that to carry on the business of a NBFC, an entity would have to register as an NBFC with the RBI and would be required to have a minimum net owned fund of ₹ 2 crore.

For this purpose, the RBI Act has defined "Net Owned Fund" to mean:

Net Owned Fund —

- (1) The aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance sheet of the company, after deducting:
- (i) accumulated balance of losses,
- (ii) deferred revenue expenditure, and
- (iii) other intangible assets,
- (2) further reduced by the amounts representing,
- (i) investment by such companies in shares of (a) its subsidiaries, (b) companies in the same group, (c) other NBFCs; and (ii) the book value of debentures, bonds, outstanding loans and advances (including hire purchase and lease finance) made to, and deposits with (a) subsidiaries of such companies; and (b) companies in the same group, to the extent such amount exceeds 10 per cent. of (1) above.

Maintenance of liquid assets

Every NBFC-D shall invest and continue invest in unencumbered approved securities valued at a price not exceeding the current market price and in unencumbered approved term deposits / approved bonds, an amount which shall at the close of business on any day be not less than 15.0% of public deposits outstanding at the close of business on the last working day of the second preceding quarter.

NBFCs such as the Company, which do not accept public deposits, are subject to lesser degree of regulation as compared to a NBFC-D and are governed by Master Direction - Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 2016.

All NBFCs are required to inform the RBI of any change in the address, telephone no's, etc. of its registered office/corporate office, names and addresses of its directors/auditors, names and designations of its principal officers, the specimen signatures of its authorised signatories, within one month from the occurrence of such an event. Further, an

NBFC-ND would need to ensure that its registration with the RBI remains current.

All NBFCs with an asset size of Rs. 100 crore and above and all NBFC-Ds are required to adhere to the guidelines for liquidity risk management provided under the SBR Directions.

Guidelines for NBFCs with gold loan business

The RBI pursuant to the SBR Directions has prescribed that all NBFCs shall maintain a loan to value ratio not exceeding 75 per cent. for loans granted against the collateral of gold jewellery. The SBR Directions has issued guidelines with regard to the following:

- i. Appropriate infrastructure for storage of gold ornaments: A minimum level of physical infrastructure and facilities is available in each of the branches engaged in financing against gold jewellery including a safe deposit vault and appropriate security measures for operating the vault to ensure safety of the gold and borrower convenience. Existing NBFCs should review the arrangements in place at their branches and ensure that necessary infrastructure is put in place at the earliest. No new branches should be opened without suitable storage arrangements having been made thereat. No business of grant of loans against the security of gold can be transacted at places where there are no proper facilities for storage/security.
- ii. Prior approval of RBI for opening branches in excess of 1,000: It is henceforth mandatory for NBFC to obtain prior approval of the RBI to open branches exceeding 1,000. However, NBFCs which already have more than 1,000 branches may approach the Bank for prior approval for any further branch expansion. Besides, no new branches will be allowed to be opened without the facilities for storage of gold jewellery and minimum security facilities for the pledged gold jewellery.
- iii. Standardisation of value of gold in arriving at the loan to value ratio: For arriving at the value of gold jewellery accepted as collateral, it will have to be valued at the average of the closing price of 22 carat gold for the preceding 30 days as quoted by BBA or the historical spot gold price data publicly disseminated by a commodity exchange regulated by the Forward Markets Commission.
- iv. Verification of the Ownership of gold: NBFCs should have Board approved policies in place to satisfy ownership of the gold jewellery and adequate steps be taken to ensure that the KYC guidelines stipulated by the RBI are followed and due diligence of the customer undertaken. Where the gold jewellery pledged by a borrower at any one time or cumulatively on loan outstanding is more than 20 grams, NBFCs must keep record of the verification of the ownership of the jewellery. The method of establishing ownership should be laid down as a Board approved policy.
- v. Auction Process and Procedures: The following additional stipulations are made with respect to auctioning of pledged gold jewellery:
 - (a) The auction should be conducted in the same town or taluka in which the branch that has extended the loan is located. While auctioning the gold, the NBFC should declare a reserve price for the pledged ornaments. The reserve price for the pledged ornaments should not be less than 85 per cent. of the previous 30 day average closing price of 22 carat gold as declared by The Bombay Bullion Association Limited and value of the jewellery of lower purity in terms of carats should be proportionately reduced.
- (b) It will be mandatory on the part of the NBFCs to provide full details of the value fetched in the auction and the outstanding dues adjusted and any amount over and above the loan outstanding should be payable to the borrower.
- (c) NBFCs must disclose in their annual reports the details of the auctions conducted during the financial year including the number of loan accounts, outstanding amounts, value fetched and whether any of its sister concerns participated in the auction.

- vi. Other Instructions:
- i. NBFCs financing against the collateral of gold must insist on a copy of the PAN Card of the borrower for all transaction above Rs. 500,000.
- ii. Documentation across all branches must be standardised.
- iii. NBFCs shall not issue misleading advertisements like claiming the availability of loans in a matter of 2-3 minutes.

Master Direction – Know Your Customer ("KYC") Directions, 2016 dated 25 February 2016 (updated as on 6 November 2024), as amended ("RBI KYC Directions")

The RBI KYC Directions are applicable to every entity regulated by the RBI, specifically, scheduled commercial banks, regional rural banks, local area banks, primary (urban) co-operative banks, state and central co-operative banks, all India financial institutions, NBFCs, miscellaneous non-banking companies and residuary non-banking companies, amongst others. In terms of the RBI KYC Directions, every entity regulated there under is required to formulate a KYC policy which is duly approved by the board of directors of such entity or a duly constituted committee thereof. The KYC policy formulated in terms of the RBI KYC Directions is required to include four key elements, being customer acceptance policy, risk management, customer identification procedures and monitoring of transactions. It is advised that all NBFC'S adopt the same with suitable modifications depending upon the activity undertaken by them and ensure that a proper policy framework of anti-money laundering measures is put in place. The RBI KYC Directions provide for a simplified procedure for opening accounts by NBFCs. It also provides for an enhanced and simplified due diligence procedure. It has prescribed detailed instructions in relation to, inter alia, the due diligence of customers, record management, and reporting requirements to Financial Intelligence Unit — India. The RBI KYC Directions have also issued instructions on sharing of information while ensuring secrecy and confidentiality of information held by Banks and NBFCs. The regulated entities must also adhere to the reporting requirements under Foreign Account Tax Compliance Act and common reporting standards. The RBI KYC Directions also require the regulated entities to ensure compliance with the requirements/obligations under international agreements. The regulated entities must also pay adequate attention to any money-laundering and financing of terrorism threats that may arise from new or developing technologies and ensure that appropriate KYC procedures issued from time to time are duly applied before introducing products/services/technologies.

Master Circular – Bank Finance to Non-Banking Financial Companies dated April 24, 2024 ("Master Circular - Bank Finance to NBFC")

The RBI has issued Master Circular – Bank Finance to NBFC, as amended, relating to financing of NBFCs by banks. In particular, these guidelines prohibit banks from lending to NBFCs for the financing of certain activities, such as:

- i. bills discounted / rediscounted by NBFCs, except for rediscounting of bills discounted by NBFCs arising from sale of commercial vehicles (including light commercial vehicles), and two wheeler and three wheeler vehicles, subject to the conditions prescribed under Master Circular Bank Finance to NBFC.
- ii. investments of NBFCs both of current and long-term nature, in any company / entity by way of shares, debentures, etc. However, Stock Broking Companies may be provided need-based credit against shares and debentures held by them as stock-in-trade.
- iii. unsecured loans / inter-corporate deposits by NBFCs to / in any company.
- iv. all types of loans and advances by NBFCs to their subsidiaries, group companies / entities.
- v. finance to NBFCs for further lending to individuals for subscribing to Initial Public Offerings ("IPOs") and for purchase of shares from secondary market.

Norms for excessive interest rates

All NBFCs must formulate appropriate internal procedures for determining interest rates, processing and other charges. The board of each NBFC shall adopt an interest rate model considering the various relevant factors such as cost of funds, margin and risk premium and determine the rate of interest to be charged for loans and advances. The rate of interest and

the approach for gradation of risk and the rationale for charging different rates of interest for different categories of borrowers shall be required to be disclosed to the borrowers in the application form and communicated explicitly in the sanction letter as well as on the company's website. Furthermore, the rate of interest would have to be annualised so that the borrower is aware of the exact rates that would be charged to the account.

Supervisory Framework

In order to ensure adherence to the regulatory framework by non-deposit taking NBFC-MLs, the RBI has directed such NBFCs to put in place a system for submission of an annual statement of capital funds, and risk asset ratio, etc. as at the end of March every year, in a prescribed format. Every NBFC is required to submit to the RBI a certificate, from its statutory auditor within 5 working days from the date of signing of the auditor's report in terms of section 134 of the Companies Act, 2013, but not later than December 31 of same year, in any case, based on audited books of accounts of the applicable entity for the preceding financial year, together with such other submissions/returns to the RBI as specified in the Master Direction – Reserve Bank of India (Filing of Supervisory Returns) Directions, 2024, as amended and any other related rules, regulations, directions, circulars.

Asset Liability Management

NBFCs, in terms of the SBR Directions are required to have in place an asset liability management ("ALM") system for managing liquidity risk of the NBFCs. This involves the categorization of all assets and liabilities into different maturity profiles and evaluating these items for any mismatches in any particular maturities, especially in the short term. The ALM system rests on the functioning of ALM information systems within the NBFC, including an Asset Liability Committee ("ALCO") and ALM support groups, and the ALM process including entity-level liquidity risk tolerance; funding strategies; prudential limits; system for measuring, assessing and reporting/reviewing liquidity; framework for stress testing; liquidity planning under alternative scenarios/formal contingent funding plan; nature and frequency of management reporting; periodical review of assumptions used in liquidity projection etc.

The ALCO consisting of the NBFC's top management shall be responsible for ensuring adherence to the risk tolerance/limits set by the Board as well as implementing the liquidity risk management strategy of the NBFC. The role of the ALCO with respect to liquidity risk should include, inter alia, decision on desired maturity profile and mix of incremental assets and liabilities, sale of assets as a source of funding, the structure, responsibilities and controls for managing liquidity risk, and overseeing the liquidity positions of all branches.

The ALM Support Group consisting of the operating staff shall be responsible for analysing, monitoring and reporting the liquidity risk profile to the ALCO. Such support groups will be constituted depending on the size and complexity of liquidity risk management in an NBFC.

The ALM Guidelines mainly address liquidity and interest rate risks. In case of structural liquidity, the net cumulative negative mismatches in the maturity buckets 1-7 days, 8-14 days, and 15-30 days shall not exceed 10 percent, 10 percent and 20 percent of the cumulative cash outflows in the respective time buckets.

Anti-Money Laundering

The RBI has issued a Master Circular dated 1 July 2015 to ensure that a proper policy frame work for the Prevention of Money Laundering Act, 2002 ("PMLA") is put into place. The PMLA seeks to prevent money laundering and provides for confiscation of property derived from, or involved in money laundering and for other matters connected therewith or incidental thereto. It extends to all banking companies, financial institutions, including NBFCs and intermediaries. Pursuant to the provisions of PMLA and the RBI guidelines, all NBFCs are advised to appoint a principal officer for internal reporting of suspicious transactions and cash transactions and to maintain a system of proper record (i) for all cash transactions of value of more than Rs 10 lakh; (ii) all series of cash transactions integrally connected to each other which have been valued below Rs 10 lakh where such series of transactions have taken place within one month and the aggregate value of such transaction exceeds Rs 10 lakh; (iii) all transactions involving receipts by non-profit organisations of value more than Rs. 10 lakh; (iv) all cash transactions where forged or counterfeit currency notes or bank notes have been used as genuine and where any forgery of a valuable security or a document has taken place facilitating the

transaction; and (v) all suspicious transactions, whether or not in cash.

Further, all NBFCs are required to take appropriate steps to evolve a system for proper maintenance and preservation of account information in a manner that allows data to be retrieved easily and quickly whenever required or when requested by the competent authorities. Further, NBFCs are also required to maintain for at least ten years from the date of transaction between the NBFCs and the client, all necessary records of transactions, both domestic or international, which will permit reconstruction of individual transactions (including the amounts and types of currency involved if any) so as to provide, if necessary, evidence for prosecution of persons involved in criminal activity.

Additionally, NBFCs should ensure that records pertaining to the identification of their customers and their address are obtained while opening the account and during the course of business relationship, and that the same are properly preserved for at least five years from the date of the transaction. The identification records and transaction data is to be made available to the competent authorities upon request.

RBI Notification dated 3 December 2015 titled "Anti-Money Laundering (AML)/Combating of Financing of Terrorism (CFT) — Standards" states that all regulated entities (including NBFCs) are to comply with the updated FATF Public Statement and document 'Improving Global AML/CFT Compliance: on-going process' as on 23 October 2015.

Accounting Standards & Accounting policies

Subject to the changes in Indian Accounting Standards ("IAS") and regulatory environment applicable to a NBFC we may change our accounting policies in the future and it might not always be possible to determine the effect on the statement of profit and loss of these changes in each of the accounting years preceding the change. In such cases our profit/loss for the preceding years might not be strictly comparable with the profit/loss for the period for which such accounting policy changes are being made.

Reporting by Statutory Auditor

The statutory auditor of the NBFC-ND is required to submit to the Board of Directors of the company along with the statutory audit report, a special report certifying that the Directors have passed the requisite resolution mentioned above, not accepted any public deposits during the year and has complied with the prudential norms relating to income recognition, accounting standards, asset classification and provisioning for bad and doubtful debts as applicable to it. In the event of non-compliance, the statutory auditors are required to directly report the same to thereby.

Master Direction – Reserve Bank of India (Filing of Supervisory Returns) Directions, 2024

The said master directions are applicable on supervised entities which includes all NBFCs except for HFCs and asset reconstruction companies. The said master direction prescribes for provisions in relation to responsibilities of the board and senior management, data architecture and IT infrastructure, accuracy and integrity in reporting, applicable returns, a general description of such returns, timelines for return submissions, alternate timelines for specific returns, mode of submission of returns along with details of online portals for filing applicable returns by NBFCs.

Master Direction on Treatment of Wilful Defaulters and Large Defaulters dated July 30, 2024

The said master direction aims to promote transparency and fairness in the classification of borrowers as wilful defaulters by lenders, including NBFCs, and to establish a system for sharing credit information about these defaulters to alert other lenders. This directive will take effect 90 days after being published on the RBI website and applies to 'lenders' including all India financial institutions, banks, or NBFCs providing credit to the borrower. Additionally, regardless of an entity's classification as a 'lender,' restrictions on further financial support to wilful defaulters and provisions for large defaulters will apply to all entities regulated by RBI.

The directions set forth a detailed process for identifying the wilful defaulters, so that the penal provisions are applied in a fair manner and the scope for discretion is obviated, and require a transparent mechanism throughout the identification process, including a role for internal audits. The said master direction also outline: (a) procedures for reporting and sharing credit information on wilful and large defaulters with CICs; (b) handling of compromise settlements with wilful defaulters; (c) treatment of defaulted loans transferred to other lenders and asset reconstruction companies; (d) approach for accounts resolved under the Insolvency and Bankruptcy Code, 2016/ resolution framework guidelines issued by RBI;

and (e) preventive measures that lenders, statutory auditors, and third parties should take to prevent and identify wilful defaults.

Master Direction – Reserve Bank of India (Commercial Paper and Non-Convertible Debentures of original or initial maturity upto one year) Directions, 2024

The said master direction issued by RBI on January 3, 2024 are applicable on all persons/agencies dealing in commercial paper and/or non-convertible debentures of original or initial maturity up to one year and the same have been made effective from April 01, 2024. The eligible issuers under the said master directions include NBFCs. The issuance under these directions is subject to condition that all fund-based facilities availed, if any, by the eligible issuer from banks/ all India financial institutions/ NBFCs are classified as 'standard' at the time of issue. The said master direction provides for, among other provisions, a list of eligible investors, general guidelines (in relation to primary issuance, discount / coupon rate, credit enhancement, end-use of funds, rating requirement, primary and secondary market related conditions, buyback, repayment, default, market timing and practices), reporting requirements, roles and responsibilities of (a) issuing and paying agent, (b) debenture trustee, and (c) credit rating agency. Further, it has been stated that the public deposit directions shall not be applicable to the NBFCs raising funds by issuance of commercial papers in accordance with the aforesaid master directions.

Master Direction – Reserve Bank of India (Securitisation of Standard Assets) Directions, 2021, as amended ("Securitisation Directions")

Securitisations of identified loan assets of NBFCs is regulated by the Securitisation Directions. The Securitisation Directions are applicable to, inter alia, NBFCs.

The Securitisation Directions regulate securitisation of standard assets and intend to legally isolate the transferred exposures from the originator in such a way that the exposures are put beyond the reach of the originator or its creditors, even in bankruptcy (especially the Insolvency and Bankruptcy Code. 2016) or administration. Investors who purchase securitisation notes have a claim only to the underlying exposures. There are minimum holding periods and minimum retention requirements ("MRR") that apply. The Securitisation Directions prescribes a minimum retention requirement of 5% of the loans being securitised, if the maturity is of 24 months or less. The MRR for loans with a maturity period of more than 24 months is 10% of the book value of the loan being securitised. Further, the Securitisation Directions mandates NBFCs to regularly perform stress tests while taking into consideration, inter alia, default rates in the underlying portfolios, rise in pre-payment rates due to fall in rate of interest and rise in income levels of borrowers. Securitisation Directions mandates NBFCs to have policies for the purposes of monitoring credit and assessing the valuation of securitisation notes.

RBI Master Direction on Transfer of Loan Exposures dated 24 September 2021, as amended ("Master Direction on Transfer of Loan Exposures")

The Master Direction on Transfer of Loan Exposures are applicable to inter alia NBFCs including HFCs. The Master Direction on Transfer of Loan Exposures lay down the conditions for transfer of loans, including allowing transfer of loans by lenders to only certain permitted transferees. Pursuant to the Master Direction on Transfer of Loan Exposures, the board must approve a policy for transfer and acquisition of loan exposures that states the minimum quantitative and qualitative standards relating to due diligence, valuation, requisite IT systems for capture, storage and management of data, risk management, periodic board level oversight, etc. Further, the policy must also ensure independence of functioning and reporting responsibilities of the units and personnel involved in transfer or acquisition of loans from that of personnel involved in originating the loans. Further, the Master Direction on Transfer of Loan Exposures also state that loan transfers should result in transfer of economic interest without being accompanied by any change in underlying terms and conditions of the loan contract usually.

Master Directions on Fraud Risk Management in Non-Banking Financial Companies dated July 15, 2024

The said master direction has been issued with a view to providing a framework for prevention, early detection and timely reporting of incidents of fraud to law enforcement agencies, RBI. These directions are applicable to all NBFCs (including housing finance companies) in the upper layer, middle layer and in the base layer (with asset size of ₹ 500 crore and

above). The said master directions provides for provisions relating to governance structure for fraud risk management, requirement of framework for early warning signals for detection of frauds, role of internal and external audits for detection of fraudulent activities, applicable penal measures for the persons / entities classified and reported as fraud, reporting of cases of frauds to law enforcement agencies and RBI and such other provisions in relation to the fraud monitoring and reporting in NBFCs.

Further, the said master direction require the NBFCs to formulate and establish various mechanisms, policies, frameworks etc. for fraud monitoring which includes: (i) constitution of a special committee comprising of at least two independent directors and chief executive officer to oversee the effectiveness of fraud risk management, monitor fraud cases and suggest mitigating measures; (ii) constitution of transparent mechanism to ensure that whistle blower complaints on possible fraud cases / suspicious activities in account(s) are examined and concluded appropriately under the whistle blower policy; (iii) set up of organisational structure for institutionalisation of fraud risk management within overall risk management functions / department; (iv) establishment of a framework for early warning signs to detect potential frauds in credit facilities, loan accounts, and other financial transactions (to be complied within 6 months of the date of issuance of these master directions). Further, the Master Direction provides for detailed compliances for the reporting of fraudulent cases / accounts including but not limited to (a) establishment of suitable nodal point(s)/ designate officer(s) for reporting incidents of fraud to and coordination with law enforcement agencies (b) furnishing fraud monitoring returns (FMR) in individual fraud cases; (c) separate reporting of frauds perpetrated in their group entities; (d) criteria for the closure of fraud cases and maintenance of record of such closed cases for auditors examinations; (e) reporting of theft, burglary, dacoity, and robbery cases within 7 days of their occurrence and submission of return on the same to RBI on quarterly basis.

Master Direction on Information Technology Governance, Risk, Controls and Assurance Practices dated November 07, 2023

The said master direction consolidates, updates, and integrates guidelines, instructions, and circulars on information technology (IT) governance, risk management, controls, assurance practices, and business continuity/disaster recovery management. The said directions apply to regulated entities, including NBFCs in the 'Top Layer,' 'Upper Layer,' and 'Middle Layer.' The said directions require regulated entities to implement specific frameworks and policies, providing guidance on: (a) roles of the board of directors, (b) establishment of an IT strategy committee and senior management and IT steering committee, (c) appointment of a senior, technically competent, and experienced head of IT, (d) management of infrastructure and services, including audit requirements, system logging, and audit trails, (e) regular risk and vulnerability assessments/penetration testing for critical and non-critical information systems, (f) development of processes to enhance incident response and recovery based on past incidents and test drills, (g) systems for business continuity and disaster recovery management, and (h) a dedicated information systems audit function or professionals within internal audit with the necessary expertise and skills.

Master Direction - Reserve Bank of India (Internal Ombudsman for Regulated Entities) Directions, 2023

The said master direction has been issued by RBI on December 29, 2023 to enhance the internal grievance redressal system within regulated entities and expedite customer complaint resolution. This directive outlines requirements for the appointment of an internal ombudsman, deputy internal ombudsman, and covers their qualifications, tenure, roles and responsibilities, removal procedures, complaint handling processes, and more.

Under the said master direction, applicable NBFCs are required to: (a) assign necessary officers or staff to support the internal ombudsman; (b) determine, through the customer service or consumer protection committee, the ombudsman's compensation, facilities, and benefits in alignment with their seniority; (c) conduct an annual internal audit to assess compliance with these directions; (d) have the customer service/consumer protection committee review cases where an internal ombudsman's decision is rejected, with RBI approval required for rejections; (e) create a standard operating procedure and fully automated complaint management system for escalating complaints partly or fully rejected by the internal grievance system to the internal ombudsman; (f) ensure the staff is well-informed of the guidelines related to this direction upon appointing an internal ombudsman; and (g) submit quarterly and annual reports to the RBI's Consumer Education and Protection Department, Central Office, using the specified formats.

To strengthen operational risk management among regulated entities (REs) and boost resilience within the interconnected financial system, the RBI released a new guidance note on operational risk management and resilience on April 30, 2024 ("Guidance Note"). This update replaces the previous "Guidance Note on Management of Operational Risk" from October 14, 2005, which did not apply to NBFCs but now includes them. The updated Guidance Note uses a principle-based, proportional approach to facilitate smooth implementation across REs of varied sizes, complexity, geographic reach, and risk profiles. It is structured around three pillars: (i) prepare and protect, (ii) build resilience, and (iii) learn and adapt.

Pillar 1 introduces a "three lines of defense" model for operational risk management: (i) Business unit management, tasked with identifying and managing risks in the products, services, activities, processes, and systems they oversee, with REs required to define roles and responsibilities for relevant units in policy; (ii) organizational operational risk management, including compliance, which must establish policies, standards, and guidelines for risk management and have an independent reporting line separate from risk-generating business units; and (iii) an audit function that provides the board with independent assurance on the suitability of the RE's operational risk management, conducted through internal or external audits or qualified third parties.

The Guidance Note also sets out core principles for each pillar, directing REs to establish mechanisms, criteria, committees, frameworks, policies, and codes of conduct, including, but not limited to: (a) a fully integrated operational risk management framework documented in board-approved policies; (b) a board-approved policy on service provider management to handle risks from third-party reliance, whether related or unrelated; (c) a forward-looking business continuity plan with scenario analyses, impact assessments, and recovery procedures; and (d) a robust information and communication technology risk management program, including cybersecurity safeguards.

Circular on Key Fact Statement (KFS) for loans and advances dated April 15, 2024

In order to harmonize the instructions on the financial products being offered by various regulated entity (including NBFCs) and enhance transparency, the RBI has issued a circular on April 15, 2024 replacing certain instructions in relation to key fact statement and disclosure of annual percentage rate specified in the master direction on 'Regulatory Framework for Microfinance Loans' dated March 14, 2022 and 'Guidelines on Digital Lending' dated September 2, 2022. The aforesaid circular shall be applicable on all retail and MSME term loans extended by all regulated entities (including NBFCs) and are required to be complied with on or after October 01, 2024. The said circular provides as follows: (a) definition of the following terms 'Key Facts', 'Key Fact Statement ("KFS")', 'Annual Percentage Rate ("APR")' and 'Equated Periodic Instalment (EPI)'; (b) require NBFCs to provide a KFS to all prospective borrowers before executing the loan contract as per the standardised format; (c) to include KFS as summary box attached in the loan agreement; (d) provide for the following in KFS: unique proposal number, computation sheet of APR, the amortisation schedule of the loan over the loan tenor, validity period of KFS as prescribed in the circular, (d) NBFCs to include all charges which are levied by it including charges recovered on behalf of third-party service providers on actual basis in the APR and provide all receipts and related documents to borrower for each payment from time to time; (e) NBFCs should not charge any fees or charges not mentioned in the KFS at any stage during the term of the loan, without explicit consent of the borrower. Further, it has been specified that credit card receivables are exempted from the provisions of the aforesaid circular.

Circular on Fair Practice Code for Lenders - Charging of Interest dated April 29, 2024

The RBI has issued the circular on Fair Practices Code for Lenders – Charging of Interest ("Circular on Fair Practices") dated April 29, 2024. The Circular on Fair Practices is applicable to all the regulated entities (including NBFCs) in relation to charging of interest rates. In view of the same, NBFCs have been directed to review their practices regarding mode of disbursal of loans, application of interest and other charges and take corrective action, including system level changes, as may be necessary, to address the issues highlighted above. NBFCs are also being encouraged to use online account transfers in lieu of cheques being issued in a few cases for loan disbursal.

Notification on Extension of Timeline for Implementation of Instructions of Fair Lending Practice - Penal Charges in Loan Accounts

The circular on 'Fair Lending Practice - Penal Charges in Loan Accounts' dated August 18, 2023, initially set the implementation date for January 1, 2024. However, through a notification on December 29, 2023, the RBI extended this timeline by three months in response to requests from certain regulated entities for additional preparation time. As a result, the instructions must now be applied to all new loans issued from April 1, 2024, onward. For existing loans, the transition to the new penal charges framework should occur on the next review or renewal date on or after April 1, 2024, but no later than June 30, 2024.

Circular – Legal Entity Identifier ("LEI") for Borrowers dated April 21, 2022

RBI has extended guidelines on LEI to NBFCs. Non-individual borrowers with an aggregate exposure of 50 million must obtain LEI codes in a phased manner by April 30, 2025. The aggregate exposure includes all fund based and non-fund based (credit as well as investment) exposure towards the borrower, taking the higher of sanctioned limit or outstanding balance for the purpose. Borrowers (other than government departments and agencies) who fail to obtain LEI codes cannot be sanctioned any new exposure norm be granted renewal or enhancement of any existing exposure.

SEBI Regulations

The Securities and Exchange Board of India (SEBI) regulates listed companies under the authority granted by the Securities and Exchange Board of India Act, 1992, as amended. Utilizing these powers, SEBI establishes regulations for listed entities to uphold high standards of investor protection and corporate governance.

As a listed entity dealing in both equity and debt, the Issuer must adhere to applicable rules and regulations, which include, but are not limited to, the SEBI Listing Regulations, and the SEBI NCS Regulations, each as amended. The SEBI Listing Regulations mandate that entities comply with ongoing disclosure obligations and corporate governance standards related to their listed securities, ensuring transparency in processes and ethical practices within the capital markets. The SEBI NCS Regulations are designed to regulate the issuance and listing of debt securities and non-convertible redeemable preference shares, whether through public offerings or private placements.

Legislative Framework for Recovery of Debts And Bankruptcy

Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002, as amended (the "SARFAESI Act")

The SARFAESI Act, as amended, states that if a borrower defaults on a secured debt and their account is classified as a non-performing asset, the secured creditor can issue a written notice requiring the borrower to fully discharge their liabilities within 60 days. If the borrower fails to do so, the secured creditor is entitled to exercise one or more of the following rights.

The secured creditor may take possession of the secured assets or assume control of the borrower's business, including the right to lease, assign, or sell the assets to recover the secured debt. Additionally, where a financial asset is financed by multiple secured creditors or through joint financing of financial assets by secured creditors, no individual secured creditor may exercise any rights unless the action is approved by secured creditors representing at least sixty percent of the outstanding amount as of a record date. This decision will be binding on all the secured creditors.

The SARFAESI Act also establishes the framework for asset reconstruction companies, which are regulated by the RBI. These asset reconstruction companies can acquire financial assets from banks and financial institutions by issuing debentures, bonds, or other securities, as agreed upon with the respective bank or financial institution, or by entering into agreements for the transfer of such financial assets under mutually agreed terms and conditions.

Recovery of Debts due to Banks and Financial Institutions Act, 1993, as amended ("DRT Act")

Under the DRT Act, the procedures for recovery of debt have been prescribed and time frames have been fixed for speedy disposal of cases. The DRT Act prescribes the rules for establishment of Debt Recovery Tribunals ("**DRTs**"), procedure for making application to DRTs, powers of DRTs and modes of recovery of debts determined by DRTs, including inter alia attachment and sale of movable and immovable properties of defendants, taking possession of property over which security interest is created or any other property of the defendant and appointing receiver for such property and to sell the same, arrest of defendants, defendants' detention in prison and appointment of receivers for management of the movable or immovable properties of defendants. The DRT Act also provides that a bank or public financial institution, having a claim to recover its debt may join an ongoing proceeding filed by some other bank or public financial institution against its debtor at any stage of the proceedings before the final order is passed by making an application to the DRT.

Insolvency and Bankruptcy Code, 2016

The Insolvency and Bankruptcy Code, 2016 (the "Bankruptcy Code") amends certain provisions of existing legislation, including the Companies Act, 2013, and aims to consolidate existing insolvency laws for companies, corporate entities, and individuals. It establishes the Insolvency and Bankruptcy Board of India (IBBI) to regulate insolvency professionals, agencies, and information utilities while performing various legislative, administrative, and quasi-judicial functions. The Bankruptcy Code classifies creditors as financial creditors, who are owed debts for financial considerations, and operational creditors, who are owed debts for goods, services, or employment-related payments.

The Bankruptcy Code sets a 330-day timeline for resolving insolvency applications, including time spent on related litigations. As part of the resolution process, any insolvency resolution plan developed by insolvency professionals must receive approval from at least 66% of the voting share of financial creditors, who are calculated based on their financial debts, including interest. If the plan is rejected, the adjudicating authority will issue a liquidation order.

Pursuant to the Insolvency and Bankruptcy (Insolvency and Liquidation Proceedings of Financial Service Providers and Application to Adjudicating Authority) Rules, 2019 and Ministry of Corporate Affairs Notification S.O. 4139(E) dated November 18, 2019, the Bankruptcy Code is applicable to NBFCs with an asset size of at least ₹ 500 crore. However, only RBI can commence a corporate insolvency resolution process against NBFCs.

Legislative Framework for Data Protection

The Digital Personal Data Protection Act, 2023 ("DPDP Act")

The DPDP Act was passed by Parliament on August 9, 2023, received presidential assent, and was notified on August 11, 2023. This legislation aims to strike a balance between individuals' rights to protect their personal data and the necessity of processing that data for lawful and incidental purposes. Data fiduciaries, responsible for determining the means and purposes of personal data processing, are required to provide a clear and itemized notice to data principals, detailing the personal data to be collected and the reasons for processing it. Personal data can only be processed for lawful purposes with the individual's consent, which must be sought through a notice outlining the data to be collected and its intended use. Individuals can withdraw their consent at any time.

Data principals whose information is being processed have several rights, including the right to (i) obtain information about how their data is processed, (ii) request corrections or erasure of their personal data, and (iii) appoint someone else to exercise these rights in the event of their death or incapacity. The DPDP Act also establishes duties for data principals, such as not filing false or frivolous complaints or impersonating others in certain situations. Additionally, data fiduciaries are obligated to (i) take reasonable steps to ensure data accuracy and consistency, (ii) implement adequate security measures to prevent data breaches, (iii) notify the Data Protection Board of India and affected individuals in case of a breach, and (iv) delete personal data when consent is withdrawn or when it is no longer necessary for the specified purpose, whichever occurs first.

Independent Auditors' Review Report on Consolidated Unaudited Quarterly and Nine Months ended Financial Results of the Company Pursuant to the Regulation 33 and 52 of the Securities Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

TO THE BOARD OF DIRECTORS OF IIFL Finance Limited

Introduction

- We have reviewed the accompanying Statement of Consolidated Unaudited Financial Results of IIFL Finance Limited ("the Parent") and its subsidiaries (the Parent and its subsidiaries together referred to as "the Group") for the quarter and nine months period ended December 31, 2024 ("the Statement"), being submitted by the Parent pursuant to the requirement of Regulation 33 and 52 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended ("the Listing Regulations").
- 2. This Statement, which is the responsibility of the Parent's Management and approved by the Parent's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013, and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.

Scope of the Review

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the circular issued by the SEBI under Regulation 33(8) of the Listing Regulations, to the extent applicable.

4. The Statement includes the results of the following entities:

Sr No	Name of the Entities	Relationship
1	IIFL Finance Limited	Holding Company
2	IIFL Home Finance Limited (IHFL)	Subsidiary
	IIHFL Sales Limited	Subsidiary of IHFL
3	IIFL Samasta Finance Limited	Subsidiary
4 IIFL Open Fintech Private Limited		Subsidiary

Conclusion

5. Based on our review conducted and procedures performed as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement or that it has not been prepared in accordance with the relevant prudential norms issued by the Reserve Bank of India in respect of income recognition, asset classification, provisioning and other related matters.

Other Matter

We did not review the consolidated unaudited interim financial results of 1 subsidiary and standalone unaudited interim financial results of 2 subsidiary companies included in the consolidated unaudited financial results, whose unaudited interim financial results reflects, total revenues of Rs. 1487.36 crore and Rs. 4785.00 crore, total net profit of Rs. 65.74 crore and Rs. 774.78 crore and total comprehensive income of Rs. 55.54 crore and Rs. 765.46 crore for the quarter ended December 31, 2024, and for the period from April 1, 2024, to December 31, 2024, respectively as considered in consolidated unaudited interim financial results of the Group. These interim financial results have been reviewed by other auditors, whose review reports have been furnished to us by the Management and our conclusion on the Statement, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries is based on the review reports of the other auditors and the procedure performed by us as stated in paragraph 3 above.

Our Conclusion is not modified in respect of this matter.

7. The numbers and details pertaining to period(s) i.e. quarter and nine months period ended December 31, 2023, have been traced from the review report of one of the current joint auditors and one of the predecessor Joint auditors wherein an unmodified conclusion was issued vide their review report dated January 17, 2024, in terms of the Listing Regulations. Similarly, the numbers and details pertaining to year ended as at March 31, 2024 and notes related thereto in the Statement have been traced from the financial statements of the Company audited by the one of the current joint auditors and one of the predecessor Joint auditors vide their unmodified audit report dated June 15, 2024

Our Conclusion is not modified in respect of this matter.

- 1. The above unaudited consolidated financial results for the quarter and nine months ended December 31, 2024, have been reviewed and recommended by the Audit Committee and approved by the Board of Directors of the Company at their respective meetings held on February 12, 2025. The Joint Statutory Auditors of the Company have carried out the Limited Review of the aforesaid results and have issued an unmodified conclusion and opinion.
- These unaudited consolidated financial results have been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standards 34 "Interim Financial reporting" ("Ind AS 34") as prescribed under Section 133 of the Companies Act, 2013 read with relevant Rules issued there under and other accounting principles generally accepted in India and in accordance with the requirement of Regulation 33 and 52 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended.
- The above unaudited consolidated financial results of the group include unaudited standalone financial results of the holding company, unaudited consolidated financial results of 1 subsidiary and unaudited standalone financial results of 2 subsidiaries.
- During the quarter ended December 31, 2024, the Company allotted 2,37,199 equity shares (previous quarter: 51,246) having face value of ₹ 2/- each on exercise of stock options under the Employee Stock Option Scheme(s).
- The Group's main business is financing and investing activities. All other activities revolve around the main business. Further all activities are carried out within India. As such there are no separate reportable segments as per the Indian Accounting Standard 108 (IND AS) on Operating Segment.
- The Secured Non-Convertible Debentures are secured by way of a first pari passu charge on receivables of the group, both present and future, book debts, loans and advances and current assets of the group, except those receivables present and/or future specifically and exclusively charged in favor of certain existing charge holders and specified immovable property such that a security cover of 100% or higher (up to 125%) as per the terms of the offer document is maintained till the time of maturity.
- The Indian Parliament has approved the Code on Social Security, 2020, which would impact the contributions by the company towards Provident Fund and Gratuity. The effective date from which the changes are applicable is yet to be notified and the final rules are yet to be framed. The Company will carry out an evaluation of the impact and record the same in the financial results in the period in which the code becomes effective and related rules are published.
- The EPS (both Basic and Diluted) figures for previous period/ year have been restated to give impact of rights issue as per IND AS 33 "Earnings per share". The restated figures are as follows:

Particulars	Quarter ended*	Nine months ended*	Year Ended	
	December 31, 2023	December 31, 2023	March 31, 2024	
Basic EPS	12.52	35.52	45.04	
Diluted EPS	12.36	35.03	44.49	

*Quarter and nine months ended numbers are not annualized.

IIFL FINANCE LIMITED

CIN: L67100MH1995PLC093797

Regd. Office:- IIFL House, Sun Infotech Park, Road No. 16V, Plot No. B-23, Thane Industrial Estate, Wagle Estate,

- 9. Subsequent to the end of reporting period, the Income Tax department commenced a search on January 28, 2025, under section 132 of the Income Tax Act, 1961 on certain offices of the Company and residences of some senior executives. The search operations were concluded on February 03, 2025.
- 10. The Holding Company had certain AIF investments that were due to mature in June 2024. In March 2024, the Holding Company requested the AIF to do in-specie distribution of assets (i.e.: debentures of underlying SPV companies) in lieu of its investment in the AIF. Subsequently, these debentures were assigned to an ARC, and the book value of the resulting Security Receipts (SRs), based on the same underlying assets as of September 30, 2024, was ₹ 586.50 crores. The RBI Circular dated December 19, 2023, on "Investments in Alternative Investment Funds (AIFs)" required a 100% provision of AIF investments if they were not liquidated within 30 days of the circular being applicable. To comply with the spirit of this circular, the management had decided to make a provision equivalent to 100% of the book value of these SRs, accordingly the same has been disclosed under exceptional items for the quarter ended September 30, 2024, and nine months ended December 31, 2024.
- 11. On December 23, 2024, the Holding Company's Finance Committee approved the Global Medium Term Note Programme. Subsequently, on January 24, 2025, the Holding Company successfully raised \$325 million through the issuance of 8.75% Senior, Secured, Fixed Rate Notes due 2028 under Regulation S and/or Rule 144A of the U.S. Securities Act of 1933. This issuance is part of the USD 1 billion Global Medium Term Note Programme, which was updated by the Holding Company via an offering circular dated December 31, 2024, filed with the India International Exchange (IFSC) Limited ("India INX").
- 12. Disclosure in compliance with Regulation 52(4) of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 is attached as **Annexure 1**.
- 13. The figures for the quarter ended December 31, 2024, and quarter ended December 31, 2023, are the balancing figures between unaudited figures in respect of the nine months ended December 31, 2024, and December 31, 2023, and the unaudited figures of half year ended September 30, 2024, and September 30, 2023, respectively.
- 14. Previous period/year figures have been regrouped/ reclassified to make them comparable with those of the current period.

Independent Auditors' Review Report on Standalone Unaudited Quarterly and Nine Months ended Financial Results of the Company pursuant to the Regulation 33 and 52 of the Securities Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

TO THE BOARD OF DIRECTORS OF IIFL Finance Limited

Introduction

- 1. We have reviewed the accompanying statement of standalone unaudited financial results of IIFL Finance Limited ("the Company") for the quarter and nine months period ended December 31, 2024 ("the Statement"), being submitted by the Company pursuant to the requirement of Regulation 33 and 52 of the Securities Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended ("the Listing Regulations").
- 2. This Statement, which is the responsibility of the Company's Management and approved by the Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in the Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued thereunder and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on these financial results based on our review.

Scope of the Review

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.

Conclusion

4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying Statement of unaudited financial results prepared in accordance with applicable accounting standards and other recognized accounting practices and policies has not disclosed the information required to be disclosed in terms of the Listing Regulations including the manner in which it is to be disclosed, or that it contains any material misstatement or that it has not been prepared in accordance with the relevant prudential norms issued by the Reserve Bank of India in respect of income recognition, asset classification, provisioning and other related matters.

Other Matter

5. The numbers and details pertaining to comparative periods i.e. quarter and Nine Months Period ended December 31, 2023, have been traced from the review report of one of the current joint auditors and one of the predecessor Joint auditors wherein an unmodified conclusion was issued vide their review report dated January 17, 2024, in terms of the Listing Regulations. Similarly, the numbers and details pertaining to year ended as at March 31, 2024 and notes related thereto in the Statement have been traced from the financial statements of the Company audited by the one of the current joint auditors and one of the predecessor Joint auditors vide their unmodified audit report dated June 15, 2024.

Our Conclusion is not modified in respect of this matter.

TO THE BOARD OF DIRECTORS OF IIFL Finance Limited

Introduction

- We have reviewed the accompanying Statement of Consolidated Unaudited Financial Results of IIFL Finance Limited ("the Parent") and its subsidiaries (the Parent and its subsidiaries together referred to as "the Group") for the quarter and half year ended September 30, 2024 ("the Statement"), being submitted by the Parent pursuant to the requirement of Regulation 33 and 52 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended ("the Listing Regulations").
- 2. This Statement, which is the responsibility of the Parent's Management and approved by the Parent's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013, and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.

Scope of the Review

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the circular issued by the SEBI under Regulation 33(8) of the Listing Regulations, to the extent applicable.

The Statement includes the results of the following entities:

Sr No	Name of the Entities	Relationship	
1	1 IIFL Finance Limited Holding Company		
2	IIFL Home Finance Limited Subsidiary		
3	IIHFL Sales Limited	Stepdown-Subsidiary	
4	IIFL Samasta Finance Limited	Subsidiary	
5	5 IIFL Open Fintech Private Limited Subsidiary

Emphasis of Matter

5. In this section, we reproduce hereunder Emphasis of Matter section of our review report of even date issued on the standalone financial results for the quarter and half year ended September 30, 2024, of the Holding Company:

We refer to the note 9 that describe lifting of Reserve Bank of India's embargo on the Company to cease and desist from continuing with its gold loan business activities which had resulted in uncertainties over the company's ability to continue its operations as a going concern and the note 10 explaining the rationale for provision of investments in Security Receipts.

Our Conclusion is not modified in respect of these matters of emphasis.

Conclusion

6. Based on our review conducted and procedures performed as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement or that it has not been prepared in accordance with the relevant prudential norms issued by the Reserve Bank of India in respect of income recognition, asset classification, provisioning and other related matters.

Other Matter

7. We did not review the consolidated unaudited interim financial results of 1 subsidiary and standalone unaudited interim financial results of 2 subsidiary companies included in the consolidated unaudited financial results, whose unaudited interim financial results reflects, total assets of Rs. 34770.35 crore as at September 30, 2024, Group's share of total revenue of Rs. 1678.04 crore and Rs. 3297.65 crore, Group's share of total net profit of Rs. 348.17 crore and Rs. 709.04 crore and Group's share of total comprehensive income of Rs. 353.59 crore and Rs. 709.93 crore for the quarter ended September 30, 2024, and for the period from April 1, 2024, to September 30, 2024, respectively, and net cash outflows Rs. (173.11) crore as considered in consolidated unaudited interim financial results of the Group. These interim financial results have been reviewed by other auditors, whose review reports have been furnished to us by the Management and our conclusion on the Statement, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries is based on the review reports of the other auditors and the procedure performed by us as stated in paragraph 3 above.

Our Conclusion is not modified in respect of this matter.

8. The numbers and details pertaining to period(s) i.e. quarter ended June 30, 2024 and quarter and half year ended September 30, 2023 have been traced from the review reports of one of the current joint auditors and one of the predecessor Joint auditors wherein an unmodified conclusion was issued vide their review reports dated August 6, 2024 and October 18, 2023 respectively, in terms of the Listing Regulations. Similarly, the numbers and details pertaining to year ended as at March 31, 2024 and notes related thereto in the Statement have been traced from the financial statements of the Company audited by the one of the current joint auditors and one of the predecessor Joint auditors vide their unmodified audit report dated June 15, 2024

Our Conclusion is not modified in respect of this matter.

IIFL FINANCE LIMITED CIN: L67100MH1995PLC093797

Regd. Office:- IIFL House, Sun Infotech Park, Road No. 16V, Plot No. B-23, Thane Industrial Estate, Wagle Estate,
Thane — 400604

- 3. The above unaudited consolidated financial results for the quarter and half year ended September 30, 2024, have been reviewed and recommended by the Audit Committee and approved by the Board of Directors of the Company at their respective meetings held on October 23, 2024. The Joint Statutory Auditors of the Company have carried out the Limited Review of the aforesaid results and have issued an unmodified conclusion and opinion.
- 4. These unaudited consolidated financial results have been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standards 34 "Interim Financial reporting" ("Ind AS 34") as prescribed under Section 133 of the Companies Act, 2013 read with relevant Rules issued there under and other accounting principles generally accepted in India and in accordance with the requirement of Regulation 33 and 52 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended.
- 5. During the quarter ended September 30, 2024, the Company allotted 51,246 equity shares (previous quarter: 2,48,266) having face value of ₹ 2/- each on exercise of stock options under the Employee Stock Option Scheme(s).
- 6. The Group's main business is financing and investing activities. All other activities revolve around the main business. Further all activities are carried out within India. As such there are no separate reportable segments as per the Indian Accounting Standard 108 (IND AS) on Operating Segment.
- 7. The Secured Non-Convertible Debentures are secured by way of a first pari passu charge on receivables of the group, both present and future, book debts, loans and advances and current assets of the group, except those receivables present and/or future specifically and exclusively charged in favor of certain existing charge holders and specified immovable property such that a security cover of 100% or higher (up to 125%) as per the terms of the offer document is maintained till the time of maturity.
- 8. Disclosure in compliance with Regulation 52(4) of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 is attached as **Annexure 1**.
- 9. The Reserve Bank of India, through its communication dated September 19, 2024, has lifted the restrictions imposed on the gold loan business of the Holding Company. These restrictions were earlier imposed on March 04, 2024, which prohibited the Holding Company from sanctioning, disbursing, or assigning/ securitizing/ selling any of its gold loans. RBI's decision was effective immediately and allowed the Holding Company to resume sanctioning, disbursal, assignment, securitization, and sale of gold loans in compliance with all relevant laws and regulations. The group is committed to upholding the highest standards of compliance and will continue to ensure that the remedial actions taken are sustained. With the removal of embargo, the Holding Company's business operations for Gold Loan have resumed as usual.
- 10. The Company had certain AIF investments that were due to mature in June 2024. In March 2024, the Company requested the AIF to do in-specie distribution of assets (i.e.: debentures of underlying SPV companies) in lieu of its investment in the AIF. Subsequently, these debentures were assigned to an ARC, and the book value of the resulting Security Receipts (SRs), based on the same underlying assets as of September 30, 2024, was ₹ 586.50 crores. The RBI Circular dated December 19, 2023, on "Investments in Alternative Investment Funds (AIFs)" required a 100% provision of AIF investments if they were not liquidated within 30 days of the circular being applicable. To comply with the spirit of this circular, the management has decided to make a provision equivalent to 100% of the book value of these SRs, accordingly the same has been disclosed under exceptional items for the quarter and half year ended September 30, 2024.

Independent Auditors' Review Report on Standalone Unaudited Quarterly and half yearly Financial Results of the Company pursuant to the Regulation 33 and 52 of the Securities Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

TO THE BOARD OF DIRECTORS OF IIFL Finance Limited

Introduction

- We have reviewed the accompanying statement of standalone unaudited financial results of IIFL Finance Limited ("the Company") for the quarter and half year ended September 30, 2024 ("the Statement"), being submitted by the Company pursuant to the requirement of Regulation 33 and 52 of the Securities Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended ("the Listing Regulations").
- 2. This Statement, which is the responsibility of the Company's Management and approved by the Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in the Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued thereunder and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on these financial results based on our review.

Scope of the Review

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.

Emphasis of Matter

4. We refer to the note 9 that describe lifting of Reserve Bank of India's embargo on the Company to cease and desist from continuing with its gold loan business activities which had resulted in uncertainties over the Company's ability to continue its operations as a going concern and the note 10 explaining the rationale for provision of investments in Security Receipts.

Our Conclusion is not modified in respect of these matters.

Conclusion

5. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying Statement of unaudited financial results prepared in accordance with applicable accounting standards and other recognized accounting practices and policies has not disclosed the information required to be disclosed in terms of the Listing Regulations including the manner in which it is to be disclosed, or that it contains any material misstatement or that it has not been prepared in accordance with the relevant prudential norms issued by the Reserve Bank of India in respect of income recognition, asset classification, provisioning and other related matters.

Other Matter

6. The numbers and details pertaining to comparative periods i.e. quarter ended June 30, 2024 and quarter and half year ended September 30, 2023 have been traced from the review reports of one of the current joint auditors and one of the predecessor Joint auditors wherein an unmodified conclusion was issued vide their review reports dated August 6, 2024 and October 18, 2023 respectively, in terms of the Listing Regulations. Similarly, the numbers and details pertaining to year ended and as at March 31, 2024 and notes related thereto in the Statement have been traced from the financial statements of the Company audited by the one of the current joint auditors and one of the predecessor Joint auditors vide their unmodified audit report dated June 15, 2024.

Our Conclusion is not modified in respect of this matter.

- 4. These unaudited standalone financial results have been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standards 34 "Interim Financial reporting" ("Ind AS 34") as prescribed under Section 133 of the Companies Act, 2013 read with relevant Rules issued there under and other accounting principles generally accepted in India and in accordance with the requirements of Regulation 33 and 52 of the Securities and Exchange Board of India ("SEBI") (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended.
- 5. During the quarter ended September 30, 2024, the Company allotted 51,246 equity shares (previous quarter: 2,48,266) having face value of ₹ 2/- each on exercise of stock options under the Employee Stock Option Scheme(s).
- The Company's main business is financing and investing activities. All other activities revolve around the
 main business. Further all activities are carried out within India. As such there are no separate reportable
 segments as per Indian Accounting Standard 108 (IND AS) on Operating Segments.
- 7. The Indian Parliament has approved the Code on Social Security, 2020, which would impact the contributions by the company towards provident fund and gratuity. The effective date from which the changes are applicable is yet to be notified and the final rules are yet to be framed. The Company will carry out an evaluation of the impact and record the same in the financial results in the period in which the code becomes effective and related ruled are published.
- 8. The Reserve Bank of India, under Scale Based Regulations has categorized the Company as Middle Layer (NBFC-ML), vide its circular. The management has taken necessary steps in terms of formulating an implementation plan and ensuring compliances with norms/ changes suggested as and when they become applicable.
- 9. The Reserve Bank of India, through its communication dated September 19, 2024, has lifted the restrictions imposed on the gold loan business of the Company. These restrictions were earlier imposed on March 04, 2024, which prohibited the Company from sanctioning, disbursing, or assigning/ securitizing/ selling any of its gold loans. RBI's decision was effective immediately and allowed the Company to resume sanctioning, disbursal, assignment, securitization, and sale of gold loans in compliance with all relevant laws and regulations. The Company is committed to upholding the highest standards of compliance and will continue to ensure that the remedial actions taken are sustained. With the removal of embargo, the Company's business operations for Gold Loan have resumed as usual.
- 10. The Company had certain AIF investments that were due to mature in June 2024. In March 2024, the Company requested the AIF to do in-specie distribution of assets (i.e.: debentures of underlying SPV companies) in lieu of its investment in the AIF. Subsequently, these debentures were assigned to an ARC, and the book value of the resulting Security Receipts (SRs), based on the same underlying assets as of September 30, 2024, was ₹ 586.50 crores. The RBI Circular dated December 19, 2023, on "Investments in Alternative Investment Funds (AIFs)" required a 100% provision of AIF investments if they were not liquidated within 30 days of the circular being applicable. To comply with the spirit of this circular, the management has decided

INDEPENDENT AUDITOR'S REPORT

To, The Members of IIFL Finance Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of IIFL Finance Limited (hereinafter referred to as the 'Holding Company") its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group"), which comprise the consolidated Balance Sheet as at March 31, 2024, the consolidated Statement of Profit and Loss (including Other Comprehensive Income), consolidated Statement of Changes in Equity and the consolidated Cash Flows statement for the year then ended, and notes to the consolidated Financial Statements, including a summary of material accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of the subsidiaries, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the Accounting Standards prescribed under section 133 of the Act and the accounting principles generally accepted in India, of the consolidated state of affairs of the Group as at March 31, 2024, of consolidated profit, consolidated total comprehensive income, consolidated changes in equity and its consolidated cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the consolidated financial statements" section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the consolidated financial statements.

Emphasis of Matter

This section of our report contains and we reproduce hereunder sections of our audit report of even date issued on the standalone financial statements of the Holding Company described under Material Uncertainty Relating to Going Concern and Emphasis of Matter sections, respectively.

 We draw attention to Note No 48 in the financial statements, which explains that the Reserve Bank of India ("RBI") vide its directive dated March 4, 2024 and in exercise of its powers under Section 45I(1)(b) of the Reserve Bank of India, 1934 has directed the Company to cease and desist, with immediate effect, from sanctioning or disbursing gold loans or assigning / securitizing/ selling any of its gold loans. However, the RBI permitted the company to continue to service its existing gold loan portfolio through usual collection and recovery processes.

Page 1 of 13

The Company has total Loan book of Rs. 17,842 crores and Rs. 14,047 crores as on March 31, 2024, and March 31, 2023 respectively. Out of the above, the Gold Loan stood at Rs. 9,634 crores (54.00%) and Rs. 8,330 crores (59.30%) for each respective financial year.

These events or conditions may cast significant doubt on the Company's ability to continue as a going concern. However, in view of the factors as described in the note no 49 in the financial statements, the management is of the view that the going concern basis of accounting is appropriate.

We refer to Note No 49 of the accompanying financial statements that explains the
directives issued by The Reserve Bank of India ("RBI") dated March 4, 2024. The Note
explains the supervisory concerns noted by the RBI in respect of restrictions on loan
against gold. These supervisory restrictions are under review by RBI post completion
of special audit instituted by the RBI.

Our opinion is not modified in respect of these matters of emphasis.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the financial year ended March 31, 2024. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

A. Key audit matters of the Holding Company

Sr. No.	Key Audit Matter	How our audit addressed the key audit matter
1	Information technology (IT) systems used in financial reporting process. The company's operational and financial processes are dependent on IT systems due to large volume of transactions that are processed daily. We therefore identified IT systems and controls over financial reporting as a key audit matter for the Company.	We obtained an understanding of the Company's IT control environment relevant to the audit. We tested the design, implementation and operating effectiveness of the Company's General IT controls over the key IT systems which are critical to financial reporting. We also tested key automated and manual controls and logic for system generated reports relevant to the audit that would materially impact the financial statements. In addition to above, we have also relied on the work of the internal auditors and system auditors.
2	Impairment of Financial Assets held at amortised cost: Since the loans and advances form a major portion of the Company's assets, and due to the significance of the judgments used in classifying loans and advances into various stages as stipulated in Indian Accounting Standard (IND AS) 109 and the management estimation of the related	We evaluated appropriateness of the impairment principles used by management based on the requirements of Ind AS 109 and our understanding of the business.

Res No.

Page 2 of 13

Sr. No.	Key Audit Matter	How our audit addressed the key audit matter
	impairment provisions, this is considered to be a key audit matter. The Company's impairment allowance is derived from estimates including the historical default and loss ratios. Management exercises judgement in determining the quantum of loss based on a range of factors. The most significant areas are: - Segmentation of loan book - Determination of exposure at default - Loan staging criteria - Calculation of probability of default / Loss given default - Consideration of probability weighted scenarios and forward looking macroeconomic factors The application of ECL model requires several data inputs. This increases the risk of completeness and accuracy of the data that has been used to create assumptions in the model. (Refer Note 38A.3 to the Standalone Financial Statements.).	We assessed the design and implementation of key Internal financial controls over loan impairment process used to calculate the impairment charge. We evaluated management's controls over collation of relevant information used for determining estimates for management overlays. We tested review controls over measurement of impairment allowances and disclosures in financial statements.

B. Key audit matters of consolidated financial statements of Subsidiary Company – IIFL Home Finance Limited

Sr. No.	Key Audit Matter	How our audit addressed the key audit matter
1	Impairment of loans as at the balance sheet date (including determination of expected credit losses) (as described in note 3(k) of the consolidated financial statements) The Company provide for impairment of its loans using the Expected Credit Loss ("ECL") model. ECL involves an estimation of probability weighted loss on financial assets over their life, considering reasonable and supportable information about past events, current conditions, and forecasts of future economic conditions and other factors which could impact the credit quality of the Company's loans. In the process, a significant degree of judgement has been applied by the management for: a) Defining qualitative/ quantitative factors for 'significant increase in credit risk' ("SICR") and 'default'.	Our audit procedures included the following: Considered the Company's accounting policies for impairment of loans and assessed compliance of the policies with Ind AS 109: Financial Instruments and the governance framework approved by the Board of Directors pursuant to applicable Reserve Bank of India guidelines, ("the RBI Guidelines"). Evaluated the reasonableness of the management estimates by understanding the process of ECL estimation and related assumptions. Tested the internal controls around extraction, validation and computation of the input data used in such estimation. Assessed the criteria for staging of loans based on their past-due

Page 3 of 13

No.	Key Audit Matter	How our audit addressed the key audit matter
	 b) Grouping of borrowers (retail loan portfolio) based on homogeneity for estimating probability of default, loss given default and exposure at default; c) Determining effect of less frequent past events on future probability of default. d) Determining macro-economic factors impacting credit quality of loans. In view of the high degree of management's judgement involved in estimation of ECL, impairment of loans as at the balance sheet date (including expected credit loss) is a key audit matter. 	status to check compliance with requirement of Ind AS 109. Tested a sample of performing (stage 1) loans to assess whether any SICR or loss indicators were present requiring them to be classified under stage 2 (i.e. default in repayment is within the range of 31 to 90 days) or stage or 3 (i.e. the default in repayment is more than 90 days). Tested the arithmetical accuracy of computation of ECL provision performed by the Company. Assessed the adequacy of disclosures included in the consolidated financial statements with the relevant requirements of Ind AS 107 and 109.

C. Key audit matters of Subsidiary Company - IIFL Samasta Finance Ltd

Sr. No.	Key Audit Matter	How our audit addressed the key audit matter
1	Expected Credit Loss Refer note 2 (c) of significant accounting policies and note 40 for credit disclosures.	Our audit focused on assessing the appropriateness of management's judgment and estimates used in the impairment analysis through
	As at 31 March 2024, the Company has total gross loan assets of Rs. 9,708.70 crores (2023: Rs. 7,998.53 crores) against which an Expected Credit Loss ('ECL') of Rs. 286.44 crores (2023 Rs. 257.22 crores) has been accrued.	procedures that included, but were not limited to, the following: Evaluated the Company's accounting policies for estimation of expected credit loss on loan assets in accordance with the requirements of Ind AS
	The ECL approach as required under Ind AS 109, Financial instruments, involves high degree of complexity and requires significant judgement of the management.	109, Financial Instruments. Obtained an understanding of the modelling techniques adopted by the Company including the key inputs and assumptions. Since modelling
	The Management is required to determine the ECL that may occur over either a 12-month period or the remaining life of an asset, depending on the categorization of the individual asset. The key areas of judgment include:	assumptions and parameters are based on historical data, we assessed whether historical experience was representative of current circumstances and was relevant in view of the recent impairment losses incurred
	Categorization of loans in Stage 1, 2 and 3 based on identification of: a) exposures with Significant Increase in Credit Risk (SICR) since their origination and	within the portfolios. • Assessed the design and implementation and tested the operating effectiveness of controls over the modelling process including governance

Sr. No.	Key Audit Matter	How our audit addressed the key audit matter
No.	b) Individually impaired / default exposures. 2. Techniques used to determine Loss Given Default ('PD') to calculate an ECL are based on past experience and. 3. The impact of different future macroeconomic conditions in the determination of ECL. These parameters are derived from the Company's internally developed statistical models, historical data and a change in such models or assumptions could have a material impact on the accompanying financial statements. These factors required the models to be reassessed based on the available information including the additional risk profiling due to the impact of COVID-19 Pandemic, geographical, political and economic risk to measure the ECL. Management has made a number of interpretations and assumptions when designing and implementing models that are compliant with the standard. The accuracy of data flows and the implementation of related controls is critical for the integrity of the estimated impairment provisions. Considering the significance of the above matter to the financial statements and the significant auditor attention required to test such complex accounting estimates, we have identified this as a key audit matter for current year audit.	over monitoring of the model and approval of key assumptions. Evaluated the appropriateness of the Company's process of determination of significant increase in credit risk in accordance with the applicable accounting standard and the basis for classification of exposures into various stages. Obtained the approved policy of board of directors to understand the relief measures sanctioned to various class of borrowers in accordance with the directions given by the RBI and tested, on sample basis, the compliance with respect to asset classification and provisioning norms as per such directions. Tested management's computation of ECL by performing following

Page 5 of 13

Sr. No.	Key Audit Matter	How our audit addressed the key audit matter
		the estimate determined by the management.
2	Identification and Measurement of NPA: As per RBI's circular dated November 12, 2021 read with earlier circular dated October 1, 2021 on "Prudential norms on Income Recognition, Asset Classification and Provisioning pertaining to Advances, Automation of NPA and provisioning is required to be implemented by all lending Institutions. The NPA provisioning as per ECL methodology followed by the Company are not fully automated in Software Applications used by the Company for Loans Management and are performed using other software. Further, marking of some legacy linked accounts at borrower level as NPAs in two different Loan management systems are done manually. These may have impact on the accuracy and completeness of the provision accrued for NPAs. Considering the significance, we have identified this as a key audit matter for current year audit.	Performed other substantive procedures, included but not limited to the following: • Assessed the appropriateness of asset classification and adequacy of related provisioning by performing procedures such as computation of overdue ageing assessment of borrower leve NPA identification and verification of applicable provision rates as per ECL policy of the Company on test check basis; • Selected samples of performing loan accounts to assess independently, whether such loan accounts should be classified as NPA; • Recompilation of the amount of ECL provisioning on the total advances base considering the stage wise categories of advances, LGD (Loss given default) and PD (Probability of default) arrived by the Company

Information Other than the Financial Statements and Auditor's Report Thereon

The Holding Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Director's report and Management Discussion and Analysis report, but does not include the consolidated financial statements, standalone financial statements and our auditor's report thereon. The Directors report and Management Discussion and Analysis report is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Directors report and Management Discussion and Analysis report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance as required under SA 720 ("The Auditors Responsibilities Relating to Other Information").

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in term of the requirements of the Companies Act, 2013 (the "Act") that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group in

Page 6 of 13

accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of the respective company's to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate the respective company or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group are responsible for overseeing the financial reporting process of the respective company.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to
 design audit procedures that are appropriate in the circumstances. Under section
 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the
 Holding Company and its subsidiary companies which are companies incorporated in
 India, have adequate internal financial controls system in place and the operating
 effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of
 accounting and, based on the audit evidence obtained, whether a material uncertainty
 exists related to events or conditions that may cast significant doubt on the ability of
 the Group to continue as a going concern. If we conclude that a material uncertainty
 exists, we are required to draw attention in our auditor's report to the related disclosures
 in the consolidated financial statements or, if such disclosures are inadequate, to modify

Page 7 of 13

our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the
 entities or business activities within the Group of which we are the independent auditors,
 to express an opinion on the consolidated financial statements. We are responsible for
 the direction, supervision and performance of the audit of the financial statements of
 such entities included in the consolidated financial statements of which we are the
 independent auditors. For the other entities included in the consolidated financial
 statements, which have been audited by other auditors, such other auditors remain
 responsible for the direction, supervision and performance of the audits carried out by
 them. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the consolidated financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the consolidated financial statements.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matters

The consolidated financial statement includes consolidated audited financial statement of 1 subsidiary and standalone audited financial statements of 2 subsidiary companies, these have been audited by the other auditors and these statements reflect the total assets of Rs. 36,969.88 Crore as at March 31, 2024, Group's share of total revenue of Rs. 5,897.27 Crore, Group's share of total net profit of Rs. 1,521.39 Crore and Group's share of total comprehensive income of Rs. 1,512.03 Crore and net cash outflows Rs. 262.31 Crore for the year ended on the date as considered in the consolidated financial statements. The reports of auditors of the said subsidiary companies have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiary companies and our report in terms of sub-section (3) and (11) of section 143 of the Act, in so far as it relates to the aforesaid subsidiary companies is based solely on the reports of the other auditors.

Page 8 of 13

Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

The Consolidated Financial Statements includes the comparative financial information for the year ended March 31, 2023 were audited by one of the joint auditor and one of the predecessor auditor and has issued unmodified opinion vide their report dated April 26, 2023.

Our opinion is not modified in respect of these other matters.

Report on Other Legal and Regulatory Requirements

- As required by Section 143(3) of the Act, based on our audit and on the consideration
 of report of the other auditors on separate financial statements and the other financial
 information of subsidiaries, as noted in the 'other matter' paragraph, to the extent
 applicable, that:
 - a) We/the other auditors whose report we have relied upon have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
 - b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and reports of other auditors.
 - c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated statement of changes in equity and the Consolidated Cash Flow Statement dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements.
 - d) In our opinion, the aforesaid consolidated financial statements comply with the Accounting Standards specified under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
 - e) On the basis of the written representations received from the directors of the Holding Company as on March 31, 2024 taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors who are appointed under Section 139 of the Act, of its subsidiary companies, none of the directors of the Group companies is disqualified as on March 31, 2024 from being appointed as a director in terms of Section 164(2) of the Act.
 - f) With respect to the adequacy of internal financial controls over financial reporting of the Group and the operating effectiveness of such controls, refer to our separate report in **Annexure**.
 - g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:
 - In our opinion and to the best of our information and according to the explanations given to us, the managerial remuneration paid by the Holding Company to its directors is in accordance with the provisions of section 197 of the Act. In our opinion and based on the consideration of reports of other statutory auditors of the subsidiaries, the managerial remuneration for the year ended March 31, 2024 has been paid by the subsidiaries to their directors is in accordance with the provisions of section 197 read with Schedule V to the Act;
 - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditor's) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other

Page 9 of 13

auditors on separate financial statements as also the other financial information of the subsidiaries, as noted in the 'Other matter' paragraph:

- The consolidated financial statements disclose the impact of pending litigations on the consolidated financial position of the Group in its consolidated financials statements – Refer Note 39 to the consolidated financial statements.
- ii. The Group has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts - Refer Note 39 to the consolidated financial statements.
- iii. There has been no delay in transferring amounts required to be transferred, to the Investor Education and Protection Fund by the Holding Company and its subsidiary companies incorporated in India.
- iv. (a) The respective managements of the Holding Company and its subsidiaries which are companies incorporated in India whose financial statements have been audited under the Act have represented to us and the other auditors of such subsidiaries respectively that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Holding Company or any of such subsidiaries to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Holding Company or any of such subsidiaries ('Ultimate Beneficiaries) or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
 - (b) The respective managements of the Holding Company and its subsidiaries which are companies incorporated in India whose financial statements have been audited under the Act have represented to us and the other auditors of such subsidiaries respectively that, to the best of its knowledge and belief, no funds have been received by the respective Holding Company or any of such subsidiaries from any person(s) or entity(ies), including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Holding Company or any of such subsidiaries shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
 - (c) Based on the audit procedures that have been considered reasonable and appropriate in the circumstances performed by us and that performed by the auditors of the subsidiaries which are companies incorporated in India whose financial statements have been audited under the Act, nothing has come to our or other auditors' notice that has caused us or the other auditors to believe that the representations under sub-clause (a) and (b) contain any material mis-statement.
- v. The Interim dividend declared and paid during the year by the Holding Company and its subsidiaries is in compliance with section 123 of the Companies Act, 2013.
- vi. Based on our examination which included test checks, the holding company and based on the consideration of the reports of the other auditors on the consolidated financial statements and / or separate financial statements, as the case may be, of subsidiary companies, the Group has used accounting software for maintaining its books of accounts which has a feature of recording

Page 10 of 13

Audit Trail (edit log facility) and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit, we and as reported by other auditors of subsidiary companies, did not come across any instance of audit trail feature being tempered with.

As proviso of Rule 3(1) of the Companies (Accounts) Rules, 2014 is applicable from April 1, 2023, reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 on preservation of audit trail as per statutory requirements for record retention is not applicable for the financial year ended March 31, 2024.

With respect to the matters specified in paragraphs 3 (xxi) and 4 of the Companies (Auditor's Report) Order, 2020 (the "Order"/ "CARO") issued by Central Government in terms of Section 143(11) of the Act, to be included in the Auditors report, according to the information and explanation given to us, and based on the CARO report issued by us for the Holding Company and by the statutory auditors of the respective subsidiary companies which are companies incorporated in India, included in the consolidated financial statement of the Company, to which reporting under CARO is applicable, we report that there are no qualifications or adverse remarks in these CARO reports except for those as stated below:

Date: June 15, 2024 UDIN: 24042624BKFRTD7654 Annexure referred to paragraph 1(f) under the heading "Report on Other Legal and Regulatory Requirements" in our report of even date to the members of IIFL Finance Limited on the consolidated financial statement for the year ended March 31, 2024.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (the "Act")

We have audited the internal financial controls over financial reporting of IIFL Finance Limited (hereinafter referred to as "the Holding Company") and its subsidiary companies (hereinafter collectively referred to as "the Group") as of March 31, 2024, which are Companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company and its subsidiary companies are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Holding Company and its subsidiary companies which are incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors of the subsidiary companies which are incorporated in India, in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Holding Company and its subsidiary companies which are incorporated in India.

Page 12 of 13

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion to the best of our information and according to the explanations given to us and based on the consideration of the reports of the other auditors referred to in the Other matters paragraph below read together with the Emphasis of Matter Para in our report to the consolidated financial statements of the Group for the financial year ended March 31, 2024, the Holding Company and subsidiary companies incorporated in India have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2024 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our aforesaid reports under section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting in so far as it relates to the subsidiary companies incorporated in India, is based solely on the corresponding report of the auditors of such companies incorporated in India.

Our opinion is not modified in respect of the above matters.

Note 1. CORPORATE INFORMATION

Company overview

IIFL Finance Limited (the "Company/ Parent/ Holding Company") is a middle layer Non-Banking Financial Company not accepting public deposits registered with the Reserve Bank of India ("the RBI") under section 45-IA of the Reserve Bank of India Act, 1934 and primarily engaged in financing and related activities. The Company had received the certificate of registration from RBI on March 06, 2020, enabling the Company to carry on business as a Non-Banking Financial Company. The Company offers a broad suite of financial products such as mortgage loan, gold loan, loan against securities loans to small & medium enterprise ("SME"), Micro finance loans ("MFI") and digital finance loans etc.

Note 2. Basis of consolidation

i. Basis of preparation of financial statements

The consolidated financial statements relate to IIFL Finance Limited (the "Company") and its subsidiary/group companies (together hereinafter referred to as "Group"). The consolidated financial statements of the Group have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time).

Control is achieved when the Group has:

- Power over the investee.
- Is exposed or has rights to variable returns from its involvement with the investee, and
- Has the ability to use its power over investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee.
- Rights arising from other contractual arrangements.
- The Group's voting rights and potential voting rights.
- The size of the Group's holding of voting rights relative to the size and dispersion of the of the other voting rights holders.

ii. Principles of consolidation:

a) The consolidated financial statements of the Group have been prepared in accordance with the Indian Accounting Standards ("Ind AS") as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 and relevant amendment rules issued thereafter ("Ind AS") on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period as explained below, the relevant provisions of the Companies Act, 2013 (the "Act") and the guidelines issued by the Reserve Bank of India ("RBI") and National Housing Bank ("NHB") to the extent applicable.

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/ or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value but are not fair value, such as value in use in Ind AS 36.

Fair value measurements under Ind AS are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date;
- Level 2 inputs are inputs, other than quoted prices included within level 1, (that are not traded in active market) that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the valuation of assets or liabilities.
- The effects of all intra-Group transactions and balances have been eliminated on consolidation.
- c) The consolidated financial statements of the subsidiary companies used in the consolidation are drawn up to the same reporting date as that of the Group, March 31, 2024.
- d) The consolidated financial statements of the Group have been combined on a line-by-line basis by adding together like items of assets, liabilities, income and expenses, after eliminating intra-group balances, intra-group transactions and resulting unrealised profits or losses, unless cost cannot be recovered.
- e) Business combinations: Business combinations are accounted for using the acquisition method. At the acquisition date, identifiable assets acquired, and liabilities assumed are measured at fair value. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition date fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. The consideration transferred is measured at fair value at acquisition date and includes the fair value of any contingent consideration. However, deferred tax asset or liability and any liability or asset relating to employee benefit arrangements arising from a business combination are measured and recognised in accordance with the requirements of Ind AS 12, Income Taxes and Ind AS 19, Employee Benefits, respectively. Where the consideration transferred exceeds the fair value of the net identifiable assets acquired and

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

liabilities assumed, the excess is recorded as goodwill. Alternatively, in case of a bargain purchase wherein the consideration transferred is lower than the fair value of the net identifiable assets acquired, and liabilities assumed, the difference is recorded as a gain in other comprehensive income and accumulated in equity as capital reserve. The costs of acquisition excluding those relating to issue of equity or debt securities are charged to the Statement of Profit and Loss in the period in which they are incurred Business combinations involving entities under common control are accounted for using the pooling of interests method. The net assets of the transferor entity or business are accounted at their carrying amounts on the date of the acquisition subject to necessary adjustments required to harmonise accounting policies.

f) Goodwill is an asset representing the future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognised. Goodwill is initially measured at cost, being the excess of the consideration transferred over the net identifiable assets acquired and liabilities assumed, measured in accordance with Ind AS 103 – Business Combinations.

Goodwill is considered to have indefinite useful life and hence is not subject to amortisation but tested for impairment at least annually. After initial recognition, goodwill is measured at cost less any accumulated impairment.

Any impairment loss on goodwill is recognised in the Statement of Profit and Loss. An impairment loss recognised on goodwill is not reversed in subsequent periods.

For the purpose of impairment testing, goodwill acquired in a business combination, is from the acquisition date.

The excess of cost to the Group of its investments in the subsidiary companies over its share of equity of the subsidiary companies, at the dates on which the investments in the subsidiary companies are made, is recognised as 'Goodwill' being an asset in the consolidated financial statements. Alternatively, where the share of equity in the subsidiary companies as on the date of investment is in excess of cost of investment of the Group, it is recognised as 'Capital Reserve' and shown under the head 'Other equity', in the consolidated financial statements. Goodwill/ Capital reserve has been netted off and disclosed in the consolidated financial statements. Goodwill arising on consolidation is not amortised but tested for impairment.

- Non-controlling Interest in the net assets of the consolidated subsidiaries consist of the amount of equity attributable to the minority shareholders at the date on which investments in the subsidiary companies were made and further movements in their share in the equity, subsequent to the dates of investments. Net profit and loss/ other comprehensive income ("OCI") for the year of the subsidiaries attributable to non-controlling interest is identified and adjusted against the profit after tax/ other comprehensive income ("OCI") of the Group in order to arrive at the income attributable to shareholders of the Group.
- h) Profit or loss and each component of other comprehensive income ("OCI") are attributed to the equity holders of the Holding Company and to the non-controlling interests, if any.

iii. List of subsidiaries consolidated

The individual Balance Sheet as at March 31, 2024, Statement of Profit and Loss and cash flow statement for the year ended March 31, 2024 of following subsidiaries are included in

consolidation:

F-53

Name of the entity	Relationship	Country of		oting power either irectly through idiary
		Incorporation	As at March 31, 2024	As at March 31, 2023
IIFL Home Finance Limited (HFC) (Consolidated)	Direct Subsidiary	India	79.59%	79.59%
IIFL Samasta Finance Limited (Samasta)	Direct Subsidiary	India	99.56%	99.51%
IFL Open Fintech Private Limited	Direct Subsidiary	India	51.02%	51.02%

iv. Use of estimates and judgments

The preparation of the consolidated financial statements in conformity with Indian Accounting Standards ("Ind AS") requires the management to make estimates, judgments, and assumptions. These estimates, judgements and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the consolidated financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the consolidated financial statements.

The Financial Statements are presented in Indian rupees which is determined to be functional currency of the Group and the currency of primary economic environment in which the Group operates.

v. Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with the provisions of the Act and the Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 issued by Ministry of Corporate Affairs in exercise of the powers conferred by section 133 read with sub-section (1) of section 210A of the Companies Act, 2013 along with the applicable guidelines issued by Reserve Bank of India ("RBI") and National Housing Bank ("NHB"). In addition, the guidance notes/ announcements issued by the Institute of Chartered Accountants of India ("ICAI") are also applied except where compliance with other statutory promulgations require a different treatment.

vi. Presentation of financial statements

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Division III to Schedule III to the Act applicable for Non-Banking-Figance Companies

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

("NBFC"). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the consolidated Financial Statements along with the other notes required to be disclosed under the notified Accounting Standards and regulations issued by the RBI and NHB.

Note 3. MATERIAL ACCOUNTING POLICIES

(a) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured and there exists reasonable certainty of its recovery.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract.

i. Interest income and dividend income

Interest income on financial instruments at amortised cost is recognised on a time proportion basis taking into account the amount outstanding and the effective interest rate ("EIR") applicable.

Interest income on Direct assignment pool is recognised on time proportion basis net off amount payable to assignees.

Interest on financial instruments measured at fair value is included within the fair value movement during the period.

The EIR is the rate that exactly discounts estimated future cash flows of the financial instrument through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial instrument. The future cash flows are estimated considering all the behavioural pattern and contractual terms of the instrument.

The calculation of the EIR includes all fees paid or received between parties to the contract that are incremental and directly attributable to the specific lending arrangement, transaction costs, and all other premiums or discounts. For financial assets at fair value through profit and loss ("FVTPL"), transaction costs are recognised in the Statement of Profit and Loss at initial recognition.

Additional Interest are recognised as income only when revenue is virtually certain which generally coincides with receipts.

Dividend is recognised as income when the right to receive is established.

ii. Fees and charges

Fees and charges include fees other than those that are an integral part of EIR. The fees included in this part of the Group's Statement of Profit and Loss include, among other things, fees charged for servicing a loan. Fees and charges are recognised as income only when revenue is virtually certain which generally coincides with receipts.

NCE

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

Cheque bounce charges, late payment charges and foreclosure charges are recognised on a point-intime basis and are recorded when realised.

Fee and commission expenses with regards to services are accounted for as and when the services are delivered.

iii. Income from financial instruments at FVTPL

Income from financial instruments at FVTPL includes all gains and losses from changes in the fair value of financial assets and financial liabilities at FVTPL.

iv. Assignment transactions

In accordance with Ind AS 109, in case of assignment transactions with complete transfer of risks and rewards without any retention of residual interest, gain arising on such assignment transactions is recorded upfront in the Statement of Profit and Loss and the corresponding asset is derecognised from the Balance Sheet immediately upon execution of such transaction. Further, the transfer of financial assets qualifies for derecognition in its entirety, the whole of the interest spread at its present value (discounted over the life of the asset) is recognised on the date of derecognition itself as interest only strip receivable (interest strip on assignment) and correspondingly recognised as profit on derecognition of financial asset.

v. Securitisation transactions

In accordance with Ind AS 109, in case of securitisation transactions, the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and recognises a collateralised borrowing for the proceeds received.

vi. Other operational revenue

Other operational revenue represents income earned from the activities incidental to the business and is recognised when the right to receive the income is established as per the terms of the contract.

(b) Property, plant and equipment ("PPE")

PPE is recognised when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. PPE is stated at original cost net of tax, if any, less accumulated depreciation. Cost includes professional fees related to the acquisition of PPE and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy.

Subsequent expenditure related to an item of PPE is added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Depreciation is charged using the straight-line method, based on the useful life of PPE as estimated by the Management, as specified below. Depreciation is charged from the month in which new assets are ready to use. No depreciation is charged from the month in which assets are sold. In case of transfer of used PPE from group companies, depreciation is charged over the remaining useful life of the asset. Individual assets / group of similar assets costing up to ₹ 5,000 have been depreciated in full in the year of purchase. Leasehold land is depreciated on a straight-line basis over the

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

leasehold period.

The estimated useful life of assets is as under:

Class of assets	Useful life	
Buildings	20 years	
Computers	3 years	
Office equipment	5 years	
Plant and Equipment	5 years	
Furniture and fixtures	5 years	
Vehicles	5 years	

For above class of assets, based on internal assessment and independent technical evaluation carried out by external valuers, the Management believes that the useful lives as given above best represent the period over which Management expects to use these assets.

An item of PPE is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of PPE is determined as the difference between the sales proceeds and the carrying amount net of accumulated depreciation of the asset and is recognised in the Statement of Profit and Loss.

Capital work in progress

Projects under which PPE are not yet ready for their intended use are carried at cost, comprising direct cost, related incidental expenses and attributable interest, and are disclosed as "capital work-in-progress".

(c) Intangible assets

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax, less accumulated amortisation and cumulative impairment.

Intangible assets i.e., Software are amortised on straight-line basis over the estimated useful life of 3 years. Amortisation on impaired assets is provided by adjusting the amortisation charge in the remaining periods so as to allocate the assets revised carrying amount over its remaining useful life.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount net of accumulated depreciation of the asset are recognised in the Statement of Profit and Loss when the asset is derecognised.

Intangible assets under development

Intangible assets not ready for their intended use on the Balance Sheet date are disclosed as "Intangible assets under development".

(d) Investment property

Investment properties are properties held to earn rentals and/ or for capital appreciation (including

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

property under construction for such purposes). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost, net of accumulated depreciation and accumulated impairment loss, if any.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount net of accumulated depreciation of the asset) is included in Statement of Profit and Loss in the period in which the Investment property is derecognised.

Freehold land and properties under construction are not depreciated.

(e) Non-current Assets held for Sale

Non-current assets are classified as held for sale if their carrying amount is intended to be recovered principally through a sale (rather than through continuing use) when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset and the sale is highly probable and is expected to qualify for recognition as a completed sale within one year from the date of classification.

(f) Impairment of assets

As at the end of each accounting year, the Group reviews the carrying amounts of its PPE, intangible assets and investment property assets to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, the PPE, intangible assets and investment property are tested for impairment so as to determine the impairment loss, if any.

Recoverable amount is the higher of fair value less costs of disposal and value in use. If recoverable amount of an asset is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset is reduced to its recoverable amount.

When an impairment loss is subsequently reversed, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, to the extent that it does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

(g) Share-based payment arrangements

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity.

Securities premium includes:

 The difference between the face value of the equity shares and the consideration received in respect of shares issued pursuant to Stock Option Scheme.

NCA

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

 The fair value of the stock options which are treated as expense, if any, in respect of shares allotted pursuant to Stock Options Scheme

(h) Employee benefits

Defined contribution plans

The Group's contribution towards Provident Fund and Family Pension Fund are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made as and when services are rendered by the employees and are accounted for on an accrual basis and recognised in the Statement of Profit and loss.

Defined benefit plans

Short term employee benefits: Employee benefits falling due wholly within twelve months of rendering the service are classified as short-term employee benefits and are expensed in the period in which the employee renders the related service. Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service. These benefits include performance incentive and compensated absences.

Post employment benefits: The employees' gratuity fund scheme represents defined benefit plan. The present value of the obligation under defined benefit plan is determined based on actuarial valuation using the Projected Unit Credit Method.

The obligation is measured at the present value of the estimated future cash flows using a discount rate based on the market yield on government securities of a maturity period equivalent to the weighted average maturity profile of the defined benefit obligations at the Balance Sheet date.

Re-measurement, comprising actuarial gains and losses, the return on plan assets (excluding amounts included in net interest on the net defined benefit liability or asset) and any change in the effect of asset ceiling (if applicable) is recognised in other comprehensive income and is reflected in retained earnings and the same is not eligible to be reclassified to the Statement of Profit and Loss.

Defined benefit costs comprising current service cost, past service cost and gains or losses on settlements are recognised in the Statement of Profit and Loss as employee benefit expenses. Gains or losses on settlement of any defined benefit plan are recognised when the settlement occurs. Past service cost is recognised as expense at the earlier of the plan amendment or curtailment and when the Group recognises related restructuring costs or termination benefits.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans to recognise the obligation on a net basis.

Long term employee benefits: The obligation recognised in respect of long-term benefits such as long term compensated absences, is measured at present value of estimated future cash flows expected to be made by the Group and is recognised in a similar manner as in the case of defined benefit plan above.

(i) Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the year.

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) and the weighted average number of equity shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e., average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented.

(j) Taxes on income

Current tax

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Group's financial statements and the corresponding tax bases used in computation of taxable profit and quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date.

Deferred tax is not recognized for:

- Temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss
- Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- Taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on business plans and the reversal of temporary differences.

Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. For this purpose, the carrying amount of investment property measured at fair value is presumed to be recovered through sale, and the company has not rebutted this presumption.

For transactions and other events recognised in profit or loss, any related tax effects are also recognised in profit or loss. For transactions and other events recognised outside profit or loss

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

(either in other comprehensive income or directly in equity), any related tax effects are also recognised outside profit or loss (either in other comprehensive income or directly in equity, respectively).

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off assets against liabilities, representing current tax and where the deferred tax assets and deferred tax liabilities relates to taxes on income levied by the same governing taxation laws.

Current and deferred tax for the year

Current and deferred tax are recognised in the Statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

(k) Financial instruments

Financial assets and financial liabilities are recognised in the Group's Balance Sheet when the Group becomes a party to the contractual provisions of the instrument.

Recognised financial assets and financial liabilities are initially measured at fair value. Transaction costs and revenues that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs and revenues directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in the Statement of Profit and Loss.

Financial assets

Classification and measurement

The Group classifies its financial assets into the following measurement categories: amortised cost; fair value through other comprehensive income; and fair value through profit or loss.

All recognised financial assets that are within the scope of Ind AS 109 are required to be subsequently measured at amortised cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

Financial instruments measured at amortised cost

Debt instruments that meet the following criteria are measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely
 payments of principal and interest ("SPPI") on the principal amount outstanding.

For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. The principal amount may change over the life of the financial asset (e.g., if there are repayments of principal). Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The SPPI assessment is made in the currency in which the financial asset is denominated.

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

Contractual cash flows that are SPPI are consistent with a basic lending arrangement. Contractual terms that introduce exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form.

An assessment of business models for managing financial assets is fundamental to the classification of a financial asset. The Group determines the business models at a level that reflects how financial assets are managed together to achieve a particular business objective. The Group's business model does not depend on management's intentions for an individual instrument, therefore the business model assessment is performed at a higher level of aggregation rather than on an instrument-by-instrument basis.

Debt instruments that are subsequently measured at amortised cost are subject to impairment.

Financial instruments measured at fair value through other comprehensive income ("FVTOCI")

Debt instruments that meet the following criteria are measured at fair value through other comprehensive income (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely
 payments of principal and interest on the principal amount outstanding.

Interest income is recognised in Statement of profit and loss for FVTOCI debt instruments. Other changes in fair value of FVTOCI financial assets are recognised in other comprehensive income. When the asset is disposed of, the cumulative gain or loss previously accumulated in reserve is transferred to Statement of Profit and Loss.

Financial instruments measured at fair value through Profit and Loss ("FVTPL")

All financial assets are recognized initially at fair value plus transaction cost attributable to the acquisition of the financial asset. However, trade receivables that do not contain a significant financing component are measured at transaction price.

Instruments that do not meet the amortised cost or FVTOCI criteria are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in the Statement of Profit and Loss. The gain or loss on disposal is recognised in the Statement of Profit and Loss.

Interest income is recognised in the Statement of Profit and Loss for FVTPL debt instruments.

Dividend on financial assets at FVTPL is recognised when the Group's right to receive dividend is established.

Investments in equity instruments at FVTOCI

On initial recognition, the Group makes an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in other comprehensive income pertaining to

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

investments in equity instruments. This election is not permitted if the equity investment is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to Statement of Profit and Loss on disposal of the investments. Dividends from these investments are recognised in the Statement of Profit and Loss when the Group's right to receive dividends is established.

Reclassifications

If the business model under which the Group holds financial assets changes, the financial assets affected are reclassified. The classification and measurement requirements related to the new category apply prospectively from the first day of the first reporting period following the change in business model that result in reclassifying the Group's financial assets. Changes in contractual cash flows are considered under the accounting policy on modification and derecognition of financial assets described below.

Impairment of financial assets

Group recognizes loss allowances using the Expected Credit Loss ("ECL") model for the financial assets which are not fair valued through profit and loss. ECL is calculated using a model which captures portfolio performance over a period of time. ECL is a probability-weighted estimate of credit losses. A credit loss is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive discounted at the original EIR. Vintage loss curve model is used for ECL computation of retail portfolio which involves assessment of performance of segmented portfolio over a time period. The model tracks monthwise losses during the loan tenor. Vintage loss rate models provide a simple, reasonable model for both one-year and lifetime expected credit loss forecasts. For wholesale portfolio, ECL computation is done for each loan account based on CRISIL default study and International Review Board ("IRB") guidelines.

ECL is measured through a loss allowance at an amount equal to:

- 12-month ECL, i.e., ECL that result from those default events on the financial instrument that are
 possible within 12 months after the reporting date (referred to as Stage 1); or
- full lifetime ECL, i.e., lifetime ECL that result from all possible default events over the life of the financial instrument (referred to as Stage 2 and Stage 3).

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL.

The Group measures ECL on an individual basis, or on a collective basis for portfolios of loans that share similar economic risk characteristics. The measurement of the loss allowance is based on the present value of the asset's expected cash flows using the asset's original EIR, regardless of whether it is measured on an individual basis or a collective basis.

Key elements of ECL computation are outlined below:

Probability of default ("PD") is an estimate of the likelihood that customer will default over a
given time horizon. A default may only happen at a certain time over the assessed period, if the
facility has not been previously de-recognised and is still in the portfolio.

Loss given default ("LGD") estimates the normalised loss which Group incurs post customer

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

default. It is usually expressed as a percentage of the Exposure at default ("EAD").

Effective interest rate ("EIR") is the rate that discounts estimated future cash flows through the
expected life of financial instrument. For calculating EIR any upfront fees need to be excluded
from the loans and advance amount.

Credit impaired financial assets

A financial asset is 'credit impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Credit-impaired financial assets are referred to as Stage 3 assets. Evidence of credit-impairment includes observable data about the following events:

- · significant financial difficulty of the borrower or issuer,
- · a breach of contract such as a default or past due event,
- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider,
- the disappearance of an active market for a security because of financial difficulties; or
- the purchase of a financial asset at a deep discount that reflects the incurred credit losses.

A loan is considered credit-impaired when a concession is granted to the borrower due to a deterioration in the borrower's financial condition, unless there is evidence that as a result of granting the concession the risk of not receiving the contractual cash flows has reduced significantly and there are no other indicators of impairment.

Definition of default

Critical to the determination of ECL is the definition of default. The definition of default is used in measuring the amount of ECL and in the determination of whether the loss allowance is based on 12-month or lifetime ECL, as default is a component of the probability of default ("PD") which affects both the measurement of ECLs and the identification of a significant increase in credit risk.

Default considered for computation of ECL computation is as per the applicable prudential regulatory norms.

Significant increase in credit risk

The Group monitors all financial assets, issued loan commitments and financial guarantee contracts that are subject to the impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. The Group's accounting policy is not to use the practical expedient that financial assets with 'low' credit risk at the reporting date are deemed not to have had a significant increase in credit risk.

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date based on the remaining maturity of the instrument with the risk of a default occurring that was anticipated for the remaining maturity at the current reporting date when the financial instrument was first recognised. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort, based on the Group's expert credit assessment.

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

Modification and derecognition of financial assets

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/ or timing of the contractual cash flows either immediately or at a future date. In addition, the introduction or adjustment of existing covenants of an existing loan would constitute a modification even if these new or adjusted covenants do not yet affect the cash flows immediately but may affect the cash flows depending on whether the covenant is or is not met (e.g., a change to the increase in the interest rate that arises when covenants are breached).

The Group renegotiates loans to customers in financial difficulty to maximise collection and minimise the risk of default. Loan forbearance is granted in cases where although the borrower made all reasonable efforts to pay under the original contractual terms, there is a high risk of default or default has already happened and the borrower is expected to be able to meet the revised terms. The revised terms in most of the cases include an extension of the maturity of the loan, changes to the timing of the cash flows of the loan (principal and interest repayment), reduction in the amount of cash flows due (principal and interest forgiveness) and amendments to covenants.

When a financial asset is modified, the Group considers the following:

Qualitative factors, such as contractual cash flows after modification are no longer SPPI, change in currency or change of counterparty, the extent of change in interest rates, maturity, covenants. If these do not clearly indicate a substantial modification, then a quantitative assessment is performed to compare the present value of the remaining contractual cash flows under the original terms with the contractual cash flows under the revised terms, both amounts discounted at the original effective interest.

In the case where the financial asset is derecognised, the loss allowance for ECL is remeasured at the date of derecognition to determine the net carrying amount of the asset at that date. The difference between this revised carrying amount and the fair value of the new financial asset with the new terms will lead to a gain or loss on derecognition. The new financial asset will have a loss allowance measured based on 12-month ECL except in the rare occasions where the new loan is considered to be originated-credit impaired. This applies only in the case where the fair value of the new loan is recognised at a significant discount to its revised par amount because there remains a high risk of default which has not been reduced by the modification. The Group monitors credit risk of modified financial assets by evaluating qualitative and quantitative information, such as if the borrower is in past due status under the new terms.

When the contractual terms of a financial asset are modified and the modification does not result in derecognition, the Group determines if the financial asset's credit risk has increased significantly since initial recognition.

For financial assets modified, where modification did not result in derecognition, the estimate of PD reflects the Group's ability to collect the modified cash flows taking into account the Group's previous experience of similar forbearance action, as well as various behavioural indicators, including the borrower's payment performance against the modified contractual terms. If the credit risk remains significantly higher than what was expected at initial recognition the loss allowance will continue to be measured at an amount equal to lifetime ECL. The loss allowance on forborne loans will generally only be measured based on 12-month ECL when there is evidence of the borrower's improved repayment behaviour following modification leading to a reversal of the previous significant increase in credit risk.

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

Where a modification does not lead to derecognition the Group calculates the modification gain/ loss comparing the gross carrying amount before and after the modification (excluding the ECL allowance). Then the Group measures ECL for the modified asset, where the expected cash flows arising from the modified financial asset are included in calculating the expected cash shortfalls from the original asset.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the asset's cash flows expire (including expiry arising from a modification with substantially different terms), or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that had been recognised in OCI and accumulated in equity is recognised in the Statement of Profit and Loss, with the exception of equity investment designated as measured at FVTOCI, where the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to the Statement of Profit and Loss.

Write-off

Loans and debt securities are written off when the Group has no reasonable expectations of recovering the financial asset (either in its entirety or a portion of it). This is the case when the Group determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event. The Group may apply enforcement activities to financial assets written off. Recoveries resulting from the Group's enforcement activities will result in impairment gains.

Financial liabilities and equity Instruments

Debt and equity instruments that are issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Compound instruments

The component parts of compound instruments (e.g., convertible notes) issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Group's own equity instruments is an equity instrument.

ANC

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments.

A conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently re-measured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to other component of equity. Where the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained earnings. No gain/ loss is recognised in Statement of Profit and Loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the life of the convertible notes using the effective interest rate method.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method.

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest rate method.

The effective interest rate method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the Statement of Profit and Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet only if there is an enforceable legal right to offset the recognised amounts with an intention to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

(I) Cash and bank balances

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value. Cash and bank balances also include fixed deposits, margin

ANC

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

money deposits, earmarked balances with banks and other bank balances which have restrictions on repatriation. Short term and liquid investments being subject to more than insignificant risk of change in value, are not included as part of cash and cash equivalents.

(m) Goods and service tax input credit

Goods and service tax input credit is accounted for in the books in the period in which the supply of goods or service received is accounted and when there is no uncertainty in availing/ utilising the credits.

(n) Borrowing costs

Borrowing costs include interest expense calculated using the EIR method.

(o) Foreign currencies

In preparing the consolidated financial statements of, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in the Statement of Profit and Loss.

Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in the Statement of Profit and Loss in the period in which they arise.

(p) Segment reporting

The Group's primary business segments are reflected based on the principal business carried out i.e., financing. All other activities of the Group revolve around the main business. The risk and returns of the business of the Group is not associated with geographical segmentation, hence there is no secondary segment reporting based on geographical segment. As such, there are no separate reportable segments.

(q) Provisions, contingent liabilities and contingent assets

Provisions are recognised only when:

- an entity has a present obligation (legal or constructive) as a result of a past event; and
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- · a reliable estimate can be made of the amount of the obligation

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the

current best estimates.

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

Contingent liability is disclosed in case of:

- a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- a present obligation arising from past events when no reliable estimate is possible.

Contingent liabilities are disclosed in the Notes. Contingent assets are neither recognised nor disclosed in the consolidated financial statements.

(r) Commitments

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- Estimated amount of contracts remaining to be executed on capital account and not provided for,
- b) Funding related commitment to associate and joint venture companies; and
- c) Other non-cancellable commitments, if any.

(s) Statement of cash flows

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method adjusting the net profit for the effects of:

- changes during the period in operating receivables and payables transactions of a non-cash nature,
- non-cash items such as depreciation, provisions, deferred taxes and unrealised foreign currency gains and losses.
- · all other items for which the cash effects are investing or financing cash flows.

Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as on the date of balance sheet.

(t) Exceptional Items

When items of income and expense within profit or loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such items is disclosed separately as Exceptional items.

(u) Derivative financial instruments and hedging

The Group enters into derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate swaps and cross currency swaps.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in the Statement of Profit and Loss immediately unless the

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in the Statement of Profit and Loss depends on the nature of the hedging relationship and the nature of the hedged item.

Hedge accounting

The Group designates certain hedging instruments, which include derivatives in respect of foreign currency risk, as cash flow hedge.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.

Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedge reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss and is included in the 'Other income' line item.

Amounts previously recognised in other comprehensive income and accumulated in equity relating to (effective portion as described above) are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, such gains and losses are transferred from equity (but not as a reclassification adjustment) and included in the initial measurement of the cost of the non-financial asset or non-financial liability. Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

(v) Leases

The Group assesses whether a contract contains a lease, at the inception of the contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group considers whether (i) the contract involves the use of identified asset; (ii) the Group has substantially all of the economic benefits from the use of the asset through the period of lease and (iii) the Group has right to direct the use of the asset.

As a lessee

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the site on which it is located, less any lease incentives received.

Certain lease arrangements include the option to extend or terminate the lease before the end of the

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

lease term. The right-of-use assets and lease liabilities include these options when it is reasonably certain that the option will be exercised.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprises of fixed payments, including in-substance fixed payments, amounts expected to be payable under a residual value guarantee and the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option.

The lease liability is subsequently measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Lease liability and the right of use asset have been separately presented in the balance sheet and lease payments have been classified as financing activities.

The Group has elected not to recognise right-of-use assets and lease liabilities for short term leases that have a lease term of less than or equal to 12 months with no purchase option and assets with low value leases. The Group recognises the lease payments associated with these leases as an expense in statement of profit and loss over the lease term. The related cash flows are classified as operating activities.

Critical accounting estimate and judgement

Determination of lease term

Ind AS 116 Leases requires lessee to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Group makes assessment on the expected lease term on lease by lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Group considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of lease and the importance of the underlying to the Group's operations taking into account the location of the underlying asset and the availability of the suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances.

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2024

2. Discount rate

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

The Group as a lessee

As a lessee, the Group leases assets which includes gold loan branches/office premises and vehicles to employees. The Group previously classified leases as operating, or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Group. Under Ind AS 116, the Group recognises right-of-use assets and lease liabilities for these leases.

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2024

6.1 Hedging activities and derivatives

The Group is exposed to certain risks relating to its ongoing business operations. The primary risks managed using derivative instruments are interest rate and currency risk.

6.1.1 Derivatives designated as hedging instruments

The foreign currency and interest rate risk on borrowings have been actively hedged through a combination of forward contracts and cross currency interest rate swaps:

The Group is exposed to interest rate risk arising from its foreign currency borrowings. Interest on the borrowing is payable at a floating rate linked to the Benchmark Plus Margin. The Group economically hedged the interest rate risk arising from the debt with a 'receive floating pay fixed' cross currency interest rate swap and also with Derivative Forward Contract.

The Group uses Cross Currency Interest Rate Swaps (IRS) Contracts (Floating to Fixed) and Forward Exchange Contracts to hedge its risks associated with interest rate and currency fluctuations relating interest rate and currency risk arising from foreign currency loans / external commercial borrowings. The Group designates such contracts in a cash flow hedging relationship by applying the hedge accounting principles as per IND AS standards. These contracts are stated at fair value of the Spot element of the forward exchange contracts at each reporting date. Changes in the fair value of these contracts that are designated and effective as hedges of future cash flows are recognised directly in "Cash Flow Hedge Reserve" under Other Equity and the ineffective portion is recognised immediately in the Statement of Profit and Loss. Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting.

There is an economic relationship between the hedged item and the hedging instrument as the terms of the Forward contracts/Cross Currency Interest Rate Swaps match that of the foreign currency borrowings (notional amount, interest payment dates, principal repayment date, etc.). The Group has established a hedge ratio of 1:1 for the hedging relationships as the underlying risk of the Forward contracts/Cross currency interest rate swaps are identical to the hedged risk components.

12.1: The management of the parent Company has acquired possession of these properties in satisfaction of the debts and intends to dispose them in due course, subject to conducive market conditions. These properties have been valued taking into consideration various factors such as location, facilities & amenities, quality of construction, percentage of completion of construction (as for some properties the construction is currently on hold), residual life of building, business potential, supply & demand, local nearby enquiry, market feedback of investigation and ready reckoner published by government. These valuations has been performed by an independent registered valuer registered under rule 2 of Companies (Registered Valuers and Valuation) Rules,2017. The fair values are based on market values, being the estimated amount for which a property could be exchanged in an arm's length transaction. These properties are not depreciated as they have not been ready to use.

Notes:

- (a) These loans are secured by way of a first pari-passu charge over the current assets in the form of receivables, book debts, bills, outstanding monies receivables including future movable assets, other than those specifically/exclusively charged.
- (b) During the year FY 2023-24 the Group had borrowed ₹ 614.48 Crores (equivalent to US\$ 75 Million) under External commercial borrowing. These are secured by way of a first ranking pari passu charge by way of hypothecation on all the borrower's charged asset in favour of the security holder in accordance with the Deed of Hypothecation.
- (c) During the year, Group borrowed ₹ 410.25 Crores (equivalent to US\$ 50 Million) under External commercial borrowing. These are secured by way of first ranking pari passu against all receivables/current assets of the borrower including book debts/receivables with both present and future but excluding book debt/receivables pertaining to capital market exposure and securitised asset
- (d) During the year, Group borrowed ₹ 410.11 Crores (equivalent to US\$ 50 Million) under External commercial borrowing. These are secured by way of first ranking pari passu charge over all receivables/current assets of the borrower including book debts/receivables both present and future and which are "standard assets" but excluding book debt/receivables pertaining to capital market exposure and securitised assets.
- (e) During the year, the Group borrowed ₹ 416.68 Crores denominated in Japanese Yen (equivalent to US\$ 50 Million) under External commercial borrowing. These are secured by way of first ranking pari passu charge on all present and future standard loan receivables (excluding the receivables given on exclusive charge, if any), book debts, loan and advances and current assets of the borrower.
- (f) During the previous year, the Group borrowed ₹ 395.28 crore (equivalent to USD 50 million) under External commercial borrowing. These are secured by way of first ranking pari passu charge by way of hypothecation on all borrower's charged asset in favour of the security trustee and specity exclusive charge.
- (g) During the previous year, the Group borrowed 822.00 crore (equivalent to USD 100 million) under External commercial borrowing. These are secured by way of first ranking pari passu against all receivables/current assets of the borrower including book debts/receivables with both present and future but excluding book debt/receivables pertaining to capital market exposure and securitised asset.
- (h) Out of the total borrowing from Banks, borrowings amounting to ₹ 20.00 Crores (As at March 31, 2023 ₹ 20.00 Crores) and Refinance Facility from NHB amounting to ₹ 390.32 Crores (As at March 31, 2023 ₹ 564.94 Crores) are also guaranteed by Holding Company i.e. IIFL Finance Limited.
- (i) The term loans from banks, Financial Institution and NHB and cash credits from banks are secured by way of first pari passu charge by way of hypothecation on receivables of the Group, both present and future, book debts, loans & advances, except those receivables present and/or future specifically and exclusively charged in favor of certain existing charge holders. Further, borrowings from Financial Institution amounting to € 413.10 Crores (before interest accrued but not due, exchange fluctuation and EIR adjustments) (As at March 31, 2023 Nil) are secured by way of first priority exclusive charge on the identified receivables of the Group.
- (j) Borrowings from NHB includes ₹ 4,401.16 Crores (As at March 31, 2023 ₹ 2,520.49 Crores) secured by way of first exclusive charge on unencumbered individual housing loan portfolio in Favor of NHB.

The sensivity analysis have been determined based on reasonable possible changes of the respective assumptions occurring at the end of the reporting period. While hidding all other assumptions constant.

The sensitivity analysis presented above may not be representative of the exhibit change in the projected benefit obligation as it is unlikely that the change in assumptions would occur in solation of one another as some of the assumptions may be correlated

Furthermore, in presenting the above sensitivity analysis, the present value of the projected tenefic obligation has been calculated using the projected unit tredit method at the end of the reporting period, which is the same method as applied in calculating the projected benefit obligation as recognised in the balance sheet

There was no change in the methods and assumptions used in preparing the sensitivity analysis from pror years.

of gains/fusses are recognised in the period of occurrence under Other Comprehensive Income (QCI). All above reported figures of QCI are gross of taxasio

Salary escalation & attrition rate are in line with the industry gractice considering promotion and demand and supply of the employees.

nefit payments is undiscounted cashillows consistening future salary, stirition & death in respective year for members as ment

Average Expected Future Service represents Estimated Term of Post - Employment Benefit Obligation.

Value of asset is considered as fair value of plan asset for the period of reporting.

Expected Rate of Raturo takes same as discount rate as described in Indian Accounting Standard 19.

Expected Contribution in the Next Year is the amount as expected by Entity to be contributed us the Plan Assets over the next year.

Qualitative disclassures

The Company has a defined benefit gratuity plan in India (funded). The company's defined benefit gratuity plan is a final salary plan for employees, which requires contributions to be made to a separately administered fund. During the year, there were no plan amendments, curtailments and settlements.

The fund is managed by a trust which is governed by the Board of Trustees. The Board of Trustees are responsible for the administration of the glan assets and for the definition of the ovestment strategy.

Risks associated with defined benefit plan

Gratuity is a defined benefit plan and company is exposed to the following Hisks:

Interest rate risk: A fall in the discount rate which is linked to the G Sec. Rate will increase the present value of the liability requiring higher provision. A fall in the discount rate generally increases the mark to market value of the assets depending on the duration of asset.

Salary risk: The present value of the defined benefit plan ketolity is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than assumed level will increase the plan's liability.

investment risk: The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period ment bonds. If the return on plan asset is below this rate, it will create a plan delice. Currently, for the plan in India, it has a relatively balanced mix of investments in government on govern securities, and other debt instruments.

Asset Rubility matching risk: The plan faces the ALM risk as to the matching cash flow. Since the dian is invested in lines of Rule 101 of income Tax Rules, 1962, this generally reduces ALM 154

Mortality risk: Since the benefits under the glan is not payable for life time and payable fill retirement age only, plan does not have any longevity risk.

A separate trust fund is created to manage the Gratuity plan.

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2024

Note 18. Risk Management

The Group's activities expose it to market risk, liquidity risk and credit risk

Bisk management is integral to the Group's strategy. An enterprise wide risk management framework is in place to govern the Group's risk management processes. A strong risk management team and an effective credit operations structure ensures that risks are properly identified and timely uddiessed to ensure minimal impact on the Group's growth and performance.

The Group has developed the necessary competency to identify early stress signals and has also defined processes, including corrective and remedial actions as regards people and processes, for mitigation to ensure minimum damage.

A stress testing mechanism is put in place to carry out the event based sensitivity analysis and identify the accounts under stress due to expected market

The comprehensive understanding of risk management throughout the various levels of an organization aids in driving key decisions related to risk return balance, capital allocation and product pricing. The Group operates under the guidance of the Board approved risk appetite statement that covers business composition, guidance around gross non-performing assets and net non-performing assets, leverage, funding and liquidity, etc.

Additionally, it is also ensured that appropriate focus is on managing risk proactively by ensuring business operations are in accordance with laid-down risk. A strong risk management team and an effective credit operations structure ensures that risks are properly identified and timely addressed, to ensure minimal impact on the Group's growth and performance.

Risk Management Structure

The Group has established multi-level risk governance for monitoring & control of product and entity level risks. The Board of Directors are responsible for the overall risk management approach and for approving the risk management strategies and principles. The Board has constituted the Risk Management Committee ("RMC") which is responsible for monitoring the overall risk process within the Group. The RMC is empowered to develop an independent risk strategy comprising of principles, frameworks, policies and limits and ensuring its effective implementation. Independent function of Risk management is in place headed by the Chief Risk Officer ("CRO") who reports to the Chief Executive Officer ("CEO") with oversight of RMC of the Board. The Risk department primarily operationalises risk management framework approved by RMC.

The group has a well -defined risk framework constituting various lines of defence - the first line of defence, consisting of management, is responsible for seamless integration of risk principles across all businesses. Additionally, it ensures adequate managerial and supervisory controls to ensure compliance and highlight inadequate processes and unexpected events. The Group has well-defined internal control measures in every process.

Independent risk and policy team constitutes second line of defence which is responsible for identification and assessment of entity-wide risks. Post its identification, it aims to mitigate risks either through portfolio trigger and caps (Credit risk) or through ongoing risk control and self assessment (Operational risk) Internal Audit function is the third line of defence that independently reviews activities of the first two lines of defence and reports to the Audit Committee of the

Risk Management Practices.

The Group has developed the necessary competency to identify early stress signals and has also defined processes, including corrective and remedial actions as regards people and processes, for mitigation to ensure minimum damage. A stress testing mechanism is put in place to carry out the event based sensitivity analysis and identify the accounts under stress due to expected market movement. In event of susceptibility to external triggers, appropriate risk mitigation would be undertaken and thereby minimize the losses to the Group.

The Group has initiated a detailed portfolio quality review mechanism which enables analysis of portfolio along various behavioural, demographic and financial parameters. Additionally, through tie-ups with external bureaus, an analysis of collection performance coupled with continuous credit assessment for various key segments is undertaken. The practices aid in proactive course correction thereby modifying credit or sourcing mechanisms, if required. Additionally, application scorecard has been developed enabling the Group to standardize credit underwriting & improve sourcing quality in the long run.

The Group's policy is to measure and monitor the overall risk-bearing capacity in relation to the aggregate risk exposure across all risk types and activities. Information pertaining to different type of risks are identified, analysed and tested on timely basis. The same is presented to Risk Management Committee at periodic intervals.

In order to minimise any adverse effects on the financial performance of the Group, derivative financial instruments, such as cross currency interest rate swaps are entered to hedge certain foreign currency risk exposures and variable interest rate exposures.

up's central treasury department identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units. The Board provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments and investment of excess liquidity. The Group's Treasury is responsible for managing its assets and liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks of the Group.

RRA 1. Credit Risk

Credit risk refers to risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. Credit risk arises primarily from financial assets such as trade receivables, investments, derivative financial instruments, other balances with banks, loans and other receivables.

Credit quality analysis

The following tables sets out information about the credit quality of financial assets measured at amortised cost. Unless specifically indicated, for financial assets, the amounts in the table represent gross carrying amounts.

(* in crores)

THE RESERVE TO THE PARTY OF THE	-	As at Marc	th 31, 2024

Financial Assets measured using simplified approach:

The Group follows 'simplified approach' for recognition of impairment loss allowance on Cash and Cash Equivalents, Bank Balances, Trade Receivables, other receivables and Other Financial Assets. The application of simplified approach does not require the Group to track changes in credit risk. Mather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

38A.2. Collateral held

The Group holds collateral and other credit enhancements against certain of its credit exposures. The loans are collateralised against equitable mortgage of property, pledge of shares, hypothecation of assets, physical gold, undertaking to create security

38A.3. Loss allowance and Exposure at default

The following tables show reconciliations from the opening to the closing balance of the loss allowance by class of financial instrument.

The terms of the assets have been modified in accordance with NHB (Directions)/RBI (HFC) Directions and as per RBI Notification "Resolution Framework for COVID-19-related Stress"

38A.5. Credit Risk Grading of loans

Credit Risk Grading is an important tool for credit risk management as it helps in understanding and evaluating risks for different credit transactions.

The Group has established overall credit limits at the level of individual borrowers and counterparties, and groups of connected counterparties. It manages and controls credit risk by contining the amount of risk it is willing to accept for individual counterparties, for geographical concentrations, and by closely monitoring such exposures.

CONSOLIDATED FINANCIAL STATEMENTS OF HEL FINANCE LIMITED

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2024

The Group has a Credit Risk Policy which is board approved and shared with all credit approving authorities. All customers will be evaluated on a set of predefined parameters as detailed below and accordingly classified into any of the following categories:

- 1. Low Risk
- 2. Medium Risk
- 3. High Risk

The high risk category of customers will not be actively sourced by the Group. Any customer, identified as High Risk, can be funded by the Group basis exceptional comfort and availability of justifying mitigates. The extent and nature of due diligence will be the highest for this category. The assessment of a customer being classified into high, medium or low is based on various parameters at the time of on-boarding which are captured in the Credit Approval Memorandum by the credit manager and validated by the relevant approving authority. The parameters are as follows:

- Customer Profile
- Financial health
- Business vintage
- Credit history
- Industry feedback
- Other qualitative/ quantitative factors as mentioned in the policy

Every customer once being stamped into a risk category on a periodic basis would further be subjected to change of his risk profile depending on the repayment history and DPDs through an independent credit quality review process. This process aims to allow the Group to assess the potential loss as a result of the risks to which it is exposed and take corrective actions.

Credit Grading details :		(₹ in crores)		
Period	Stage 1	Stage 2	Stage 3	Total EAD
March 31, 2024	51,691.32	2,595.04	1,179.36	55,465.72
March 31, 2023	40,164.57	2,089.94	736.77	42,991.27

38A.7. Concentration of Credit Risk

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. in order to avoid excessive concentrations of risk, the Group's polities and procedures include specific guidelines to focus on spreading its lending portfolio across various products/states/customer base with a cap on maximum limit of exposure for an individual/Group. Accordingly, the Group does not have concentration

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2024

Uquidity risk refers to the risk that the Group may not be able to meet its short-term financial obligations. The Group manages liquidity risk by maintaining sufficient cash and marketable securities and by having access to funding through an adequate amount of credit lines. Further, the Group has well defined Asset Liability Management (ALM) framework with an appropriate organizational structure to regularly monitor and manage maturity profiles of financial assets and financial liabilities including debt financing plans, cash and cash equivalent instruments to ensure liquidity. The Group seeks to maintain flexibility in funding mix by way of sourcing the funds through money markets, debt markets and banks to meet its business and liquidity requirements.

CONSOLIDATED FINANCIAL STATEMENTS OF IFL FINANCE LIMITED

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2024

Market Risk is the risk that the value of on and off-balance sheet positions of a financial institution will be adversely affected by movements in market rates or prices such as interest rates, foreign exchange rates, equity prices, credit spreads and/or commodity prices resulting in a loss to earnings and capital.

Financial institutions may be exposed to Market Risk in variety of ways. Market risk exposure may be explicit in portfolios of securities / equities and instruments that are actively traded. Conversely it may be implicit such as interest rate risk due to mismatch of loans and deposits. Besides, market risk may also arise from activities categorized as off-balance sheet item. Therefore market risk is potential for loss resulting from adverse movement in market risk factors such as interest rates, forex rates, equity and commodity prices.

The Group's exposure to market risk is primarily on account of interest rate risk and Foreign exchange risk.

38C.1 Interest rate risk

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2024

38C.2. Exposure to currency risks

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign currency rates. The Group's exposure to the risk of changes in foreign exchange rates relates primary to the foreign currency borrowings taken from banks and External Commercial Borrowings (ECB).

The Group follows a conservative policy of hedging its foreign currency exposure through Forwards and / or Cross Currency Interest Rate Swaps (CCRIS) in such a manner that it has fixed determinate outflows in its functional currency and as such there would be no significant impact of movement in foreign currency rates on the Group's profit before tax (PBT) and equity. However for the unhedged foreign currency exposure(s) there would be an impact on Group's profitability.

The General currency position is as under

(E in crores)

The Group's currency position is as under	USD	EUR	CHF	JPY	SGD	Other Currencies
Foreign Currency Assets (in.(NR)	157.69	-	- 9	/t	-	
Foreign Currency Liabilities (in INR)	13.54			19.99		-
	144.15			(19.99)		16.5
Net Gap as at March 31, 2024	744173			11/1/2011		(₹ in crores

AND THE RESERVE	USD	EUR	CHF	JPY .	SGD	Other Currencies
Particulars : Foreign Currency Assets (in INR)	223.58		-	-	-	
Foreign Currency Liabilities (in INR)	42.37	(4)	(4.1)	P. C.		-
Net Gap as at March 31, 2023	181.21			-		

Sensitivity:

The sensitivity of profit or loss to changes in the exchange rates arises mainly from foreign currency denominated financial instruments.

(₹ in crores)

	Impact on pro	Impact on profit after tax		
Particulars	March 31, 2024	March 31, 2023	March 31, 2024	March 31, 2023
Currency sensitivity	(15.41)	-	(143.79)	(182.45)
Increase by 5% Decrease by 5%	15.41	-	143.79	182.45

The sensitivity on profit and loss is due to the timing difference of the maturity of the Cross currency interest rate swap. On the date of maturity of the Cross currency interest rate swap, the sensitivity of profit and loss to changes in the exchange rates will be Nil.

38C.3. Price Risk

(a) Exposure

The Group's exposure to assets having price risk is as under

(₹ in crores)

Particulars	Equity Share	/Alternate investment funds/ others	Bonds / Debt securities	Security Receipts	Total
11 1074	24.18	482.50	369.31	3,182.99	4,058.9
Market Value as on March 31, 2024 Market Value as on March 31, 2023	0.05	2,284.73	346.52	879.70	3,511.0

To manage its price risk arising from investments in equity securities/other assets, the Group diversifies its portfolio.

(b) Sensitivity

The table below summarises the impact of increases/decreases of the index on the Group's equity/other assets and profit for the period. The analysis is based on the assumption that the instrument index has increased by 5% or decreased by 5% with all other variables held constant.

Particulars	Impact on pr	Impact on other components of equity		
	March 31, 2024	March 31, 2023	March 31, 2024	March 31, 2023

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2024

38E.3. Valuation methodologies of financial instruments not measured at fair value

Below are the methodologies and assumptions used to determine fair values for the above financial instruments which are not recorded and measured at fair value in the Group's financial statements. These fair values were calculated for disclosure purposes only.

Short-term financial assets and liabilities

For financial exects and financial habities that have a short-form nature, the carrying amounts, which are net of impairment, are a reasonable approximation of their fair value. Such extruments include: cash and tank balances, Trade receivables, other receivables, balances other than cash and cash equivalents and trade payables.

Leans, Debts, Borrowings and Subordinated Debts

Sears, Debts, decrowings and supprenated Debts

The fair values of these instruments are estimated by determining the price of the instrument taking into consideration the origination date, maturity date, coupon rate, actual or approximation of frequency of interest payments and incorporating the actual or estimated/pricky yields of identifical or similar instruments through the discounting factor, for instruments, having contractual residual maturity less than one year, the carrying value has been considered as fair value. Loans and advances are presented net of provisions for impairment.

38 F. Transferrest financial assets that are derecognised in their entirety

The Group has sold some loans and advances measured at FVTOCI as per assignment deals, as a source of finance. As per the terms of deal, since the derecognition criteria as per IND AS 109, including transfer of substantially all the risks and rewards relating to assets being transferred to the buyer being met, the assets have been derecognised. The management has evaluated the impact of the assignment transactions done during the year for its business model. Based on the future business plans, the Group's business model remains to hold the assets for collecting contractual cash flows.

The following table provide a summary of the amount of the derecognised financial assets during the year and the gain/[loss] on derecognision, which qualify for derecognistion:

		(* in crores)
Particulars	JY 2023-24	FY 2022-23
	14,338.07	14,645.44
Financial assets derecognised during the year Net loss / (gain) an derecognistion of financial instruments under FVTOCI category	136.79	(513.83)

38 G. Transferred financial assets that are recognised in their entirety:

The Group uses securitizations as a source of finance. Such transaction resulted in the transfer of contractual such flows from portfolios of financial assets to holders of issued debt securities. Such deals resulted as continued recognision of the securitized assets since the Group retains substantial risks and rewards. The table below outlines the carrying amounts and fair values of all financial assets transferred that are not derecognised in their entirety and associated liabilities.

		(* in crores)	
Securitizations (IAS)	As at March 31, 2024	As at March 31, 2023	
Carrying amount of transferred assets measured at amortised cost.	280.45	743.94	
Carrying amount of associated liabilities	280.71	741.94	
Fair value of assets	780.43	743.81	
Fair value of associated liabilities	280.73	743.94	

Note 39. Capital, Other Commitments and Contingent Liabilities at Balance Sheet date:

Contingent Liabilities:

(₹ in crores)

The Group's primary business segments are reflected based on the principal business carried out, i.e. financing. All other activities of the Group revolve around the main business. The risk and returns of the business of the Group is not associated with geographical segmentation, hence there is no secondary segment reporting based on geographical segment. As such, there are no separate reportable segments as per the Indian Accounting Standard 108 on Segment Reporting

The Group operates from and uses the premises, infrastructure and other facilities and services as provided to it by its group companies, which are termed as "Shared Services" Hitherto, such shared services convisting of administrative and other revenue expenses paid for by the Group were identified and recovered/recoverable from them based on reasonable management estimates, which are constantly refined in the light of additional knowledge gained relevant to such estimation. These expenses are recovered on an actual basis and the estimates are used only where actual were difficult to determine.

On March 04, 2024, the Reserve Bank of India (RBI), under Section 454(1)(b) of the Reserve Bank of India Act, 1934, enposed supervisory restrictions on the parent Company. This followed an RBI impection of the parent Company's financial position as of March 31, 2023, which identified significant concerns in our gold foan portfolio. These include

- Distursals and collections of loan amounts in cash exceeding statutory limits.
- Non-compliance with the standard auction process.
- Deviations in assaying and certifying the purity and net weight of gold at both the time of loan sanction and auction upon default.
- . It muches in the Loan-to-Value ratio.
- Lack of transparency in charges levied on custo

Consequently, the RBI directed the parent Company to cease the sanctioning or disbursing of new gold loans and the assignment, securitization, or sale of existing gold loans with immediate effect. However, the parent Company is permitted to continue servicing its existing gold loan portfolio, including loan collections and recoveries, and to maintain its other business operations as usual.

The RBI has initiated a special audit by an independent professional agency, which commenced on April 23, 2024, and has since concluded. The parent Company has taken necessary measures to address the identified concerns and prevent their recurrence. The Board has thoroughly reviewed these deviations and non-compliances, forming a team to implement corrective actions and revise policies and procedures as needed. Management is confident that these actions will resolve all issues raised by the RBI. The Group remains committed to adhering to the highest standards of compliance with RBI regulations, in both letter and spirit,

Note 49 impact of RBI's Action on the Parent Company's Operations:

The RBI's order, effective March 05, 2024, placed an embargo on the parent Company's gold loan business. While the Gold Loan Business is a major segment of the standalone Company, its consolidated operations benefit significantly from other businesses operating in the standalone company and its subsidiaries. To mitigate any risks to the parent Company's status as a going concern, the following steps have been taken:

- Capital infusion: Raised * 1,271.83 crore through an equity rights issue in May 2024.
- Funding: Secured ₹ 500.00 crore via Non-Convertible Debentures from long-term investors.
- 3. Cost control: Implemented cost control measures, including the reduction of major discretionary expenditures.

These actions ensure that the parent Company's projected cash flows over the next three years will meet its financial obligations, maintaining robust capital adequacy. Management is confident in resolving all issues raised by the RBI and has prepared the financial statements on a going concern basis.

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2024

Note 50. The Code on Social Security, 2020

a. Social security means the measures of protection afforded to employees, inclusive of unorganized workers, gig workers and platform workers to ensure access to health care and to provide income security, particularly in cases of old age, unemployment, sickness, invalidity, work injury, maternity or loss of a breadwinner by means of rights conferred on them and schemes framed, under the Code on Social Security, 2020 ("Code").

b. The Code subsumes nine central labour legislations.ie., The Employees' Compensation Act, 1923, The Employees' State Insurance Act, 1948, The Employees' Provident Funds and Miscellaneous Provisions Act, 1952, The Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959, The Maternity Benefit Act, 1961, The Payment of Gratuity Act, 1972, The Cine Workers Welfare Fund Act, 1981, The Building and Other Construction Workers Welfare Cess Act, 1996 and the Unorganised Workers' Social Security Act 2008.

c. The objective of the Code is to amend and consolidate the existing labour laws relating to social security with the wider goal of extending social security benefits to all employees and workers irrespective of belonging to the organised or unorganised sector. The Code brings, within itself the self-employed workers, home workers, wage workers, migrant workers, the workers in the unorganised sector, gig workers and platform workers for the purpose of social security schemes, including life insurance and disability insurance, health and maternity benefits, provident fund.

Note 51. Previous year's figures are regrouped, reclassified and rearranged wherever considered necessary to confirm to current year's presentation.

INDEPENDENT AUDITOR'S REPORT

To, The Members of IIFL Finance Limited

Report on the Audit of the Standalone financial statements.

Opinion

We have audited the accompanying standalone financial statements of IIFL Finance Limited (The "Company"), which comprise Balance Sheet as at March 31, 2024, the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of material accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, and its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Material Uncertainty related to Going Concern

We draw attention to Note No 42 in the financial statements, which explains that the Reserve Bank of India ("RBI") vide its directive dated March 4, 2024 and in exercise of its powers under Section 45I(1)(b) of the Reserve Bank of India Act, 1934 has directed the Company to cease and desist, with immediate effect, from sanctioning or disbursing gold loans or assigning / securitizing/ selling any of its gold loans. However, the RBI permitted the company to continue to service its existing gold loan portfolio through usual collection and recovery processes.

The Company has total Loan book of Rs. 17,842 crores and Rs. 14,047 crores as on March 31, 2024 and March 31, 2023 respectively. Out of the above, the Gold Loan stood at Rs. 9,634 crores (54.00%) and Rs. 8,330 crores (59.30%) for each respective financial year.

These events or conditions may cast significant doubt on the Company's ability to continue as a going concern. However, in view of the factors as described in the note no 43 in the financial statements, the management is of the view that the going concern basis of accounting is appropriate.

Our opinion is not modified in respect of this matter.

Page 1 of 15

Emphasis of Matter

We refer to Note No 42 of the accompanying financial statements that explains the directives issued by The Reserve Bank of India ("RBI") dated March 4, 2024. The Note explains the supervisory concerns noted by the RBI in respect of restrictions on loan against gold. These supervisory restrictions are under review by RBI post completion of special audit instituted by the RBI.

Our Opinion is not modified in respect of this Emphasis of Matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matters described in the *Material Uncertainty Related to Going Concern section* of this report, we have determined the matters described below to be the key audit matters to be communicated in our report.

Sr. No.	Key Audit Matter	How our audit addressed the key audit matter
1	Information technology (IT) systems used in financial reporting process.	We obtained an understanding of the Company's IT control environment relevant to the audit.
	The company's operational and financial processes are dependent on IT systems due to large volume of transactions that are processed daily.	We tested the design, implementation and operating effectiveness of the Company's General IT controls over the key IT systems which are critical to financial reporting.
	We therefore identified IT systems and controls over financial reporting as a key audit matter for the Company.	We also tested key automated and manual controls and logic for system generated reports relevant to the audit that would materially impact the financial statements. In addition to above, we have also relied on the work of the internal auditors and system auditors.
2	Impairment of Financial Assets held at amortised cost: Since the loans and advances form a major portion of the Company's assets, and due to the significance of the judgments used in classifying loans and advances into various stages as stipulated in Indian Accounting Standard (IND AS) 109 and the management estimation of the related impairment provisions, this is considered to be a key audit matter.	We evaluated appropriateness of the impairment principles used by management based on the requirements of Ind AS 109 and our understanding of the business. We assessed the design and implementation of key Internal financial controls over loan impairment process used to calculate the impairment charge. We evaluated management's controls over collation of relevant information used for

Page 2 of 15

Sr. No.	Key Audit Matter	How our audit addressed the key audit matter
	The Company's impairment allowance is derived from estimates including the historical default and loss ratios. Management exercises judgement in determining the quantum of loss based on a range of factors. The most significant areas are: - Segmentation of loan book - Determination of exposure at default - Loan staging criteria - Calculation of probability of default / Loss given default - Consideration of probability weighted scenarios and forward looking macro-economic factors The application of ECL model requires several data inputs. This increases the risk of completeness and accuracy of the data that has been used to create assumptions in the model. Refer Note 38A.3 to the Financial Statements.	determining estimates for management overlays. We tested review controls over measurement of impairment allowances and disclosures in financial statements.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report and Management Discussion and Analysis report but does not include the financial statements and our auditor's report thereon. The Directors report and Management Discussion and Analysis report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Directors report and Management Discussion and Analysis report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance as required under SA 720 "The Auditors Responsibilities Relating to Other Information".

Page 3 of 15

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian accounting standards specified under Sec 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether
 due to fraud or error, design and perform audit procedures responsive to those risks, and
 obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
 The risk of not detecting a material misstatement resulting from fraud is higher than for
 one resulting from error, as fraud may involve collusion, forgery, intentional omissions,
 misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to
 design audit procedures that are appropriate in the circumstances. Under section 143(3)(i)
 of the Act, we are also responsible for expressing our opinion on whether the Company
 has adequate internal financial controls system in place and the operating effectiveness of
 such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

Page 4 of 15

- Conclude on the appropriateness of management's use of the going concern basis of
 accounting and, based on the audit evidence obtained, whether a material uncertainty
 exists related to events or conditions that may cast significant doubt on the Company's
 ability to continue as a going concern. If we conclude that a material uncertainty exists,
 we are required to draw attention in our auditor's report to the related disclosures in the
 financial statements or, if such disclosures are inadequate, to modify our opinion. Our
 conclusions are based on the audit evidence obtained up to the date of our auditor's report.
 However, future events or conditions may cause the Company to cease to continue as a
 going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matter

The Financial Statements includes the comparative financial information for the year ended March 31, 2023 were audited by one of the joint auditor and one of the predecessor auditor and has issued unmodified opinion vide their report dated April 26, 2023.

Our opinion is not modified in respect of these other matters.

Report on Other Legal and Regulatory Requirements

- As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by Section 143(3) of the Act, we report that:
 - We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the financial statements.
 - In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

Page 5 of 15

- c) The Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of changes in Equity and the Statement of Cash Flows dealt with by this Report are in agreement with the books of account maintained for the purpose or preparation of the financial statements.
- d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
- e) On the basis of the written representations received from the directors as on March 31, 2024, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2024, from being appointed as a director in terms of Section 164(2) of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".
- g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:
 - In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.
- h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
 - The Company has disclosed the impact of pending litigations on its financial position in its financial statements- Refer Note No 39 of the financial statements.
 - The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts.
 - There has not been any delay in transferring amounts which requires to be transferred to the Investor Education and Protection Fund by the Company.
 - iv. (a) The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person or entity, including foreign entity ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
 - (b) The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entity ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

Page 6 of 15

- (c) In our opinion and based on the audit procedures, we have considered reasonable and appropriate in the circumstances; nothing has come to our notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.
- The dividend declared or paid during the year by the Company is in compliance with section 123 of the Companies Act, 2013.
- vi. Based on our examination which included test checks, the Company has used accounting software for maintaining its books of accounts which has a feature of recording Audit Trail (edit log facility) and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tempered with.

As proviso of Rule 3(1) of the Companies (Accounts) Rules, 2014 is applicable from April 1, 2023, reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 on preservation of audit trail as per statutory requirements for record retention is not applicable for the financial year ended March 31, 2024.

Annexure A referred to paragraph 1 under the heading "Report on Other Legal and Regulatory Requirements" in our report of even date to the members of IIFL Finance Limited on the financial statement for the year ended March 31, 2024.

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief we state that:

- 3(i)(a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment and relevant details of right of use of assets.
 - (B) The Company has maintained proper records showing full particulars of intangible assets.
 - (b) The Company has a program of verification of Property, Plant and Equipment including Right of Use Assets to cover all the items at major locations in a phased manner over a period of three years which, in our opinion, is reasonable having regard to the size of the company and the nature of its assets. Pursuant to such programme, the physical verification of Property, Plant and Equipment including Right of Use Assets was carried out by the management during the current year and on the basis of explanation received no material discrepancies were noticed during the verification.
 - (c) The title deeds of all the immovable properties (other than properties where the company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company.
 - (d) The company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets during the year.
 - (e) There are no proceedings initiated during the year or are pending against the Company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (45 of 1988) and rules made thereunder.
- 3(ii)(a) The company does not have any inventory and accordingly, the requirement to report on clause 3(ii)(a) of the order is not applicable to the Company.
 - (b) The company has been sanctioned working capital limits in excess of five crore rupees, in aggregate from banks / financial institutions on the basis of security of current assets namely financial asset. Quarterly returns / statements filed with such banks / financial institutions are in agreement with the unaudited books of account of the Company.
- 3(iii)(a) The company's principal business is to give loans and accordingly, the provisions stated in paragraph 3(iii)(a) of the order are not applicable to the company.
 - (b) In our Opinion the terms and conditions in relations to the investments made, guarantees provided, security given and / or grant of all loans and advances in the nature of loans and guarantees are prima facie not prejudicial to the interest of the Company.
 - (c) The Company, being a Non-Banking Financial Company, is registered under provisions of Reserve Bank of India Act, 1934 and rules made there under, in pursuance of its compliance with provisions of the said act, particularly, the Income Recognition, Asset Classification and Provisioning norms and generally accepted business practices by the lending institutions, repayments schedules are stipulated basis the nature of loan products. Having regard to the voluminous nature of loan transactions, it is not practicable to furnish entity-wise details of the amounts, due date of repayment or receipt and extent of delay in this report (as suggested in the Guidance Note on CARO 2020, issued by the Institute of Chartered Accountants of India for reporting under this clause), in respect of loans and advances which are not

Page 8 of 15

- repaid / paid when they were due or were repaid / paid with a delay, in the normal course of lending business.
- (d) In respect of loans and advances in the nature of loans, the total amount of cases which are overdue for more than ninety days as at March 31, 2024 is Rs. 121.10 crores with respect to 1,99,819 borrowers. In such instances, in our opinion reasonable steps have been taken by the company for recovery of the overdue amount of principal and interest.
- (e) Since, the Company's principal business is to give loans and Accordingly, the requirement to report on clause 3(iii)(e) of the order is not applicable to the Company.
- (f) The company has not granted any loans or advances in the nature of loans either repayable on demand or without specifying any terms or period of repayment. Accordingly, the requirement to report on clause 3(iii)(f) of the order is not applicable to the Company.
- 3(iv) Loans, Investments, Guarantees and security in respect of which the provisions of sections 185 and 186 of the Companies Act, 2013, are applicable have been complied with by the Company.
- 3(v) The Company has neither accepted any deposits from the public nor accepted any amounts which are deemed to be deposits, within the meaning of section 73 to 76 of the Companies Act, 2013 and Rules framed thereunder, to the extent applicable. Accordingly, the requirement to report on clause 3(iii)(v) of the order is not applicable to the Company.
- 3(vi) The maintenance of cost records has not been specified by Central Government under Section 148(1) of the Companies Act, 2013 for the company. Accordingly, the requirement to report on clause 3(vi) of the order is not applicable to the Company.
- 3(vii)(a) The Company is generally regular in depositing undisputed statutory dues including provident fund, employees state insurance, income tax, goods and services tax, cess and other statutory dues as applicable to the Company with the appropriate authorities. The provisions of sales tax, value added tax, service tax, customs duty, excise duty and cess are not applicable to the Company.
 - There were no undisputed amounts payable in respect of these statutory dues in arrears as at March 31, 2024, for a period of more than six months from the date they became payable.
 - (b) The dues of provident fund, employees state insurance, income tax, goods and services tax, sales tax, duty of customs, duty of excise, value added tax, cess and other material statutory dues applicable to the Company, which have not been deposited on account of any dispute as at March 31, 2024 are as follows.

Annexure B referred to paragraph 2(f) under the heading "Report on Other Legal and Regulatory Requirements" in our report of even date to the members of IIFL Finance Limited on the financial statement for the year ended March 31, 2024.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of IIFL Finance Limited ("the Company") as of March 31, 2024, in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the

Page 14 of 15

Chhajed & Doshi Chartered Accountants

Sharp & Tannan Associates Chartered Accountants

company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, read together with Emphasis of Matter contained in our even dated audit opinion on the standalone financial statements of the Company for the financial year ended March 31, 2024, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Note 1. CORPORATE INFORMATION:

Company overview

IIFL Finance Limited (the "Company") is a middle layer Non-Banking Financial Company not accepting public deposits registered with the Reserve Bank of India ("the RBI") under section 45-IA of the Reserve Bank of India Act, 1934 and primarily engaged in financing and related activities. The Company had received the certificate of registration from RBI on March 06, 2020, enabling the Company to carry on business as a Non-Banking Financial Company. The Company offers a broad suite of financial products such as gold loan, loans to Micro, small & medium enterprise ("MSME"), loan against securities and digital finance loans.

The audited financial statements were subject to review and recommendation of Audit Committee and approval of Board of Directors. On June 15, 2024, Board of Directors of the Company approved and recommended the audited financial statements for consideration and adoption by the shareholders in its Annual General Meeting.

Note 2. BASIS OF PREPARATION AND PRESENTATION OF FINANCIAL STATEMENTS:

The financial statements have been prepared in accordance with the Indian Accounting Standards ("Ind AS") on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period as explained in the accounting policies below and the relevant provisions of The Companies Act, 2013 ("Act").

Accounting policies have been consistently applied except where a newly issued Accounting Standard is initially adopted or a revision to an existing Accounting Standard requires a change in the accounting policy hitherto in use.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/ or disclosure purposes in these financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value but are not fair value, such as value in use in Ind AS 36.

Fair value measurements under Ind AS are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date;
- Level 2 inputs are inputs, other than quoted prices included within level 1,(that are not traded in active market) that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the valuation of assets or liabilities.

(a) Use of estimates and judgments

The preparation of the financial statements in conformity with Indian Accounting Standards ("Ind AS") requires the management to make estimates, judgements and assumptions. These estimates, judgements and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Accounting estimates can change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which these changes are made and, if material, their effects are disclosed in the notes to the financial statements.

The Financial Statements are presented in Indian rupees which is determined to be functional currency of the Company and the currency of primary economic environment in which the Company operates.

(b) Statement of compliance

The standalone financial statements of the Company have been prepared in accordance with the provisions of the Act and Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 issued by Ministry of Corporate Affairs in exercise of the powers conferred by section 133 read with sub-section (1) of section 210A of the Companies Act, 2013 along with the applicable guidelines issued by Reserve Bank of India ("RBI"). In addition, the guidance notes/ announcements issued by the Institute of Chartered Accountants of India ("ICAI") are also applied except where compliance with other statutory promulgations requires a different treatment.

(c) Presentation of financial statements

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Division III to Schedule III to Act applicable for Non-Banking Finance Companies ("NBFC"). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the Financial Statements along with the other notes required to be disclosed under the notified Accounting Standards and regulations issued by the RBI.

Note 3. MATERIAL ACCOUNTING POLICIES

(a) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured and there exists reasonable certainty of its recovery.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract.

i. Interest income and dividend income:

Odnterest income on financial instruments at amortised cost in recognised on a time proportion basis taking into account the amount outstanding.

Interest on financial instruments measured at fair value is included within the fair value movement during the period.

The EIR is the rate that exactly discounts estimated future cash flows of the financial instrument through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial instrument. The future cash flows are estimated taking into account all the contractual terms of the instrument.

The calculation of the EIR includes all fees paid or received between parties to the contract that are incremental and directly attributable to the specific lending arrangement, transaction costs, and all other premiums or discounts. For financial assets at fair value through profit and loss ("FVTPL"), transaction costs are recognised in the Statement of Profit and Loss at initial recognition.

Dividend on equity shares, preference shares and on mutual fund units is recognised as income when the right to receive the dividend is established.

ii. Fees and charges:

Fees and charges include fees other than those that are an integral part of EIR. The fees included in this part of the Company's Statement of Profit and Loss include, among other things, fees charged for servicing a loan.

Cheque bounce charges, late payment charges and foreclosure charges are recognised on a point-intime basis and are recorded when realised.

Fee and commission expenses with regards to services are accounted for as and when the services are delivered.

iii. Income from financial instruments at FVTPL:

Income from financial instruments at FVTPL includes all gains and losses from changes in the fair value of financial assets and financial liabilities at FVTPL.

iv. Assignment transactions:

In accordance with Ind AS 109, in case of assignment transactions with complete transfer of risks and rewards without any retention of residual interest, gain arising on such assignment transactions is recorded upfront in the Statement of Profit and Loss and the corresponding asset is derecognised from the Balance Sheet immediately upon execution of such transaction. Further, the transfer of financial assets qualifies for derecognition in its entirety, the whole of the interest spread at its present value (discounted over the life of the asset) is recognised on the date of derecognition itself as interest only strip receivable (interest strip on assignment) and correspondingly recognised as profit on derecognition of financial asset.

v. Securitisation transactions

DAD

In accordance with Ind AS 109, in case of securitisation transactions, the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds-received.

STANDALONE FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

vi. Other operational revenue

Other operational revenue represents income earned from the activities incidental to the business and is recognised when the right to receive the income is established as per the terms of the contract.

(b) Property, plant and equipment ("PPE")

PPE is recognised when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. PPE is stated at original cost net of tax, if any, less accumulated depreciation. Cost includes professional fees related to the acquisition of PPE and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy.

Depreciation is charged using the straight-line method, based on the useful life of PPE as estimated by the Management, as specified below. Depreciation is charged from the month in which new assets are available for use. No depreciation is charged from the month in which assets are sold. In case of transfer of used PPE from group companies, depreciation is charged over the remaining useful life of the asset. Individual assets / group of similar assets costing up to ₹ 5,000 have been depreciated in full in the year of purchase.

The estimated useful life of assets is as under:

Class of assets	Useful life
Buildings	20 years
Computers	3 years
Office equipment	5 years
Plant and Equipment	5 years
Furniture and fixtures	5 years
Vehicles	5 years

For above class of assets, based on internal assessment and independent technical evaluation carried out by external valuers, the Management believes that the useful lives as given above best represent the period over which Management expects to use these assets.

An item of PPE is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of PPE is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the Statement of Profit and Loss.

Capital work in progress

Projects under which PPE are not yet ready for their intended use are carried at cost, comprising direct cost, related incidental expenses and attributable interest and are disclosed as "capital work-in-progress".

(c) Intangible assets

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax, less accumulated amortisation and cumulative impairment.

STANDALONE FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

Intangible assets i.e. Software are amortised on straight-line basis over the estimated useful life of 3 years.

Amortisation on impaired assets is provided by adjusting the amortisation charge in the remaining periods so as to allocate the assets revised carrying amount over its remaining useful life.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset are recognised in the Statement of Profit and Loss when the asset is derecognised.

Intangible assets under development

Intangible assets not ready for their intended use on the Balance Sheet date are disclosed as "Intangible assets under development".

(d) Investment property

Investment properties are properties held to earn rentals and/ or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost, net of accumulated depreciation and accumulated impairment loss, if any.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in Statement of Profit and Loss in the period in which the Investment property is derecognised.

Freehold land and properties under construction are not depreciated.

(e) Non-current Assets held for Sale

Non-current assets are classified as held for sale if their carrying amount is intended to be recovered principally through a sale (rather than through continuing use) when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset and the sale is highly probable and is expected to qualify for recognition as a completed sale within one year from the date of classification. Non-current assets classified as held for sale are measured at lower of their carrying amount and fair value less costs to sell.

(f) Impairment of assets

As at the end of each accounting year, the Company reviews the carrying amounts of its PPE, intangible assets and investment property assets to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, the PPE, intangible assets and investment property are tested for impairment so as to determine the impairment loss, if any.

Recoverable amount is the higher of fair value less costs of disposal and value in use. If recoverable amount of an asset is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset is reduced to its recoverable amount.

When an impairment loss is subsequently reversed, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, to an extent that it does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

(g) Share-based payment arrangements

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity.

Securities premium includes:

- The difference between the face value of the equity shares and the consideration received in respect of shares issued pursuant to Stock Option Scheme.
- The fair value of the stock options which are treated as expense, if any, in respect of shares allotted pursuant to Stock Options Scheme

(h) Employee benefits

Defined contribution plans

The Company's contribution towards Provident Fund and Family Pension Fund are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made as and when services are rendered by the employees and are accounted for on an accrual basis and recognised in the Statement of Profit and loss.

Defined benefit plans

Short term employee benefits: Employee benefits falling due wholly within twelve months of rendering the service are classified as short term employee benefits and are expensed in the period in which the employee renders the related service. Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service. These benefits include performance incentive and compensated absences

Post employment benefits: The employees' gratuity fund scheme represents defined benefit plan. The present value of the obligation under defined benefit plan is determined based on actuarial valuation using the Projected Unit Credit Method.

The obligation is measured at the present value of the estimated future cash flows using a discount rate based on the market yield on government securities of a maturity period equivalent to the weighted average maturity profile of the defined benefit obligations at the Balance Sheet date.

Re-measurement, comprising actuarial gains and losses, the return on plan assets (excluding amounts included in net interest on the net defined benefit liability or asset) and any change in the effect of asset ceiling (if applicable) is recognised in other comprehensive income and is reflected in retained earnings and the same is not eligible to be reclassified to the Statement of Profit and Loss.

Defined benefit costs comprising current service cost, past service cost and gains or losses on settlements are recognised in the Statement of Profit and Loss as employee benefit expenses. Gains or losses on settlement of any defined benefit plan are recognised when the settlement occurs. Past service cost is recognised as expense at the earlier of the plan amendment or curtailment and when the Company recognises related restructuring costs or termination benefits.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans to recognise the obligation on a net basis.

Long term employee benefits: The obligation recognised in respect of long term benefits being long term compensated absences, is measured at present value of estimated future cash flows expected to be made by the Company and is recognised in a similar manner as in the case of defined benefit plan above.

(i) Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) and the weighted average number of equity shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented.

(j) Taxes on income

Current tax

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Company's financial statements and the corresponding tax bases used in computation of taxable profit and quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date.

Deferred tax is not recognized for:

- Temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss

Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the forence able future; and

- Taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on business plans and the reversal of temporary differences.

Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. For this purpose, the carrying amount of investment property measured at fair value is presumed to be recovered through sale, and the company has not rebutted this presumption.

For transactions and other events recognised in profit or loss, any related tax effects are also recognised in profit or loss. For transactions and other events recognised outside profit or loss (either in other comprehensive income or directly in equity), any related tax effects are also recognised outside profit or loss (either in other comprehensive income or directly in equity, respectively).

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off assets against liabilities, representing current tax and where the deferred tax assets and deferred tax liabilities relates to taxes on income levied by the same governing taxation laws.

Current and deferred tax for the year

Current and deferred tax are recognised in the Statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

(k) Financial instruments

Financial assets and financial liabilities are recognised in the Company's Balance Sheet when the Company becomes a party to the contractual provisions of the instrument.

Recognised financial assets and financial liabilities are initially measured at fair value. Transaction costs and revenues that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs and revenues directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in the Statement of Profit and Loss.

Financial assets

Classification and measurement

The Company classifies its financial assets into the following measurement categories: amortised cost; fair value through other comprehensive income; and fair value through profit or loss.

All recognised financial assets that are within the scope of Ind AS 109 are required to be subsequently measured at amortised cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

F-1

Financial instruments measured at amortised cost

Debt instruments that meet the following criteria are measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely
 payments of principal and interest ("SPPI") on the principal amount outstanding.

For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. The principal amount may change over the life of the financial asset (e.g. if there are repayments of principal). Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The SPPI assessment is made in the currency in which the financial asset is denominated.

Contractual cash flows that are SPPI are consistent with a basic lending arrangement. Contractual terms that introduce exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form.

An assessment of business models for managing financial assets is fundamental to the classification of a financial asset. The Company determines the business models at a level that reflects how financial assets are managed together to achieve a particular business objective. The Company's business model does not depend on management's intentions for an individual instrument, therefore the business model assessment is performed at a higher level of aggregation rather than on an instrument-by-instrument basis.

Debt instruments that are subsequently measured at amortised cost are subject to impairment.

Financial instruments measured at fair value through other comprehensive income ("FVTOCI")

Debt instruments that meet the following criteria are measured at fair value through other comprehensive income (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Interest income is recognised in Statement of profit and loss for FVTOCI debt instruments. Other changes in fair value of FVTOCI financial assets are recognised in other comprehensive income. When the asset is disposed of, the cumulative gain or loss previously accumulated in reserve is transferred to Statement of Profit and Loss.

Financial instruments measured at fair value through Profit and Loss ("FVTPL")

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss (FVTPL), transaction costs that are attributable to the

acquisition of the financial asset. However, trade receivables that do not contain a significant financing component are measured at transaction price.

Instruments that do not meet the amortised cost or FVTOCI criteria are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in the Statement of Profit and Loss. The gain or loss on disposal is recognised in the Statement of Profit and Loss.

Interest income is recognised in the Statement of Profit and Loss for FVTPL debt instruments. Dividend on financial assets at FVTPL is recognised when the Company's right to receive dividend is established.

Investments in equity instruments at FVTOCI

On initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments. This election is not permitted if the equity investment is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to Statement of Profit and Loss on disposal of the investments. Dividends from these investments are recognised in the Statement of Profit and Loss when the Company's right to receive dividends is established.

Reclassifications

If the business model under which the Company holds financial assets changes, the financial assets affected are reclassified. The classification and measurement requirements related to the new category apply prospectively from the first day of the first reporting period following the change in business model that result in reclassifying the Company's financial assets. Changes in contractual cash flows are considered under the accounting policy on modification and derecognition of financial assets described below.

Impairment of financial assets

Company recognizes loss allowances using the Expected Credit Loss ("ECL") model for the financial assets which are not fair valued through profit and loss. ECL is calculated using a model which captures portfolio performance over a period of time. ECL is a probability-weighted estimate of credit losses. A credit loss is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive discounted at the original EIR. Vintage loss curve model is used for ECL computation of retail portfolio which involves assessment of performance of segmented portfolio over a time period. The model tracks month-wise losses during the loan tenor. Vintage loss rate models provide a simple, reasonable model for both one-year and lifetime expected credit loss forecasts. For wholesale portfolio, ECL computation is done for each loan account based on CRISIL default study and International Review Board ("IRB") guidelines. Additionally, forecasts of future macro situations and economic conditions are considered as part of forward economic guidance (FEG) model. Forward looking economic scenarios determined with reference to external forecasts of economic parameters that have demonstrated a linkage to the performance of our portfolios over a period of time have been applied to determine impact of macro-economic factors.

STANDALONE FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

ECL is measured through a loss allowance at an amount equal to:

- · 12-month ECL, i.e. ECL that result from those default events on the financial instrument that are possible within 12 months after the reporting date (referred to as Stage 1); or
- full lifetime ECL, i.e. lifetime ECL that result from all possible default events over the life of the financial instrument (referred to as Stage 2 and Stage 3).

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL.

The Company measures ECL on an individual basis, or on a collective basis for portfolios of loans that share similar economic risk characteristics. The measurement of the loss allowance is based on the present value of the asset's expected cash flows using the asset's original EIR, regardless of whether it is measured on an individual basis or a collective basis.

Key elements of ECL computation are outlined below:

- Probability of default ("PD") is an estimate of the likelihood that customer will default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously de-recognised and is still in the portfolio.
- Loss given default ("LGD") estimates the normalised loss which Company incurs post customer default. It is usually expressed as a percentage of the Exposure at default ("EAD").
- Effective interest rate ("EIR") is the rate that discounts estimated future cash flows through the expected life of financial instrument. For calculating EIR any upfront fees needs to be excluded from the loans and advance amount.

Credit impaired financial assets

A financial asset is 'credit impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Credit-impaired financial assets are referred to as Stage 3 assets. Evidence of credit-impairment includes observable data about the following events:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- · the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider;
- the disappearance of an active market for a security because of financial difficulties; or
- the purchase of a financial asset at a deep discount that reflects the incurred credit losses.

A loan is considered credit-impaired when a concession is granted to the borrower due to a deterioration in the borrower's financial condition, unless there is evidence that as a result of granting the concession the risk of not receiving the contractual cash flows has reduced significantly and there are no other indicators of impairment.

Definition of default

Critical to the determination of ECL is the definition of default. The definition of default is used in measuring the amount of ECL and in the determination of whether the loss allowance is based on 12month or lifetime ECL, as default is a component of the probability of default ("PD") which affects both the measurement of ECLs and the identification of a significant increase in credit risk.

Default considered for computation of ECL computation is as per the applicable prudential regulatory

norms.

Significant increase in credit risk

The Company monitors all financial assets, issued loan commitments and financial guarantee contracts that are subject to the impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. The Company's accounting policy is not to use the practical expedient that financial assets with 'low' credit risk at the reporting date are deemed not to have had a significant increase in credit risk.

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial instrument at the reporting date based on the remaining maturity of the instrument with the risk of a default occurring that was anticipated for the remaining maturity at the current reporting date when the financial instrument was first recognised. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort, based on the Company's expert credit assessment.

Modification and derecognition of financial assets

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/ or timing of the contractual cash flows either immediately or at a future date. In addition, the introduction or adjustment of existing covenants of an existing loan would constitute a modification even if these new or adjusted covenants do not yet affect the cash flows immediately but may affect the cash flows depending on whether the covenant is or is not met (e.g. a change to the increase in the interest rate that arises when covenants are breached).

The Company renegotiates loans to customers in financial difficulty to maximise collection and minimise the risk of default. Loan forbearance is granted in cases where although the borrower made all reasonable efforts to pay under the original contractual terms, there is a high risk of default or default has already happened and the borrower is expected to be able to meet the revised terms. The revised terms in most of the cases include an extension of the maturity of the loan, changes to the timing of the cash flows of the loan (principal and interest repayment), reduction in the amount of cash flows due (principal and interest forgiveness) and amendments to covenants.

When a financial asset is modified, the Company assesses whether this modification results in derecognition. In accordance with the Company's policy, a modification results in derecognition when it gives rise to substantially different terms. To determine if the modified terms are substantially different from the original contractual terms the Company considers the following:

Qualitative factors, such as contractual cash flows after modification are no longer SPPI, change in currency or change of counterparty, the extent of change in interest rates, maturity, covenants. If these do not clearly indicate a substantial modification, then a quantitative assessment is performed to compare the present value of the remaining contractual cash flows under the original terms with the contractual cash flows under the revised terms, both amounts discounted at the original effective interest.

In the case where the financial asset is derecognised, the loss allowance for ECL is remeasured at the date of derecognition to determine the net carrying amount of the asset at that date. The difference between this revised carrying amount and the fair value of the new financial asset with the new sterms will lead to a gain or loss on derecognition. The new financial asset will have a loss allowance

measured based on 12-month ECL except in the rare occasions where the new loan is considered to be originated-credit impaired. This applies only in the case where the fair value of the new loan is recognised at a significant discount to its revised par amount because there remains a high risk of default which has not been reduced by the modification. The Company monitors credit risk of modified financial assets by evaluating qualitative and quantitative information, such as if the borrower is in past due status under the new terms.

When the contractual terms of a financial asset are modified and the modification does not result in derecognition, the Company determines if the financial asset's credit risk has increased significantly since initial recognition.

For financial assets modified, where modification did not result in derecognition, the estimate of PD reflects the Company's ability to collect the modified cash flows taking into account the Company's previous experience of similar forbearance action, as well as various behavioural indicators, including the borrower's payment performance against the modified contractual terms. If the credit risk remains significantly higher than what was expected at initial recognition the loss allowance will continue to be measured at an amount equal to lifetime ECL. The loss allowance on forborne loans will generally only be measured based on 12-month ECL when there is evidence of the borrower's improved repayment behaviour following modification leading to a reversal of the previous significant increase in credit risk.

Where a modification does not lead to derecognition the Company calculates the modification gain/ loss comparing the gross carrying amount before and after the modification (excluding the ECL allowance). Then the Company measures ECL for the modified asset, where the expected cash flows arising from the modified financial asset are included in calculating the expected cash shortfalls from the original asset.

Derecognition of financial assets

The Company derecognises a financial asset only when the contractual rights to the asset's cash flows expire (including expiry arising from a modification with substantially different terms), or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that had been recognised in OCI and accumulated in equity is recognised in the Statement of Profit and Loss, with the exception of equity investment designated as measured at FVTOCI, where the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to the Statement of Profit and Loss.

Write-off

Loans and debt securities are written off when the Company has no reasonable expectations of recovering the financial asset (either in its entirety or a portion of it). This is the case when the company determines that the borrower does not have assets or sources of income that reduce generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event. The Company may apply enforcement activities to financial assets written off.

Recoveries resulting from the Company's enforcement activities will result in impairment gains.

Financial liabilities and equity Instruments

Debt and equity instruments that are issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Compound instruments

The component parts of compound instruments (e.g. convertible notes) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments.

A conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently re-measured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to other component of equity. Where the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained earnings. No gain/ loss is recognised in Statement of Profit and Loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the life of the convertible notes using the effective interest rate method.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method.

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest rate method.

The effective interest rate method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

annan Assoc

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the Statement of Profit and Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet only if there is an enforceable legal right to offset the recognised amounts with an intention to settle on a net basis or to realise the assets and settle the liabilities simultaneously

(I) Investment in subsidiaries

Investment in subsidiaries is recognised at cost and is not adjusted to fair value at the end of each reporting period as allowed by Ind AS 27 'Separate financial statement'. Cost of investment represents amount paid for acquisition of the said investment.

The Company assesses at the end of each reporting period, if there are any indications that the said investment may be impaired. If so, the Company estimates the recoverable value/amount of the investment and provides for impairment, if any i.e. the deficit in the recoverable value over cost.

(m) Cash and bank balances

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value. Cash and bank balances also include fixed deposits, margin money deposits, earmarked balances with banks and other bank balances which have restrictions on repatriation. Short term and liquid investments being subject to more than insignificant risk of change in value, are not included as part of cash and cash equivalents.

(n) Goods and service tax input credit

Goods and service tax input credit is accounted for in the books in the period in which the supply of goods or service received is accounted and when there is no uncertainty in availing/ utilising the credits.

(o) Borrowing costs

Borrowing costs include interest expense calculated using the EIR method.

Foreign currencies

In preparing the financial statements, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year exchange rates are generally recognised in the Statement of Profit and Loss.

Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in the Statement of Profit and Loss in the period in which they arise.

(q) Segment reporting

The Company's primary business segments are reflected based on the principal business carried out, i.e. financing. All other activities of the Company revolve around the main business. The risk and returns of the business of the Company is not associated with geographical segmentation, hence there is no secondary segment reporting based on geographical segment. As such, there are no separate reportable segments.

(r) Provisions, contingent liabilities and contingent assets

Provisions are recognised only when:

- · an entity has a present obligation (legal or constructive) as a result of a past event; and
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

Contingent liability is disclosed in case of:

- a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- a present obligation arising from past events, when no reliable estimate is possible.

Contingent liabilities are disclosed in the Notes. Contingent assets are neither recognised nor disclosed in the financial statements.

(s) Statement of Cash Flows

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method adjusting the net profit for the effects of:

- changes during the period in operating receivables and payables transactions of a non-cash nature:
- non-cash items such as depreciation, provisions, deferred taxes and unrealised foreign currency gains and losses.
- all other items for which the cash effects are investing or financing cash flows.

Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as on the date of balance sheet.

(t) Derivative financial instruments and hedging

The company holds derivative financial instruments to hedge its foreign currency and interest rate risk exposures relating to foreign currency borrowings. Embedded derivatives are separated from the host contract and accounted for separately if certain criteria are met.

The company designates only the change in fair value of the spot element of the forward exchange contract as the hedging instrument in cash flow hedging relationships. The effective portion of changes in fair value of hedging instruments is accumulated in a cash flow hedge reserve as a separate component of equity.

The forward cost are separately accounted for as a cost of hedging and are recognised in OCI and accumulated in a cost of hedging reserve as a separate component within equity.

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in OCI and accumulated under the heading of Cash Flow Hedge Reserve. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss, and is included in the other Income line item.

The amount accumulated in equity is retained in OCI and reclassified to profit or loss in the same period or periods during which the hedged forecast cash flows affect profit or loss or the hedged item affects profit or loss.

If the forecast transaction is no longer expected to occur, the hedge no longer meets the criteria for hedge accounting, the hedging instrument expires or is sold, terminated or exercised, or the designation is revoked, then hedge accounting is discontinued prospectively. If the forecast transaction is no longer expected to occur, then the amount accumulated in equity is reclassified to profit or loss.

(u) Leases

The Company assesses whether a contract contains a lease, at the inception of the contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company considers whether (i) the contract involves the use of identified asset; (ii) the Company has substantially all of the economic benefits from the use of the asset through the period of lease and (iii) the Company has right to direct the use of the asset.

Ac a loccon

The Company ecognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the site on which it is located, less any lease incentives received.

Certain lease arrangements include the option to extend or terminate the lease before the end of the lease term. The right-of-use assets and lease liabilities include these options when it is reasonably certain that the option will be exercised.

The right-of-use asset is subsequently depreciated using the straight-line method from commencement date to the earlier of the end of the useful life of the right-of-use asset or the

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprises of fixed payments, including in-substance fixed payments, amounts expected to be payable under a residual value guarantee and the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option.

The lease liability is subsequently measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if Company changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Lease liability and the right of use asset have been separately presented in the balance sheet and lease payments have been classified as financing activities.

The Company has elected not to ecognize right-of-use assets and lease liabilities for short term leases that have a lease term of less than or equal to 12 months with no purchase option and assets with low value leases. The Company ecognizes the lease payments associated with these leases as an expense in statement of profit and loss over the lease term. The related cash flows are classified as operating activities.

Critical accounting estimate and judgement

Determination of lease term

Ind AS 116 Leases requires lessee to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes assessment on the expected lease term on lease by lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of lease and the importance of the underlying to the Company's operations taking into account the location of the underlying asset and the availability of the suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances.

2. Discount rate

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

The Company as a lessee

As a lessee, the Company leases assets which includes gold loan branches/office premises and vehicles to employees. The Company previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Company. Under Ind AS 116, the Company recognises right-to-use assets and lease liabilities for these leases.

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

6.1 Hedging activities and derivatives

The Company is exposed to certain risks relating to its ongoing business operations. The primary risks managed using derivative instruments are interest rate and currency risk.

6.1.1 Derivatives designated as hedging instruments

The foreign currency and interest rate risk on borrowings have been actively hedged through a combination of forward contracts and interest rate swaps.

The Company is exposed to interest rate risk arising from its foreign currency borrowings. Interest on the borrowing is payable at a floating rate linked to the Benchmark plus Margin. The Company hedges the interest rate risk arising from the debt with a 'receive floating' pay fixed' interest rate swap.

The Company uses Cross Currency Swap Contracts and Forward Exchange Contracts to hedge its risks associated with interest rate and currency risk arising from the foreign currency loans. The Company designates such contracts in a cash flow hedging relationship by applying the hedge accounting principles as per IND AS - 109 (refer note 38.C.2). These contracts are stated at fair value of the spot element of the forward exchange contracts at each reporting date. Changes in the fair value of these contracts that are designated as effective hedge of future cash flows are recognised directly in the "Cash Flow Hedge Reserve" under Other Comprehensive Income and the ineffective portion is recognised immediately in the Statement of Profit and Loss. Hedge accounting is discontinued when the hedged instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting.

There is an economic relationship between the hedged item and the hedging instrument as the terms of the Forward contracts/interest Rate Swaps match that of the foreign currency borrowings (notional amount, interest payment dates, principal repayment date, etc.). The Company has established a hedge ratio of 1:1 for the hedging relationships as the underlying risk of the Forward contracts/interest rate swaps are identical to the hedged risk components.

- Notes:

 1. No trade or other receivables are due from directors or other officer of the company either severally or jointly, with any other person. No trade or other receivables are due from firms including limited liability partnerships in which any director is a partner or a director or a member.

 2. The Company has adopted simplified approach for impairment allowance on trade receivables. Expected credit loss ("ECL") has been recognised on credit impaired.
- 3. Trade receivables are non-interest bearing.

Note 12.1: Management had acquired possession of these properties in satisfaction of the debts and intends to dispose them in due course, subject to conducive market conditions. These properties have been valued taking into consideration various factors such as location, facilities & amenities, quality of construction, percentage of completion of construction (as for some properties the construction is currently on hold), residual life of building, business potential, supply & demand, local nearby enquiry, market feedback of investigation and ready recknor published by government. These valuations has been performed by an independent registered valuer registered under Rule 2 of Companies (Registered Valuers and Valuation) Rules, 2017. The fair values are based on market values, being the estimated amount for which a property could be exchanged in an arm's length transaction. These properties are not depreciated as they have not been ready to use.

Sum of years 11 and above	80.38	64.24

(₹ in crores)

Sensitivity analysis	FY 2023-24	FY 2022-23
Defined Benefit Obligation on Current Assumptions	26,29	20.49
Delta effect of +1% change in rate of discounting	(3.47)	(2.66)
Delta effect of -1% change in rate of discounting	3.81	2.87
Delta effect of +1% change in rate of salary increase	4.12	3.10
Delta effect of -1% change in rate of salary increase	(3.40)	(2.55)
Delta effect of +1% change in rate of employee turnover	0.36	0.37
Delta effect of -1% change in rate of employee turnover	(0.45)	(0.46)

The sensitivity analysis have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same method as applied in calculating the projected benefit obligation as recognised in the balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

Notes

Actuarial gains/losses are recognised in the period of occurrence under Other Comprehensive Income (OCI). All above reported figures of OCI are gross of taxation.

Salary escalation & attrition rate are in line with the industry practice considering promotion and demand and supply of the employees.

Maturity analysis of benefit payments is undiscounted cashflows considering future salary, attrition & death in respective year for members as mentioned above.

Average Expected Future Service represents Estimated Term of Post - Employment Benefit Obligation.

Expected Rate of Return taken same as discount rate as described in Indian Accounting Standard 19.

Expected Contribution in the next year is considered as the sum of net liability/assets at the end of the current year and current service cost for next year, subject to maximum allowable contribution to the Plan Assets over the next year as per the Income Tax Rules.

Value of asset is considered as fair value of plan asset for the period of reporting.

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

Qualitative disclosures

Characteristics of defined benefit plan

The Company has a defined benefit gratuity plan in India (funded). The company's defined benefit gratuity plan is a final salary plan for employees, which requires contributions to be made to a separately administered fund. During the year, there were no plan amendments, curtailments and settlements.

The fund is managed by a trust which is governed by the Board of Trustees. The Board of Trustees are responsible for the administration of the plan assets and for the definition of the investment strategy. The trust is guided by rule 103 of Income Tax Rules, 1962.

Risks associated with defined benefit plan

Gratuity is a defined benefit plan and company is exposed to the following risks:

Interest rate risk: A fall in the discount rate which is linked to the G.Sec. Rate will increase the present value of the liability requiring higher provision. A fall in the discount rate generally increases the mark to market value of the assets depending on the duration of asset.

Salary risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than assumed level will increase the plan's liability.

Investment risk: The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds. If the return on plan asset is below this rate, it will create a plan deficit. Currently, for the plan in India, it has a relatively balanced mix of investments in government securities, and other debt instruments.

Asset liability matching risk: The plan faces the ALM risk as to the matching cash flow. Since the plan is invested in lines of Rule 101 of Income Tax Rules, 1962, this generally reduces ALM risk.

Mortality risk: Since the benefits under the plan is not payable for life time and payable till retirement age only, plan does not have any longevity risk.

Concentration Risk: Plan is having a concentration risk as all the assets are invested with the insurance entity and a default will wipe out all the assets. Although probability of this is very less as insurance companies have to follow regulatory guidelines.

The Company follows 'simplified approach' for recognition of impairment loss allowance on cash and cash equivalents, bank balance, trade receivables, other receivables and other francial assets. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

company personal guarantees, physical gold, undertaking to create security The Company holds collateral and other credit enhancements against certain of its credit exposures. The loans are collateralised against equitable mortgage of property, pledge of shares, hypothecation of assets.

38A.4. Write Off

Contractual amount outstanding on financial assets that were written off [net of recovery) during the reporting period is ₹ 279.33 crore (P.X ₹ 355.15 crore)

38A.5. Modified Financial Instruments

For financial assets, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that the modification does not result in cash flows that are substantially different (thereby not resulting into derecognition), the Company has disclosed carrying amount of modification gain/ loss based on discounted cash flow basis in the below table:

5.66	3.77	Gross carrying amount of modification (gain)/ loss as on date for the modified financial assets
March 31, 2023	March 31, 2024	Particulars

38A.6. Credit Risk Grading of Loans

Credit risk is the risk that the Company will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Company manager and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties. The Company ensures effective monitoring of credit facilities through a portfolio quality review framework. As per this process, an asset is reviewed at a frequency determined based on the risk it carries at the

The credit quality review process aims to allow the Company to assets the potential loss as a result of the risks to which it is exposed and take corrective actions. An independent risk and policy team reviews For effective risk management, the company monitors its portfolio, based on product, underlying security and credit risk characteristics. review date.

adherence to policies and processes on a periodic basis.

Additionally, the Company evaluates risk based on staging as defined in Ind AS, details of which are mentioned below:

Grading Details Stage 1 Stage 2 Stage 3 Total La Period 17,010.01 1,797.90 653.22 18.9	17,010,011	181 32 14,	728.12	13,689,92	March 31, 2024

		e aller	Section 2	Stage 1	PLEASE SHOWING A PROPERTY.
	Annual Control of the	Total F			radit Gradine Details

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet

contractual obligations to be similarly affected by changes in economic, political or other conditions.

In order to avoid excessive concentrations of risk, the Company's policies and procedures include specific guidelines to focus on spreading its lending portfolio across various products/states/customer base with a cap on maximum limit of exposure for an individual/Group. Accordingly, the Company does not have concentration risk

Elquidity risk refers to the risk that the Company may not be able to meet its short-term financial obligations. The Company manages liquidity risk by maintaining sufficient cash and marketable securities and by having access to funding through an adequate amount of credit lines. Further, the Company has well defined Asset Liability Management (ALM) framework with an appropriate organizational structure to regularly monitor and manage maturity profiles of financial assets and financial liabilities including debt financing plans, cash and cash equivalent instruments to ensure liquidity. The Company seeks to maintain flexibility in funding mix by way of sourcing the funds through money markets, debt markets and banks to meet its business and liquidity requirements.

(i) Profit or loss is sensitive to higher flower interest expense from borrowings as a result of changes in interest rates (assuming other variables constant)

increase by 50 basis points March 31, 2024 March 31, 2023 March 31, 2024 March 31, 2023

33.49

21.76

(ii) The Company does not have any outstanding variable rate loans given and hence there is no impact on Profit & loss account due to any such change.

erest rates - decrease by 50 basis points

rates relates primarily to the foreign currency borrowings taken from Financial Institutions, External Commercial Borrowings (ECB) and foreign bond markets. Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign currency rates. The Company's exposure to the risk of changes in foreign exchange

(i) The Company has hedged its foreign currency exposure through Forwards/ Future and / or Cross Currency Interest Rate Swaps in such a manner that it has fixed determinate outflows in its functional currency and as such there would be no significant impact of movement in foreign currency rates on the Company's profitability. However for the unhedged foreign currency exposure(s) there would be an impact on Company's profitability

38E. 1. Financial Instruments Measured At Fair Value - Fair Value Hierarchy

The following table analyses financial instruments measured at fair value at the reporting date, by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position.

38E.2. Valuation Methodologies Of Financial Instruments Measured At Fair Value

- Quoted equity/ debt instruments are measured based on the closing price in the recognised stock exchange and are classified as level 1.
- · Quoted Mutual Funds are measured based on the published net asset value (NAV) by AMFI and are classified as level 1.
- Alternate investment Funds and unquoted Mutual Funds are measured based on the latest NAV provided by the fund house and are classified as level 3.
- Equity instruments in non-listed entities are initially recognised at transaction price and re-measured (to the extent information is available) and valued by external independent valuer and classified as Level 3.
- . Government Securities are valued based on the closing price published by FBIL and are classified as level 2.
- Unquoted debt securities are measured based on average of security level prices received from AMFI appointed/designated agencies viz: CRISIL and ICRA and are classified as level 2.
- · Fair value of loans measured at FVOCI approximates its carrying value and are classified as level 3.
- Fair value of forward foreign exchange contracts is determined by computing present value of payoff between contractual rate (Strike) and forward exchange rates at the
 testing date and are classified as Level 2.
- Security receipts are measured as Level 3 basis rating given by independent Rating agencies to the Asset Reconstruction Companies on this security receipts.

38E.3. Valuation Methodologies Of Financial Instruments Not Measured At Fair Value

Below are the methodologies and assumptions used to determine fair values for the above financial instruments which are not recorded and measured at fair value in the Company's financial statements. These fair values were calculated for disclosure purposes only.

Short-Term Financial Assets And Liabilities

For financial assets and financial liabilities that have a short-term nature, the carrying amounts, which are net of impairment, are a reasonable approximation of their fair value. Such instruments include: cash and bank balances, Trade receivables, other receivables, balances other than cash and cash equivalents, other financial assets and other financial liabilities and trade payables.

Loans, Debts, Borrowings And Subordinated Debts

The fair values of these instruments are estimated by determining the price of the instrument taking into consideration the origination date, maturity date, coupon rate, actual or approximation of frequency of interest payments and incorporating the actual or estimated/proxy yields of identifical or similar instruments through the discounting factor. For instruments, having contractual residual maturity or original maturity less than one year, the carrying value has been considered as fair value. Fair values of Loans and advances are presented net of provisions for impairment.

38F. Transferred Financial Assets That Are Derecognised In Their Entirety

During the year, the Company sold loans measured at FVTOCI through assignment deals. The Company derognised the assets as per IND AS 109 as all the risks and rewards relating to assets were transferred to the buyer.

The table below summarises the carrying amount of the derecognised financial assets measured at FVTOCI and the gain/ (loss) on derecognition, per type of asset.

(* in crores)

FY 2023-24	FY 2022-23
9,029.31	10,063.15
(166,77)	348.06
	9,029.31

38G. Transferred Financial Assets That Are Recognised In Their Entirety:

The Company uses securitisation as a source of finance. Such transaction resulted in the transfer of contractual cash flows from portfolios of financial assets to holders of issued debt securities. Such deals resulted in continued recognition of the securitised assets since the Company retains substantial risks and rewards. The table below outlines the carrying amounts and fair values of all financial assets transferred that are not derecognised in their entirety and associated liabilities.

(Kin crore			
Particulars	As at March 31, 2024	As at March 31, 2023	
Carrying amount of transferred assets measured at amortised cost	135.45	564.26

Fair value of associated liabilities	135.45	564.26	
Net position at Fair value	0.00	(0,00)	

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

Note 39. Capital, Other Commitments And Contingent Liabilities At Balance Sheet Date: Contingent Liabilities:

(₹ in crores)

Particulars	As at March 31, 2024	As at March 31, 2023
Claim against the Company not acknowledged as debt:		
In respect of Income tax demands (refer note (a) and (b))	68.95	72.23
In respect of GST/Service tax demands (including interest accrued and refer note (c))	69.50	65.65
In respect of Profession tax demands (refer note (d))	0.16	
In respect of Stamp Duty (refer note (f))	16.66	0.16
In respect of Legal cases	15.58	0.98
Bank Guarantee:		
In respect of Bank guarantees given (refer note (e))	410.32	584.94

- (a) The Company has filed appeal against the said demands raised by the Income Tax Department.
- (b) Amount paid under protest with respect to income tax demand is ₹76.32 crores (P.Y ₹ 68.89 crores).
- (c) Amount paid under protest with respect to service tax demand ₹ 1.55 crores (P.Y ₹ 1.89 crores) and with respect to GST demand.
- (d) Amount paid under protest with respect to profession tax demand ₹ 0.05 crores (P.Y ₹ 0.05 crores).
- (e) Guarantee has been given on behalf of subsidiary.
- (f) The Company had received demand towards stamp duty on account of the Composite Scheme of Arrangement. The demand had been raised for a sum of ₹ 75.00 crores. As per the scheme document any incidental expenses will be borne by the resulting companies i.e IIFL Finance Limited, IIFL Securities Limited and 360 ONE WAM Limited (Formerly known as IIFL Wealth Management Limited) equally. The Company has appealed against the same and paid ₹ 8.34 crores under protest towards its share of the liability and shown ₹ 16.66 crores as Contingent. The matter is pending before the court.
- (g) Apart from the above, Company is subject to legal proceedings and claims which have arisen in the ordinary course of the business. The Company's management does not reasonably expect that these legal actions, when ultimately concluded and determined, will have material and adverse effect on the Company's financial position.

Commitments Not Provided For:

Particulars	As at March 31, 2024	As at March 31, 2023
Commitments related to loans sanctioned but undrawn	427.84	40.66

Weight Average Value (₹)	35.40	35:40	34.72	201.65

Particulars	ESOP 2008 08-Mar-16
Stock price (₹)	82.02
Volatility	10,00%
Risk-free Rate	7.47%
Exercise price (₹)	82.02
Time to Maturity (Years)	5.00
Dividend yield	3,00%
Weight Average Value (₹)	76.59

Stock Price: The closing market price on NSE one day prior to the date of grant has been considered for the purpose of Option valuation.

Volatility: The daily volatility of the stock prices on BSE, over a period prior to the date of grant, corresponding with the expected life of the Options has been considered to calculate the fair value.

Risk-free rate of return: The risk-free rate being considered for the calculation is the India Government Bond Generic Bid Yield with a maturity about equal to the expected life of the options.

Exercise Price: Price of each specific grant has been considered.

Time to Maturity: Time to Maturity / Expected Life of Options is the period for which the Company expects the Options to be live. The minimum life of a stock option is the minimum period before which the Options cannot be exercised and the maximum life is the period after which the Options cannot be exercised.

Expected dividend yield: Expected dividend yield has been calculated as an average of dividend yields for the three financial years preceding the date of the grant. The dividend yield for the year is derived by dividing the dividend per share by the average price per share of the respective period.

The Company has granted Employee Stock Options under IIFL Finance Employee Stock Option Plan 2020 – Merger Scheme pursuant to aforesaid Composite Scheme of Arrangement.

a) The details of various Employee Stock Option Schemes are as under:

Particulars	As at March 2024 ESOP 2020	As at March 2023 ESOP 2020

Stock Price: The fair value of stock as on Appointed Date, i.e., April 1, 2018 ("the Effective date" or the "Date of Modification") has been used to value the outstanding grants based on Mercahnt Banker's Report.

Volatility: The daily volatility of the stock prices on BSE, based on post demerger traded prices, has been considered to calculate the fair value.

Risk-free rate of return: The risk-free rate being considered for the calculation is the India Government Bond Generic Bid Yield with a maturity about equal to the expected life of the options.

Exercise Price: Price of each specific grant has been considered based on equity swap ratio of the Composite Scheme of Arrangement.

Time to Maturity: Time to Maturity / Expected Life of Options is the period for which the Company expects the Options to be live. The minimum life of a stock option is the minimum period before which the Options cannot be exercised and the maximum life is the period after which the Options cannot be exercised.

Expected dividend yield: Expected dividend yield has been calculated as an average of dividend yields for the three financial years preceding the date of the grant. The dividend yield for the year is derived by dividing the dividend per share by the average price per share of the respective period.

Particulars	As at March 31, 2024	As at March 31, 2023	
Capital to risk-weighted assets ratio (CRAR)	18.61%	20.38%	
Tier I CRAR	12.56N	12.85%	
Tier II CRAR	6.29%	7.53%	
Liquidity Coverage Relio for the quarter ended March 31	192.47%	193.50%	

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

Note 42. Action by the Reserve Bank of India (RBI) against the Company:

Company's financial position as of March 31, 2023, which identified significant concerns in our gold loan portfolio. These include: On March 04, 2024, the Reserve Bank of India (RBI), under Section 45L(1)(b) of the Reserve Bank of India Act, 1934, imposed supervisory restrictions on the Company. This followed an RBI inspection of the

- Disbursals and collections of loan amounts in cash exceeding statutory limits
- Non-compliance with the standard auction process.
- Deviations in assaying and certifying the purity and net weight of gold at both the time of loan sanction and auction upon default.
- Breaches in the Loan-to-Value ratio
- Lack of transparency in charges levied on customer accounts.

Company is permitted to continue servicing its existing gold loan portfolio, including loan collections and recoveries, and to maintain its other business operations as usual Consequently, the RBI directed the Company to cease the sanctioning or disbursing of new gold loans and the assignment, securitization, or sale of existing gold loans with immediate effect. However, the

regulations, in both letter and spirit. procedures as needed. Management is confident that these actions will resolve all issues raised by the RBI. The Company remains committed to adhering to the highest standards of compliance with RBI identified concerns and prevent their recurrence. The Board has thoroughly reviewed these deviations and non-compliances, forming a team to implement corrective actions and revise policies and The RBI has initiated a special audit by an independent professional agency, which commenced on April 23, 2024, and has since concluded. The Company has taken necessary measures to address the

Note 43. Impact of RBI's Action on the Company's Operations:

benefit significantly from other businesses operating in the standalone company and its subsidiaries. To mitigate any risks to the Company's status as a going concern, the following steps have been taken: The RBI's order, effective March 05, 2024, placed an embargo on the Company's gold loan business. While the Gold Loan Business is a major segment of the standalone Company, its consolidated operations

- 1.Capital infusion: Raised ₹ 1,271.83 crore through an equity rights issue in May 2024
- 2.Funding: Secured ₹500.00 crore via Non-Convertible Debentures from long-term investors
- 3.Cost control: Implemented cost control measures, including the reduction of major discretionary expenditures

issues raised by the RBI and has prepared the financial statements on a going concern basis These actions ensure that the Company's projected cash flows over the next three years will meet its financial obligations, maintaining robust capital adequacy. Management is confident in resolving all

^{*}The Company has hedged its foreign currency borrowings through forward contract and interest rate swaps. For Accounting Policy & Risk Management Policy. (Refer note no. 38C)

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

(c) Disclosures on Risk Exposure in Derivatives:

(I) Qualitative disclosure:

a) Structure and organization for management of risk in derivatives trading:

The Board of Directors, the Asset Liability Management Committee (ALCO) and the Risk Management Committee (RMC) are entrusted with the management of risks in derivatives.

The philosophy and framework for the derivative business is laid out in the Board approved policies including limits. It also reviews the market risk exposures of derivatives against the limits. The Risk Management Committee reviews all risks on a consolidated basis and also reviews stress testing.

The monitoring and measurement of risk in derivatives is carried out by the Risk Department. The Risk Department is independent of the Treasury Front office, back office and directly reports into the Chief Risk Officer.

b) Scope and nature of risk measurement, risk reporting and risk monitoring systems:

All significant risks of the derivative portfolio are monitored and measured daily. The Risk Department measures and reports Market Risk metrics like VaR, PV01, Option Greeks like Delta, Gamma, Vega, Theta, Rho, etc. The Credit Risk from the derivatives portfolio is also measured daily.

The Risk Department monitors these exposures against the set limits and also reviews profitability on a daily basis. MIS is sent to relevant teams on a periodic basis. Exception reports are also sent so that emerging risks are reviewed and managed on a timely basis. Stress testing is also performed on the Derivative portfolio.

c) Policies for hedging and / or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges/mitigants:

The Board Approved 'Hedging Policy' details the hedging strategies, hedging processes, accounting treatment, documentation requirements and effectiveness testing for hedges.

Hedges are monitored for effectiveness periodically, in accordance with the Board Approved Policy.

d) Accounting policy for recording hedge and non-hedge transactions; recognition of income, premiums and discounts; valuation of outstanding contracts; provisioning, collateral and credit risk mitigation:

Initial and additional margin paid over and above initial margin for entering into contracts for Equity Index/Stock Futures/Currency Futures/Interest Rate Futures and/or Equity Index/Stock Options/ Currency Options as the case may be ("Derivatives Portfolio") which are released on final settlement/squaring-up of underlying contracts are disclosed under the head "Other Current Assets".

Equity Index/Stock Option/Currency Option Premium Account represents premium paid or received for buying or selling the Options, respectively which is amortised over the period of contract.

On final settlement or squaring up of contracts for Derivatives Portfolio, the realized profit or loss after adjusting the unrealized loss already accounted, if any, is recognized in the Statement of Profit and Loss. On settlement or squaring up of Derivatives Portfolio before expiry, the premium, prevailing in "Equity Index/Stock Option/Currency Option Premium Account" on that date is recognized in the Statement of Profit and Loss.

As at the Balance Sheet date, the Mark to Market/Unrealised Profit/(Loss) on all outstanding Derivative portfolio comprising of Securities and Equity/Currency Derivatives positions is determined on scrip basis with net unrealized losses on scrip basis being recognized in the Other Comprehensive Income.

STANDALONE FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of Standalone Financial Statements as at and for the year ended March 31, 2024

49. Unhedged Foreign Currency Exposure:

The unhedged foreign currency exposure as on March 31, 2024 is 1.87 crore (P.Y Nil).

50. Gold Loan Portfolio

As on March 31, 2024 the gold loan portfolio comprises 34.83 % (P.Y. 34.59 %) of the total assets of the Company.

51. Segment Reporting

The Company's primary business segments are reflected based on the principal business carried out, i.e. financing. All other activities of the Company revolve around the main business. The risk and returns of the business of the Company is not associated with geographical segmentation, hence there is no secondary segment reporting based on geographical segment. As such, there are no separate reportable segments as per the IND AS 108 on 'Segment Reporting'.

52. Shared services

The Company operates from and uses the premises, infrastructure and other facilities and services as provided to it by its Holding Company/group companies, which are termed as 'Shared Services'. Hitherto, such shared services consisting of administrative and other revenue expenses paid for by the Company were identified and recovered/recoverable from them based on reasonable management estimates, which are constantly refined in the light of additional knowledge gained relevant to such estimation. These expenses are recovered on an actual basis and the estimates are used only where actual were difficult to determine.

53. Fraud

During the year under review, the Company had come across frauds totaling to ₹ 6.66 Crores (P.Y. ₹ 4.24 Crores) in respect of its lending operations. Out of the above, frauds amounting to ₹ 0.20 Crores (P.Y. ₹ 0.27 Crores) has already been recovered. Suitable action has been taken by the Company to recover the balance amounts.

54. Disclosure of Loan and advances pursuant to Regulation 53(f) of the Securities and Exchange Board of India (Listing Obligation and Disclosure Requirements) Regulations, 2015:

^{*} Short Term liabilities means total of current liabilities as per note 45.1 & 46.2 to the financial statements as reduced by current portion of Debt Securities, Borrowings (other than debt securities) and Subordinated Liabilities.

(vi) Institutional set-up for Liquidity Risk Management

The Board of Directors of the Company has an overall responsibility and oversight for the management of all the risks, including liquidity risk, to which the Company is exposed to in the course of conducting its business.

The Board approves the governance structure, policies, strategy and the risk limits for the management of liquidity risk.

The Board of Directors approves the constitution of the Risk Management Committee (RMC) for the effective supervision, evaluation, monitoring and review of various aspects and types of risks, including liquidity risk, faced by the Company.

Further, the Board of Directors also approves constitution of Asset Liability Committee (ALCO), which functions as the strategic decision-making body for the asset-liability management of the Company from risk return perspective and within the risk appetite and guard-rails approved by the Board.

The main objective of ALCO is to assist the Board and RMC in effective discharge of the responsibilities of asset-liability management, market risk management, liquidity and interest rate risk management and also to ensure adherence to risk tolerance/limits set up by the Board.

ALCO provides guidance and directions in terms of interest rate, liquidity, funding sources, and investment of surplus funds. ALCO board meetings are held once in a quarter or more frequently as warranted from time to time.

Note: Figures in bracket represent previous year's figures.

Uquidity Coverage Ratio (LCR) aims to ensure that NBFC's maintains an adequate level of unencumbered High Quality Liquidity Asset (HQLAs) that can be converted into cash to meet liquidity needs for a 30

calendar day time horizon under a significantly severe liquidity stress scenario.

The Company has robust liquidity risk management framework in place that ensures sufficient liquidity including a cushion of unencumbered, high quality liquid assets, to withstand a range of stress events, including that real record and secured and secured funding sources. The Company has implemented the LCR framework and has maintained LCR well above the events, including those involving the loss or impairment of both unsecured and secured funding sources. The Company has implemented the LCR framework and has maintained LCR well above the

HQLA comprises of unencumbered Bank Balances, Cash in Hand and Liquid investments after appropriate haircut. The Company maintains sufficient balance of Cash and Bank Balance and liquid investments

the next 30 days towards borrowings and other liabilities which can be easily liquidated in times of stress.

tiguidity Coverage Ratio results drive by inflow of next 30 days receivable on loans and advances

INDEPENDENT AUDITOR'S REPORT

To the Members of IIFL Finance Limited

Report on the Audit of the Consolidated Ind AS Financial Statements

Opinion

We have audited the accompanying consolidated Ind AS financial statements of IIFL Finance Limited (hereinafter referred to as the 'Holding Company") its subsidiary companies (the Holding Company and its subsidiaries together referred to as "the Group"), which comprise the consolidated Balance Sheet as at 31st March 2023, the consolidated Statement of Profit and Loss, consolidated Statement of Changes in Equity (Including Other Comprehensive Income) and the consolidated Cash Flows statement for the year then ended, and notes to the consolidated Financial Statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 in the manner so required and give a true and fair view in conformity with the Accounting Standards prescribed under section 133 of the Act and the accounting principles generally accepted in India, of the consolidated state of affairs of the Group as at 31st March, 2023, of consolidated profit, consolidated total comprehensive income, consolidated changes in equity and its consolidated cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Consolidated Financial Statements for the financial year ended March 31, 2023. These matters were addressed in the context of our audit of the Consolidated Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the 'Auditors' responsibilities for the audit of the Consolidated Financial Statements' section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the Consolidated Financial Statements. The results of audit procedures performed by us and by other auditors of components not audited by us, as reported by them in their audit reports furnished to us by the management, including those procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying Consolidated Financial Statements.

A. Key audit matters of the Holding Company

(Refer Note 37A.3 to the Standalone

Financial Statements.).

1	Information technology (IT) systems used in financial reporting process. The company's operational and financial processes are dependent on IT systems due to large volume of transactions that are processed daily. We therefore identified IT systems and controls over financial reporting as a key audit matter for the Company.	We obtained an understanding of the Company's IT control environment relevant to the audit. We tested the design, implementation and operating effectiveness of the Company's General IT controls over the key IT systems which are critical to financial reporting. We also tested key automated and manual controls and logic for system generated reports relevant to the audit that would materially impact the financial statements. In addition to above, we have also relied on the work of the internal auditors and system.
		auditors.
	amortised cost: Since the loans and advances form a major portion of the Company's assets, and due to the significance of the judgments used in classifying loans and advances into various stages as stipulated in Indian Accounting Standard (IND AS) 109 and the management estimation of the related impairment provisions, this is considered to be a key audit matter.	We evaluated appropriateness of the impairment principles used by management based on the requirements of Ind AS 109 and our understanding of the business. We assessed the design and implementation of key Internal financial controls over loar impairment process used to calculate the impairment charge.
Will state of the	The Company's impairment allowance is derived from estimates including the historical default and loss ratios. Management exercises judgement in determining the quantum of loss based on a range of factors. The most significant areas are: - Segmentation of loan book - Determination of exposure at default - Loan staging criteria - Calculation of probability of default / Loss given default - Consideration of probability weighted scenarios and forward looking macroeconomic factors The application of ECL model requires several data inputs. This increases the risk of completeness and accuracy of the data that has been used to create assumptions in the model.	We evaluated management's controls over collation of relevant information used for determining estimates for management overlays. We tested review controls over measurement of impairment allowances and disclosures in financial statements.

по	Key Audit Matter	Response to Key Audit Matter
no L	Expected Credit Loss – Impairment of carrying value of loans and advances Under Ind AS 109, Expected Credit Loss (ECL) is required to be determined for recognising impairment loss on financial assets which are stated at amortised cost or carried at fair value through other comprehensive income. The Company exercises significant judgement using assumptions over both when and how much to record as impairment for loans and advances and estimation of the amount of the impairment provision for loans and advances. The calculation of impairment loss or ECL is based on significant management estimates and judgements, which are as under: Judgements about credit risk characteristics for collective evaluation of impairment under various stages of ECL Loan staging criteria Calculation of Probability of Default (PD) and Loss Given Default (LGD) Consideration of probability scenarios and forward looking macro-economic factors Considering time value of money for delays in receipt of funds Inputs and Judgements used in determination of management overlay at various asset stages considering the current uncertain economic environment with the range of possible effects unknown to the country arising out of the COVID 19 pandemic, certain restructured cases, interest rate increase resulting in increased EMI which may cause stress, introduction of new product and specific identification of certain construction finance cases etc. ECL requires a large variety of data as an input to the model. This increases the risk of completeness and accuracy of the data that has been used to create assumptions in the model. In view of the criticality of the item to the Standalone Financial Statements, complex nature of assumptions & judgements exercised by the management and loans forming a major portion of the Company's	 Read the Company's Board approved Ind-Al 109 based impairment provisioning policy Understood and assessed the Company' process and controls on measurement and recognition of impairment in the load portfolio Test checked loans in stage 1, 2 and 3 to ascertain that they were allocated to the appropriate stage Test checked PD and LGD calculation workings performed by management including testing data used in assessment and evaluation of whether the results suppor appropriateness of the PDs at portfolio level Test checked the calculations of determining Exposure at Default (EAD) Test checked the manner of determining significant increase in credit risk and the resultant basis for classification of exposure into various stages Performed an assessment of the EC provision levels at each stage including management's assessment on COVID 19 impact to determine if they were reasonable considering the Company's portfolio, ris profile, credit risk management practices and the macroeconomic environment.

being material to the net profit for the year, in our opinion this is considered as a Key Audit Matter. IT Systems and controls 2 We performed audit procedures set out below: The Company financial accounting and We obtained an understanding of the reporting systems are highly dependent on Company's business IT environment and key the effective working of the operating and changes, if any during the audit period that accounting system. may be relevant to the audit. The Company has separate software applications for management of its loan Our audit procedures included verifying, portfolio from origination to servicing and testing and reviewing the design and closure and for the routine accounting. operating effectiveness Transfer of data from / to this software are automated and manual business cycle critical for accurate compilation of financial controls and logic for system generated information. reports relevant to the audit by verifying the Due to extensive volumes, variety and reports/returns and other financial and noncomplexity of transactions the operating financial information generated from the system is functioning, consistently and system on a test check basis accurately, specifically with respect to following: We have tested and reviewed the Interest, Fee income and other charges reconciliations between the loan origination/ collected on Loans ·Bifurcation of the Loan Portfolio based on servicing application and the accounting maturity pattern and Assets Classification software to mitigate the risk of incorrect data based on ageing of default flow to/from separate application software. We have identified 'IT systems and controls' We have also obtained management as key audit matter because of significant use of IT system and the scale and complexity of considered representations wherever the IT architecture. Our audit outcome is necessary. dependent on the effective functioning of such operating and accounting system.

C. Key audit matters of Subsidiary Company – IIFL Samasta Finance Ltd

Key Audit Matter

Sr.no

1	Expected Credit Loss	
de.	As at 31 March 2023, the Company has total gross loan assets of Rs. 7,998.53 crores (2022: Rs. 5,772.72 crores) against which an Expected Credit Loss ('ECL') of Rs. 257.22 crores (2022 Rs. 254.80 crores) has been accrued.	Our audit focused on assessing the appropriateness of management's judgment and estimates used in the impairment analysis through procedures that included, but were not limited to, the following:
Sumus.	The ECL approach as required under Ind AS 109, Financial instruments, involves high degree of complexity and requires significant judgement of the management.	 Evaluated the Company's accounting policies for estimation of expected credit loss on loan assets in accordance with the requirements of Ind AS 109, Financial Instruments.
	The Management is required to determine the ECL that may occur over either a 12-month period or the remaining life of an asset,	 Obtained an understanding of the modelling techniques adopted by the Company including the key inputs and

Response to Key Audit Matter

depending on the categorization of the individual asset. The key areas of judgment include:

- Categorization of loans in Stage 1, 2 and 3 based on identification of:
- a) exposures with Significant Increase in Credit
 Risk (SICR) since their origination and
 b) Individually impaired / default exposures.
- Techniques used to determine Loss Given Default ('LGD') and Probability of Default ('PD') to calculate an ECL are based on past experience.
- The impact of different future macroeconomic conditions in the determination of ECL.

These parameters are derived from the Company's internally developed statistical models, historical data and macro-economic factors and a change in such models or assumptions could have a material impact on the accompanying financial statements.

These factors required the models to be reassessed based on the available information including the additional risk profiling due to the impact of COVID-19 Pandemic, geographical, political and economic risk to measure the ECL.

Management has made a number of interpretations and assumptions when designing and implementing models that are compliant with the standard. The accuracy of data flows and the implementation of related controls is critical for the integrity of the estimated impairment provisions.

Considering the significance of the above matter to the financial statements and the significant auditor attention required to test such complex accounting estimates, we have identified this as a key audit matter for current year audit.

- assumptions. Since modelling assumptions and parameters are based on historical data, we assessed whether historical experience was representative of current circumstances and was relevant in view of the recent impairment losses incurred within the portfolios.
- Assessed the design and implementation, and tested the operating effectiveness of controls over the modelling process including governance over monitoring of the model and approval of key assumptions.
- Evaluated the appropriateness of the Company's process of determination of significant increase in credit risk in accordance with the applicable accounting standard and the basis for classification of exposures into various stages.
- Assessed the key judgments and assumptions relating to the macroeconomic scenarios including the impact of COVID 19 Pandemic, RBI guidelines/notification and the associated probability weights.
- Obtained the approved policy of board of directors to understand the relief measures sanctioned to various class of borrowers in accordance with the directions given by the RBI and tested, on sample basis, the compliance with respect to asset classification and provisioning norms as per such directions.
- Tested management's computation of ECL by performing following procedures:
- Evaluated management's groupings of borrowers on the basis of different product lines and customer segments with different risk characteristics.
- Tested classification of loans into various categories based on their past due status and other loss indicators. On a sample basis, inspected the repayment schedule from the underlying borrower agreements and collection made on due dates;
- Performed test of details of the input information used in ECL computation on a sample basis.
- Tested the arithmetical accuracy of the computation.
- Performed analytical procedures by determining various ratios or percentagebased measures to review overall reasonableness of the estimate determined by the management.

2 Identification and Measurement of NPA:

As per RBI's circular dated November 12, 2021 read with earlier circular dated October 1, 2021 on "Prudential norms on Income Recognition, Asset Classification and Provisioning pertaining to Advances, Automation of NPA and provisioning is required to be implemented by all lending Institutions.

The NPA provisioning as per ECL methodology followed by the Company are not fully automated in Software Applications used by the Company for Loans Management and are performed manually through excel spreadsheets. Further, marking of linked accounts at borrower level as NPAs are done manually. These may have impact on the accuracy and completeness of the provision accrued for NPAs.

Considering the significance, we have identified this as a key audit matter for current year audit.

Performed other substantive procedures, included but not limited to the following:

- Assessed the appropriateness of asset classification and adequacy of related provisioning by performing procedures such as computation of overdue ageing, assessment of borrower level NPA identification and verification of applicable provision rates as per ECL policy of the Company on test check basis;
- Selected samples of performing loan accounts to assess, independently, whether such loan accounts should be classified as NPA;
- Recompilation of the amount of ECL provisioning on the total advances base considering the stage wise categories of advances, LGD (Loss given default) and PD (Probability of default) arrived by the Company.

Information Other than the Financial Statements and Auditor's Report Thereon

The Holding Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Director's report and Management Discussion and Analysis report, but does not include the consolidated financial statements, standalone financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in term of the requirements of the Companies Act, 2013 (the Act) that give a superant supera

estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of the respective company's to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate the respective company or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group are responsible for overseeing the financial reporting process of the respective company.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether
 due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a
 material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also
 responsible for expressing our opinion on whether the Company and its subsidiary companies which are
 companies incorporated in India, have adequate internal financial controls system in place and the
 operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
 - Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

 Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matters

The financial statements of four subsidiary companies have been audited by other auditors. The financial statements of the said subsidiary companies reflect total assets of Rs. 30,850.31 crs as at March 31, 2023, Group's share of total revenue of Rs. 4,371.23 crs, Group's share of total net profit of Rs. 933.45 crs and Group's share of total comprehensive income of Rs. 944.81 crs and net cash inflows Rs. 16.55 crs for the year ended on the date as considered in the consolidated financial statements. The reports of auditors of the said subsidiary companies have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiary companies and our report in terms of sub-section (3) and (11) of section 143 of the Act, in so far as it relates to the aforesaid subsidiary companies is based solely on the reports of the other auditors.

Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

Report on Other Legal and Regulatory Requirements

- As required by Section 143(3) of the Act, based on our audit and on the consideration of report of the
 other auditors on separate financial statements and the other financial information of subsidiaries, as
 noted in the 'other matter' paragraph, to the extent applicable, that:
 - a) We/the other auditors whose report we have relied upon have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
 - b) In our opinion, proper books of account as required by law relating to preparation of the aforesald consolidated financial statements have been kept so far as it appears from our examination of those books and reports of other auditors.

- c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss, the Consolidated statement of changes in equity and the Consolidated Cash Flow Statement dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements.
- d) In our opinion, the aforesaid consolidated financial statements comply with the Accounting Standards specified under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.
- e) On the basis of the written representations received from the directors of the Holding Company as on 31st March, 2023 taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors who are appointed under Section 139 of the Act, of its subsidiary companies, none of the directors of the Group companies incorporated in India is disqualified as on 31st March, 2023 from being appointed as a director in terms of Section 164(2) of the Act.
- f) With respect to the adequacy of internal financial controls over financial reporting of the Group and the operating effectiveness of such controls, refer to our separate report in Annexure.
- g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:
 - In our opinion and to the best of our information and according to the explanations given to us, the managerial remuneration paid by the Holding Company to its directors is in accordance with the provisions of section 197 of the Act. In our opinion and based on the consideration of reports of other statutory auditors of the subsidiaries, the managerial remuneration for the year ended March 31, 2023 has been paid by the subsidiaries incorporated in India to their directors in accordance with the provisions of section 197 read with Schedule V to the Act;
- h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditor's) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements as also the other financial information of the subsidiaries and associates, as noted in the 'Other matter' paragraph:
- The consolidated financial statements disclose the impact of pending litigations on the consolidated financial position of the Group in its consolidated financials statements

 Refer Note 38 to the consolidated financial statements.
- The Group has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts.
- There has been no delay in transferring amounts required to be transferred, to the Investor Education and Protection Fund by the Holding Company and its subsidiary companies incorporated in India.
- MUNBAL + 400 069. PE
- ALL SOUNTH
- (a) The respective managements of the Holding Company and its subsidiaries which are companies incorporated in India whose financial statements have been audited under the Act have represented to us and the other auditors of such subsidiaries respectively that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Holding Company or any of such subsidiaries to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Holding Company or any of

such subsidiaries ('Ultimate Beneficiaries) or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

- (b) The respective managements of the Holding Company and its subsidiaries which are companies incorporated in India whose financial statements have been audited under the Act have represented to us and the other auditors of such subsidiaries respectively that, to the best of its knowledge and belief, no funds have been received by the respective Holding Company or any of such subsidiaries from any person(s) or entity(ies), including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Holding Company or any of such subsidiaries shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
- (c) Based on the audit procedures that have been considered reasonable and appropriate in the circumstances performed by us and that performed by the auditors of the subsidiaries which are companies incorporated in India whose financial statements have been audited under the Act, nothing has come to our or other auditors' notice that has caused us or the other auditors to believe that the representations under sub-clause (a) and (b) contain any material mis-statement.
- v. The Interim dividend declared and paid during the year by the Holding Company and its subsidiaries is in compliance with section 123 of the Companies Act, 2013.
- vi. Proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 for maintaining books of account using accounting software which has a feature of recording audit trail (edit log) facility is applicable to the Company with effect from April 1, 2023 to the Company and its subsidiaries, which are companies incorporated in India, and accordingly, reporting under Rule 11(g) of Companies (Audit and Auditors) Rules, 2014 is not applicable for the financial year ended March 31, 2023.
- 2. With respect to the matters specified in paragraphs 3 (xxi) and 4 of the Companies (Auditor's Report Order, 2020 (the "Order"/ "CARO") issued by Central Government in terms of Section 143(11) of the Act, to be included in the Auditors report, according to the information and explanation given to us, and based on the CARO report issued by us for the Holding Company and by the statutory auditors of the four subsidiary companies which are companies incorporated in India, included in the consolidated financial statement of the Company, to which reporting under CARO is applicable, we report that there are no qualifications or adverse remarks in these CARO reports except for those as stated below:

Annexure to the Independent Auditor's Report

Annexure referred to in our report of even date to the members of IIFL Finance Limited on the consolidated accounts for the year ended 31st March 2023

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of IIFL Finance Limited (hereinafter referred to as "the Holding Company") and its subsidiary companies (hereinafter collectively referred to as "the Group") as of March 31st, 2023, which are Companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company and its subsidiary companies are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Holding Company and its subsidiary companies which are incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors of the subsidiary companies which are incorporated in India, in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Holding Company and its subsidiary companies which are incorporated in India.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion to the best of our information and according to the explanations given to us and based on the consideration of the reports of the other auditors referred to in the Other matters paragraph below , the Holding Company and subsidiary companies incorporated in India have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2023 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our aforesaid reports under section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting in so far as it relates to the subsidiary companies incorporated in India, is based solely on the corresponding report of the auditors of such companies incorporated in India.

Our opinion is not modified in respect of the above matters.

Note 1. CORPORATE INFORMATION

Company overview

IIFL Finance Limited (the "Company/ Parent/ Holding Company") is a Systemically Important Non-Banking Financial Company not accepting public deposits ("NBFC-ND-SI") registered with the Reserve Bank of India ("the RBI") under section 45-IA of the Reserve Bank of India Act, 1934 and primarily engaged in financing and related activities. The Company had received the certificate of registration from RBI on Mar 12, 2020, enabling the Company to carry on business as a Non-Banking Financial Company. The Company offers a broad suite of financial products such as mortgage loan, gold loan, loan against securities loans to small & medium enterprise ("SME"), Micro finance loans ("MFI") and digital finance loans.

Note 2. Basis of consolidation

i. Basis of preparation of financial statements

The consolidated financial statements relate to IIFL Finance Limited (the "Company") and its subsidiary/group companies (together hereinafter referred to as "Group"). The consolidated financial statements of the Group have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time).

Control is achieved when the Company has:

- · Power over the investee,
- Is exposed or has rights to variable returns from its involvement with the investee, and
- Has the ability to use its power over investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Holding Company has less than a majority of the voting or similar rights of an investee, the Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee.
- Rights arising from other contractual arrangements.
- The Holding Company's voting rights and potential voting rights.
- The size of the Company's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The consolidated financial statements of the Group have been prepared in accordance with the Indian Accounting Standards ("Ind AS") as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 and relevant amendment rules issued thereafter ("Ind AS") on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period as explained below, the relevant provisions of the Companies Act, 2013 (the "Act") and the guidelines issued by the Reserve Bank of India ("RBI") and National Housing Bank ("NHB") to the extent applicable.

ii. Principles of consolidation:

 The consolidated financial statements have been prepared in accordance with the Indian Accounting Standards ("Ind AS") on the historical cost basis except for certain financial

instruments that are measured at fair values at the end of each reporting period as explained in the accounting policies below and the relevant provisions of The Companies Act, 2013 ("Act").

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/ or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value but are not fair value, such as value in use in Ind AS 36.

Fair value measurements under Ind AS are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date;
- Level 2 inputs are inputs, other than quoted prices included within level 1, (that are not traded in active market) that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the valuation of assets or liabilities.
- b) The effects of all inter-Group transactions and balances have been eliminated on consolidation. The accounting policies adopted in the preparation of the consolidated financial statements are consistent with those followed in the previous year by the Group.
- c) The consolidated financial statements of the subsidiary companies used in the consolidation are drawn up to the same reporting date as that of the Group, March 31, 2023.
- d) The consolidated financial statements of the Group have been combined on a line-by-line basis by adding together like items of assets, liabilities, income and expenses, after eliminating intra-group balances, intra-group transactions and resulting unrealised profits or losses, unless cost cannot be recovered.
- e) Business combinations: Business combinations are accounted for using the acquisition method. At the acquisition date, identifiable assets acquired and liabilities assumed are measured at fair value. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition date fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. The consideration transferred is measured at fair value at acquisition date and

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2023

includes the fair value of any contingent consideration. However, deferred tax asset or liability and any liability or asset relating to employee benefit arrangements arising from a business combination are measured and recognised in accordance with the requirements of Ind AS 12, Income Taxes and Ind AS 19, Employee Benefits, respectively. Where the consideration transferred exceeds the fair value of the net identifiable assets acquired and liabilities assumed, the excess is recorded as goodwill. Alternatively, in case of a bargain purchase wherein the consideration transferred is lower than the fair value of the net identifiable assets acquired, and liabilities assumed, the difference is recorded as a gain in other comprehensive income and accumulated in equity as capital reserve. The costs of acquisition excluding those relating to issue of equity or debt securities are charged to the Statement of Profit and Loss in the period in which they are incurred Business combinations involving entities under common control are accounted for using the pooling of interests method. The net assets of the transferor entity or business are accounted at their carrying amounts on the date of the acquisition subject to necessary adjustments required to harmonise accounting policies.

f) Goodwill is an asset representing the future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognised. Goodwill is initially measured at cost, being the excess of the consideration transferred over the net identifiable assets acquired and liabilities assumed, measured in accordance with Ind AS 103 – Business Combinations.

Goodwill is considered to have indefinite useful life and hence is not subject to amortisation but tested for impairment at least annually. After initial recognition, goodwill is measured at cost less any accumulated impairment.

Any impairment loss on goodwill is recognised in the Statement of Profit and Loss. An impairment loss recognised on goodwill is not reversed in subsequent periods.

For the purpose of impairment testing, goodwill acquired in a business combination, is from the acquisition date.

The excess of cost to the Group of its investments in the subsidiary companies over its share of equity of the subsidiary companies, at the dates on which the investments in the subsidiary companies are made, is recognised as 'Goodwill' being an asset in the consolidated financial statements. Alternatively, where the share of equity in the subsidiary companies as on the date of investment is in excess of cost of investment of the Group, it is recognised as 'Capital Reserve' and shown under the head 'Reserves and Surplus', in the consolidated financial statements. Goodwill/ Capital reserve has been netted off and disclosed in the consolidated financial statements. Goodwill arising on consolidation is not amortised but tested for impairment.

- Non-controlling Interest in the net assets of the consolidated subsidiaries consist of the amount of equity attributable to the minority shareholders at the date on which investments in the subsidiary companies were made and further movements in their share in the equity, subsequent to the dates of investments. Net profit and loss/ other comprehensive income ("OCI") for the year of the subsidiaries attributable to non-controlling interest is identified and adjusted against the profit after tax/ other comprehensive income ("OCI") of the Group in order to arrive at the income attributable to shareholders of the Group.
- Profit or loss and each component of other comprehensive income ("OCI") are attributed to the equity holders of the Holding Company and to the non-controlling interests, if any.

iii. List of subsidiaries consolidated

The individual Balance Sheet as at March 31, 2023, Statement of Profit and Loss and cash flow statement for the year ended March 31, 2023 of following subsidiaries are included in consolidation:

		Country of	% of holding and voting power either direct or indirectly through subsidiary			
Name of the entity	Relationship	Incorporation	As at March 31, 2023	As at March 31, 2022	As at March 31, 2021	
IIFL Home Finance Limited (HFC)	Direct Subsidiary	India	100%	100%	100%	
IIFL Samasta Microfinance Limited (Formerly Samasta Microfinance Limited) (Samasta)	Direct Subsidiary	India	99.51%	99.41%	99.09%	
IIHFL Sales Limited	Step down Subsidiary	India	100%	100%	100%	
IFL Open Fintech Private Limited	Direct Subsidiary	India	51.02%	NA	NA	

iv. Use of estimates and judgments

The preparation of the consolidated financial statements in conformity with Indian Accounting Standards ("Ind AS") requires the management to make estimates, judgments, and assumptions. These estimates, judgements and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the consolidated financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the consolidated financial statements.

v. Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with the provisions of the Act and the Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 issued by Ministry of Corporate Affairs in exercise of the powers conferred by section 133 read with sub-section (1) of section 210A of the Companies Act, 2013 along with the applicable guidelines issued by Reserve Bank of India ("RBI") and National Housing Bank ("NHB"). In addition, the guidance notes/ announcements issued by the Institute of Chartered Accountants of India ("ICAI") are also applied except where compliance with other statutory promulgations require a different treatment.

vi. Presentation of financial statements

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Division III to Schedule III to the Act applicable for Non-Banking Finance Companies ("NBFC"). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the consolidated Financial Statements along with the other notes required to be disclosed under the notified Accounting Standards and regulations issued by the RBI and NHB.

Note 3. SIGNIFICANT ACCOUNTING POLICIES

(a) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured and there exists reasonable certainty of its recovery.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract.

i. Interest income and dividend income

Interest income on financial instruments at amortised cost is recognised on a time proportion basis taking into account the amount outstanding and the effective interest rate ("EIR") applicable.

Interest income on Direct assignment pool is recognised on time proportion basis net off amount payable to assignees.

Interest on financial instruments measured at fair value is included within the fair value movement during the period.

The EIR is the rate that exactly discounts estimated future cash flows of the financial instrument through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial instrument. The future cash flows are estimated considering all the behavioural pattern and contractual terms of the instrument.

The calculation of the EIR includes all fees paid or received between parties to the contract that are incremental and directly attributable to the specific lending arrangement, transaction costs, and all other premiums or discounts. For financial assets at fair value through profit and loss ("FVTPL"), transaction costs are recognised in the Statement of Profit and Loss at initial recognition.

Penal Interest are recognised as income only when revenue is virtually certain which generally coincides with receipts.

Dividend on equity shares, preference shares and on mutual fund units is recognised as income when the right to receive the dividend is established.

ii. Fees and charges

Fees and charges include fees other than those that are an integral part of EIR. The fees included in this part of the Group's Statement of Profit and Loss include, among other things, fees charged for servicing a loan. Fees and charges are recognised as income only when revenue is virtually certain which generally coincides with receipts.

Cheque bounce charges, late payment charges and foreclosure charges are recognised on a point- intime basis and are recorded when realised.

Fee and commission expenses with regards to services are accounted for as and when the services are delivered.

iii. Income from financial instruments at FVTPL

Income from financial instruments at FVTPL includes all gains and losses from changes in the fair value of financial assets and financial liabilities at FVTPL.

iv. Assignment transactions

In accordance with Ind AS 109, in case of assignment transactions with complete transfer of risks and rewards without any retention of residual interest, gain arising on such assignment transactions is recorded upfront in the Statement of Profit and Loss and the corresponding asset is derecognised from the Balance Sheet immediately upon execution of such transaction. Further, the transfer of financial assets qualifies for derecognition in its entirety, the whole of the interest spread at its present value (discounted over the life of the asset) is recognised on the date of derecognition itself as interest only strip receivable (interest strip on assignment) and correspondingly recognised as profit on derecognition of financial asset.

v. Securitisation transactions

In accordance with Ind AS 109, in case of securitisation transactions, the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and recognises a collateralised borrowing for the proceeds received.

vi. Other operational revenue

Other operational revenue represents income earned from the activities incidental to the business and is recognised when the right to receive the income is established as per the terms of the contract.

(b) Property, plant and equipment ("PPE")

PPE is recognised when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. PPE is stated at original cost net of tax, if any, less accumulated depreciation. Cost includes professional fees related to the acquisition of PPE and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy.

Subsequent expenditure related to an item of PPE is added to its book value only if they

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2023

increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Depreciation is charged using the straight-line method, based on the useful life of PPE as estimated by the Management, as specified below. Depreciation is charged from the month in which new assets are put to use. No depreciation is charged from the month in which assets are sold. In case of transfer of used PPE from group companies, depreciation is charged over the remaining useful life of the asset. Individual assets / group of similar assets costing up to ₹ 5,000 have been depreciated in full in the year of purchase. Leasehold land is depreciated on a straight-line basis over the leasehold period.

The estimated useful life of assets is as under:

Class of assets	Useful life
Buildings	20 years
Computers	3 years
Office equipment	5 years
Plant and Equipment	5 years
Furniture and fixtures	5 years
Vehicles	5 years

For above class of assets, based on internal assessment and independent technical evaluation carried out by external valuers, the Management believes that the useful lives as given above best represent the period over which Management expects to use these assets.

An item of PPE is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of PPE is determined as the difference between the sales proceeds and the carrying amount net of accumulated depreciation of the asset and is recognised in the Statement of Profit and Loss.

Capital work in progress

Projects under which tangible fixed assets are not yet ready for their intended use are carried at cost, comprising direct cost, related incidental expenses and attributable interest and are disclosed as "capital work-in-progress".

(c) Intangible assets

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax, less accumulated amortisation and cumulative impairment.

Intangible assets i.e., Software are amortised on straight-line basis over the estimated useful life of 3 years. Amortisation on impaired assets is provided by adjusting the amortisation charge in the remaining periods so as to allocate the assets revised carrying amount over its remaining useful life.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount net of accumulated depreciation of the asset are recognised in the Statement of Profit and Loss when the asset is

derecognised.

(d) Investment property

Investment properties are properties held to earn rentals and/ or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost, net of accumulated depreciation and accumulated impairment loss, if any.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount net of accumulated depreciation of the asset) is included in Statement of Profit and Loss in the period in which the Investment property is derecognised.

Freehold land and properties under construction are not depreciated.

(e) Non-current Assets held for Sale

Non-current assets are classified as held for sale if their carrying amount is intended to be recovered principally through a sale (rather than through continuing use) when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset and the sale is highly probable and is expected to qualify for recognition as a completed sale within one year from the date of classification.

(f) Impairment of assets

As at the end of each accounting year, the Group reviews the carrying amounts of its PPE, intangible assets and investment property assets to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, the PPE, intangible assets and investment property are tested for impairment so as to determine the impairment loss, if any.

Recoverable amount is the higher of fair value less costs of disposal and value in use. If recoverable amount of an asset is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset is reduced to its recoverable amount.

When an impairment loss is subsequently reverse, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, to the extent that it does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

(g) Share-based payment arrangements

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments

that will eventually vest, with a corresponding increase in equity.

Securities premium includes:

- The difference between the face value of the equity shares and the consideration received in respect of shares issued pursuant to Stock Option Scheme.
- The fair value of the stock options which are treated as expense, if any, in respect of shares allotted pursuant to Stock Options Scheme

(h) Employee benefits

Defined contribution plans

The Group's contribution towards Provident Fund and Family Pension Fund are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made as and when services are rendered by the employees and are accounted for on an accrual basis and recognised in the Statement of Profit and loss.

Defined benefit plans

Short term employee benefits: Employee benefits falling due wholly within twelve months of rendering the service are classified as short-term employee benefits and are expensed in the period in which the employee renders the related service. Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service. These benefits include performance incentive and compensated absences.

Post employment benefits: The employees' gratuity fund scheme represents defined benefit plan. The present value of the obligation under defined benefit plan is determined based on actuarial valuation using the Projected Unit Credit Method.

The obligation is measured at the present value of the estimated future cash flows using a discount rate based on the market yield on government securities of a maturity period equivalent to the weighted average maturity profile of the defined benefit obligations at the Balance Sheet date.

Re-measurement, comprising actuarial gains and losses, the return on plan assets (excluding amounts included in net interest on the net defined benefit liability or asset) and any change in the effect of asset ceiling (if applicable) is recognised in other comprehensive income and is reflected in retained earnings and the same is not eligible to be reclassified to the Statement of Profit and Loss.

Defined benefit costs comprising current service cost, past service cost and gains or losses on settlements are recognised in the Statement of Profit and Loss as employee benefit expenses. Gains or losses on settlement of any defined benefit plan are recognised when the settlement occurs. Past service cost is recognised as expense at the earlier of the plan amendment or curtailment and when the Group recognises related restructuring costs or termination benefits.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans to recognise the obligation on a net basis.

Long term employee benefits: The obligation recognised in respect of long-term benefits such as long term compensated absences, is measured at present value of estimated future cash flows expected to be made by the Group and is recognised in a similar manner as in the case of defined benefit plan above.

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2023

(i) Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) and the weighted average number of equity shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e., average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented.

(j) Taxes on income

Current tax

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Group's financial statements and the corresponding tax bases used in computation of taxable profit and quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date.

Deferred tax is not recognized for:

- Temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss
- Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- Taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on business plans and the reversal of temporary differences.

Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. For this purpose, the carrying amount of investment property measured at fair value is presumed to be recovered through sale, and the company has not rebutted this

presumption.

For transactions and other events recognised in profit or loss, any related tax effects are also recognised in profit or loss. For transactions and other events recognised outside profit or loss (either in other comprehensive income or directly in equity), any related tax effects are also recognised outside profit or loss (either in other comprehensive income or directly in equity, respectively).

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off assets against liabilities, representing current tax and where the deferred tax assets and deferred tax liabilities relates to taxes on income levied by the same governing taxation laws.

Current and deferred tax for the year

Current and deferred tax are recognised in the Statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

(k) Financial instruments

Financial assets and financial liabilities are recognised in the Group's Balance Sheet when the Group becomes a party to the contractual provisions of the instrument.

Recognised financial assets and financial liabilities are initially measured at fair value. Transaction costs and revenues that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs and revenues directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in the Statement of Profit and Loss.

Financial assets

Classification and measurement

The Group classifies its financial assets into the following measurement categories: amortised cost; fair value through other comprehensive income; and fair value through profit or loss.

All recognised financial assets that are within the scope of Ind AS 109 are required to be subsequently measured at amortised cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

Financial instruments measured at amortised cost

Debt instruments that meet the following criteria are measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely
 payments of principal and interest ("SPPI") on the principal amount outstanding.

For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. The principal amount may change over the life of the financial asset (e.g., if there are repayments of principal). Interest consists of consideration for the time value of money, for the credit risk

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2023

associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The SPPI assessment is made in the currency in which the financial asset is denominated.

Contractual cash flows that are SPPI are consistent with a basic lending arrangement. Contractual terms that introduce exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form.

An assessment of business models for managing financial assets is fundamental to the classification of a financial asset. The Group determines the business models at a level that reflects how financial assets are managed together to achieve a particular business objective. The Group's business model does not depend on management's intentions for an individual instrument, therefore the business model assessment is performed at a higher level of aggregation rather than on an instrument-by-instrument basis.

Debt instruments that are subsequently measured at amortised cost are subject to impairment.

Financial instruments measured at fair value through other comprehensive income ("FVTOCI")

Debt instruments that meet the following criteria are measured at fair value through other comprehensive income (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Interest income is recognised in Statement of profit and loss for FVTOCI debt instruments. Other changes in fair value of FVTOCI financial assets are recognised in other comprehensive income. When the asset is disposed of, the cumulative gain or loss previously accumulated in reserve is transferred to Statement of Profit and Loss.

Financial instruments measured at fair value through Profit and Loss ("FVTPL")

All financial assets are recognized initially at fair value plus transaction cost attributable to the acquisition of the financial asset. However, trade receivables that do not contain a significant financing component are measured at transaction price.

Instruments that do not meet the amortised cost or FVTOCI criteria are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in the Statement of Profit and Loss. The gain or loss on disposal is recognised in the Statement of Profit and Loss.

Interest income is recognised in the Statement of Profit and Loss for FVTPL debt instruments.

Dividend on financial assets at FVTPL is recognised when the Group's right to receive dividend is established.

Investments in equity instruments at FVTOCI

On initial recognition, the Group makes an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments. This election is not permitted if the equity investment is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to Statement of Profit and Loss on disposal of the investments. Dividends from these investments are recognised in the Statement of Profit and Loss when the Group's right to receive dividends is established.

Reclassifications

If the business model under which the Group holds financial assets changes, the financial assets affected are reclassified. The classification and measurement requirements related to the new category apply prospectively from the first day of the first reporting period following the change in business model that result in reclassifying the Group's financial assets. Changes in contractual cash flows are considered under the accounting policy on modification and derecognition of financial assets described below.

Impairment of financial assets

Group recognizes loss allowances using the Expected Credit Loss ("ECL") model for the financial assets which are not fair valued through profit and loss. ECL is calculated using a model which captures portfolio performance over a period of time. ECL is a probability-weighted estimate of credit losses. A credit loss is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive discounted at the original EIR. Vintage loss curve model is used for ECL computation of retail portfolio which involves assessment of performance of segmented portfolio over a time period. The model tracks monthwise losses during the loan tenor. Vintage loss rate models provide a simple, reasonable model for both one-year and lifetime expected credit loss forecasts. For wholesale portfolio, ECL computation is done for each loan account based on CRISIL default study and International Review Board ("IRB") guidelines.

ECL is measured through a loss allowance at an amount equal to:

- 12-month ECL, i.e., ECL that result from those default events on the financial instrument that are
 possible within 12 months after the reporting date (referred to as Stage 1); or
- full lifetime ECL, i.e., lifetime ECL that result from all possible default events over the life of the financial instrument (referred to as Stage 2 and Stage 3).

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL.

The Group measures ECL on an individual basis, or on a collective basis for portfolios of loans that share similar economic risk characteristics. The measurement of the loss allowance is based on the present value of the asset's expected cash flows using the asset's original EIR, regardless of whether it is measured on an individual basis or a collective basis.

Key elements of ECL computation are outlined below:

Probability of default ("PD") is an estimate of the likelihood that customer will default over a
given time horizon. A default may only happen at a certain time over the assessed period, if the
facility has not been previously de-recognised and is still in the portfolio.

- Loss given default ("LGD") estimates the normalised loss which Group incurs post customer default. It is usually expressed as a percentage of the Exposure at default ("EAD").
- Effective interest rate ("EIR") is the rate that discounts estimated future cash flows through the
 expected life of financial instrument. For calculating EIR any upfront fees need to be excluded
 from the loans and advance amount.

Credit impaired financial assets

A financial asset is 'credit impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Credit-impaired financial assets are referred to as Stage 3 assets. Evidence of credit-impairment includes observable data about the following events:

- significant financial difficulty of the borrower or issuer,
- a breach of contract such as a default or past due event,
- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider,
- the disappearance of an active market for a security because of financial difficulties; or
- the purchase of a financial asset at a deep discount that reflects the incurred credit losses.

A loan is considered credit-impaired when a concession is granted to the borrower due to a deterioration in the borrower's financial condition, unless there is evidence that as a result of granting the concession the risk of not receiving the contractual cash flows has reduced significantly and there are no other indicators of impairment.

Definition of default

Critical to the determination of ECL is the definition of default. The definition of default is used in measuring the amount of ECL and in the determination of whether the loss allowance is based on 12-month or lifetime ECL, as default is a component of the probability of default ("PD") which affects both the measurement of ECLs and the identification of a significant increase in credit risk.

Default considered for computation of ECL computation is as per the applicable prudential regulatory norms.

Significant increase in credit risk

The Group monitors all financial assets, issued loan commitments and financial guarantee contracts that are subject to the impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. The Group's accounting policy is not to use the practical expedient that financial assets with 'low' credit risk at the reporting date are deemed not to have had a significant increase in credit risk.

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date based on the remaining maturity of the instrument with the risk of a default occurring that was anticipated for the remaining maturity at the current reporting date when the financial instrument was first recognised. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort, based on the Group's expert credit assessment.

Modification and derecognition of financial assets

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/ or timing of the contractual cash flows either immediately or at a future date. In addition, the introduction or adjustment of existing covenants of an existing loan would constitute a modification even if these new or adjusted covenants do not yet affect the cash flows immediately but may affect the cash flows depending on whether the covenant is or is not met (e.g., a change to the increase in the interest rate that arises when covenants are breached).

The Group renegotiates loans to customers in financial difficulty to maximise collection and minimise the risk of default. Loan forbearance is granted in cases where although the borrower made all reasonable efforts to pay under the original contractual terms, there is a high risk of default or default has already happened and the borrower is expected to be able to meet the revised terms. The revised terms in most of the cases include an extension of the maturity of the loan, changes to the timing of the cash flows of the loan (principal and interest repayment), reduction in the amount of cash flows due (principal and interest forgiveness) and amendments to covenants.

When a financial asset is modified, the Group considers the following:

Qualitative factors, such as contractual cash flows after modification are no longer SPPI, change in currency or change of counterparty, the extent of change in interest rates, maturity, covenants. If these do not clearly indicate a substantial modification, then a quantitative assessment is performed to compare the present value of the remaining contractual cash flows under the original terms with the contractual cash flows under the revised terms, both amounts discounted at the original effective interest.

In the case where the financial asset is derecognised, the loss allowance for ECL is remeasured at the date of derecognition to determine the net carrying amount of the asset at that date. The difference between this revised carrying amount and the fair value of the new financial asset with the new terms will lead to a gain or loss on derecognition. The new financial asset will have a loss allowance measured based on 12-month ECL except in the rare occasions where the new loan is considered to be originated-credit impaired. This applies only in the case where the fair value of the new loan is recognised at a significant discount to its revised par amount because there remains a high risk of default which has not been reduced by the modification. The Group monitors credit risk of modified financial assets by evaluating qualitative and quantitative information, such as if the borrower is in past due status under the new terms.

When the contractual terms of a financial asset are modified and the modification does not result in derecognition, the Group determines if the financial asset's credit risk has increased significantly since initial recognition.

For financial assets modified, where modification did not result in derecognition, the estimate of PD reflects the Group's ability to collect the modified cash flows taking into account the Group's previous experience of similar forbearance action, as well as various behavioural indicators, including the borrower's payment performance against the modified contractual terms. If the credit risk remains significantly higher than what was expected at initial recognition the loss allowance will continue to be measured at an amount equal to lifetime ECL. The loss allowance on forborne loans will generally only be measured based on 12-month ECL when there is evidence of the borrower's improved repayment behaviour following modification leading to a reversal of the previous

significant increase in credit risk.

Where a modification does not lead to derecognition the Group calculates the modification gain/ loss comparing the gross carrying amount before and after the modification (excluding the ECL allowance). Then the Group measures ECL for the modified asset, where the expected cash flows arising from the modified financial asset are included in calculating the expected cash shortfalls from the original asset.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the asset's cash flows expire (including expiry arising from a modification with substantially different terms), or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that had been recognised in OCI and accumulated in equity is recognised in the Statement of Profit and Loss, with the exception of equity investment designated as measured at FVTOCI, where the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to the Statement of Profit and Loss.

Write-off

Loans and debt securities are written off when the Group has no reasonable expectations of recovering the financial asset (either in its entirety or a portion of it). This is the case when the Group determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event. The Group may apply enforcement activities to financial assets written off. Recoveries resulting from the Group's enforcement activities will result in impairment gains.

Financial liabilities and equity Instruments

Debt and equity instruments that are issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement. Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Compound instruments

The component parts of compound instruments (e.g., convertible notes) issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial

asset for a fixed number of the Group's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments.

A conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently re-measured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to other component of equity. Where the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained earnings. No gain/ loss is recognised in Statement of Profit and Loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the life of the convertible notes using the effective interest rate method.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method.

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest rate method.

The effective interest rate method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the Statement of Profit and Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet only if there is an enforceable legal right to offset the recognised amounts with an intention to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

(I) Cash and bank balances

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to

insignificant risk of changes in value. Cash and bank balances also include fixed deposits, margin money deposits, earmarked balances with banks and other bank balances which have restrictions on repatriation. Short term and liquid investments being subject to more than insignificant risk of change in value, are not included as part of cash and cash equivalents.

(m) Goods and service tax input credit

Goods and service tax input credit is accounted for in the books in the period in which the supply of goods or service received is accounted and when there is no uncertainty in availing/ utilising the credits.

(n) Borrowing costs

Borrowing costs include interest expense calculated using the EIR method.

(o) Foreign currencies

In preparing the consolidated financial statements of, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in the Statement of Profit and Loss.

Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in the Statement of Profit and Loss in the period in which they arise.

(p) Segment reporting

The Group's primary business segments are reflected based on the principal business carried out i.e., financing. All other activities of the Group revolve around the main business. The risk and returns of the business of the Group is not associated with geographical segmentation, hence there is no secondary segment reporting based on geographical segment. As such, there are no separate reportable segments.

(q) Provisions, contingent liabilities and contingent assets

Provisions are recognised only when:

- an entity has a present obligation (legal or constructive) as a result of a past event; and
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

Notes forming part of the Consolidated Financial Statements as at and for the year ended March 31, 2023

Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

Contingent liability is disclosed in case of:

- a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- a present obligation arising from past events when no reliable estimate is possible.

Contingent liabilities are disclosed in the Notes. Contingent assets are neither recognised nor disclosed in the consolidated financial statements.

(r) Commitments

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- Estimated amount of contracts remaining to be executed on capital account and not provided for,
- b) Funding related commitment to associate and joint venture companies; and
- c) Other non-cancellable commitments, if any.

(s) Statement of cash flows

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method adjusting the net profit for the effects of:

- changes during the period in operating receivables and payables transactions of a non-cash nature,
- non-cash items such as depreciation, provisions, deferred taxes and unrealised foreign currency gains and losses.
- all other items for which the cash effects are investing or financing cash flows.

Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as on the date of balance sheet.

(t) Exceptional Items

When items of income and expense within profit or loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such items is disclosed separately as Exceptional items.

(u) Derivative financial instruments and hedging

The Group enters into derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate swaps and cross currency swaps.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in the Statement of Profit and Loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the

recognition in the Statement of Profit and Loss depends on the nature of the hedging relationship and the nature of the hedged item.

Hedge accounting

The Group designates certain hedging instruments, which include derivatives in respect of foreign currency risk, as cash flow hedge.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.

Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedge reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss and is included in the 'Other income' line item.

Amounts previously recognised in other comprehensive income and accumulated in equity relating to (effective portion as described above) are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, such gains and losses are transferred from equity (but not as a reclassification adjustment) and included in the initial measurement of the cost of the non-financial asset or non-financial liability. Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

(v) Leases

The Group assesses whether a contract contains a lease, at the inception of the contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group considers whether (i) the contract involves the use of identified asset; (ii) the Group has substantially all of the economic benefits from the use of the asset through the period of lease and (iii) the Group has right to direct the use of the asset.

As a lessee

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the site on which it is located, less any lease incentives received.

Certain lease arrangements include the option to extend or terminate the lease before the end of the lease term. The right-of-use assets and lease liabilities include these options when it is reasonably

certain that the option will be exercised.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprises of fixed payments, including in-substance fixed payments, amounts expected to be payable under a residual value guarantee and the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option.

The lease liability is subsequently measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Lease liability and the right of use asset have been separately presented in the balance sheet and lease payments have been classified as financing activities.

The Group has elected not to recognise right-of-use assets and lease liabilities for short term leases that have a lease term of less than or equal to 12 months with no purchase option and assets with low value leases. The Group recognises the lease payments associated with these leases as an expense in statement of profit and loss over the lease term. The related cash flows are classified as operating activities.

As a lessor

Leases for which the Group is a lessor is classified as finance or operating leases. When the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

When the Group is an intermediate lessor, it accounts for its interests in the head lease and the sublease separately. The sublease is classified as a finance or operating lease by reference to the right of use asset arising from the head lease.

Critical accounting estimate and judgement

Determination of lease term

Ind AS 116 Leases requires lessee to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Group makes assessment on the expected lease term on lease by lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the

contract will be exercised. In evaluating the lease term, the Group considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of lease and the importance of the underlying to the Group's operations taking into account the location of the underlying asset and the availability of the suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances.

2. Discount rate

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

The Group as a lessee

As a lessee, the Group leases assets which includes gold loan branches/office premises and vehicles to employees. The Group previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Group. Under Ind AS 116, the Group recognises right-of-use assets and lease liabilities for these leases.

(w) Recent Accounting Pronouncements

On March 31, 2023, Ministry of Corporate Affairs ("MCA") has amended the Companies (Indian Accounting Standards) Amendment Rules, 2023, as below:

IND AS 1 - Presentation of Financial Statements:

This amendment requires the entities to disclose their material accounting policies rather than their significant accounting policies. The effective date for adoption of this amendment is annual period beginning on or after April 1, 2023. The company has evaluated the amendment the impact of the amendment is insignificant in the standalone financial statements.

IND AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors:

This amendment has introduced a definition of 'accounting estimates' and included amendments to Ind AS 8 to help entities distinguish changes in accounting policies from changes in accounting estimates. The effective date for adoption of this amendment is annual period beginning on or after April 1,2023. The company has evaluated the amendment and the impact of the amendment is insignificant in the standalone financial statements there is no impact on its standalone financial statements.

IND AS 12 - Income Taxes:

This amendment has narrowed the scope of initial recognition exemption so that it does not apply to transactions that give rise to equal and offsetting temporary differences. The effective date for adoption of this amendment is annual period beginning on or after April 1,2023. The company has evaluated the amendment and there is no impact on its standalone financial statements.

Notes forming part of Consolidated Financial Statements as at and for the year ended March 31, 2023

6.1 Hedging activities and derivatives

The Group is exposed to certain risks relating to its ongoing business operations. The primary risks managed using derivative instruments are interest rate and currency risk.

6.1.1 Derivatives designated as hedging instruments

The foreign currency and interest rate risk on borrowings have been actively hedged through a combination of forward contracts and cross currency interest rate swaps.

The Group is exposed to interest rate risk arising from its foreign currency borrowings. Interest on the borrowing is payable at a floating rate linked to the Benchmark Plus Margin. The Group economically hedged the interest rate risk arising from the debt with a 'receive floating pay fixed' cross currency interest rate swap.

The Group uses Cross Currency Interest Rate Swaps (IRS) Contracts (Floating to Fixed) and Forward Exchange Contracts to hedge its risks associated with interest rate and currency fluctuations relating interest rate and currency risk arising from foreign currency loans / external commercial borrowings. The Group designates such contracts in a cash flow hedging relationship by applying the hedge accounting principles as per IND AS standards. These contracts are stated at fair value of the Spot element of the forward exchange contracts at each reporting date. Changes in the fair value of these contracts that are designated and effective as hedges of future cash flows are recognised directly in "Cash Flow Hedge Reserve" under Other Equity and the ineffective portion is recognised immediately in the Statement of Profit and Loss. Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting.

There is an economic relationship between the hedged item and the hedging instrument as the terms of the Forward contracts/Cross Currency Interest Rate Swaps match that of the foreign currency borrowings (notional amount, interest payment dates, principal repayment date, etc.). The Group has established a hedge ratio of 1:1 for the hedging relationships as the underlying risk of the Forward contracts/Cross currency interest rate swaps are identical to the hedged risk components.

12.1: Management has acquired possession of these properties in satisfaction of the debts and intends to dispose them in due course, subject to conducive market conditions. These properties have been valued taking into consideration various factors such as location, facilities & amenities, quality of construction, percentage of completion of construction (as for some properties the construction is currently on hold), residual life of building, business potential, supply & demand, local nearby enquiry, market feedback of investigation and ready recknor published by government. These valuations has been performed by an independent registered valuer registered under rule 2 of Companies (Registered Valuers and Valuation) Rules, 2017. The fair values are based on market values, being the estimated amount for which a property could be exchanged in an arm's length transaction. These properties are not depreciated as they have not been put to use.

Note 18.1 Disclosure under the Micro, Small and Medium Enterprises Development Act, 2006

The following disclosure is made as per the requirement under the Micro, Small and Medium Enterprises Development Act, 2016 ("MSMED Act") on the basis of confirmations sought from suppliers on registration with the specified authorities under MSMED:

Particulars	2022-2023	2021-2022
(a) Principal amount remaining unpaid to any supplier at the year end	3.02	
(b) Interest due thereon remaining unpoid to any supplier at the year end	0.0	
(c) Amount of interest paid and payments made to the supplier Reyand the appointed day during the year	0.00	
(d) Amount of interest due and payable for the period of detay in making payment (which have been paid but beyond the appointed day during the year) but without adding the interest specified under the Act		
e) Amount of interest accrued and remaining unpaid at the year end	- 74	
(f) Amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues above are actually paid to the small enterprise, for the purpose of disallowance of a deductible expenditure under section 23 of the Act	14	-

The aforementioned is based on the responses received by the Group to its inquiries with suppliers with regard to applicability under the said Act. This has been relied upon by the auditors.

No interest has been paid/is payable by the Group during the year to the suppliers registered under this Act.

Maturity Analysis of the Benefit Payments: From the Fund	FY 2022-23	FY 2021-22
Projected Benefits Payable in Future Years From the Date of Reporting		
1st Following Year	3.92	0.69
2nd Following Year	1.31	0.93
3rd Following Year	1.39	1.07
4th Following Year	1.51	1.13
5th Following Year	1.86	1.21
Sum of Years 6 To 10	9.50	7,41
Sum of Years 11 and above	118.37	100.48

Sensitivity Analysis	FY 2022-23	FY 2021-22
Projected Senefit Obligation on Current Assumptions	40.69	32.77
Delta Effect of +1% Change in Rate of Discounting	(5.02)	(4.44)
Delta Effect of -1% Change in Rate of Discounting	5.54	5.46
Delta Effect of +1% Change in Rate of Salary Increase	5.34	4.77
Delta Effect of -1% Change in Rate of Salary Increase	(4.53)	(4.06)
Delta Effect of +1% Change in Rate of Employee Turnover	0.16	(0.21)
Delta Effect of -1% Change in Rate of Employee Turrover	(0.24)	0.21

The sensitivity analysis have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

The sensitivity analysis presented above may not be representative of the actual change in the projected benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the projected benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same method as applied in calculating the projected benefit obligation as recognised in the balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

Actuarial gains/losses are recognised in the period of occurrence under Other Comprehensive Income (OCI). All above reported figures of OCI are gross of taxation.

Salary escalation & attrition rate are in line with the industry practice considering promotion and demand and supply of the employees.

Maturity analysis of benefit payments is undiscounted cashflows considering future salary, attrition & death in respective year for members as mentioned above.

Average Expected Future Service represents Estimated Term of Post - Employment Benefit Obligation.

Value of asset is considered as fair value of plan asset for the period of reporting.

Notes forming part of Consolidated Financial Statements as at and for the year ended March 31, 2023

Qualitative disclosures

Characteristics of defined benefit plan

The Company has a defined benefit gratuity plan in India (funded). The company's defined benefit gratuity plan is a final salary plan for employees, which requires contributions to be made to a separately administered fund.

The fund is managed by a trust which is governed by the Board of Trustees. The Board of Trustees are responsible for the administration of the plan assets and for the definition of the investment strategy.

Risks associated with defined benefit plan

Gratuity is a defined benefit plan and company is exposed to the following risks:

Interest rate risk: A fall in the discount rate which is linked to the G.Sec. Rate will increase the present value of the liability requiring higher provision. A fall in the discount rate generally increases the mark to market value of the assets depending on the duration of asset.

Salary risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than assumed level will increase the plan's liability.

Investment risk: The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds. If the return on plan asset is below this rate, it will create a plan deficit. Currently, for the plan in India, it has a relatively balanced mix of investments in government securities, and other debt instruments.

Asset liability matching risk: The plan faces the ALM risk as to the matching cash flow. Since the plan is invested in lines of Rule 101 of Income Tax Rules, 1962, this generally reduces ALM risk.

Mortality risk: Since the benefits under the plan is not payable for life time and payable till retirement age only, plan does not have any longevity risk.

Characteristics of defined benefit plans

During the year, there were no plan amendments, curtailments and settlements.

A separate trust fund is created to manage the Gratuity plan.

Note: The above information is as provided by the Actuary, which has been relied upon by the auditors.

Note 37. Risk Managemer

The Group's activities expose It to market risk, liquidity risk and credit risk

Risk management is integral to the Group's strategy. An enterprise wide risk management framework is in place to govern the Group's risk management processes. A strong risk management team and an effective credit operations structure ensures that risks are properly identified and timely addressed to ensure minimal impact on the Group's growth and performance.

The Group has developed the necessary competency to identify early stress signals and has also defined processes, including corrective and remedial actions as regards people and processes, for mitigation to ensure minimum damage

A stress testing mechanism is put in place to carry out the event based sensitivity analysis and identify the accounts under stress due to expected market movement.

The Group's central treasury department identifies, evaluates and hedges financial risks in close co- operation with the Group's operating units. The Board provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments and investment of excess liquidity. The Group's Treasury is responsible for managing its assets and liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks of the Group. Risk management is integral to Group's strategy. The comprehensive understanding of risk management throughout the various levels of an organization sids in driving key decisions related to risk-return balance, capital allocation and product pricing. The Group operates under the guidance of the Board approved risk appetite statement that covers business composition, guidance around gross non-performing assets and net non-performing assets, leverage, funding and

Additionally, it is also ensured that appropriate focus is on managing risk proactively by ensuring business operations are in accordance with laid-down risk. A strong risk management team and an effective credit operations structure ensures that risks are properly identified and timely addressed, to ensure minimal impact on the Group's growth and performance.

Risk Management Structure

The Group has established multi-level risk governance for monitoring & control of product and entity level risks. The Board of Directors are responsible for the overall risk management approach and for approving the risk management strategies and principles. The Board has constituted the Risk Management Committee ("AMC") which is responsible for monitoring the overall risk process within the Group. The RMC is empowered to develop an independent risk strategy comprising of principles, frameworks, policies and limits and ensuring its effective implementation. Independent function of Risk management is in place headed by the Chief Risk Officer ("CRO") who reports to the Chief Executive Officer "CEO") with oversight of RMC of the Board. The Risk department primarily operationalises risk management framework approved by RMC.

The group has a well -defined risk framework constituting various lines of defence - the first line of defence, consisting of management, is responsible for seamless integration of risk principles across all businesses. Additionally, it ensures adequate managerial and supervisory controls to ensure compliance and highlight inadequate processes and unexpected events. The Group has well-defined internal control measures in every process

Independent risk and policy team constitutes second line of defence which is responsible for identification and assessment of entity-wide risks. Post its identification, it aims to mitigate risks either through portfolio trigger and caps (Credit risk) or through ongoing risk control and self assessment (Operational risk)

Internal Audit function is the third line of defence that independently reviews activities of the first two lines of defence and reports to the Audit Committee of the Board.

Risk Management Practice

The Group has developed the necessary competency to identify early stress signals and has also defined processes, including corrective and remedial actions as regards people and processes, for mitigation to ensure minimum damage. A stress testing mechanism is put in place to carry out the event based sensitivity analysis and identify the accounts under stress due to expected market movement, in event of susceptibility to external triggers, appropriate risk mitigation would be undertaken and thereby minimize the losses to the Group.

It has initiated a detailed portfolio quality review mechanism which enables analysis of portfolio along various behavioural, demographic and financial parameters. Additionally, through tie-ups with external bureaus, an analysis of collection performance coupled with continuous credit assessment for various key segments is undertaken. The practices aid in proactive course correction thereby modifying credit or sourcing mechanisms, if required. Additionally, application scorecard has been developed enabling the Group to standardize credit underwriting & Improve sourcing quality in the long run.

The Group's policy is to measure and monitor the overall risk-bearing capacity in relation to the aggregate risk exposure across all risk types and activities. Information pertaining to different type of risks are identified, analysed and tested on timely basis. The same is presented to Risk Management Committee at periodic intervals. in order to minimise any adverse effects on the financial performance of the Group, derivative financial instruments, such as cross currency interest rate swaps are entered to hedge certain foreign currency risk exposures and variable interest rate exposures. The Group's central tressury department identifies, evaluates and hedges financial risks in close co- operation with the Group's operating units. The Board provides written principles for overall risk management, as well as policies covering eschange risk, interest rate risk, use of derivative financial instruments and non-derivative financial instruments and investment of excess liquidity. The Group's Treasury is responsible for managing its vancial structure. It is also primarily responsible for the funding and liquidity risks of the Group. specific areas, such as fe sets and liabiliti

Notes forming part of Consolidated Financial Statements as at and for the year ended March 31, 2023

37A.1. Credit Risk

Credit risk refers to risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group.

Credit risk arises primarily from financial assets such as trade receivables, investments, derivative financial instruments, other balances with banks, loans and other

receivables.

Credit quality analysis

The following tables sets out information about the credit quality of financial assets measured at amortised cost. Unless specifically indicated, for financial assets, the amounts in the table represent gross carrying amounts.

Loans comprises of outstanding principal, interest accrued but not due and principal and interest overdue.

Financial Assets measured using simplified approach:

The Group follows 'simplified approach' for recognition of impairment loss allowance on Cash and Cash Equivalents, Bank Balances, Trade Receivables, other receivables and Other Financial Assets. The application of simplified approach does not require the Group to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime EGATHERCH reporting date, right from its initial recognition.

The above modification is in accordance with the provisions defined in the Master Direction Non-Banking Financial Company - Systemically Important Non-Deposit taking Company (Reserve Bank) Directions, 2016 Circular No DNBR.PD.008/03.10.119/2016-17 dated September 01, 2016 (updated as on February 22, 2019) and the "The Housing Finance Companies (NHB) Directions, 2010".

Notes forming part of Consolidated Financial Statements as at and for the year ended March 31, 2023 CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

37A.6. Credit Risk Grading of loans

Credit Risk Grading is an important tool for credit risk management as it helps in understanding and evaluating risks for different credit transactions.

The Group has established overall credit limits at the level of individual borrowers and counterparties, and groups of connected counterparties. It manages and controls credit risk by confining the amount of risk it is willing to accept for individual counterparties, for geographical concentrations, and by closely monitoring such exposures. The Group has a Credit Risk Policy which is board approved and shared with all credit approving authorities. All customers will be evaluated on a set of pre-defined parameters as detailed below and accordingly classified into any of the following categories:

- 1. Low Risk
- 2. Medium Risk

3. High Risk - This category of customers will not be actively sourced by the Group. Any customer, identified as High Risk, can be funded by the Group basis exceptional comfort and availability of justifying mitigates. The extent and nature of due diligence will be the highest for this category.

The assessment of a customer being classified into high, medium or low is based on various parameters at the time of on-boarding which are captured in the Credit Approval Memorandum by the credit manager and validated by the relevant approving authority. The parameters are as follows:

- Customer Profile
- Financial health
- **Business vintage**
- Credit history

Industry feedback

Other qualitative/ quantitative factors as mentioned in the policy 4 4 6 Every customer once being stamped into a risk category on a periodic basis would further be subjected to change of his risk profile depending on the repayment history and DPDs through an independent credit quality review process. This process aims to allow the Group to assess the potential loss as a result of the risks to which it is exposed and take corrective actions.

(K in crores) 42,597.30 813.14 972.19 2,090.11 2,176,95 39,694.04 33,735.61 Stage 1 Credit Grading details: March 31, 2023 March 31, 2022

37A.7. Concentration of Credit Risk

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions.

in order to avoid excessive concentrations of risk, the Group's policies and procedures include specific guidelines to focus on spreading its lending portfolio across various products/states/customer base with a cap on maximum limit of exposure for an individual/Group. Accordingly, the Group does not have concentration risk.

Notes forming part of Consolidated Financial Statements as at and for the year ended March 31, 2023

37B Liquidity Risk

securities and by having access to funding through an adequate amount of credit lines. Further, the Group has well defined Asset Liability Management (ALM) framework with an Liquidity risk refers to the risk that the Group may not be able to meet its short-term financial obligations. The Group manages liquidity risk by maintaining sufficient cash and marketable instruments to ensure liquidity. The Group seeks to maintain flexibility in funding mix by way of sourcing the funds through money markets, debt markets and banks to meet its business and appropriate organizational structure to regularly monitor and manage maturity profiles of financial assets and financial liabilities including debt financing plans, cash and cash equivalent liquidity requirements.

37C Market Risk

Market Risk is the risk that the value of on and off-balance sheet positions of a financial institution will be adversely affected by movements in market rates or prices such as interest rates, Financial institutions may be exposed to Market Risk in variety of ways. Market risk exposure may be explicit in portfolios of securities / equities and instruments that are actively traded. Conversely it may be implicit such as interest rate risk due to mismatch of loans and deposits. Besides, market risk may also arise from activities categorized as off-balance sheet item. Therefore market risk is potential for loss resulting from adverse movement in market risk factors such as interest rates, forex rates, equity and commodity prices. foreign exchange rates, equity prices, credit spreads and/or commodity prices resulting in a loss to earnings and capital.

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of Consolidated Financial Statements as at and for the year ended March 31, 2023

Stock Price: The closing market price on NSE one day prior to the date of grant has been considered for the purpose of Option valuation.

Volatility: The daily volatility of the stock prices on BSE, over a period prior to the date of grant, corresponding with the expected life of the Options has been considered to calculate the fair value.

Risk-free rate of return: The risk-free rate being considered for the calculation is the India Government Bond Generic Bid Yield with a maturity about equal to the expected life of the options.

Exercise Price: Price of each specific grant has been considered.

Time to Maturity: Time to Maturity / Expected Life of Options is the period for which the Company expects the Options to be live. The minimum life of a stock option is the minimum period before which the Options cannot be exercised and the maximum life is the period after which the Options cannot be exercised.

Expected dividend yield: Expected dividend yield has been calculated as an average of dividend yields for the three financial years preceding the date of the grant. The dividend yield for the year is derived by dividing the dividend per share by the average price per share of the respective period.

The Company has granted Employee Stock Options under IIFL Finance Employee Stock Option Plan 2020 – Merger Scheme pursuant to aforesaid Composite Scheme of Arrangement.

a) The details of various Employee Stock Option Schemes are as under:

Weight Average Value (₹)	1.00%	1.00%	1.00%			
the But Mende Auge LA	106.90	110.78	37.90			

Stock Price: The fair value of stock as on Appointed Date, i.e., April 1, 2018 ("the Effective date" or the "Date of Modification") has been used to value the outstanding grants based on Mercahnt Banker's Report.

Volatility: The daily volatility of the stock prices on BSE, based on post demerger traded prices, has been considered to calculate the fair value.

Risk-free rate of return: The risk-free rate being considered for the calculation is the India Government Bond Generic Bid Yield with a maturity about equal to the expected life of the options.

Exercise Price: Price of each specific grant has been considered based on equity swap ratio of the Composite Scheme of Arrangement.

Time to Maturity: Time to Maturity / Expected Life of Options is the period for which the Company expects the Options to be live. The minimum life of a stock option is the minimum period before which the Options cannot be exercised and the maximum life is the period after which the Options cannot be exercised.

Expected dividend yield: Expected dividend yield has been calculated as an average of dividend yields for the three financial years preceding the date of the grant. The dividend yield for the year is derived by dividing the dividend per share by the average price per share of the respective period.

CONSOLIDATED FINANCIAL STATEMENTS OF IIFL FINANCE LIMITED

Notes forming part of consolidated Financial Statements as at and for the year ended March 31, 2023

Note 43. Corporate Social Responsibility:

During the financial year 2022-23, the Group has spent ₹ 21.35 crore (P.Y. ₹ 12.74 crore) out of the total amount of ₹ 27.40 crore (P.Y. ₹ 18.77 crore) resulting into shortall of ₹ 6.05 crore (P.Y. ₹ 6.03 crore). The shorfall amount pertains towards the ongoing projects. The unspent amount has been transferred to a separate Bank account and will be spent during the FY 2023-24. The aforementioned amount has been contributed to India Infoline Foundation.

Note 44. Additional information pursuant to para 2 of general instructions for the preparations of Consolidated Financial Statements:

Note 45. Segment Reporting

The Group's primary business segments are reflected based on the principal business carried out, i.e. financing. All other activities of the Group revolve around the main business. The risk and returns of the business of the Group is not associated with geographical segmentation, hence there is no secondary segment reporting based on geographical segment. As such, there are no separate reportable segments as per the Indian Accounting Standard 108 on 'Segment Reporting'.

Note 46. Shared services

The Group operates from and uses the premises, infrastructure and other facilities and services as provided to it by its group companies, which are termed as 'Shared Services'. Hitherto, such shared services consisting of administrative and other revenue expenses paid for by the Group were identified and recovered/recoverable from them based on reasonable management estimates, which are constantly refined in the light of additional knowledge gained relevant to such estimation. These expenses are recovered on an actual basis and the estimates are used only where actual were difficult to determine.

Note 47. Previous year's figures are regrouped, reclassified and rearranged wherever considered necessary to confirm to current year's presentation.

INDEPENDENT AUDITOR'S REPORT

To the Members of IIFL Finance Limited

Report on the Audit of the Standalone Ind AS financial statements

Opinion

We have audited the standalone Ind AS financial statements of IIFL Finance Limited, which comprise Balance Sheet as at 31st March 2023, the Statement of Profit and Loss, Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2023, and its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Sr.no	Key Audit Matter	Response to Key Audit Matter		
1	Information technology (IT) systems used in financial reporting process.	We obtained an understanding of the Company's IT control environment relevant to the audit.		
	The company's operational and financial processes are dependent on IT systems due	We tested the design, implementation and operating effectiveness of the Company's		

Sr.no	Key Audit Matter	Response to Key Audit Matter		
	to large volume of transactions that are processed daily. We therefore identified IT systems and controls over financial reporting as a key audit matter for the Company.	General IT controls over the key IT systems which are critical to financial reporting. We also tested key automated and manual controls and logic for system generated reports relevant to the audit that would materially impact the financial statements. In addition to above, we have also relied on the work of the internal auditors and system auditors.		
2	Impairment of Financial Assets held at amortised cost:			
	Since the loans and advances form a major portion of the Company's assets, and due to the significance of the judgments used in classifying loans and advances into various stages as stipulated in Indian Accounting Standard (IND AS) 109 and the management estimation of the related impairment provisions, this is considered to be a key audit matter. The Company's impairment allowance is derived from estimates including the historical default and loss ratios. Management exercises judgement in determining the quantum of loss based on a range of factors. The most significant areas are: - Segmentation of loan book - Determination of exposure at default - Loan staging criteria - Calculation of probability of default / Loss given default - Consideration of probability weighted scenarios and forward looking macroeconomic factors The application of ECL model requires several data inputs. This increases the risk of completeness and accuracy of the data that has been used to create assumptions in the model.	We evaluated appropriateness of the impairment principles used by management based on the requirements of Ind AS 109 and our understanding of the business. We assessed the design and implementation of key Internal financial controls over loan impairment process used to calculate the impairment charge. We evaluated management's controls over collation of relevant information used for determining estimates for management overlays. We tested review controls over measurement of impairment allowances and disclosures in financial statements.		
	Refer Note 37A.3 to the Financial Statements.			

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report and Management Discussion and Analysis report but does not include the financial statements and our auditor's report thereon. The Director's report and Management Discussion and Analysis report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Director's report and Management Discussion and Analysis report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance as required under SA 720 'The Auditor's responsibilities Relating to Other Information'.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian accounting standards specified under Sec 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not
 detecting a material misstatement resulting from fraud is higher than for one resulting from error,
 as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override
 of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are
 also responsible for expressing our opinion on whether the Company has adequate internal
 financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting
 and, based on the audit evidence obtained, whether a material uncertainty exists related to events
 or conditions that may cast significant doubt on the Company's ability to continue as a going
 concern. If we conclude that a material uncertainty exists, we are required to draw attention in
 our auditor's report to the related disclosures in the financial statements or, if such disclosures are
 inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up
 to the date of our auditor's report. However, future events or conditions may cause the Company
 to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and
 events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

 As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

- 2. As required by Section 143(3) of the Act, we report that:
 - We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the financial statements.
 - In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c) The Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of changes in Equity and the Statement of Cash Flows dealt with by this Report are in agreement with the books of account maintained for the purpose or preparation of the financial statements.
 - In our opinion, the aforesaid financial statements comply with the Ind AS specified under section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
 - e) On the basis of the written representations received from the directors as on 31st March 2023, taken on record by the Board of Directors, none of the directors is disqualified as on 31st March 2023, from being appointed as a director in terms of Section 164(2) of the Act.
 - f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".
 - g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:
 - In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.
 - h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
 - The Company has disclosed the impact of pending litigations on its financial position in its financial statements- Refer Note No 38 of the financial statements.
 - The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts.
 - There has not been any delay in transferring amounts which requires to be transferred to the Investor Education and Protection Fund by the Company.
 - iv. (a) The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person or entity, including foreign entity ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
 - (b) The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entity ("Funding Parties"), with the understanding, whether

recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- (c) In our opinion and based on the audit procedures, we have considered reasonable and appropriate in the circumstances; nothing has come to our notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.
- The dividend declared or paid during the year by the Company is in compliance with section 123 of the Companies Act, 2013.
- vi. Proviso to Rule 3(1) of Companies (Accounts) Rule, 2014 for maintaining books of account using accounting software which has a feature of recording audit trail (edit log) facility is applicable to the Company with effect from April 1, 2023, and accordingly, reporting under Rule 11(g) of Companies (Audit and Auditors) Rules, 2014 is not applicable for the financial year ended 31st March 2023.

Annexure A to the Independent Auditor's Report

Annexure referred to in our report of even date to the members of IIFL Finance Limited on the accounts for the year ended 31st March 2023.

- 3(i)(a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment.
 - (B) The Company has maintained proper records showing full particulars of intangible assets.
 - (b) The Company has a program of verification of Property, Plant and Equipment to cover all the items at major locations in a phased manner over a period of three years which, in our opinion, is reasonable having regard to the size of the company and the nature of its assets. Based on the information and explanation given to us and on verification of the records of the Company, the physical verification was conducted during the financial year 2020-21 and no material discrepancies were observed on such verification.
 - (c) According to the information and explanations given to us and based on verification of records provided to us, we report that, the title deeds of all the immovable properties (other than properties where the company is the lessee and the lease agreements are duly executed in favour of the lessee) disclosed in the financial statements are held in the name of the company.
 - (d) The company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets or both during the year.
 - (e) As per the information and explanation provided to us no proceedings have been initiated or are pending against the company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (45 of 1988) and rules made thereunder.
- 3(ii) (a) The company does not have any inventory and hence reporting under clause 3(ii)(a) of the order is not applicable.
 - (b) The company has been sanctioned working capital limits in excess of five crore rupees, in aggregate from banks or financial institutions on the basis of security of current assets namely financial asset. Based on our verification, the quarterly statements filed by the company with such banks and financial institutions are in agreement with the books of account of the Company.
- 3(iii)(a) The company being a Non-Banking Finance Company, the provisions of clause 3(iii)(a) are not applicable to the company.
 - (b) According to the information and explanations given to us and based on the verification of the records and in our opinion the investments made, guarantees provided, security given and the terms and conditions of the grant of all loans and advances in nature of loans and guarantees provided are not prejudicial to the company's interest.
 - (c) The company being a Non-banking Finance company is in the business of granting loans and advances which are in the nature of loans. The schedule of repayment of principal and payment of interest has been stipulated and the repayments or receipts are regular except accounts which are overdue are classified as special mention accounts or non-performing assets as per RBI norms.
 - (d) The total amount overdue for more than ninety days is Rs. 43.78 crores with respect to 61,207 borrowers. Based on the information and explanations given to us and in our opinion reasonable steps have been taken by the company for recovery of principal and interest.

- (e) The company being a Non-Banking Finance Company, the provisions of clause 3(iii)(e) are not applicable to the company.
- (f) As per the information and explanation made available to us and in our opinion the company has not granted any loans or advances in the nature of loans either repayable on demand or without specifying any terms or period of repayment.
- 3(iv) The Company is a registered Non-Banking Finance Company to which the provisions of Sections 185 and 186 of the Companies Act, 2013, are not applicable, and hence reporting under clause (iv) of CARO 2020 is not applicable.
- 3(v) The Company has not accepted any deposits from the public, within the meaning of Section 73 to 76 or any other relevant provisions of the Act and Rules framed thereunder. We are informed that no order has been passed by the Company Law Board or National Company Law Tribunal or Reserve Bank of India or any court or other tribunal.
- 3(vi) The maintenance of cost records has not been specified by Central Government under Section 148(1) of the Companies Act, 2013 for the company.
- 3(vii) (a) According to the information and explanations given to us the Company is generally regular in depositing undisputed statutory dues including provident fund, employees state insurance, income tax, service tax, sales tax, value added tax, goods and services tax, cess and other statutory dues as applicable to the Company with the appropriate authorities. We are informed that the provisions of Sales Tax, Customs Duty and Excise Duty are not applicable to the Company.
 - There were no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income-tax, Goods and Services Tax, cess and other material statutory dues in arrears as at 31st March 2023, for a period of more than six months from the date they became payable.
 - (b) According to the information and explanations given to us and records of the Company examined by us, there are no cases of non-deposit of disputed dues of sales tax or duty of customs or duty of excise. According to the information and explanations given to us, the following dues of income tax, service tax and Goods and service tax have not been deposited by the Company on account of dispute as at 31st March, 2023.

Name of Statute			Nature of Forum where Dues Dispute is Pending		Period to which the Amount Relates	Amount Unpaid (Rs. in Crores)	Amount Deposited under protest (Rs. in Crores)

- 3(viii) As per the information and explanation provided to us and as represented to us, there were no transactions not recorded in the books of account which have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961.
- 3(ix)(a) According to the information and explanation given to us and based on our audit procedures, the Company has not defaulted in repayment of loans or borrowings or in the payment of interest thereon to any lender.
 - (b) According to the information and explanations provided to us, the company has not been declared as wilful defaulter by any bank or financial institution or other lender.
 - (c) According to the information and explanations and records provided to us the term loans were applied for the purpose for which the loans were obtained.
 - (d) According to the information and explanations provided to us, in our opinion the funds raised on short term basis have not been utilised for long term purposes.

- (e) According to the information and explanations provided to us and on examination of records, the company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
- (f) According to the information and explanations given to us, the company has not raised any loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies.
- 3(x) (a) According to the information and explanations given to us and in our opinion, money raised by way of initial public offer or further public offer (including debt instruments) have been applied by the Company during the year for the purposes for which they were raised.
 - (b) During the year the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partially or optionally convertible) during the year and hence reporting under clause (xiv) of CARO 2020 is not applicable to the Company. In case of shares issued to the employees under Employee Option scheme the requirements of section 62 or the companies act have been complied with and the funds raised have been used for the purposes for which funds were raised.
- 3(xi)(a) During the course of our examination of the books and records of the company carried out in accordance with generally accepted auditing practices in India and according to the information and explanations given to us, there have been instances of fraud on the company, during the course of business operation amounting to Rs.4.24 crores. No fraud by the company has been noticed or reported during the year. We have not been informed of any such case by the management.
 - (b) No report under sub-section (12) of section 143 of the Companies Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.
 - (c) We have taken into consideration the whistle blower complaints received by the Company during the year, while determining the nature, timing, and extent of our audit procedures.
- 3(xii) The Company is not a Nidhi Company and hence reporting under clause (xii) of the Order is not applicable.
- 3(xiii) According to the information and explanations given to us and in our opinion, all the transactions with the related parties are in compliance with sections 177 and 188 of Companies Act where applicable and the details have been disclosed in the Financial Statements etc., as required by the applicable accounting standards.
- 3(xiv)(a) In our opinion the Company has an adequate internal audit system commensurate with the size and the nature of its business.
 - (b) We have considered, the internal audit reports for the year under audit, issued to the Company during the year and till date, in determining the nature, timing and extent of our audit procedures.
- 3(xv) In our opinion and according to the information and explanations given to us, during the year the Company has not entered into any non-cash transactions with its directors or directors of its holding or subsidiary companies or persons connected with them and hence provisions of section 192 of the Companies Act, 2013 are not applicable.
- 3(xvi)(a) The Company is required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 and it has obtained the registration.

- (b) The company has carried on the business of Non- Banking Financial activities with valid Certificate of Registration (CoR) obtained from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.
- (c) The company is a not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India and accordingly reporting under clause 3(xvi)(c) of the Order is not applicable.
- (d) In our opinion, there is no core investment company within the Group (as defined in the Core Investment Companies (Reserve Bank) Directions, 2016) and accordingly reporting under clause 3(xvi)(d) of the Order is not applicable.
- 3(xvii) The Company has not incurred cash losses during the financial year covered by our audit and the immediately preceding financial year.
- 3(xviii) There has been no resignation of the statutory auditors of the Company during the year.
- On the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities and our knowledge of the Board of Directors and Management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- 3(xx) According to the information and explanations given to us, there is no unspent amount under subsection (5) of section 135 of the Act pursuant to any project. Accordingly, reporting under clause 3(xx)(a) and (b) of the Order is not applicable for the year.

Annexure referred to in our report of even date to the members of IIFL Finance Limited on the standalone accounts for the year ended 31st March 2023

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of IIFL Finance Limited ("the Company") as of 31st March 2023, in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and

dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
